## IMPORTANT NOTICES

### Distribution of Securities

Securities may be issued on a continuing basis to CGML, Citigroup Global Markets Europe AG and/or any additional dealer appointed under the Programme (each a **"Dealer"** and together the **"Dealers"**). In relation to each issue of Securities, any Dealer will be specified in the applicable Final Terms (as defined below). However, each Issuer reserves the right to sell Securities directly on its own behalf to other entities and to offer Securities in specified jurisdictions directly to the public through distributors, in accordance with all applicable rules and regulations. The Securities may be offered and sold on a private placement basis, in accordance with all applicable rules and regulations.

Pursuant to this Base Prospectus, Securities may be issued whose return (in respect of any interest payable on such Securities and/or their redemption amount) is linked to one or more security indices (**"Security Index Linked Securities"**) or one or more inflation indices (**"Inflation Index Linked Securities"**) or one or more commodities (**"Commodity Linked Securities"**) or one or more shares (**"Share Linked Securities"**) or one or more depositary receipts (**"Depositary Receipt Linked Securities"**) or one or more exchange traded fund (**"ETF"**) shares (**"ETF Linked Securities"**) or one or more mutual funds (**"Mutual Fund Linked Securities"**) or one or more currency exchange rates (**"FX Rate Linked Securities"**) or one or more Dividend Futures Contracts (**"Dividend Futures Contract Linked Securities"**) or one or more interest rates (**"Interest Rate Linked Securities"**) or the credit of one or more specified entities (**"Credit Linked Securities"**) each a **"Security"** and together **"Structured Securities"**, as more fully described in this Base Prospectus.

Securities may provide that settlement will be by way of cash settlement (**"Cash Settled Securities"**) or physical delivery (**"Physical Delivery Securities"**) as provided in the Valuation and Settlement Schedule and the applicable Final Terms.

**Benchmarks Regulation statement in relation to administrator's registration** – Amounts payable or assets deliverable under the Securities may be calculated by reference to one or more "benchmarks" for the purposes of Regulation (EU) No. 2016/1011 (the **"Benchmarks Regulation"**). In this case the applicable Final Terms will indicate whether or not the benchmark is provided by an administrator included in the register of administrators and benchmarks established and maintained by the European Securities and Markets Authority (the **"ESMA"**) pursuant to Article 36 of the Benchmarks Regulation. Transitional provisions in the Benchmarks Regulation may apply such that the administrator of a particular "benchmark" is not required to be included in the register of administrators and benchmarks at the date of the applicable Final Terms.

Prospective investors should note that the Events of Default in respect of the CGMHI Guarantor are limited to the events stated in General Conditions 7(a)(i) and 7(a)(ii) (*Events of Default*) relating to default in payment of principal or interest in respect of the Securities but will not include the insolvency or bankruptcy of the CGMHI Guarantor (or any similar event), any other default of the CGMHI Guarantor or the deed of guarantee dated 21 December 2015, as amended and/or supplemented and/or replaced from time to time (the **"CGMHI Deed of Guarantee"**) executed by the CGMHI Guarantor and not being (or being claimed not to be) in full force and effect. Therefore, even though the CGMHI Guarantor may be declared insolvent or have entered into bankruptcy proceedings or disclaimed the CGMHI Deed of Guarantee, holders of Securities issued by CGMHI will not be able to trigger an Event of Default under the Securities and thus will not be able to cause the Securities to be immediately due and payable, and the Securities will not redeem until maturity (unless there has been an Event of Default due to non-payment of interest or principal or bankruptcy or other default of CGMHI in the meantime). It is possible that holders may receive a lower return

at maturity than if they were able to accelerate the Securities for immediate repayment in such circumstances.

## **MIFID II PRODUCT GOVERNANCE / TARGET MARKET**

The Final Terms in respect of any Securities may include a legend entitled "*MiFID II Product Governance*" which will outline the target market assessment in respect of the Securities and which channels for distribution of the Securities are appropriate. Any person subsequently offering, selling or recommending the Securities (a "**distributor**") should take into consideration the target market assessment; however, a distributor subject to Directive 2014/65/EU (as amended, "**MiFID II**") is responsible for undertaking its own target market assessment in respect of the Securities (by either adopting or refining the target market assessment) and determining appropriate distribution channels.

A determination will be made in relation to each issue about whether, for the purpose of the MiFID Product Governance rules under EU Delegated Directive 2017/593 (the "**MiFID Product Governance Rules**"), any Dealer subscribing for any Securities is a manufacturer in respect of such Securities, but otherwise neither the Arranger nor the Dealers nor any of their respective affiliates will be a manufacturer for the purpose of the MiFID Product Governance Rules.

## **UK MIFIR PRODUCT GOVERNANCE / TARGET MARKET**

The Final Terms in respect of any Securities may include a legend entitled "*UK MiFIR Product Governance*" which will outline the target market assessment in respect of the Securities and which channels for distribution of the Securities are appropriate. Any person subsequently offering, selling or recommending the Securities (a "**distributor**") should take into consideration the target market assessment; however, a distributor subject to the *Financial Conduct Authority* ("**FCA**") Handbook Product Intervention and Product Governance Sourcebook (the "**UK MiFIR Product Governance Rules**") is responsible for undertaking its own target market assessment in respect of the Securities (by either adopting or refining the target market assessment) and determining appropriate distribution channels.

A determination will be made in relation to each issue about whether, for the purpose of the UK MiFIR Product Governance Rules, any Dealer subscribing for any Securities is a manufacturer in respect of such Securities, but otherwise neither the Arranger nor the Dealers nor any of their respective affiliates will be a manufacturer for the purpose of the UK MIFIR Product Governance Rules.

## **PRIIPS REGULATION / EEA RETAIL INVESTORS**

If the Final Terms in respect of any Securities include a legend entitled "*Prohibition of Sales to EEA Retail Investors*", the Securities are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area ("**EEA**"). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of MiFID II; or (ii) a customer within the meaning of Directive 2016/97/EU as amended (the "**Insurance Distribution Directive**"), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in the Prospectus Regulation. Where such a Prohibition of Sales to EEA Retail Investors is included in the Final Terms, no key information document required by Regulation (EU) No 1286/2014 (as amended, the "**PRIIPs Regulation**") for offering or selling the Securities or otherwise making them available to retail investors in the EEA

has been prepared and therefore offering or selling such Securities or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

## **UK PRIIPS REGULATION / UK RETAIL INVESTORS**

If the Final Terms in respect of any Securities include a legend entitled "*Prohibition of Sales to UK Retail Investors*", the Securities are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the United Kingdom ("**UK**"). For the purposes of this provision the expression "retail investor" means a person who is one (or more) of the following: (i) a retail client, as defined in point (8) of Article 2 of Regulation (EU) No 2017/565 as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018 ("**EUWA**"); or (ii) a customer within the meaning of the provisions of the Financial Services and Markets Act 2000 (the "**FSMA**") and any rules or regulations made under the FSMA to implement Directive (EU) 2016/97, where that customer would not qualify as a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the EUWA; or (iii) not a qualified investor as defined in Article 2 of the Prospectus Regulation as it forms part of domestic law by virtue of the EUWA. Where such a Prohibition of Sales to UK Retail Investors is included in the Final Terms, no key information document required by Regulation (EU) No 1286/2014 as it forms part of domestic law by virtue of the EUWA (the "**UK PRIIPs Regulation**") for offering or selling the Securities or otherwise making them available to retail investors in the UK has been prepared and therefore offering or selling the Securities or otherwise making them available to any retail investor in the UK may be unlawful under the UK PRIIPs Regulation.

### *Approval by the Commission de Surveillance du Secteur Financier*

In particular, unless specifically indicated to the contrary in the applicable Final Terms, no action has been taken by CGMHI, CGMFL, the CGMHI Guarantor, the CGMFL Guarantor or the Dealers which is intended to permit a public offering of any Securities or distribution of this Base Prospectus in any jurisdiction where action for that purpose is required. Accordingly, no Securities may be offered or sold, directly or indirectly, and neither this Base Prospectus nor any advertisement or other offering material may be distributed or published in any jurisdiction, except under circumstances that will result in compliance with any applicable laws and regulations. Persons into whose possession this Base Prospectus or any Securities may come must inform themselves about, and observe, any such restrictions on the distribution of this Base Prospectus and the offering and sale of Securities. However, save as provided in the Terms and Conditions of the Securities (including any costs, taxes, duties and/or expenses relating to the purchase, exercise and/or redemption of the Securities), the Terms and Conditions of the Securities are such that, in absence of error or overpayment by the Issuer, no payment is expected from Securityholders other than the Issue Price.

The applicable terms of any Security will be agreed between the relevant Issuer and, where applicable, the relevant Dealer prior to the issue of the Securities and will be set out in the terms and conditions of the Securities which shall mean the "*Terms and Conditions of the Securities*", as completed by Part A of the applicable Final Terms.

### ***Information on the components of the Base Prospectus***

#### ***The Base Prospectus and its components***

This Base Prospectus is a base prospectus pursuant to Article 8 of the Prospectus Regulation. The Base Prospectus must be read in conjunction with any supplements and all information incorporated by reference into this Base Prospectus and the applicable Final Terms. Those documents form an integral part of the Base Prospectus and reflect the status as of their respective dates.

For detailed information on the issuance of the Securities please see "*Section F.1 – General Information Relating To The Issue Of Securities Under This Base Prospectus*" and, in particular, the subsection "*3. Information concerning the Securities*".

#### ***Final terms, supplements to the prospectus and successor prospectuses***

##### **Final terms**

If Securities are offered to the public and/or admitted to trading on a regulated market on the basis of this Base Prospectus, applicable Final Terms will be prepared for such Securities. The applicable Final Terms contain all information specific to the Securities, which is only determined at the time of the individual issue and which is required for the public offer and/or admission to trading on a regulated market. The applicable information is selected in the Final Terms either by reference to the Base Prospectus or by repeating the relevant information in the Final Terms or by inserting the relevant Securities-specific information in the Final Terms.

After the expiry of the validity of this Base Prospectus, an offer can be maintained on the basis of a successor base prospectus in accordance with Article 8 (11) of the Prospectus Regulation. The Final Terms will then state that the offer can be maintained under a successor prospectus and how the successor prospectus will be published.

##### **Supplements to the Base Prospectus**

If this Base Prospectus is supplemented at a later date in accordance with the provisions of Article 23 of the Prospectus Regulation, it shall apply from the date of publication of the respective supplement in the supplemented version. Previous statements are either incorporated by reference or amended or replaced by the statements contained in the supplement. These statements shall be deemed to form part of the Base Prospectus from this point in time in the correspondingly amended or replaced version. In the event of the publication of a supplement, the investor may have a right of withdrawal in accordance with Article 23 of the Prospectus Regulation. The supplements are published and made available in the same way as the prospectus (see "*Section D.4 – Supplements to the CGMHI Base Prospectus or the CGMFL Base Prospectus*").

### ***Information incorporated by reference into the Base Prospectus***

Information from other documents is incorporated by reference into this Base Prospectus in accordance with Article 19 Prospectus Regulation.

### ***Significance of the Final Terms for the specific product***

If Securities are offered to the public and/or admitted to trading on a regulated market on the basis of this Base Prospectus, applicable Final Terms will be prepared for such Securities. The applicable Final Terms contain all information specific to the Securities, which is only determined at the time of the individual issue and which is required for the public offer and/or admission to trading on a regulated market. The Final Terms are therefore of central importance for the respective issue.

The specific product that an investor acquires is set out in the applicable Final Terms. In order to have complete information for the assessment of the relevant Securities, including the type of offer and/or possible admission to trading, for example on the regulated market or multilateral trading facility, and the risks associated with them (see "*Section B – Risk Factors*"), investors must read the Base Prospectus including all its components and in particular the relevant Final Terms of the specific Securities. A "Form of Final Terms" is contained in "*Section G.3 – Form of Final Terms*".

The "Form of Final Terms" includes the following sections:

- *PART A – Terms and Conditions* which sets out the selections applicable to the terms and conditions of the relevant Securities. Part A is structured in the following subsections:
  - *General Provisions applicable to the Securities*
  - *Underlying Provisions applicable to the Securities*
  - *Payoff Provisions applicable to the Securities*
- *PART B – Other Information* which contains further information that is of material importance in connection with the public offer and/or the admission of the security to trading.

In the case of issues for retail investors pursuant to the Prospectus Regulation, the issue-specific summary is also included at the end of the Final Terms.

As an annex to the Final Terms, the consolidated terms and conditions as they apply to the relevant product are also included for information purposes. The annex does not form part of the Final Terms for the purposes of the Prospectus Regulation.

### ***PART A – Terms and Conditions***

#### ***General Provisions applicable to the Securities***

This section of the Final Terms provides the selections for the general information applicable to the Securities, such as the Issuer, the Guarantor, the series number, the tranche number, the type of Security, the trading method, the currency of the Securities, the aggregate principal amount or

number of the Securities, the denomination, the calculation amount, the issue date and the scheduled maturity date.

#### *Underlying Provisions applicable to the Securities*

If the Securities are linked to an underlying, the section "*Underlying Provisions applicable to the Securities*" provides the information on the underlying (or underlyings) which applies to the Securities and the selections specific to the underlying and its classification. It also specifies the underlying linked conditions applicable to the Securities, including, for example, which Additional Disruption Event(s), Additional Adjustment Event(s) or Additional Early Redemption Event(s) apply. These events are specific to a certain type of underlying, if it is applicable to the specific Securities.

The so-called U-tables ("*Table U-I*" to "*Table U-II*") provide information specific to the underlying(s) of the Securities, such as, for example, on which exchange an underlying share is traded or which electronic page shows the level of an underlying security index.

#### *Payoff Provisions applicable to the Securities*

The section "*Payoff Provisions applicable to the Securities*" provides the information on the payout of the Securities, being interest and/or redemption. The section follows the order of the conditions in the Valuation and Settlement Schedule.

The first subsection on definitions (Clause 1.1 of the Valuation and Settlement Schedule) will specify which definitions are applicable to the relevant Securities, including (i) general definitions such as the relevant dates, such as for example, interest payment dates or mandatory early redemption dates, (ii) definitions relating to the interest underlying(s), the determination of whether interest is due and the interest amount, (iii) definitions relating to mandatory early redemption, and (iv) definitions relating to redemption, the redemption underlying(s) and the determination of the redemption amount due or assets deliverable on the maturity date.

The second subsection sets out which features are applicable to the Securities, such as an interest barrier event (Clause 1.2 of the Valuation and Settlement Schedule), mandatory early redemption (Clause 1.3 of the Valuation and Settlement Schedule), a redemption barrier and whether a redemption amount or an entitlement is applicable (Clause 1.4 of the Valuation and Settlement Schedule) and the so called issuer call, i.e., redemption at the option of the Issuer (Clause 1.5 of the Valuation and Settlement Schedule).

The third subsection specifies the adjustment and disruption provisions applicable to the Securities generally, irrespective of the type of underlying applicable (Clause 2 of the Valuation and Settlement Schedule).

The fourth subsection specifies the applicable selections in respect of the determination of the interest payable, if any (Clause 3 of the Valuation and Settlement Schedule).

The fifth subsection specifies the determination for Securities which provide for physical delivery of an underlying as part of the redemption, the so-called entitlement (Clause 4 of the Valuation and Settlement Schedule).

The sixth subsection specifies the applicable selections in respect of Securities which have two currencies, such as, for example, Securities which are denominated in one currency and pay interest in another currency (Clause 5 of the Valuation and Settlement Schedule).

The seventh subsection specifies the fallback provisions for a reference rate. These are applicable for Securities which are linked to a reference rate (Clause 6 of the Valuation and Settlement Schedule).

The eighth subsection specifies the fallback provisions for a Benchmark, such as the Administrator/Benchmark Event (Clauses 7 and 8 of the Valuation and Settlement Schedule).

The "*Payoff Provisions applicable to the Securities*" also include four tables ("*Table 1*" to "*Table 4*"), if applicable, which include important definitions in table format:

- TABLE 1: Definitions relating to Interest
- TABLE 2: Definitions relating to Mandatory Early Redemption
- TABLE 3: Definitions relating to Redemption
- TABLE 4: Definitions relating to the Payoff Provisions

#### *PART B – Other Information*

Part B of the Final Terms contains further information that is of material importance in connection with the public offer and/or the admission of the security to trading, e.g., on the regulated market, the regulated unofficial market (*Freiverkehr*) or a multilateral trading facility. This information includes, for example, (i) where an application for admission to trading of the Securities will be made, (ii) the ratings of the Securities, if any, (iii) the interests of natural and legal persons involved in the issue/offer, (iv) the reasons for the offer, (v) the estimated net proceeds and total expenses, (vi) the yield (in the case of Securities which are fixed rate securities), (vii) information about the past and future performance and volatility of the underlying(s) and/or the floating rate of interest, if applicable, (viii) information on the EU benchmark regulation, (ix) disclaimers specific to the underlying of the Securities, (x) operational information, such as the ISIN code of the Securities, (xi) information on the distribution and the terms the offer, and (xii) considerations on the tax treatment of the Securities in the United States. In the case of Credit Linked Securities, Part B also includes additional information on the reference entity to the credit of which the Securities are linked.

#### *Issue-Specific Summary*

In the case of issues for retail investors pursuant to the Prospectus Regulation, the issue-specific summary is also included at the end of the Final Terms.

#### *Annex: Consolidated Terms*

As an annex to the Final Terms the consolidated terms and conditions as they apply to the relevant product are included for information purposes. The annex does not form part of the Final Terms for the purposes of the Prospectus Regulation.

The annex gives the investors only the terms and condition which are relevant to their product. This helps an investor to consider the terms and condition of the Securities in addition to the applicable Terms and Conditions as set out in "*PART A – Terms and Conditions*" of the Final Terms.

### **Introduction to Interest and Redemption of the Securities**

The Securities provide for different interest profiles and interest payments (if any) may be linked to certain interest underlyings or other conditions for payment. Payment of any redemption amount depends on the applicable redemption profile of the Securities. The Securities may redeem at maturity or extraordinarily prior to maturity. In the case of Securities linked to the credit of one or more specified entities, the redemption at maturity may be extended in certain circumstances.

The Securities may be linked to a single or various underlyings or a combination of underlyings in a worst-of basket or a best-of basket.

Formulae for determining amounts due or assets deliverable under the Securities may be subject to one or a combination of features, such as, for example, a barrier event, accrual or mandatory early redemption. In such circumstances, the relevant calculation will not be made only by reference to the performance of one or more underlying and the application of such features may result in the calculation being subject to a minimum and/or maximum amount or otherwise increasing or decreasing the amount that would otherwise have been calculated had no such feature(s) been applicable.

For detailed information on the interest profiles, redemption profiles and features relating to the interest or redemption of the Securities please see "*Section F.1 – General Information Relating To The Issue Of Securities Under This Base Prospectus*" and, in particular, the subsection "*5. Interest and Redemption of the Securities*" and, in respect of Securities linked to the credit of one or more specified entities, additionally also the subsection "*6. Credit Linked Securities*". For a general overview on Securities linked to Credit, please see the subsection "*6. Introduction to Credit Linked Securities*" of "*Section C – Investment Considerations*".

Each prospective investor is therefore advised to consult his or her own financial, tax or legal advisers or other appropriate advisers as to the risks involved in buying, holding or selling the Securities (including the implications of the law of the country in which the prospective investor resides). If a potential investor in the Securities wishes to acquire the Securities in a capacity as trustee for a third party, particular attention should be paid to the circumstances of the person for whose account the Securities are to be acquired.*

*In purchasing Securities, investors assume the risk that the relevant Issuer and, where CGMHI is the Issuer, the CGMHI Guarantor or, where CGMFL is the Issuer, the CGMFL Guarantor may become insolvent or otherwise be unable to satisfy their obligations in respect of the Securities. There is a wide range of factors which individually or together could result in the relevant Issuer and, where CGMHI is the Issuer, the CGMHI Guarantor or, where CGMFL is the Issuer, the CGMFL Guarantor becoming unable to satisfy their obligations in respect of the Securities. It is not possible to identify all such factors, as the relevant Issuer and, where CGMHI is the Issuer, the CGMHI Guarantor or, where CGMFL is the Issuer, the CGMFL Guarantor may not be aware of all relevant factors and certain factors which they currently deem not to be material may become material as a result of the occurrence of events outside the relevant Issuer's and, where CGMHI is the Issuer, the CGMHI Guarantor's or, where CGMFL is the Issuer, the CGMFL Guarantor's control. The relevant Issuer and, where CGMHI is the Issuer, the CGMHI Guarantor or, where*

*CGMFL is the Issuer; the CGMFL Guarantor have identified in this Base Prospectus a number of factors which could materially adversely affect their businesses and ability to make payments due under, or to deliver assets on or in connection with, the Securities.*

*Each of the risks highlighted below could adversely affect the trading price of the Securities and, as a result, investors could lose some or all of their investment.*

*Prospective investors must read the detailed information set out elsewhere in this Base Prospectus including any documents incorporated by reference in it and reach their own views prior to making any investment decision.*

**INVESTORS MAY LOSE THEIR ENTIRE INVESTMENT OR PART OF IT AS THE CASE MAY BE. EACH OF THE ISSUERS DOES NOT REPRESENT THAT THE LIST BELOW IS COMPREHENSIVE. PROSPECTIVE INVESTORS SHOULD READ THE BASE PROSPECTUS IN ITS ENTIRETY AND FORM THEIR OWN CONCLUSIONS REGARDING THE RELEVANT ISSUER.**

Set out below are certain risk factors which could have a material adverse effect on the business, operations, financial condition or prospects of CGMHI, CGMFL, the CGMHI Guarantor and/or the CGMFL Guarantor and cause one or more of CGMHI's, CGMFL's, the CGMHI Guarantor's and/or the CGMFL Guarantor's future results to be materially different from expected results. CGMHI's, CGMFL's, the CGMHI Guarantor's and/or the CGMFL Guarantor's results could also be affected by competition and other factors. The factors discussed below should not be regarded as a complete and comprehensive statement of all potential risks and uncertainties CGMHI's, CGMFL's, the CGMHI Guarantor's and the CGMFL Guarantor's businesses face. Each of CGMHI, CGMFL, the CGMHI Guarantor and the CGMFL Guarantor have described only those risks relating to its operations that they consider to be material. There may be additional risks that CGMHI, CGMFL, the CGMHI Guarantor and/or the CGMFL Guarantor currently considers not to be material or of which they are not currently aware, and any of these risks could have the effects set forth above. Investors should note that they bear the relevant Issuer's, the CGMHI Guarantor's (where the Issuer is CGMHI) and the CGMFL Guarantor's (where the Issuer is CGMFL) solvency risk.

## **2 Operational risks relating to CGMHI, CGMHI Guarantor, CGMFL and the CGMFL Guarantor**

*The ability of each of CGMHI, the CGMHI Guarantor and the CGMFL Guarantor to fulfil its obligations under the Securities issued by CGMHI or CGMFL, as the case may be, is dependent on the earnings of Citigroup Inc.'s subsidiaries*

CGMHI is a holding company that does not engage in any material amount of business activities that generate revenues. CGMHI services its obligations primarily with dividends and advances from its subsidiaries. Its subsidiaries that operate in the securities businesses can only pay dividends if they are in compliance with applicable regulatory requirements imposed on them by federal and state regulatory authorities. Its respective subsidiaries may also be subject to credit agreements that also may restrict their ability to pay dividends. If such subsidiaries do not realise sufficient earnings to satisfy applicable regulatory requirements, or if such requirements are changed to further restrict the ability of such subsidiaries to pay dividends to CGMHI, CGMHI's ability to fulfil its obligations under the Securities issued by it may be adversely affected and consequently the value of and return on such Securities may also be adversely affected.

In addition, Citigroup Inc. (as the CGMHI Guarantor) is a holding company that does not engage in any material amount of business activities that generate revenues. It services its obligations primarily with dividends and advances from its subsidiaries. The ability of such subsidiaries to pay dividends or advances are dependent on a number of factors. For example, certain of Citigroup Inc.'s subsidiaries have co-branding and private label credit card relationships with various retailers and merchants through Group-branded cards and retail services credit card businesses. The five largest of these relationships constituted an aggregate of approximately 10 per cent. of the revenues of Citigroup Inc. and its subsidiaries (together the "**Group**") for 2022. These relationships could be negatively impacted by, among other things, the general economic environment, declining sales and revenues or other operational difficulties of the retailer or merchant, termination due to a breach by a Group entity or by the retailer or merchant, or other factors, including bankruptcies, liquidations, restructurings, consolidations and other similar events that would restrict the ability of the subsidiaries of Citigroup Inc. to pay dividends.

Moreover, Citigroup Inc.'s subsidiaries that operate in the banking, insurance and securities businesses can only pay dividends if they are in compliance with applicable regulatory requirements imposed on them by federal and state regulatory authorities. Respective subsidiaries may also be subject to credit agreements that also may restrict their ability to pay dividends. If such subsidiaries do not realise sufficient earnings to satisfy applicable regulatory requirements, or if such requirements are changed to further restrict the ability of such subsidiaries to pay dividends to Citigroup Inc., Citigroup Inc.'s ability to fulfil its obligations under the CGMHI Deed of Guarantee may be adversely affected and consequently the value of and return on the Securities issued by CGMHI may also be adversely affected.

The subsidiaries of CGMHI and Citigroup Inc. are also exposed to concentrations of risk, particularly credit and market risk, as they routinely execute a high volume of securities, trading, derivative and foreign exchange transactions with non-U.S. sovereigns and with counterparties in the financial services industry. As regulatory or market developments continue to lead to increased centralisation of trading activities, these subsidiaries could also experience an increase in concentration of risk to these industries. These concentrations of risk could limit the effectiveness of any hedging strategies and cause the subsidiaries to incur significant losses, impacting their ability to pay dividends.

Further, such dividends and/or advances, whether to CGMHI or Citigroup Inc. (or both), may be affected by macroeconomic, geopolitical and other challenges, uncertainties and volatilities and the presence of certain subsidiaries in emerging markets. For example, numerous uncertainties have arisen in relation to the potential impact of the UK's exit from the European Union and the U.S. federal government's indication that it may pursue protectionist trade and other policies. These and other global macroeconomic and geopolitical challenges have negatively impacted, and could continue to negatively impact, the businesses of CGMHI and/or Citigroup Inc.'s subsidiaries. The presence of certain subsidiaries in emerging markets subjects them to a number of risks, including sovereign volatility, foreign exchange controls and sanctions, and also increases their compliance and regulatory risks and costs. As a result, the dividends and/or advances subsidiaries are able to pay may be impacted which could have a negative effect on the ability of CGMHI or Citigroup Inc. to fulfil its obligations under the Securities and consequently the value of and return on such Securities may also be adversely affected.

***The ability of CGMFL to fulfil its obligations under the Securities issued by it is dependent on the CGMFL Guarantor performing its counterparty obligations owed to CGMFL***

CGMFL is subject to intra-group credit risk. From time to time, CGMFL enters into derivative transactions with the CGMFL Guarantor to offset or hedge its liabilities to securityholders under securities issued by it (which may include the Securities). As such, CGMFL is exposed to the credit risk of the CGMFL Guarantor in the form of counterparty risk in respect of such derivative transactions. In particular, CGMFL's ability to fulfil its obligations under the Securities is primarily dependent on the CGMFL Guarantor performing its counterparty obligations owed to CGMFL in respect of such derivative transactions in a timely manner, and any failure by the CGMFL Guarantor to do so will negatively affect the ability of CGMFL to fulfil its obligations under the Securities. Securityholders will not have any recourse to the CGMFL Guarantor under any such derivative transactions.

### **3 Regulatory risks relating to CGMHI, CGMHI Guarantor, CGMFL and the CGMFL Guarantor**

***The inclusion of contractual stay provisions in the terms and conditions of the Securities could materially adversely affect the rights of Securityholders in a resolution scenario***

In the autumn of 2017 the Board of Governors of the Federal Reserve System, the Federal Deposit Insurance Corporation and the Office of the Comptroller of the Currency issued rules ("QFC Stay Rules") designed to improve the resolvability and resilience of U.S. global systemically important banking organizations ("G-SIBs") and the U.S. operations of foreign G-SIBs, by mitigating the risk of destabilizing closeouts of qualified financial contracts ("QFCs") in resolution. Citigroup Inc. and its subsidiaries, including CGMHI, CGMFL and the CGMFL Guarantor, are "covered entities" subject to the QFC Stay Rules. Certain of the Securities (such Securities, "Covered Instruments"), the CGMHI Deed of Guarantee and the CGMFL Deeds of Guarantee – to the extent the guarantee relates to Covered Instruments – may qualify as QFCs.

The QFC Stay Rules seek to eliminate impediments to the orderly resolution of a G-SIB both in a scenario where resolution proceedings are instituted by the U.S. regulatory authorities under the Federal Deposit Insurance Act or the Orderly Liquidation Authority under Title II of the Dodd Frank Act ("**OLA**") (together, the "**U.S. Special Resolution Regimes**") as well as in a scenario where the G-SIB is resolved under ordinary insolvency proceedings. To achieve this, the QFC Stay Rules require covered entities (such as CGMHI, CGMFL, the CGMHI Guarantor and the CGMFL Guarantor) to ensure that their QFCs subject to the QFC Stay Rules (including any Securities which are Covered Instruments) (i) contain an express contractual recognition of the statutory stay-and-transfer provisions of the U.S. Special Resolution Regimes and (ii) do not contain cross-default rights against the covered entity based on an affiliate becoming subject to any type of insolvency proceeding or restrictions on the transfer of any related credit enhancements (including a guarantee) issued by an affiliate of the covered entity following the affiliate's entry into insolvency proceedings.

To address these requirements, the terms and conditions of the Securities contain an express contractual recognition that, in the event any of the relevant Issuer, the CGMHI Guarantor and the CGMFL Guarantor becomes subject to a proceeding under a U.S. Special Resolution Regime, the transfer of Securities which are Covered Instruments and (in relation to Covered Instruments) the CGMHI Deed of Guarantee and the CGMFL Deeds of Guarantee (and the transfer of any interest and obligation in or under such Covered Instruments, the CGMHI Deed of Guarantee or the CGMFL Deeds of Guarantee) from the relevant Issuer, the CGMHI Guarantor or the CGMFL Guarantor, as applicable, will be effective to the same extent as the transfer would be effective under such U.S. Special Resolution Regime. In addition, the terms and conditions of the Securities contain an express contractual recognition that, in the event any of the relevant Issuer, the CGMHI Guarantor, the CGMFL Guarantor or any of their affiliates becomes subject to a proceeding under a U.S. Special Resolution Regime, default rights against the relevant Issuer, the CGMHI Guarantor or the CGMFL Guarantor with respect to the Covered Instruments, the CGMHI Deed of Guarantee or the CGMFL Deeds of Guarantee are permitted to be exercised to no greater extent than they could be exercised under such U.S. Special Resolution Regime. For these purposes, "default rights" include the right to terminate, liquidate or accelerate a QFC or demand payment or delivery thereunder. See General Condition 18 (*Acknowledgement of the United States Special Resolution Regimes*).

Each of Citigroup Inc., as a U.S. entity incorporated in Delaware, and CGMHI, as a U.S. entity incorporated in the State of New York, could be placed into proceedings under OLA if certain determinations are made by the applicable U.S. regulatory authorities. However, under the law in effect as at the date of this Base Prospectus, although CGMFL and the CGMFL Guarantor are each "covered entities" for the purposes of the QFC Stay Rules and are required to include the above-described acknowledgements in relevant QFCs, neither CGMFL nor the CGMFL Guarantor, as non-U.S. entities, are eligible to be placed into proceedings under the U.S. Special Resolution Regimes.

The exercise of any power under the U.S. Special Resolution Regimes could materially adversely affect the rights of the holders of Securities issued by CGMHI (e.g., in respect of the right to demand payment), and accordingly, the price or value of their investment in any such Security and/or the ability of the relevant Issuer to satisfy its obligations under such Securities.

**As at the date of this Base Prospectus, interpretation of the application of the relevant requirements and market practice is continuing to evolve. If investors are in any doubt about the categorisation of any Securities as QFCs and the effect of any proceeding under a U.S. Special Resolution Regime on such Securities, they should take advice from such professional advisers as they may deem necessary.**

***Actions taken under the Banking Act in relation to the CGMFL Guarantor could materially adversely affect the value of and return on Securities issued by CGMFL***

Under the Banking Act 2009 (the "**Banking Act**"), substantial powers are granted to HM Treasury, the Bank of England, the Financial Conduct Authority and the Prudential Regulation Authority (the "**PRA**") (together, the "**Authorities**") as part of a special resolution regime (the "**SRR**"). These powers may be exercised in respect of certain UK entities (each a "**Relevant Entity**"), including certain UK investment firms such as the CGMFL Guarantor.

The SRR consists of five stabilisation options and two special insolvency procedures (bank administration and bank insolvency). The stabilisation options provide for: (i) private sector transfer of all or part of the business of the Relevant Entity; (ii) transfer of all or part of the business of the Relevant Entity to a bridge bank wholly owned by the Bank of England; (iii) transfer of all or part of the business of the Relevant Entity to an asset management vehicle owned and controlled by the Bank of England; (iv) writing down certain claims of unsecured creditors of the Relevant Entity and/or converting certain unsecured debt claims to equity, (the "**Bail-in Option**"), which equity could also be subject to any future cancellation, transfer or dilution; and (v) temporary public ownership (nationalisation) of all or part of the Relevant Entity or its UK holding company. The stabilisation options are achieved through the exercise of certain stabilisation powers, for example to modify contractual arrangements, and HM Treasury may also disapply or modify laws with possible retroactive effect.

The stabilisation options may be exercised if (a) the PRA is satisfied that a Relevant Entity is failing or likely to fail; (b) the Bank of England determines that it is not reasonably likely that (ignoring the stabilising options) action will be taken that will result in the condition referred to in (a) ceasing to be met; (c) the Bank of England considers the exercise of the stabilisation options to be necessary, having regard to the public interest in the advance of one or more of the special resolution objectives prescribed in the Banking Act; and (d) the Bank of England considers that one or more of such special resolution objectives would not be met to the same extent by the winding up of the relevant entity. The PRA must consult the Bank of England prior to making a determination in respect of (a), while the Bank of England must consult the other Authorities prior to making a determination in respect of (b), (c) and (d). The stabilisation powers could be exercised prior to insolvency, and payments to Securityholders may be delayed or less than expected.

By way of example, exercise of the stabilisation powers could involve (among other things) modifying or disapplying the terms of the CGMFL Deeds of Guarantee without Securityholders' consent. This could adversely affect their rights under the CGMFL Deed of Guarantee (which may consequently impact the price or value of their investment) and the ability of the CGMFL Guarantor to satisfy its obligations.

In addition, if the CGMFL Guarantor were subject to a partial transfer of its business to another entity, the quality of the assets and the quantum of the liabilities not transferred (which may include the CGMFL Deeds of Guarantee) would negatively affect its creditworthiness. As a result, the CGMFL Guarantor may be unable to meet its obligations in respect of the CGMFL Deeds of Guarantee or subject to administration proceedings.

In certain circumstances, while Securityholders may have a claim for compensation under the Banking Act, they may not recover compensation promptly or equal to losses incurred. The investors may therefore lose all or a substantial part of the value of their investment.

***Action taken under the BRRD in relation to CGMFL could materially adversely affect the value of and return on Securities issued by CGMFL***

Directive 2014/59/EU of the European Parliament and of the Council of 15 May 2014 establishing a framework for the recovery and resolution of credit institutions and investment firms, as amended (the "**BRRD**") was implemented by the Luxembourg act dated 18 December 2015 on the resolution, reorganisation and winding up measures of credit institutions and certain investment firms and on deposit guarantee and investor compensation schemes, as amended (the "**BRR Act 2015**"). Under the BRR Act 2015, the competent authority is the CSSF and the resolution authority is the CSSF acting as resolution council (*Conseil de résolution*) (the "**Resolution Council**").

The BRR Act 2015 contains four resolution tools and powers which may be used where the Resolution Council considers that (a) an institution is failing or likely to fail, (b) there is no reasonable prospect that any alternative private sector measures would prevent the failure of such institution within a reasonable timeframe, and (c) a resolution action is in the public interest.

The BRR Act 2015 provides for the power to impose a suspension of activities, including a partial or complete suspension of the performance of agreements entered into by a Luxembourg incorporated in-scope entity (such as CGMFL). The BRR Act 2015 also grants the power to the Resolution Council to take a number of other resolution measures including (i) a forced sale of all or part of the business of a Luxembourg incorporated in-scope entity, (ii) the establishment of an entity wholly or partially in public control (a "**bridge institution**"), which may limit the capacity of a Luxembourg incorporated in-scope entity to meet its repayment obligations or, (iii) the forced transfer of all or part of the assets, rights or obligations of a Luxembourg incorporated in-scope entity and (iv) the application of the general bail-in tool to write down certain claims of unsecured creditors (including to zero) and to convert certain unsecured debt claims to equity or other instruments of ownership, which equity or other instruments could also be subject to any future cancellation, transfer or dilution.

If Securities issued by CGMFL are subject to the bail-in tool, holders of such Securities may lose some or all of their investment. The terms of the obligations under the Securities may also be varied by the Resolution Council (e.g., suspension of payments). In addition, more recent amendments to the BRRD and other related pieces of EU legislation provide for a new pre-resolution moratorium tool and new powers to suspend performance of agreements (including payment) by the relevant institution (such as CGMFL).

The exercise of the above powers could materially adversely affect the rights of the holders of Securities issued by CGMFL, the price or value of their investment in any such Securities and/or the ability of CGMFL to satisfy its obligations under any such Securities. In certain circumstances, while Securityholders may have a claim for compensation under the BRR Act 2015, they may not recover compensation promptly or equal to losses incurred.

***Anti-tax avoidance directives***

Directive 2016/1164/EU, the so-called anti-tax avoidance directive ("**ATAD**"), was adopted on 12 July 2016 to implement in the EU member states' domestic legal frameworks common measures to tackle tax avoidance practices. ATAD lays down (i) controlled foreign company rules, (ii) anti-hybrid mismatches within the EU context rules, (iii) general interest limitation rules, (iv) a general anti-abuse rule, and (v) exit taxation rules. Following the adoption of ATAD, the EU member states decided to go further as regards hybrid-mismatches with third countries, and adopted the Directive 2017/952/EU ("**ATAD 2**") amending the ATAD provisions with respect to anti-hybrid mismatches, on 29 May 2017. ATAD must be implemented by the EU member states as of 1 January 2019, and ATAD 2 as of 1 January 2020. Luxembourg adopted (i) the Law of 21 December 2018 implementing ATAD with effect as of 1 January 2019 and (ii) the Law of 20 December 2019 implementing ATAD

2 with effect as of 1 January 2020 (except for the reverse hybrid mismatch rules, which apply as of 1 January 2022). These rules could increase the taxable base of the Securities issued by the relevant Issuer and/or reduce amounts available for distribution to Securityholders.

#### **4 Credit risks relating to CGMHI, CGMHI Guarantor, CGMFL and the CGMFL Guarantor**

***A reduction of the relevant Issuer's and/or, where the Issuer is CGMHI, the CGMHI Guarantor's and/or, where the Issuer is CGMFL, the CGMFL Guarantor's ratings may reduce the market value and liquidity of the relevant Securities***

The value of the Securities is expected to be affected, in part, by investors' general appraisal of the relevant Issuer's, the CGMHI Guarantor's, the CGMFL Guarantor's and/or their affiliates' creditworthiness. Such perceptions are generally influenced by the ratings accorded to the outstanding securities of the relevant Issuer, the CGMHI Guarantor, the CGMFL Guarantor and/or any of their affiliates by standard statistical rating services, such as Moody's, S&P and Fitch. A reduction in the rating, if any, accorded to outstanding debt securities (if any) of the Issuers, the CGMHI Guarantor, the CGMFL Guarantor and/or the securities issued by any of their affiliates by one of these rating agencies could result in a reduction in the trading value of the Securities.

Each rating agency may reduce, suspend or withdraw any credit ratings of an Issuer, the CGMHI Guarantor and/or the CGMFL Guarantor at any time in the future if, in its judgment, circumstances warrant a change. No rating agency is obligated to maintain its ratings at their current levels. The rating agencies continuously evaluate Citigroup Inc. and its subsidiaries, and their ratings of Citigroup Inc. and its subsidiaries' long-term and short-term debt are based on a number of factors, including financial strength, as well as factors not entirely within the control of Citigroup Inc. and its subsidiaries, such as conditions affecting the financial services industry generally. If a rating agency reduces, suspends or withdraws its rating of an Issuer and/or, where the Issuer is CGMHI, the CGMHI Guarantor and/or, where the Issuer is CGMFL, the CGMFL Guarantor, and/or any affiliate thereof, the liquidity and market value of the Securities and, where applicable, the CGMHI Guarantor's or the CGMFL Guarantor's ability to fulfil its guarantor obligations are likely to be adversely affected.

In addition, ratings downgrades by Fitch, Moody's or S&P could have a significant and immediate impact on Citigroup Inc.'s funding and liquidity through cash obligations, reduced funding capacity and derivative triggers and additional margin requirements. Ratings downgrades could also have a negative impact on other funding sources, such as secured financing and other margin requirements, for which there are no explicit triggers. Some entities may also have ratings limitations as to their permissible counterparties, of which Citigroup Inc. may or may not be aware. A reduction in Citigroup Inc.'s or its subsidiaries' credit ratings could also widen Citigroup Inc.'s credit spreads or otherwise increase its borrowing costs and limit its access to the capital markets. Any of the foregoing factors may negatively impact the value of and return on the Securities.

For information on the credit ratings of the Issuers, the CGMHI Guarantor and the CGMFL Guarantor, please refer to the subsection "7 Credit Ratings" of "Section C – Investment Considerations" below.

#### ***Ability to Substitute the CGMHI Guarantor or the CGMFL Guarantor in Insolvency***

The terms and conditions of the Securities explicitly provide that nothing in General Condition 11 (*Substitution of the Issuer, the CGMHI Guarantor and the CGMFL Guarantor*) shall limit the ability of the CGMHI Guarantor or the CGMFL Guarantor to be substituted upon or following the relevant entity becoming subject to a resolution, restructuring, or reorganization or similar proceeding. This

means any such substitution of the CGMHI Guarantor or the CGMFL Guarantor does not have to comply with the substitution criteria set out in General Condition 11 (*Substitution of the Issuer, the CGMHI Guarantor and the CGMFL Guarantor*). Any such substitution could adversely affect the rights of the Securityholders, the price and/or value of their investment in the Securities and/or performance under the CGMHI Deed of Guarantee or the CGMFL Deeds of Guarantee, as the case may be.

## **5 Other risks relating to CGMHI, CGMHI Guarantor, CGMFL and the CGMFL Guarantor**

### ***The military action by Russia in Ukraine, and related sanctions, export controls and similar actions or laws could adversely affect the Groups' business activities and customers***

The ongoing action of Russian military forces and support personnel in Ukraine has escalated tensions between Russia and the U.S., NATO, the European Union and the UK. The U.S. has imposed, and is likely to impose material additional, financial and economic sanctions and export controls against certain Russian organisations and/or individuals, with similar actions implemented and/or planned by the European Union, the UK and other jurisdictions. The packages of financials and economic sanctions imposed by the U.S., the UK, and the European Union, in various ways, constrain transactions with numerous Russian entities and individuals; transactions in Russian sovereign debt; and investment, trade, and financing to, from, or in certain regions of Ukraine. The Group's ability to engage in activity with certain consumer and institutional businesses in Russia and Ukraine or involving certain Russian or Ukrainian businesses and customers is dependent in part upon whether such engagement is restricted under any current or expected U.S., European Union, UK or other countries' sanctions and laws, or is otherwise discontinued in light of these developments. Sanctions and export controls, as well as any actions by Russia, could adversely affect the Group's business activities and customers in and from Russia and Ukraine. Moreover, actions by Russia, and any further measures taken by the U.S. or its allies, could have negative impacts on regional and global financial markets and economic conditions, including without limitation global energy markets. The extent of the impact on the Group will continue to depend significantly on future developments, which are uncertain and cannot be predicted.

Any negative impact of Russia's actions in Ukraine, and related sanctions, export controls and similar actions or laws on the Group, including the relevant Issuer, the CGMHI Guarantor or the CGMFL Guarantor, could adversely affect the ability of the relevant Issuer, the CGMHI Guarantor or the CGMFL Guarantor to fulfil its obligations under the Securities, and the value of and return on the Securities may also be adversely affected.

## **6 Risks relating to Securities generally**

An investment in Securities involves risks (as further described in the paragraphs below) and should only be made after assessing the direction, timing and magnitude of potential future market changes (e.g., in the value of the security indices, inflation indices, commodities, shares, depositary receipts, exchange traded funds, mutual funds, currencies, dividend futures contracts, interest rates or other items which comprise or relate to the Underlying(s)), as well as the terms and conditions of the Securities. More than one risk factor may have simultaneous effects with regard to the Securities such that the effect of a particular risk factor may not be predictable. In addition, more than one risk factor may have a compounding effect, which may not be predictable.

### ***Potential loss of some or all of the investment***

Investors should be prepared to sustain a total or partial loss of the purchase price of their Securities.

Other than any Securities having a scheduled minimum redemption value, Securities purchased may be worthless on redemption. In addition, the Securities will only redeem at an amount equivalent to at least the issue price if the applicable Final Terms provide that the Redemption Amount at maturity is an amount equivalent to at least such amount. If the Securities provide that the Redemption Amount may be less than the issue price, such Securities may be redeemed at an amount less than such price. If the Securities are redeemed at less than the issue price or the Securities are cancelled or repaid early in accordance with their terms, the amount received by the Securityholder may be less than its initial investment.

Furthermore, the Securities may be traded in the secondary market or redeemed early, and if so, the price for which a Security may be sold or redeemed early may be less than the principal amount of such Security and/or the initial investment by the investor in such Securities.

For Securities which are linked to Underlying(s), in order to recover and realise a return upon his investment, a purchaser of a Security must generally be correct about the direction, timing and magnitude of an anticipated change in the value of the relevant Underlying(s). Assuming all other factors are held constant, the more a Security is "out-of-the-money" and the shorter its remaining term to maturity, the greater the risk that purchasers of such Securities will lose all or part of their investment. The only means through which a Securityholder can realise value from a Security prior to the maturity date in relation to such Security is to sell it at its then market price in an available secondary market (if any). Fluctuations in the value or the yield (if applicable) or the relevant rates of exchange (if applicable) of the relevant Underlying(s) will affect the value of the relevant Securities. Purchasers of Securities risk losing their entire investment if the value of the relevant Underlying(s) does not move in the anticipated direction.

Further, Securityholders may receive no interest during the term of the Securities.

***Securities are unsecured obligations and subject to the credit risk of the relevant Issuer, the CGMHI Guarantor and/or the CGMFL Guarantor***

All Securities will be unsecured and unsubordinated obligations of the relevant Issuer and all Securities issued by it will rank equally among themselves and with all other unsecured and unsubordinated obligations of the relevant Issuer. The obligations of the CGMHI Guarantor under the CGMHI Deed of Guarantee will be unsecured and unsubordinated and will rank *pari passu* with all other outstanding unsecured and unsubordinated obligations of the CGMHI Guarantor. The obligations of the CGMFL Guarantor under the CGMFL Deeds of Guarantee will be unsecured and unsubordinated and will rank *pari passu* with all other outstanding unsecured and unsubordinated obligations of the CGMFL Guarantor. See General Condition 2 (*Status*). The relevant Issuer's obligations under the Securities issued by it, the CGMHI Guarantor's obligations under the CGMHI Deed of Guarantee and the CGMFL Guarantor's obligations under the CGMFL Deeds of Guarantee represent general contractual obligations of each respective entity and of no other person. Only Securities issued by CGMHI will be guaranteed by the CGMHI Guarantor. Only Securities issued by CGMFL will be guaranteed by the CGMFL Guarantor.

Accordingly, all payments under the Securities are subject to the credit risk of the relevant Issuer and, where the Issuer is CGMHI, of the CGMHI Guarantor or, where the Issuer is CGMFL, of the CGMFL Guarantor. Securityholders will not have recourse to any secured assets of the relevant Issuer and, where the Issuer is CGMHI, of the CGMHI Guarantor or, where the Issuer is CGMFL, of the CGMFL Guarantor in the event that the relevant Issuer or the relevant Guarantor is unable to meet its obligations under the Securities, including e.g., in the event of an insolvency, and therefore risk losing some or all of their investment.

***A sale of Securities prior to their scheduled redemption may result in a loss to the investor***

The value of Securities prior to their scheduled redemption varies as the price or level of the Underlying(s) varies, as well as due to a number of other interrelated factors, including (i) the trading price of the relevant Securities, (ii) the value and volatility of the Underlying(s), (iii) the remaining tenor, (iv) in the case of Cash Settled Securities, the probable range of any Redemption Amounts, (v) any change(s) in interim interest rates and dividend yields if applicable, (vi) any change(s) in currency exchange rates, (vii) the depth of the market or liquidity of the Underlying(s) and (viii) any related transaction costs. Depending on the above factors (e.g., if movements in the price or level of the Underlying(s) reduce the probable range of any Redemption Amounts), a sale of Securities prior to their scheduled redemption may be at a substantial discount from the original purchase price and the investor may lose some or all of its investment.

***Securities which are issued at a substantial discount or premium***

The market value of any Securities issued at a substantial discount or premium to their principal amount tend to fluctuate more in relation to general changes in interest rates than do prices for more conventional interest-bearing Securities. Generally, the longer the remaining term of such Securities, the greater the price volatility as compared to more conventional interest-bearing securities with comparable maturities. Such price volatility could lead to a greater loss than otherwise on any sale of the Security prior to its scheduled redemption or an inability to sell the Security in the secondary markets.

***Impact of fees, commissions and/or inducements on the Issue Price and/or offer price***

The Issue Price and/or offer price of Securities may include fees and/or other commissions and inducements (e.g., placement fees, distribution fees, structuring fees). Any such fees and/or other commissions and inducements will not be taken into account for the purposes of determining the price of such Securities in the secondary market and will result in a difference between the Issue Price and/or offer price of the Securities and the bid/offer price quoted by any intermediary in the secondary market. Any such difference will result in a decrease in the value of an issue of Securities and consequently a loss to the investor, particularly in relation to any such Securities sold immediately following the issue date or offer period relating to such Securities.

***The secondary market***

Securities may have no established trading market when issued, and one may never develop, so investors should be prepared to hold their Securities until maturity. If a market does develop, it may not be very liquid and may be sensitive to changes in financial markets and investors may not be able to find a timely and/or suitable purchaser. If it is possible to sell Securities, they would be sold for the prevailing bid price in the market and may be subject to a transaction fee. The prevailing bid price may be affected by several factors including the performance of any relevant Underlying, prevailing interest rates at the time of sale, the time remaining to the stated maturity date, the creditworthiness of the relevant Issuer and/or, where the Issuer is CGMHI, the CGMHI Guarantor or, where the Issuer is CGMFL, the CGMFL Guarantor and factors affecting the capital markets generally. The introduction of additional or competing products in the market may also have a negative effect on the price of any Securities. Consequently, investors may not be able to sell their Securities easily or at prices that will provide them with a yield comparable to similar investments that have a developed secondary market or at prices higher than the relevant investor's initial investment and in fact any such price may be substantially less than their original purchase price. Therefore, in establishing their investment strategy, investors should ensure that the term of the Securities is in line with their future liquidity requirements. This is particularly the case should the relevant Issuer be in financial distress, which may result in any sale of the Securities having to be at a substantial discount to their principal amount or issue or offer price, or for Securities that are

especially sensitive to interest rate, currency or market risks, are designed for specific investment objectives or strategies or have been structured to meet the investment requirements of limited categories of investors. These types of Securities generally would have a more limited secondary market and more price volatility than conventional debt securities. Illiquidity may have a severely adverse effect on the market value of Securities. The liquidity of Securities is also influenced by the type of investor to whom such Securities are sold. To the extent that an issue of Securities is or becomes illiquid, investors may have to hold the relevant Securities until maturity before they are able to realise value.

The relevant Issuer may, but is not obliged to, list an issue of Securities on a stock exchange or regulated market. If Securities are not listed or traded on any stock exchange or regulated market, pricing information for the relevant Securities may be more difficult to obtain and the liquidity of such Securities may be adversely affected.

If Securities are not listed or traded on a stock exchange or regulated market, they may be traded on trading systems governed by the laws and regulations in force from time to time (e.g., multilateral trading systems or "MTF") or in other trading systems (e.g., bilateral systems, or equivalent trading systems). In the event that trading in such Securities takes place outside any such stock exchange, regulated market or trading systems, the manner in which the price of such Securities is determined may be less transparent and the liquidity of such Securities may be adversely affected. Investors should note that neither the relevant Issuer nor the Guarantor nor any Dealer grants any warranty to Securityholders as to the methodologies used to determine the price of Securities which are traded outside a trading system. However, where the relevant Issuer or any of its affiliates determines the price of such Securities, it will take into account the market parameters applicable at such time in accordance with applicable provisions of law. Even if Securities are listed and/or admitted to trading, this will not necessarily result in greater liquidity.

Each of the relevant Issuer, (if applicable) the Guarantor and any Dealer may, but is not obliged to, at any time purchase Securities at any price in the open market or by tender or private agreement. Any Securities so purchased may be held or resold or surrendered for cancellation. If such Securities are surrendered for cancellation, then the number of Securities outstanding will decrease, which will reduce liquidity for the outstanding Securities. Any such activities may have an adverse effect on the price of the relevant Securities in the secondary market and/or the existence of a secondary market.

Any of the relevant Issuer, (if applicable) the Guarantor or any Dealer or affiliate of any such entity, as, where applicable, part of its activities as a broker and dealer in fixed income and equity securities and related products or otherwise, may make a secondary market in relation to any Securities and may provide an indicative bid price on a daily basis. Any indicative prices so provided shall be determined by the relevant party in its sole discretion taking into account prevailing market conditions and shall not be a representation by such party that any Securities can be purchased or sold at such prices (or at all) and any of the parties specified above may suspend or terminate making a market and providing indicative prices without notice, at any time and for any reason. In these circumstances, there may be no market for the relevant Securities and investors should not assume that such a market will exist. Accordingly, an investor must be prepared to hold the Securities until the maturity date and may not be able to sell them prior to such date or, if it can, it may only be able to do so for a loss.

### ***Risks related to implementation of regulatory reform***

Implementation of U.S. federal financial reform legislation may affect the value of Underlying(s) and the ability to hedge the relevant Issuer's obligations under the Securities. This may in turn affect the market value, trading price and viability of, and return on, the Securities. This is because the

amounts received and/or value of assets deliverable under the Securities will depend on (among other things) the performance of any such Underlying(s) and the Securities may be subject to early redemption as a result of events related to hedging arrangements. In addition, amounts and/or assets due under the Securities may be reduced to reflect costs related to hedging arrangements.

For example, in October 2020, the CFTC adopted rules to establish revised or new limits on the size of the positions any person may hold in 25 agricultural, metals and energy futures contracts and futures, options and swaps that are economically equivalent to those futures contracts. The limits apply to a person's combined position in the specified 25 futures contracts and options on futures ("**core referenced futures contracts**"), futures and options on futures directly or indirectly linked to the core referenced futures contracts, and economically equivalent swaps. These rules came into effect on January 1, 2022 for covered futures and options on futures contracts and on January 1, 2023 for covered swaps. These limits may subject certain transactions to new forms of regulation that could create barriers and increase costs in relation to some types of hedging activity by the relevant Issuer and/or any Hedging Party or any of their respective affiliates. Other provisions of the Dodd-Frank Act require certain Underlying(s) or hedging transactions to be cleared, traded on a regulated exchange and reported to regulators, central data repositories and, in some cases, the public, which may also affect their value, viability and cost. The Dodd-Frank Act also expands entity registration requirements and imposes business conduct requirements on persons active in the swaps market (which may include new capital and margin requirements), which may affect the value of the relevant Underlying(s) or value and/or cost of hedging transactions. Such regulation may consequently affect the market value, trading price and viability of, and return on, the Securities.

***Changes in exchange rates and exchange controls could result in a loss of the value of the Securities and payments in respect thereof in relation to the currency of the jurisdiction of an investor***

An investment in Securities denominated in a Specified Currency and/or payable in a currency other than the currency of the jurisdiction of a particular investor (the "**investor's currency**") entails significant risks that are not associated with a similar investment in a security denominated in the investor's currency. These risks include, but are not limited to:

- the possibility of significant market changes in rates of exchange between the investor's currency and the Specified Currency and/or payment currency;
- the possibility of significant changes in rates of exchange between the investor's currency and the Specified Currency and/or payment currency resulting from the official redenomination or revaluation of the Specified Currency and/or payment currency; and
- the possibility of the imposition or modification of foreign exchange controls by either the investor's jurisdiction or foreign governments.

These risks generally depend on factors over which neither the relevant Issuer nor (if applicable) the Guarantor has any control and which cannot be readily foreseen, such as economic and political events and the supply of, and demand for, the relevant currencies.

In recent years, rates of exchange between some foreign currencies in which the Securities may be denominated and/or payable have been volatile. This volatility may be expected in the future. Fluctuations that have occurred in any particular exchange rate in the past are not necessarily indicative, however, of fluctuation that may occur in the rate during the term of any Security. Depreciation of the Specified Currency and/or payment currency of a Security against the investor's currency would result in a decrease in the effective yield of such Security below its coupon rate (if applicable) and could result in a substantial loss to the investor in terms of the investor's currency.

Governments and monetary authorities have imposed from time to time, and may in the future impose, exchange controls that could affect applicable exchange rates as well as the availability of a Specified Currency and/or payment currency at the time of payment of any amounts on any Security. There can be no assurance that exchange controls will not restrict or prohibit payments under the Securities which are denominated in any such Specified Currency and/or payment currency.

Even if there are no actual exchange controls, it is possible that a Specified Currency and/or payment currency would not be available to the relevant Issuer and/or, where the Issuer is CGMHI, the CGMHI Guarantor, and/or, where the Issuer is CGMFL, the CGMFL Guarantor when payments on a Security are due because of circumstances beyond the control of the relevant Issuer and/or the CGMHI Guarantor and/or the CGMFL Guarantor. Any such restriction, prohibition or unavailability of the relevant currency may negatively affect the value of and return on the Securities, and could result in a substantial loss to the investor.

The above risks may be increased if any Specified Currency and/or payment currency and/or the investor's currency is the currency of an emerging market jurisdiction.

***The unavailability of currencies could result in a loss of value of the Securities and payments thereunder***

The currency in which payments on a Security are required to be made may be redenominated, for example, because such currency is:

- unavailable due to the imposition of exchange controls or other circumstances beyond the relevant Issuer's and/or, where the Issuer is CGMHI, the CGMHI Guarantor's and/or, where the Issuer is CGMFL, the CGMFL Guarantor's control;
- no longer used by the government of the country issuing the currency; or
- no longer used for the settlement of transactions by public institutions of the international banking community.

Where the currency in which payments in respect of a Security are required to be made is officially redenominated, other than as a result of Economic and Monetary Union, such as by an official redenomination of any such currency that is a composite currency, then the payment obligations of the relevant Issuer and/or, where the Issuer is CGMHI, the CGMHI Guarantor and/or, where the Issuer is CGMFL, the CGMFL Guarantor on such Security immediately following the redenomination will be the amount of redenominated currency that represents the amount of the relevant Issuer's and/or, where the Issuer is CGMHI, the CGMHI Guarantor's and/or, where the Issuer is CGMFL, the CGMFL Guarantor's obligations immediately before the redenomination.

The Securities will not provide for any adjustment to any amount payable as a result of:

- any change in the value of the Specified Currency and/or payment currency of those Securities relative to any other currency due solely to fluctuations in exchange rates; or
- any redenomination of any component currency of any composite currency, unless that composite currency is itself officially redenominated.

Accordingly, a currency redenomination may result in a material adverse loss of the value of and return on the Securities.

***Certain considerations relating to public offers of Securities in the EEA and the UK***

As described in the applicable Final Terms, Securities may be distributed by means of a public offer made in the specified member state(s) of the EEA or the UK during an offer period specified in the

applicable Final Terms. During such offer period, the relevant Issuer and/or any other person specified in the applicable Final Terms may reserve the right to cancel such offer and/or to scale back applications for such offer in the event of over-subscription or such other circumstances as are specified in the applicable Final Terms. In such circumstances, an applicant investor may not be issued any Securities or may be issued a number of Securities which is less than the amount for which such applicant investor applied. Any payments made by an applicant investor for Securities that are not issued to such applicant investor for any such reason will be refunded. However, there will be a time lag in making any reimbursement, no interest or compensation will be payable in respect of any such amounts and the applicant investor may be subject to reinvestment risk.

In addition, the relevant Issuer and/or the other entities specified in the applicable Final Terms may terminate the offer early by immediate suspension of the acceptance of further subscription requests and by giving notice to the public in accordance with the applicable Final Terms. Any such termination may occur, even where the maximum amount for subscription in relation to that offer (as specified in the applicable Final Terms), has not been reached and, in such circumstances, the early closing of the offer may have an impact on the aggregate number of Securities issued. This may in turn have an adverse effect on the liquidity of the relevant Securities, with the result that an Investor may not be able to sell the Securities prior to the maturity date or, if it can, that it may only be able to do so for a loss.

Further, investors should note that, in certain circumstances, Securities may not be issued on the originally designated issue date, for example because either the Issuer and/or any other person specified in the applicable Final Terms has reserved the right to postpone such issue date or, following the publication of a supplement to this Base Prospectus the Issuer has decided to postpone such issue date to allow investors who had made applications to subscribe for Securities before the date of publication of such Supplement to exercise their right to withdraw their acceptances. In the event that the issue date is so delayed, no interest shall accrue (if applicable) until the issue date of the Securities and no compensation shall be payable.

### ***Determinations and potential conflicts of interest***

The terms of the Securities confer on the relevant Issuer, the Calculation Agent and certain other persons some discretion in making judgments, determinations and calculations in relation to the Securities including, inter alia, Underlying(s) and the occurrence of various events. The relevant Issuer or the Calculation Agent will act in its reasonable discretion (*billiges Ermessen*, §§ 315, 317 of the German Civil Code (*BGB*)), but there can be no assurance that the exercise of any such discretion will not affect the value of the Securities or result in the occurrence of an early repayment at an amount less than an investor's initial investment.

Where the Calculation Agent is an affiliate of the relevant Issuer, potential conflicts of interest may exist between the Calculation Agent and Securityholders, including with respect to such judgments, determinations and calculations that the Calculation Agent may make pursuant to the Securities that may influence the amount receivable or specified assets deliverable in respect of the Securities.

Any of CGMHI, the CGMHI Guarantor, CGMFL, the CGMFL Guarantor and/or their affiliates and/or any third parties or entities which are not subject to regulation under the laws of the United States, the EEA or the United Kingdom may be the sponsor of an Underlying and may publish values or prices or other projections of creditworthiness in respect of an Underlying. Any of CGMHI, the CGMHI Guarantor, CGMFL, the CGMFL Guarantor and/or any of their affiliates, may also from time to time engage in transactions involving Underlying(s) for their proprietary accounts or for other accounts under their management, subject to requirements of all applicable laws and regulations. Any of CGMHI, the CGMHI Guarantor, CGMFL, the CGMFL Guarantor and/or their affiliates may also issue other derivative instruments in respect of any Underlying(s).

Any of CGMHI, the CGMHI Guarantor, CGMFL, the CGMFL Guarantor and/or their affiliates may also act as underwriter or counterparty in connection with future offerings of shares or other securities related to an issue of Securities or may act as financial adviser to certain companies or companies whose securities are Underlying(s) in respect of one or more issues of Securities or in a commercial banking capacity for such companies. These activities may have negative effect on the value of the relevant Underlying(s) and consequently upon the value of the Securities.

Any of CGMHI, the CGMHI Guarantor, CGMFL, the CGMFL Guarantor any Dealer and/or any of their affiliates may at the date of this Base Prospectus or at any time hereafter be in possession of information in relation to an Underlying that is or may be material and may or may not be publicly available to Securityholders. There is no obligation on any of CGMHI, the CGMHI Guarantor, CGMFL, the CGMFL Guarantor or any Dealer to disclose to any potential investors in Securities or to Securityholders any such information.

Any of CGMHI, the CGMHI Guarantor, CGMFL, the CGMFL Guarantor any Dealer and/or any of their affiliates may have existing or future business relationships with the issuer of, or other entity associated with, any Underlying(s) (including, but not limited to, lending, depositary, risk management, advisory and banking relationships), and will pursue actions and take steps that they or it deems necessary or appropriate to protect their and/or its interests arising therefrom without regard to the consequences for a Securityholder, which could have a material adverse impact on the value of and return on the Securities.

Where Securities are offered to the public, as the relevant Dealer(s) and any distributors act pursuant to a mandate granted by the relevant Issuer and they receive fees on the basis of the services performed and the outcome of the placement of such Securities, potential conflicts of interest could arise.

#### ***Substitution of the CGMFL and/or the CGMFL Guarantor***

Investors should note that, in relation to any Securities where the Issuer is CGMFL, either of the Issuer and/or the CGMFL Guarantor may, without the consent of the holders but subject to certain conditions, substitute for itself in respect of such Securities or in respect of the CGMFL Deeds of Guarantee any affiliate which is, on the date of such substitution, in the opinion of the Issuer or the CGMFL Guarantor, as the case may be, of at least equivalent standing and creditworthiness to it. Any such substitution could have a material adverse impact on the rights of Securityholders, the value of and return on the Securities and/or performance under the CGMFL Deeds of Guarantee.

#### ***Realisation Disruption***

If a Realisation Disruption Event occurs (being, in summary, either (i) an event which imposes restrictions or taxes, charges or deductions in respect of the Securities and/or on hedging arrangements in respect of the Securities which would materially restrict, or materially increase the cost of, the relevant Issuer's obligations under the Securities or materially restrict, or materially increase the cost of, any Hedging Party's obligations under any such hedging arrangements or (ii) the occurrence or existence of any event which either materially restricts the exchange, delivery or transfer of the currency of payment of the Securities or of any hedging arrangements in respect of the Securities or restricts the determination of any exchange rate in relation to any such currency), then either (a) the terms of the Securities (including any payment or delivery obligations) may be adjusted in order to reflect the economic effect of the particular Realisation Disruption Event or (b) the relevant Issuer may redeem the Securities.

Any such adjustments by the Calculation Agent may include: (i) payments under the Securities being made in a different currency to the previously specified payment currency of the Securities; (ii) deduction of applicable taxes, charges or deductions from payments due in respect of the

Securities resulting in reduced amounts paid in respect of the Securities or delivery of any Entitlement being subject to payment by the relevant Securityholder of an amount equal to a pro rata portion of any such tax, charge or deduction; (iii) delay of payments or deliveries in respect of the Securities until the relevant restrictions are lifted; (iv) determination of relevant exchange rates by the Calculation Agent taking into consideration all available information that it deems relevant, which may result in a different rate to that which would have applied had the Realisation Disruption Event not occurred and (v) (where legally permissible) in lieu of paying any cash amounts in respect of the Securities, procuring the physical delivery of any Underlying(s) (or vice versa). All the above could produce a materially different redemption to that originally anticipated in respect of the Securities and could have a material adverse impact on the value of and return on the Securities.

If the Securities are redeemed early pursuant to (b) of the first paragraph above, the relevant Issuer will pay to each Securityholder in respect of each Calculation Amount held by such holder an amount calculated in accordance with the method specified in the applicable Final Terms, as determined by the Calculation Agent. The amount repaid to investors could be substantially less than the investor's initial investment and the investor would therefore sustain a loss.

See further Valuation and Settlement Condition 2(h) (*Realisation Disruption*).

### ***Illegality in relation to Securities***

If "Illegality" is specified as being applicable in the applicable Final Terms and the relevant Issuer determines that the performance of its obligations under an issue of Securities or, where the Issuer is CGMHI, the CGMHI Guarantor determines that the performance of its obligations under the CGMHI Deed of Guarantee in respect of such Securities or, where the Issuer is CGMFL, the CGMFL Guarantor determines that the performance of its obligations under the CGMFL Deeds of Guarantee in respect of such Securities has become illegal in whole or in part for any reason, the relevant Issuer may redeem the Securities early and, if and to the extent permitted by applicable law, will pay to each Securityholder (i) in respect of Structured Securities in respect of each Calculation Amount held by such Securityholder, an amount calculated in respect of such Calculation Amount, notwithstanding such illegality, in accordance with the method specified in the applicable Final Terms and (ii) in respect of Securities other than Structured Securities, an amount calculated pursuant to the relevant Condition or as specified in the applicable Final Terms. The amount repaid to investors could be substantially less than the investor's initial investment and the investor would therefore sustain a loss.

### ***Section 871(m) Event***

In circumstances that constitute a "Section 871(m) Event" (being the occurrence at any time of circumstances in which the relevant Issuer, and/or the relevant Guarantor and/or any Hedging Party is (or, in the determination of the Calculation Agent, there is a reasonable likelihood that, within the next 30 Business Days, the relevant Issuer and/or the relevant Guarantor and/or any Hedging Party will become) subject to any withholding or reporting obligations pursuant to Section 871(m) (as described in "*Section F.4 – Taxation – United States Federal Income Tax Considerations – Other U.S. Federal Tax Considerations for Non-U.S. Holders – Section 871(m) Withholding on Dividend Equivalents*") with respect to the relevant Securities and/or the relevant Deed(s) of Guarantee and/or any underlying Hedging Positions), if specified as applicable in the applicable Final Terms, an Early Redemption Event will occur in which case the relevant Securities may be redeemed as more fully set out in the terms and conditions of such Securities.

If the Securities are so redeemed early, the relevant Issuer will pay to each Securityholder in respect of each Calculation Amount held by such holder an amount calculated in accordance with the method specified in the applicable Final Terms, or such other amount as is specified in the Valuation and Settlement Schedule and in the applicable Final Terms. The amount repaid to investors could

be substantially less than the Securityholder's initial investment and the Securityholder could therefore sustain a loss.

### ***Green Bonds, Social Bonds and Social Finance Bonds***

For information relating to Green Bonds, Social Bonds and Social Finance Bonds (each as defined in "Section C – Investment Considerations") and any relevant frameworks please refer to "Section C – Investment Considerations" of this Base Prospectus.

Whilst it is the intention of the Group to apply an amount equivalent to the net proceeds of any Green Bonds, Social Bonds or Social Finance Bonds in, or substantially in, the manner described in this Base Prospectus and/or the applicable Final Terms, any relevant investment may not provide the results or outcome originally expected or anticipated by the relevant Issuer or meet the goals of the relevant frameworks and/or it may not be possible for the relevant Issuer or any of its affiliates to invest an amount equal to such net proceeds in accordance with any particular timing schedule relevant to you or the Securities. In addition, a relevant framework may be amended by the Group from time to time in a manner which may affect the value of relevant Green Bonds, Social Bonds or Social Finance Bonds, as applicable.

There is currently no clear definition (legal, regulatory or otherwise) of, or market consensus as to what constitutes, a "green", "social", "inclusive", "sustainable" or any equivalently-labelled project or asset or as to what precise attributes are required for a particular project or asset to be defined as "green", "social", "inclusive", "sustainable" or any such other equivalent label. A clear definition or consensus may not develop or if market consensus is developed, such consensus may be different from the relevant framework or may significantly change over time which may affect the value of any Green Bonds, Social Bonds or Social Finance Bonds. Consequently, investments in businesses or projects described in the relevant framework agreements and any related opinions and/or reports may not meet your expectations, taxonomies or standards or other investment criteria or guidelines regarding such "green", "social", "inclusive", "sustainable" or other equivalently-labelled performance objectives or any binding or non-binding legal or other standards regarding any direct or indirect environmental impact (including any present or future applicable law or regulations or by-laws or other governing rules, policies or investment mandates applicable to you) and there can be no assurance that adverse social, environmental and/or other impacts will not occur from such businesses or projects.

Further, any Green Bonds, Social Bonds and Social Finance Bonds issued under the Green Bond Framework, the Social Finance Framework or the Social Bond Framework (each as defined below) are not intended to be compliant with Regulation (EU) 2023/2631 on European Green Bonds and optional disclosures for bonds marketed as environmentally sustainable and for sustainability-linked bonds (the "**EU Green Bond Regulation**"). It is not clear if the establishment under the EU Green Bond Regulation of the EuGB label and the optional disclosures regime for bonds issued as "environmentally sustainable" could have an impact on investor demand for, and pricing of, green use of proceeds bonds that do not comply with the requirements of the EuGB label or the optional disclosures regime, such as the Green Bonds, Social Bonds or Social Finance Bonds issued under this Base Prospectus. It could result in reduced liquidity or lower demand or could otherwise affect the market price of any Green Bonds issued under this Base Prospectus that do not comply with those standards proposed under the EU Green Bond Regulation. You should have regard to any descriptions of the relevant projects and eligibility criteria in any applicable framework and the applicable Final Terms and determine for yourself the relevance of such information and such opinions and/or reports and whether all your applicable standards will be met.

Any opinion, certification or report of any third party (whether or not solicited by the Group) that may be made available in connection with Green Bonds, Social Bonds or Social Finance Bonds

(including with respect to whether any businesses or projects fulfil any green, social, inclusive, sustainability and/or other criteria) may be withdrawn, subject to amendment or may not be maintained. In addition, the provider of any such opinion, certification or report may not be subject to any specific oversight or regulatory regime. Green Bonds, Social Bonds or Social Finance Bonds may also be listed or admitted to trading on a dedicated "green", "environmental", "social", "inclusive", "sustainable" or other equivalently-labelled segment of any stock exchange or securities market (whether or not regulated), but you should be aware that the criteria for such listings or admission to trading may vary and may not meet your expectations and there is a risk that any such listing or admission to trading may not be maintained by the relevant Issuer or may be withdrawn. This may adversely affect the market value of any Green Bonds, Social Bonds or Social Finance Bonds with the effect that you may be unable to realise all or part of your investment.

Failure by the relevant Issuer or any other relevant entity to allocate (or cause allocation of) an amount equal to the net proceeds as described in the relevant framework or provide reports, or the failure of any external assurance provider to opine on any relevant framework or on any report's conformity with the Group's sustainability strategy or the relevant framework or the withdrawal of any report or any certification that the Group is not complying in whole or in part with any matters for which such opinion or certification is opining or certifying, as the case may be, will not constitute an event of default under or trigger any early redemption rights (whether by the relevant Issuer or any Securityholder). In addition and for the avoidance of doubt, the proceeds of any Green Bonds, Social Bonds or Social Finance Bonds will not be segregated by the relevant Issuer or any other entity in the Group from its capital and other assets and there will be no direct or contractual link between any Green Bonds, Social Bonds or Social Finance Bonds and any Eligible Green Assets, the Affordable Housing Bond Asset Portfolio, or Social Finance Assets, respectively.

Any of the above factors (and any events that negatively affect the value of any other Securities of CGMHI that are intended to finance "green", "social", "inclusive", "sustainable" or equivalently-labelled projects or assets) could have a material adverse effect on the value of such Securities and investors may be unable to realise all or part of their investment.

### ***Risks relating to inflation***

Inflation is the general increase in prices and fall in the purchasing value of money over time. Due to the impact of inflation, the same amount of money will buy fewer goods and services over time.

The real return (or yield) on an investment in Securities will be reduced by inflation. Consequently, the higher the rate of inflation, the lower the real yield on a security will be. If the inflation rate is equal to or greater than the yield under a security, the real yield a holder of such security will achieve will be zero or even negative. Accordingly, inflation may have a negative effect on the value of and return on the Securities, and you should consider the potential impact of inflation (including if the rate of inflation is anticipated to rise over the term of the Securities) before purchasing Securities.

Relatedly, if the terms and conditions of the relevant Securities provide that some or all of the principal shall be repaid at maturity, such scheduled principal repayment will not provide any protection from the effect of inflation over time and it may still be the case that the return on such Securities adjusted for inflation could be negative.

With regard to risks of Securities linked to one or more Inflation Indices, see "8. *Risks relating to Securities linked to Underlying(s) – Risks associated with Securities linked to Inflation Indices*".

## **7 Risks relating to the United States Tax Treatment of the Securities**

### ***The United States Tax Treatment of Certain Securities is Unclear***

For U.S. federal tax purposes, the proper treatment and characterisation of Securities that are not treated as debt instruments (generally, Securities that do not provide for the return at maturity of a holder's investment) are unclear. As a result, the timing and character of income on such a Security are uncertain, and for a non-U.S. investor holding such a Security issued by a U.S. Issuer (as described in "*Section F.4 – Taxation – United States Federal Income Tax Considerations*"), there is a risk that payments on such a Security, in particular payments that are made (or fixed) prior to maturity, may be subject to U.S. withholding tax. If withholding tax applies to a payment on such a Security, the Issuer will not be required to pay additional amounts in respect of amounts withheld, and an investor may therefore receive a substantially reduced return on the Securities as compared to the return an investor would receive in the absence of such withholding.

Moreover, even if the U.S. Issuer treats a Security as debt, there is a risk of recharacterization if the Security does not provide for the return of a holder's investment under all circumstances, as is the case of a Credit Linked Security. The U.S. Treasury Department and the Internal Revenue Service ("**IRS**") have requested comments on various issues regarding the U.S. federal income tax treatment of "prepaid forward contracts" and similar financial instruments and have indicated that such transactions may be the subject of future regulations or other guidance. In addition, members of Congress have proposed legislative changes to the tax treatment of derivative contracts. Any legislation, Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the Securities, possibly with retroactive effect.

### ***Possible Taxable Event for U.S. Federal Income Tax Purposes***

Certain modifications to the terms of the Securities could be treated as "significant modifications" of the Securities for U.S. federal income tax purposes, in which case the Securities would generally be treated, in whole or part, as retired and reissued. Significant modifications could include (but are not limited to) a designation by the Issuer of a substitute for itself and certain modifications to the Underlying with respect to a Security and the designation of a substitute or successor rate.

In the event of a significant modification, the U.S. federal tax treatment of a Security could differ from its prior treatment. A changed treatment of the Securities could have possible withholding tax consequences to non-U.S. investors. Prospective purchasers should consult their tax advisers regarding the risk of such an event.

### ***Possible U.S. Federal Withholding Tax under Section 871(m)***

Section 871(m) of the United States Internal Revenue Code of 1986, as amended (the "**Code**"), imposes a 30 per cent. (or lower treaty rate) withholding tax on certain "dividend equivalents" paid or deemed paid to Securityholders with respect to certain financial instruments linked to U.S. equities or indices that include U.S. equities. United States Treasury regulations promulgated under Section 871(m) may require withholding on Securityholders in respect of dividend equivalents deemed paid under certain Securities, regardless of whether the Securities are issued by the U.S. Issuer or the Non-U.S. Issuer (as described under "*Section F.4 – Taxation – United States Federal Income Tax Considerations*"). This withholding regime generally applies to Securities that substantially replicate the economic performance of one or more underlying U.S. equities, as determined based on one of two tests set forth in the regulations. However, based on an IRS notice, Securities issued prior to 2027 will generally be subject to withholding tax only if they have a "delta" of one with respect to the relevant underlying U.S. equity. The regulations provide certain other exceptions to this withholding regime, in particular for instruments linked to certain broad-

based indices that meet requirements set forth in the regulations as well as instruments linked to securities that track such indices. The relevant Issuer will not be required to pay any additional amounts in respect of amounts withheld under Section 871(m).

Prospective purchasers of the Securities should consult their tax advisers regarding the potential application of Section 871(m) to a particular Security.

If the relevant Issuer determines that amounts paid with respect to the Securities or any underlying hedging arrangements of the relevant Issuer in respect of the Securities will be subject to any withholding or reporting obligations pursuant to Section 871(m), the relevant Issuer may redeem such Securities and, if and to the extent permitted by applicable law, may pay to each Securityholder in respect of each Security an amount equal to the fair market value of such Security, and may also deduct the cost to the relevant Issuer and/or its affiliates of unwinding any underlying related hedging arrangements from such amount. The amount repaid to investors could be substantially less than the investor's initial investment and the investor could therefore sustain a loss.

### ***Potential U.S. Federal Withholding Taxes on Interest Payments***

The treatment of certain Securities for U.S. federal income tax purposes is unclear. In particular, the U.S. federal withholding tax treatment of interest payments by CGMHI on Securities that are not treated as debt instruments is uncertain.

In the case of Securities issued by CGMHI that are treated as prepaid forward contracts or options with associated periodic payments, CGMHI intends to withhold on interest payments on such Securities, generally at a rate of 30%, except to the extent that an investor is eligible for the benefits of an income tax treaty that would reduce or eliminate such withholding.

In the case of Securities issued by CGMHI that are treated as Put Options and Deposits, CGMHI does not intend to withhold on interest payments on such Securities, provided that the second paragraph under "*Section F.4 – Taxation – United States Federal Income Tax Considerations – Securities Issued by the U.S. Issuer – Securities Treated as Debt*" are met. However, because of the uncertain treatment of such payments, it is possible that an applicable withholding agent could treat the payments as subject to withholding tax (generally at a 30% rate). Moreover, CGMHI could determine in the future that withholding is required.

Prospective Securityholders should review the discussion under "*Section F.4 – Taxation – United States Federal Income Tax Considerations – Securities Issued by the U.S. Issuer*" and consult their tax advisers regarding these potential withholding tax considerations. Neither CGMHI nor the CGMHI Guarantor will be required to pay any additional amounts in respect of these withholding taxes.

### ***Reportable Transactions***

In 2015, the U.S. Treasury Department and the IRS released notices designating certain "basket options", "basket contracts" and substantially similar transactions as "reportable transactions". The notices apply to specified transactions in which a taxpayer or its "designee" has, and exercises, discretion to change the assets or an algorithm underlying the transaction. In addition, in July 2024 the U.S. Treasury Department and the IRS released proposed regulations that, if adopted in their current form, would deem any such transactions to be "listed transactions." If the relevant Issuer, an Index Sponsor or calculation agent or other person were to exercise discretion under the terms of a Security or an index underlying a Security and were treated as a Securityholder's "designee" for these purposes, unless an exception applied, certain holders of the relevant Securities would be required to report certain information to the IRS, as set forth in the applicable Treasury regulations, or be subject to penalties. The relevant Issuer might also be required to report information regarding the transaction to the IRS.

## **8 Risks relating to Securities linked to Underlying(s)**

### ***General risks relating to Securities linked to Underlying(s)***

An investment in Securities linked to Underlying(s) has significant risks that are not associated with a similar investment in a conventional security (e.g., a debt instrument that has a pre-determined specified principal amount, is denominated in the investor's currency and bears interest at either a fixed or a floating rate based on nationally published interest rate references), as amounts due or assets deliverable in respect of such Securities are linked to the performance of the relevant Underlying(s).

The risks associated with a particular Security linked to Underlying(s) will depend on factors over which none of the Issuers, the CGMHI Guarantor and the CGMFL Guarantor has any control and which cannot readily be foreseen, and the return on Securities linked to Underlying(s) may attract certain of the same risks as an actual investment in the relevant Underlying(s). These risks include economic and political events and the supply of, and demand for, any relevant Underlying(s).

Each of these risks may have an impact on the level, price, rate or other applicable value of an Underlying, which may go down as well as up throughout the term of the Securities, and such fluctuations may affect the value of and return on the Securities.

Furthermore, in recent years, prices for various Underlying(s) have been highly volatile. Such volatility may be expected in the future. Fluctuations in the rates, levels or prices that have occurred in the past are not necessarily indicative, however, of fluctuations that may occur during the term of any Securities linked to Underlying(s).

In addition, the value of any relevant Underlying(s) may be determined or published by any Issuer, the CGMHI Guarantor and/or the CGMFL Guarantor or an affiliate of any such entity or determined or published by third parties or entities which are not subject to regulation under the laws of the United States, the EEA or the United Kingdom.

The risk of loss as a result of linking principal, interest and/or termination payments to Underlying(s) can be substantial and the payment of principal, interest and/or termination amounts may be contingent on the occurrence of certain events in respect of Underlying(s) which may not occur.

### ***No rights of ownership in Underlying(s)***

The Securities do not create an actual interest in, or ownership of, the relevant Underlying(s). Except in certain circumstances where the Securities are Physical Delivery Securities, a Security will not represent a claim against any Underlying and, in the event that the amount paid on redemption of the Securities is less than the nominal amount of the Securities, the Securityholder will not have recourse under any relevant Security to any security indices, commodities, shares, depositary receipts, exchange traded funds, mutual funds, currencies, dividend futures contracts, interest rates or other items which may comprise the relevant Underlying(s) in respect of such Securities. The exposure to the relevant Underlying(s) is notional and an investment in the Securities is not an investment in the relevant Underlying(s). Although the performance of the relevant Underlying(s) will have an effect on the Securities, the relevant Underlying(s) and the Securities are separate obligations of different legal entities. Investors will have no legal or beneficial interest in the relevant Underlying(s). Accordingly, an investor may receive a lower return on the Securities than it would have received had it invested directly in the Underlying(s) or through another product.

### ***Risks associated with Securities relating to Security Indices***

The level of a security index is generally based on the value of the component securities of that index although investors should note that the level of a security index at any time may not include the reinvestment of the yield on the component securities. Global economic, financial and political developments, among other things, may have a material effect on the value of the component securities and/or the performance of a security index, and this may in turn affect the value of and return on the Securities.

The risks of a particular Security linked to a security index will depend on the terms of that Security. Such risks may include the possibility of significant changes in:

- the prices of the component securities and the weighting of each component security within the relevant index or indices;
- other objective prices; and
- economic or other measures making up the relevant security index or indices.

Market volatility reflects the degree of instability and expected instability of the performance of a security index and the component securities. The level of market volatility is largely determined by the prices for financial instruments supposed to protect investors against such market volatility. The prices of these instruments are determined by forces of supply and demand in the options and derivative markets generally. These forces are, themselves, affected by factors such as actual market volatility, expected volatility, economic factors and speculation. In recent years, currency exchange rates and prices for component securities have been highly volatile. Such volatility may be expected in the future. Fluctuations in the rates or prices that have occurred in the past are not necessarily indicative, however, of fluctuations that may occur during the term of any Security relating to security indices.

The above factors may have an effect on the performance of a security index, and this may in turn affect the value of and return on the Securities.

Investors should note that any dividends, other distributions assets and/or amounts paid to holders of the component securities will not be paid to the relevant Issuer, the CGMHI Guarantor (where the Issuer is CGMHI), the CGMFL Guarantor (where the Issuer is CGMFL) or to the Securityholders. The return on Securities will thus not reflect any such assets and/or amounts which would otherwise be paid to investors that have made a direct investment in any such component securities. Consequently, the return on Securities may be less than the return from a direct investment in any such component securities.

In considering whether to purchase Securities relating to security indices, each investor should be aware that the calculation of amounts payable or, as applicable, assets due on Securities relating to security indices may involve reference to:

- an index determined by an affiliate of the relevant Issuer, the CGMHI Guarantor (if applicable) and/or the CGMFL Guarantor (if applicable); or
- prices that are published solely by third parties or entities which are not regulated by the laws of the United States, the EEA, the United Kingdom or the jurisdiction of the particular investor.

Accordingly, investors may receive a lower return on Securities linked to a Security Index than they would have received if they had invested in the components of such index directly or in another product.

See Underlying Schedule 1 (*Security Index Conditions*) for the specific terms and conditions in respect of Securities linked to security indices.

***The type and rules of the Security Index (or Security Indices) to which the Securities are linked may have an adverse effect on the value of and return on the Securities***

***Price Return and Total Return Indices***

The rules governing the composition and calculation of the relevant Security Index may stipulate that dividends paid on its components are included in the calculation of the index level (a "Total Return" Index) or are not included in the calculation of the index level (a "Price Return" Index).

Where Securities are linked to a "price return" index, holders of the Securities will not participate in dividends paid on the components comprising the Security Index. As a result, holders of Securities linked to such Security Index would lose the benefit of any dividends paid by the components of the Security Index and such Securities may not perform as well as a position where such holder had invested directly in such components or where they invested in a "total return" version of the Security Index, or in another product.

In the case of Securities linked to a "total return" index, net dividends (in the case of a "net total return" index) or gross dividends (in the case of a "gross total return" index) paid on its components are included in the calculation of the index level. In the case of a "net total return" index, dividends paid on its components may not be fully reinvested in the Security Index and accordingly, you may receive a lower return on Securities linked to such Security Index than you would have received if you had invested in the components of such Security Index directly or in another product.

***Decrement Indices***

If the Security Index has a "decrement" feature, the return on such Security Index will be calculated by reinvesting net dividends or gross dividends (depending on the type and rules of such Security Index) paid by its components and by subtracting on a daily basis a pre-defined amount (a **Synthetic Dividend**). The Synthetic Dividend may be defined as a percentage of the index level or as a fixed number of index points. Investors should note that any of the following factors, where applicable, could adversely affect the value of and return on Securities linked to a "decrement" index:

A Security Index with a "decrement" feature will underperform a "total return" index that is used as a base index to calculate such Security Index since the latter is calculated without the deduction of a Synthetic Dividend. Similarly, where such Security Index tracks the performance of a single component security, the Security Index will underperform a direct investment in such component security as such investment would benefit from dividends paid by the component security without the deduction of a Synthetic Dividend.

A Security Index with a "decrement" feature will underperform the corresponding "price return" index if the amount of dividends paid by the components of such Security Index is less than the amount of the Synthetic Dividend deducted. Where such Security Index tracks the performance of a single component security, the Security Index will underperform a direct investment in such component security as such investment would benefit from dividends paid by the component security without the deduction of a Synthetic Dividend.

Where the Synthetic Dividend is defined as a fixed number of index points (as opposed to a percentage of the index level), the Synthetic Dividend yield (calculated as the ratio of the fixed index point decrement to the relevant decrement index level) will increase in a falling equities market as the Synthetic Dividend is a fixed amount. In such scenario, the fixed deduction will have a greater negative impact on the index level of the relevant Security Index than if the Synthetic Dividend was defined as a percentage of the index level. It is even possible that in a steeply falling

market scenario the index level could become negative, since the amount of decrement expressed in index points will not vary with the level of the decrement index.

***Disrupted Days, Adjustment Events and Early Redemption Events in relation to Securities linked to Security Indices***

As the terms and conditions of Securities relating to security indices include provisions dealing with the postponement of a Valuation Date due to the occurrence of a Disrupted Day, such postponement or any alternative provisions for valuation provided in the terms and conditions of such Securities may have an adverse effect on the value of such Securities.

Certain events or occurrences described below will only be relevant if the associated Adjustment Events and Early Redemption Events are specified as being applicable for a security index in the applicable Final Terms.

If the Calculation Agent determines that an Adjustment Event occurs in respect of any security index (being, in each case if applicable, (a) the occurrence at any time of a change in law affecting any underlying hedging position in relation to the Securities or materially increasing the relevant Issuer's costs in relation to performing its obligations in respect of the Securities, or a Hedging Disruption or an Increased Cost of Hedging; (b) such security index (i) not being calculated and announced by or on behalf of the relevant index sponsor but instead being calculated and announced by or on behalf of a successor to the relevant index sponsor or (ii) being replaced by a successor index; or (c) any Additional Disruption Event specified in the applicable Final Terms), then the Calculation Agent shall make such adjustment(s) to the terms of the Securities as the Calculation Agent determines necessary to account for the effect of such Adjustment Event or the Calculation Agent may replace the security index the subject of the Adjustment Event with a new security index using, in the determination of the Calculation Agent, the same or a substantially similar formula and method of calculation as used in the calculation of the level of such security index. Any such adjustment may include, in the case of an Increased Cost of Hedging, adjustments to pass on to Securityholders any such Increased Cost of Hedging (including, but not limited to, reducing any amounts payable or deliverable in respect of the Securities to reflect any such increased costs). Any such adjustments may have an adverse effect on the value of such Securities and, if the Calculation Agent determines that no adjustment can reasonably so be made, such Adjustment Event shall be an Early Redemption Event.

If the Calculation Agent determines that a Security Index Adjustment Event occurs (being, in each case if applicable, in respect of a security index, the relevant index sponsor announcing that it will make a material change to a relevant security index, the index sponsor permanently cancelling the index and no successor index existing or the index sponsor or any other person or entity acting on its behalf failing to calculate and announce the relevant index), then the Calculation Agent may determine whether such Security Index Adjustment Event has a material effect on the relevant Securities and, if so, shall either (A) calculate the relevant level of such security index in accordance with the formula for and method of calculating the relevant security index last in effect prior to the applicable change, cancellation or failure and/or (B) substitute the affected security index with a replacement index using, in the determination of the Calculation Agent, the same or a substantially similar formula and method of calculation as used in the calculation of the level of such security index and determine any adjustment necessary to the terms of the Securities to account for such substitution and/or (C) make such adjustments to the terms of the Securities as it determines necessary or appropriate to account for the effect of such Security Index Adjustment Event. Any such calculation, substitution and/or adjustment may have an adverse effect on the value of such Securities and, if the Calculation Agent determines that no calculation or substitution can reasonably so be made, such Security Index Adjustment Event shall be an Early Redemption Event.

If an Early Redemption Event occurs (being, in each case if applicable, (a) circumstances in which the Calculation Agent determines that no adjustment or substitution can reasonably be made following an Adjustment Event, (b) no calculation or substitution can reasonably be made following a Security Index Adjustment Event, (c) a Section 871(m) Event or (d) a Hedging Disruption Early Termination Event (if specified as applicable in the applicable Final Terms)), the Securities may be redeemed as more fully set out in the terms and conditions of the relevant Securities. If the Securities are redeemed early, the relevant Issuer will pay to each Securityholder in respect of each Calculation Amount held by such holder an amount calculated in accordance with the method specified in the applicable Final Terms, as determined by the Calculation Agent. The amount repaid to the investors may be less than the investor's initial investment and the investor may therefore sustain a loss.

***Risks associated with Securities linked to Inflation Indices***

The risks of a particular Security relating to inflation indices will depend on the terms of that Security. Many economic and market factors may influence an inflation index and consequently the value of Securities relating to inflation indices, including general economic, financial, political or regulatory conditions and/or events; and/or fluctuations in the prices of various assets, goods, services and energy resources (including in response to supply of, and demand for, any of them); and/or the level of inflation in the economy of the relevant country and expectations of inflation. In particular, the level of an inflation index may be affected by factors unconnected with the financial markets. Any such factor may either offset or magnify one or more of the other factors.

The performance of an inflation index will affect the amounts payable in respect of Securities relating to inflation indices and may result in investors receiving less than their original investment and/or no return on their investment, or in certain circumstances zero.

The rate of interest (if any) payable in respect of inflation index-linked interest Securities will vary for each interest payment due and may be less than that which would be payable on a conventional fixed rate, non-callable debt security of the relevant Issuer of comparable maturity.

See Underlying Schedule 2 (*Inflation Index Conditions*) for the specific terms and conditions in respect of Securities linked to inflation indices.

***Adjustment Events and Early Redemption Events in relation to Securities linked to inflation indices***

If an underlying closing level for an inflation index for a specified reference month has not been published or announced by five business days prior to the relevant payment date, then the Calculation Agent shall determine a substitute index level. Any such substitution may have an adverse effect on the value of such Securities.

Investors should note that certain events may not be applicable, depending on whether these are specified as applicable in the applicable Final Terms. Accordingly, certain events or occurrences described below will only be relevant if the associated Adjustment Events and Early Redemption Events are specified as being applicable for an inflation index in the applicable Final Terms.

If the Calculation Agent determines that an Adjustment Event occurs in respect of any inflation index (being, in each case if applicable, (a) the occurrence at any time of a change in law affecting any underlying hedging position in relation to the Securities or materially increasing the relevant Issuer's costs in relation to performing its obligations in respect of the Securities or, a Hedging Disruption or, an Increased Cost of Hedging, or (b) the imposition of increased or unexpected fees and costs for the use of such index on the relevant Issuer and/or any of its affiliates by the relevant index sponsor which the Calculation Agent deems material), then the Calculation Agent shall make such adjustment(s) to the terms of the Securities as the Calculation Agent determines necessary to account for the effect of such Adjustment Event including, in the case of an Increased Cost of

Hedging, adjustments to pass on to Securityholders any such Increased Cost of Hedging (including, but not limited to, reducing any amounts payable or deliverable in respect of the Securities to reflect any such increased costs). Any such adjustments may have an adverse effect on the value of such Securities and, if the Calculation Agent determines that no adjustment can reasonably so be made, such Adjustment Event shall be an Early Redemption Event.

If "Revision" is specified as applicable for an inflation index in the applicable Final Terms, then any revision to an underlying closing level of an inflation index occurring before the relevant revision cut-off date shall be considered final and conclusive for the purpose of any determination made in respect of the Securities. If "No Revision" is specified as applicable in the applicable Final Terms (or if "Revision" is not specified as applicable) then the first publication and announcement of an underlying closing level for such inflation index shall be final and conclusive. Further, if the Calculation Agent determines that the index sponsor of an inflation index has corrected an underlying closing level for such index to correct a manifest error no later than the earlier to occur of the relevant manifest error cut-off date and thirty calendar days following the first publication and announcement of such level, then the Calculation Agent may use the corrected level of such inflation index for the purposes of any calculation in respect of the relevant payment date. In the event of inconsistency between a revision and a manifest error correction, the manifest error correction shall prevail. Any such adjustment (or absence of an adjustment, for the purpose of the Securities) to any level of an inflation index may have an adverse effect on the value of the Securities.

If the Calculation Agent determines that either (a) a level for an inflation index has not been published or announced for two consecutive months and/or (b) the relevant index sponsor announces that it will no longer continue to publish or announce such inflation index and/or (c) the relevant index sponsor cancels such inflation index then the Calculation Agent may replace the originally designated inflation index with a successor index. Any such adjustment may have an adverse effect on the value of the Securities and, if no successor index can be determined, then an Early Redemption Event shall occur with respect to the Securities.

If an index sponsor announces, in respect of an inflation index, that it will make a material change to a relevant inflation index then the Calculation Agent shall make such consequential adjustments to the terms of the Securities as are consistent with any adjustment made to any relevant fallback bond or as are necessary for such modified inflation index to continue as an inflation index for the purpose of the Securities. Any such adjustments may have an adverse effect on the value of such Securities and, if the Calculation Agent determines that no adjustment can reasonably so be made, then an Early Redemption Event shall occur with respect to the Securities.

If an Early Redemption Event occurs (being, in each case if applicable, (a) circumstances in which the Calculation Agent determines that no adjustment can reasonably be made following an Adjustment Event, (b) no successor index can be determined or no adjustment can reasonably be made following a material change to a relevant inflation index, (c) a Section 871(m) Event or (d) a Hedging Disruption Early Termination Event (if specified as applicable in the applicable Final Terms)), the Securities may be redeemed as more fully set out in the terms and conditions of the relevant Securities. If the Securities are redeemed early, the relevant Issuer will pay to the Securityholders in respect of each Calculation Amount held by any Securityholder an amount calculated in accordance with the method specified in applicable Final Terms, as determined by the Calculation Agent. The amount repaid to the investors could be substantially less than the investor's initial investment and the investor could therefore sustain a loss.

### ***Risks associated with Securities linked to Commodities***

Movements in the price of any relevant commodities may be subject to significant fluctuations that may not correlate with changes in interest rates, currencies or other indices and the timing of changes in the relevant price of a commodity or commodities may affect the actual yield of the Securities, even if the average level is consistent with their expectations. In general, the earlier the change in the price or prices of the commodities, the greater the effect on yield of the Securities.

Commodity futures markets are highly volatile. Commodity markets are influenced by, among other things, changing supply and demand relationships, weather, governmental, agricultural, commercial and trade programmes and policies designed to influence commodity prices, world political and economic events, and changes in interest rates. Moreover, investments in futures and options contracts involve additional risks including, without limitation, leverage (margin is usually a percentage of the face value of the contract and exposure can be nearly unlimited). A holder of a futures position may find such position becomes illiquid because certain commodity exchanges limit fluctuations in certain futures contract prices during a single day by regulations referred to as "daily price fluctuation limits" or "daily limits". Under such daily limits, during a single trading day no trades may be executed at prices beyond the daily limits. Once the price of a contract for a particular future has increased or decreased by an amount equal to the daily limit, positions in the future can neither be taken nor liquidated unless traders are willing to effect trades at or within the limit. This could prevent a holder from promptly liquidating unfavorable positions and subject it to substantial losses. Futures contract prices in various commodities occasionally have exceeded the daily limit for several consecutive days with little or no trading. Similar occurrences could prevent the liquidation of unfavorable positions and could therefore have a material adverse impact on value of and return on the Securities.

See Underlying Schedule 3 (*Commodity Conditions*) for the specific terms and conditions in respect of Securities linked to commodities.

### ***Risk related to the possible rolling mechanism of commodity futures contracts***

The yield on Securities relating to commodities may not perfectly correlate to the trend in the price of the underlying commodities as the use of such future commodity contracts generally involves a rolling mechanism. This means that the commodity futures contracts which expire prior to the relevant payment date under the relevant Securities are replaced with future commodity contracts that have a later expiry date. Investors may therefore only marginally benefit from any rise/fall in prices on such commodities.

Investors should also consider that the commodity futures contracts could have a trend which differs significantly from that of the commodity spot markets. The trend in the price of a commodity futures contracts compared to the underlying commodity is closely linked to the present and future level of the production of the underlying commodity or to the level of estimated natural reserves, particularly in the case of energy commodities. In addition, the price of the relevant commodity futures contract may not be considered an accurate prediction of a market price, since it also includes the so-called "carrying costs" (such as, for example, warehouse costs, insurance covering the goods, transportation etc.), which also contribute toward the determination of the price of the commodity futures contracts. These factors which directly influence the commodities prices substantially explain the imperfect correlation between the commodity spot markets and the commodity futures contracts. Accordingly, Investors may receive a lower return on Securities linked to one or more commodity futures contracts than they would have received if they had invested in relevant commodity spot market(s) or in another related product.

***Disrupted Days, Adjustment Events and Early Redemption Events in relation to Securities linked to Commodities***

As the terms and conditions of Securities relating to commodities include alternative provisions for valuation and/or provisions dealing with the postponement of a Valuation Date due to the occurrence of a Disrupted Day, such alternative provisions for valuation or postponement may have a material adverse effect on the value of and return on such Securities.

Certain events or occurrences described below will only be relevant if the associated Adjustment Events and Early Redemption Events are specified as being applicable for commodities in the applicable Final Terms.

If the Calculation Agent determines that an Adjustment Event occurs in respect of any commodity (being, in each case if applicable, the occurrence at any time of a change in law affecting any underlying hedging position in relation to the Securities or materially increasing the relevant Issuer's costs in relation to performing its obligations in respect of the Securities or a Hedging Disruption or an Increased Cost of Hedging), then the Calculation Agent shall make such adjustment(s) to the terms of the Securities as the Calculation Agent determines necessary to account for the effect of such Adjustment Event including, in the case of an Increased Cost of Hedging, adjustments to pass on to Securityholders any such Increased Cost of Hedging (including, but not limited to, reducing any amounts payable or deliverable in respect of the Securities to reflect any such increased costs). Any such adjustments may have an adverse effect on the value of such Securities and, if the Calculation Agent determines that no adjustment can reasonably so be made, such Adjustment Event shall be an Early Redemption Event.

If an Early Redemption Event occurs (being, in each case if applicable, (a) circumstances in which the Calculation Agent determines that no adjustment can reasonably be made following an Adjustment Event, (b) the occurrence of a disruption event and any relevant disruption fallbacks fail (or are deemed to fail) to provide a relevant price in respect of a commodity and a valuation date, (c) any Additional Early Redemption Event specified in the applicable Final Terms (being an "abandonment of scheme" in relation to commodities that are emissions) the Securities may be redeemed as more fully set out in the terms and conditions of the relevant Securities. If the Securities are redeemed early, the relevant Issuer will pay to Securityholder in respect of each Calculation Amount held by such holder an amount calculated in accordance with the method specified in the applicable Final Terms, as determined by the Calculation Agent. The amount repaid to investors could be substantially less than the investor's initial investment and the investor could therefore sustain a loss.

***Risks associated with Securities linked to Shares***

Securities linked to shares will give rise to obligations of the relevant Issuer and, where the Issuer is CGMHI, the CGMHI Guarantor or, where the Issuer is CGMFL, the CGMFL Guarantor and will not give rise to any obligations of any share company, and accordingly investors will have no recourse against any (such) share company.

No issuer of such shares will have participated in the preparation of the applicable Final Terms or in establishing the terms of the Securities and none of the relevant Issuer, the CGMHI Guarantor (if applicable), the CGMFL Guarantor (if applicable) and any Dealer will make any investigation or enquiry in connection with such offering with respect to the information concerning any such issuer of shares contained in such Final Terms or in the documents from which such information was extracted. Consequently, there can be no assurance that all events occurring prior to the relevant issue date (including events that would affect the accuracy or completeness of the publicly available documents described in this paragraph or in any applicable Final Terms) that would affect the trading price of the share will have been publicly disclosed. Subsequent disclosure of any such

events or the disclosure of or failure to disclose material future events concerning such an issuer of shares could affect the trading price of the shares and therefore the trading price of the relevant Securities.

Except as provided in the applicable Final Terms in relation to Physical Delivery Securities, Securityholders will not have voting rights or rights to receive dividends or distributions or any other rights with respect to the relevant shares to which such Securities relate. The return on such Securities may thus not reflect any dividends or other distributions which would be paid to investors that have made a direct investment in the relevant shares. Consequently, the return on Securities linked to shares may be less than the return from a direct investment in the relevant shares.

The risks of a Security relating to shares will depend on the terms of that Security. Such risks may include, but are not limited to, the possibility of significant changes in the price(s) of the share or shares. The value of shares may go down as well as up and the value of any share on any date may not reflect its performance in any prior period. There can be no assurance as to the future value of any share or of the continued existence of any share or share company. Accordingly, before making an investment decision with respect to Securities, prospective investors should carefully consider, among other matters, the value and price volatility of the relevant shares, as this may affect the value of and return on the Securities.

In addition, the calculation of amounts payable on such Securities may involve reference to the performance of one or more shares over a period of time and to shares, the issuer(s) of which are incorporated outside the United States, the EEA and the United Kingdom.

Accordingly, investors may receive a lower return on Securities linked to one or more shares than they would have received if they had invested directly in the shares or in another product.

See Underlying Schedule 4 (*Share Conditions*) for the specific terms and conditions in respect of Securities linked to shares.

***Disrupted Days, Adjustment Events and Early Redemption Events in relation to Securities linked to Shares***

As the terms and conditions of the Securities relating to shares include provisions dealing with the postponement of a Valuation Date due to the occurrence of a Disrupted Day, such postponement or any alternative provisions for valuation provided in the terms and conditions of such Securities may have an adverse effect on the value of such Securities.

Certain events or occurrences described below will only be relevant if the associated Adjustment Events and Early Redemption Events are specified as being applicable for a share in the applicable Final Terms.

If the Calculation Agent determines that an Adjustment Event occurs in respect of a share (being, in each case if applicable, (a) the occurrence at any time of a change in law affecting any underlying hedging position in relation to the Securities or materially increasing the relevant Issuer's costs in relation to performing its obligations in respect of the Securities or a Hedging Disruption or an Increased Cost of Hedging, or (b) a corporate action, de-listing, insolvency, merger event, nationalisation, tender offer and/or any Additional Disruption Event specified in the applicable Final Terms), then the Calculation Agent shall make such adjustment(s) to the terms of the Securities as the Calculation Agent determines necessary to account for the effect of such Adjustment Event or the Calculation Agent may replace the share that is the subject of the Adjustment Event with a new Share selected by the Calculation Agent from an applicable reference index. Any such adjustment may include, in the case of an Increased Cost of Hedging, adjustments to pass on to Securityholders any such Increased Cost of Hedging (including, but not limited to, reducing any amounts payable or deliverable in respect of the Securities to reflect any such

increased costs). Any such adjustment(s) or substitution may have an adverse effect on the value of such Securities and, if the Calculation Agent determines that no adjustment(s) or substitution can reasonably so be made, such Adjustment Event shall be an Early Redemption Event.

If an Early Redemption Event occurs (being, in each case if applicable, (a) circumstances where the Calculation Agent determines that no adjustment or substitution can reasonably be made following an Adjustment Event, (b) a Section 871(m) Event or (c) a Hedging Disruption Early Termination Event (if specified as applicable in the applicable Final Terms)), the Securities may be redeemed as more fully set out in the terms and conditions of the relevant Securities. If the Securities are redeemed early, the relevant Issuer will pay to each Securityholder in respect of each Calculation Amount held by such holder an amount calculated in accordance with the method specified in the applicable Final Terms, as determined by the Calculation Agent. The amount repaid to investors could be substantially less than the investor's initial investment and the investor could therefore sustain a loss.

### ***Risks associated with Securities linked to Depositary Receipts***

Securities linked to depositary receipts will give rise to obligations of the relevant Issuer and, where the Issuer is CGMHI, the CGMHI Guarantor or, where the Issuer is CGMFL, the CGMFL Guarantor and will not give rise to any obligations of any depositary or any underlying share company, and accordingly investors will have no recourse against any such depositary or underlying share company.

No issuer of such depositary receipts or any underlying shares related to such depositary receipts will have participated in the preparation of the applicable Final Terms or in establishing the terms of the Securities and none of the relevant Issuer, the CGMHI Guarantor (if applicable), the CGMFL Guarantor (if applicable) nor any Dealer will make any investigation or enquiry in connection with such offering with respect to the information concerning any depositary or any related underlying share company contained in such Final Terms or in the documents from which such information was extracted. Consequently, there can be no assurance that all events occurring prior to the relevant issue date (including events that would affect the accuracy or completeness of the publicly available documents described in this paragraph or in any applicable Final Terms) that would affect the trading price of the depositary receipt or the underlying share will have been publicly disclosed. Subsequent disclosure of any such events or the disclosure of or failure to disclose material future events concerning such depositary or underlying share company could affect the trading price of the depositary receipts and therefore the trading price of the relevant Securities.

Except as provided in the applicable Final Terms in relation to Physical Delivery Securities, Securityholders will not have voting rights or rights to receive dividends or distributions or any other rights with respect to the relevant depositary receipts and/or underlying shares to which such Securities relate. The return on such Securities may thus not reflect any dividends or other distributions which would be paid to investors that have made a direct investment in the relevant depositary receipts and/or underlying shares. Consequently, the return on Securities linked to depositary receipts may be less than the return from a direct investment in the relevant depositary receipts and/or underlying shares.

The risks of a Security relating to depositary receipts will depend on the terms of that Security. Such risks may include, but are not limited to, the possibility of significant changes in the price(s) of the depositary receipts. The value of depositary receipts may go down as well as up and the value of any depositary receipt on any date may not reflect its performance in any prior period. There can be no assurance as to the future value of any depositary receipts or of the continued existence of any depositary and/or underlying share company. Accordingly, before making an investment decision with respect to Securities, prospective investors should carefully consider, among other

matters, the value and price volatility of depositary receipts and relevant underlying shares, as this may affect the value of and return on the Securities.

In addition, the calculation of amounts payable on such Securities may involve reference to the performance of one or more depositary receipts and the related underlying shares over a period of time and to depositary receipts and/or underlying shares, the issuer(s) of which are incorporated outside the United States, the EEA and the United Kingdom.

Accordingly, investors may receive a lower return on Securities linked to one or more depositary receipts than they would have received if they had invested directly in the depositary receipts or in another product.

See Underlying Schedule 5 (*Depositary Receipt Conditions*) for the specific terms and conditions in respect of Securities linked to depositary receipts.

***Disrupted Days, Adjustment Events and Early Redemption Events in relation to Securities linked to Depositary Receipts***

As the terms and conditions of the Securities include provisions dealing with the postponement of a Valuation Date due to the occurrence of a Disrupted Day, such postponement or any alternative provisions for valuation provided in the terms and conditions of such Securities may have a material adverse effect on the value of and return on such Securities.

Certain events or occurrences described below will only be relevant if the associated Adjustment Events and Early Redemption Events are specified as being applicable for a depositary receipt in the applicable Final Terms.

If the Calculation Agent determines that an Adjustment Event occurs in respect of a depositary receipt and/or an underlying share (being, in each case if applicable, (a) the occurrence at any time of a change in law affecting any underlying hedging position in relation to the Securities or materially increasing the relevant Issuer's costs in relation to performing its obligations in respect of the Securities or a Hedging Disruption or an Increased Cost of Hedging or (b) a corporate action, delisting, insolvency, merger event, nationalisation, tender offer, written instructions being given by an underlying share company to the relevant depositary to withdraw or surrender underlying shares or the termination of a relevant deposit agreement and/or any Additional Disruption Event specified in the applicable Final Terms), then the Calculation Agent shall make such adjustment(s) to the terms of the Securities as the Calculation Agent determines necessary to account for the effect of such Adjustment Event or the Calculation Agent may replace the depositary receipt and/or the underlying share that is the subject of the Adjustment Event with a new depositary receipt selected by the Calculation Agent (referencing, where "same underlying share and currency" is specified as the Depositary Receipt Substitution Criteria in the applicable Final Terms, the same underlying share and denominated in the same currency as the previous depositary receipt (and, if no such depositary receipt is selected or available, then the underlying share shall be substituted and a new depositary receipt selected in respect of such new underlying share)) and/or a new share selected by the Calculation Agent from an applicable reference index. Any such adjustment may include, in the case of an Increased Cost of Hedging, adjustments to pass on to Securityholders any such Increased Cost of Hedging (including, but not limited to, reducing any amounts payable or deliverable in respect of the Securities to reflect any such increased costs). Any such adjustment(s) or substitution may have an adverse effect on the value of such Securities and, if the Calculation Agent determines that no adjustment(s) or substitution can reasonably so be made, such Adjustment Event shall be an Early Redemption Event.

If an Early Redemption Event occurs (being, in each case if applicable, (a) circumstances where the Calculation Agent determines that no adjustment(s) or substitution can reasonably be made

following an Adjustment Event, (b) a Section 871(m) Event or (c) a Hedging Disruption Early Termination Event (if specified as applicable in the applicable Final Terms)), the Securities may be redeemed as more fully set out in the terms and conditions of the relevant Securities. If the Securities are redeemed early, the relevant Issuer will pay to each Securityholder in respect of each Calculation Amount held by such holder an amount calculated in accordance with the method specified in the applicable Final Terms, as determined by the Calculation Agent. The amount repaid to investors could be substantially less than the investor's initial investment and the investor could therefore sustain a loss.

***Risks associated with Securities linked to ETF Shares***

Securities linked to ETF shares will give rise to obligations of the relevant Issuer and, where the Issuer is CGMHI, the CGMHI Guarantor or, where the Issuer is CGMFL, the CGMFL Guarantor and will not give rise to any obligations of the issuer of any ETF shares, and accordingly investors will have no recourse against any such issuer.

No issuer of ETF shares will have participated in the preparation of the applicable Final Terms or in establishing the terms of the Securities and none of the relevant Issuer, the CGMHI Guarantor (if applicable), the CGMFL Guarantor (if applicable) nor any Dealer will make any investigation or enquiry in connection with such offering with respect to the information concerning any such issuer of ETF shares contained in such Final Terms or in the documents from which such information was extracted. Consequently, there can be no assurance that all events occurring prior to the relevant issue date (including events that would affect the accuracy or completeness of the publicly available documents described in this paragraph or in any applicable Final Terms) that would affect the trading price of the ETF share will have been publicly disclosed. Subsequent disclosure of any such events or the disclosure of or failure to disclose material future events concerning such an issuer of ETF shares could affect the trading price of the ETF share and therefore the trading price of the relevant Securities.

Except as provided in the applicable Final Terms in relation to Physical Delivery Securities, Securityholders will not have voting rights or rights to receive dividends or distributions or any other rights with respect to the relevant ETF shares to which such Securities relate. The return on such Securities may thus not reflect any dividends or other distributions which would be paid to investors that have made a direct investment in relevant ETF shares. Consequently, the return on Securities linked to ETF shares may be less than the return from a direct investment in the relevant ETF shares.

The risks of a Security relating to ETF shares will depend on the terms of that Security. Such risks may include, but are not limited to, the possibility of significant changes in the price(s) of the ETF shares. The value of ETF shares may go down as well as up and the value of any ETF share on any date may not reflect its performance in any prior period. There can be no assurance as to the future value of any ETF share or of the continued existence of any ETF share or the issuer of such ETF share. Accordingly, before making an investment decision with respect to Securities, prospective investors should carefully consider, among other matters, the value and price volatility of ETF shares, as this may affect the value of and return on the Securities.

In addition, the calculation of amounts payable on such Securities may involve reference to the performance of one or more ETF shares over a period of time and to ETF shares, the issuer(s) of which are established outside the United States, the EEA and the United Kingdom.

Accordingly, investors may receive a lower return on Securities linked to one or more ETF Shares than they would have received if they had invested directly in the ETF Shares or in another product.

See Underlying Schedule 6 (*Exchange Traded Fund (ETF) Share Conditions*) for the specific terms and conditions in respect of Securities linked to ETF shares.

***Disrupted Days, Adjustment Events and Early Redemption Events in relation to Securities linked to ETF Shares***

As the terms and conditions of the Securities relating to ETF shares include provisions dealing with the postponement of a Valuation Date due to the occurrence of a Disrupted Day, such postponement or any alternative provisions for valuation provided in the terms and conditions of such Securities may have a material adverse effect on the value of and return on such Securities.

Certain events or occurrences described below will only be relevant if the associated Adjustment Events and Early Redemption Events are specified as being applicable for an ETF share in the applicable Final Terms. While ETF shares are traded on an exchange and are therefore valued in a similar manner as a Share traded on an exchange, the Adjustment Events in relation to Securities linked to ETF shares include certain adjustments which would be applicable to Securities linked to an underlying fund.

If the Calculation Agent determines that an Adjustment Event occurs in respect of an ETF share (being, in each case if applicable, (a) the occurrence at any time of a change in law affecting any underlying hedging position in relation to the Securities or materially increasing the relevant Issuer's costs in relation to performing its obligations in respect of the Securities or a Hedging Disruption or an Increased Cost of Hedging; (b) a corporate action, delisting, insolvency, merger event, nationalisation, tender offer, fund modification, strategy breach, regulatory action, cross-contamination and/or any Additional Disruption Event specified in the applicable Final Terms), then the Calculation Agent shall make such adjustment(s) to the terms of the Securities as the Calculation Agent determines necessary to account for the effect of such Adjustment Event or the Calculation Agent may replace the ETF share that is the subject of the Adjustment Event with a new ETF share selected by the Calculation Agent (which shall be an ETF share which, where a "related index" is specified in the applicable Final Terms, tracks such related index, or an index substantially similar in formula and calculation method). Any such adjustment may include, in the case of an Increased Cost of Hedging, adjustments to pass on to Securityholders any such Increased Cost of Hedging (including, but not limited to, reducing any amounts payable or deliverable in respect of the Securities to reflect any such increased costs). Any such adjustment(s) or substitution may have an adverse effect on the value of such Securities and, if the Calculation Agent determines that no adjustment(s) or substitution can reasonably so be made, such Adjustment Event shall be an Early Redemption Event.

If an Early Redemption Event occurs (being, in each case if applicable, (a) circumstances where the Calculation Agent determines that no adjustment(s) or substitution can reasonably be made following an Adjustment Event, (b) a Section 871(m) Event or (c) a Hedging Disruption Early Termination Event (if specified as applicable in the applicable Final Terms)), the Securities may be redeemed as more fully set out in the terms and conditions of the relevant Securities. If the Securities are redeemed early, the relevant Issuer will pay to each Securityholder in respect of each Calculation Amount held by such holder an amount calculated in accordance with the method specified in the applicable Final Terms, as determined by the Calculation Agent. The amount repaid to investors could be substantially less than the investor's initial investment and the investor could therefore sustain a loss.

***Risks associated with Securities linked to Mutual Fund Interests***

Securities linked to mutual fund interests will give rise to obligations of the relevant Issuer, and, where the Issuer is CGMHI, the CGMHI Guarantor or, where the Issuer is CGMFL, the CGMFL Guarantor and will not give rise to any obligations of any mutual fund administrator, adviser or

manager in respect of a mutual fund, and accordingly you will have no recourse against any such mutual fund administrator, adviser or manager.

No mutual fund administrator, adviser or manager in respect of a mutual fund will have participated in the preparation of the applicable Final Terms or in establishing the terms of the Securities and none of the relevant Issuer, the CGMHI Guarantor (if applicable), the CGMFL Guarantor (if applicable) and any Dealer will make any investigation or enquiry in connection with such offering with respect to the information concerning any such mutual fund contained in such Final Terms or in the documents from which such information was extracted. Consequently, there can be no assurance that all events occurring prior to the relevant issue date (including events that would affect the accuracy or completeness of the publicly available documents described in this paragraph or in any applicable Final Terms) that would affect the value of the mutual fund interest will have been publicly disclosed. Subsequent disclosure of any such events or the disclosure of or failure to disclose material future events concerning such mutual fund could affect the value of the mutual fund interest and therefore the trading price of the Securities.

Except as provided in the applicable Final Terms in relation to Physical Delivery Securities, Securityholders will not have voting rights or rights to receive dividends or distributions or any other rights with respect to the relevant mutual fund interests to which such Securities relate. The return on such Securities may thus not reflect any dividends or other distributions which would be paid to you if you had made a direct investment in relevant mutual fund interests. Consequently, the return on Securities linked to mutual fund interests may be less than the return from a direct investment in the relevant mutual fund interests.

The risks of a Security relating to mutual fund interests will depend on the terms of that Security. Such risks may include, but are not limited to, the possibility of significant changes in the value(s) of the mutual fund interests. The value of mutual fund interests may go down as well as up and the value of any mutual fund interest on any date may not reflect its performance in any prior period. There can be no assurance as to the future value of any mutual fund interest or of the continued existence of any mutual fund interest or the issuer of such mutual fund interest. Accordingly, before making an investment decision with respect to Securities, you should carefully consider, among other matters, the value and price volatility of the relevant mutual fund interests, as this may affect the value of and return on the Securities.

In addition, mutual funds may trade and invest in a broad range of investments such as debt and equity securities, commodities and foreign exchange and may enter into derivative transactions, including, without limitation, futures and options. Mutual fund interests may be illiquid and may only be traded on an infrequent basis. The trading strategies of mutual funds are often opaque. Mutual funds, as well as the markets and instruments in which they invest, are often not subject to review by governmental authorities, self-regulatory organisations or other supervisory authorities. Further, the value of mutual fund interests may be affected by the performance of the relevant fund service providers and in particular the relevant fund adviser.

For the foregoing reasons, investing directly or indirectly in mutual funds is generally considered to be risky. If the underlying mutual fund does not perform sufficiently well, the value of the Securities will fall, and may in certain circumstances be zero.

In addition, the calculation of amounts payable on such Securities may involve reference to the performance of one or more mutual fund interests over a period of time and to mutual fund interests, the issuer(s) of which are established outside the United States, the EEA and the United Kingdom.

Accordingly, investors may receive a lower return on Securities linked to one or more mutual fund interests than they would have received if they had invested directly in the mutual fund interests or in another product.

See Underlying Schedule 7 (*Mutual Fund Conditions*) for the specific terms and conditions in respect of Securities linked to mutual fund interests.

***Disrupted Days, Adjustment Events and Early Redemption Events in relation to Securities linked to Mutual Fund Interests***

As the terms and conditions of the Securities relating to mutual fund interests include provisions dealing with the postponement of a Valuation Date due to the occurrence of a Disrupted Day, such postponement or any alternative provisions for valuation provided in the terms and conditions of such Securities may have an adverse effect on the value of such Securities.

Certain events or occurrences described below will only be relevant if the associated Adjustment Events and Early Redemption Events are specified as being applicable for a Mutual Fund Interest in the applicable Final Terms.

If the Calculation Agent determines that an Adjustment Event occurs in respect of a mutual fund interest (being, in each case if applicable, (a) the occurrence at any time of a change in law affecting any underlying hedging position in relation to the Securities or materially increasing the relevant Issuer's costs in relation to performing its obligations in respect of the Securities or a Hedging Disruption or an Increased Cost of Hedging, or (b) a corporate action, insolvency, merger event, nationalisation, adviser resignation event, fund modification, strategy breach, regulatory action, reporting disruption, cross-contamination, failure by a fund service provider and/or any Additional Disruption Event specified in the applicable Final Terms), then the Calculation Agent shall make such adjustment(s) to the terms of the Securities as the Calculation Agent determines necessary to account for the effect of such Adjustment Event or the Calculation Agent may replace the mutual fund interest that is the subject of the Adjustment Event with a new mutual fund interest selected by the Calculation Agent (in a fund which provides daily liquidity, the shares or units of which may be subscribed, sold to or redeemed by the fund (subject to giving no more than two fund business days' notice and no charges being imposed by the fund), and which in the determination of the Calculation Agent, has the same or substantially similar strategies, and the same currency as, the affected mutual fund). Any such adjustment may include, in the case of an Increased Cost of Hedging, adjustments to pass on to Securityholders any such Increased Cost of Hedging (including, but not limited to, reducing any amounts payable or deliverable in respect of the Securities to reflect any such increased costs). Any such adjustment may also include a monetisation whereby the Calculation Agent shall determine the value of the mutual fund interest affected by the relevant Adjustment Event on a date selected by the Calculation Agent and shall make such adjustments to the terms of the Securities so that the Securities reference such value (and interest thereon) rather than such mutual fund interest. Any such adjustment(s) or substitution may have an adverse effect on the value of such Securities and, if the Calculation Agent determines that no adjustment(s) or substitution can reasonably so be made, such Adjustment Event shall be an Early Redemption Event.

If an Early Redemption Event occurs (being, in each case if applicable, (a) circumstances where the Calculation Agent determines that no adjustment(s) or substitution can reasonably be made following an Adjustment Event, (b) the Calculation Agent determines that no Monetisation can reasonably be effected, (c) a Section 871(m) Event or (d) a Hedging Disruption Early Termination Event (if specified as applicable in the applicable Final Terms)), the Securities may be redeemed as more fully set out in the terms and conditions of the relevant Securities. If the Securities are redeemed early, the relevant Issuer will pay to each Securityholder an amount calculated in

accordance with the method specified in the applicable Final Terms, as determined by the Calculation Agent. The amount repaid to you could be substantially less than your initial investment and you could therefore sustain a loss.

***Risks associated with Securities linked to currency exchange rates***

An investment in Securities linked to currency exchange rates may bear similar market risks to a direct investment in foreign exchange.

Movements in currency exchange rates may be subject to significant fluctuations that may not correlate with changes in interest rates or other indices and the timing of changes in the currency exchange rates may affect the actual yield to investors, even if the average level is consistent with their expectations. In addition, Securities linked to currency exchange rates may be linked to emerging market currencies and, as such, may experience greater volatility and less certainty as to future levels or as against other currencies. Emerging market currencies are highly exposed to the risk of a currency crisis happening in the future and this could result in the occurrence of a Disrupted Day – see "*Disrupted Days*" below.

Fluctuations in exchange rates and implied volatility of the relevant currency (or basket of currencies) will affect the value of the relevant Securities. Currency values may be affected by complex political and economic factors, including governmental action to fix or support the value of a currency/currencies, regardless of other market forces, which could have a material adverse effect on the value of and return on the Securities of the relevant Securityholder (see "*6. Risks relating to Securities generally – Changes in exchange rates and exchange controls could result in a loss of the value of the Securities and payments in respect thereof in relation to the currency of the jurisdiction of an investor*" above).

Accordingly, investors may receive a lower return on Securities linked to one or more currency exchange rates than they would have received if they had invested directly in the relevant currency or currencies or in another product.

See Underlying Schedule 8 (*FX Rate Conditions*) for the specific terms and conditions in respect of Securities linked to currency exchange rates.

***Disrupted Days, Adjustment Events and Early Redemption Events in relation to Securities linked to currency exchange rates where the EMTA Provisions are not specified as applicable in the applicable Final Terms***

As the terms and conditions of the Securities relating to currency exchange rates include provisions dealing with the postponement of a Valuation Date due to the occurrence of a Disrupted Day, such postponement or any alternative provisions for valuation provided in the terms and conditions of the Securities may have a material adverse effect on the value of and return on such Securities.

Certain events or occurrences described below will only be relevant if the associated Adjustment Events and Early Redemption Events are specified as being applicable for currency exchange rates in the applicable Final Terms.

If the Calculation Agent determines that an Adjustment Event occurs in respect of a currency exchange rate (being, in each case if applicable, (a) the occurrence at any time of a change in law affecting any underlying hedging position in relation to the Securities or materially increasing the Issuer's costs in relation to performing its obligations in respect of the Securities or a Hedging Disruption or an Increased Cost of Hedging or (b) a relevant country has lawfully converted or exchanged its currency for a successor currency), then the Calculation Agent shall make such adjustment(s) to the terms of the Securities as the Calculation Agent determines necessary to account for the effect of such Adjustment Event including, in the case of an Increased Cost of

Hedging, adjustments to pass on to Securityholders any such Increased Cost of Hedging (including, but not limited to, reducing any amounts payable or deliverable in respect of the Securities to reflect any such increased costs). Any such adjustment(s) may have an adverse effect on the value of such Securities and, if the Calculation Agent determines that no adjustment(s) can reasonably so be made, such Adjustment Event shall be an Early Redemption Event.

If an Early Redemption Event occurs (being, in each case if applicable, (a) circumstances where the Calculation Agent determines that no adjustment(s) can reasonably be made following an Adjustment Event, (b) a Section 871(m) Event or (c) a Hedging Disruption Early Termination Event (if specified as applicable in the applicable Final Terms)), the Securities may be redeemed as more fully set out in the terms and conditions of the relevant Securities. If the Securities are redeemed early, the relevant Issuer will pay to each Securityholder in respect of each Calculation Amount held by such holder an amount calculated in accordance with the method specified in the applicable Final Terms, as determined by the Calculation Agent. The amount repaid to investors could be substantially less than the investor's initial investment and the investor could therefore sustain a loss.

***Disrupted Days, Adjustment Events and Early Redemption Events in relation to Securities linked to currency exchange rates where the EMTA Provisions are specified as applicable in the applicable Final Terms***

The terms and conditions of the Securities include provisions dealing with the consequences of a Disrupted Day. These consequences shall be determined in accordance with the Disruption Fallbacks specified in the applicable Final Terms and may include (i) where Valuation Postponement is specified in the applicable Final Terms, postponement of a Valuation Date due to the occurrence of a Disrupted Day, (ii) where First Fallback Reference Price or Second Fallback Reference Price is specified in the applicable Final Terms, determination of the Underlying Closing Level for the relevant Valuation Date by reference to alternative prices for the applicable currency exchange rate, and (iii) where Calculation Agent Determination is specified as applicable in the applicable Final Terms, the Calculation Agent determining the Underlying Closing Level for the relevant Valuation Date. Such alternative provisions for valuation provided in the terms and conditions of the Securities may have an adverse effect on the value of such Securities. The Valuation Postponement provisions, if applicable, may result in a Securityholder receiving payments in respect of the Securities after the originally scheduled date for payment.

Certain events or occurrences described below will only be relevant if the associated Adjustment Events and Early Redemption Events are specified as being applicable for currency exchange rates in the applicable Final Terms.

If the Calculation Agent determines that an Adjustment Event occurs in respect of a currency exchange rate (being, in each case if applicable, (a) the occurrence at any time of a change in law affecting any underlying hedging position in relation to the Securities or materially increasing the relevant Issuer's costs in relation to performing its obligations in respect of the Securities or a Hedging Disruption or an Increased Cost of Hedging or (b) any relevant rate which as of the Trade Date is reported, sanctioned, recognised, published, announced or adopted (or similar action) by the relevant Government Authority and any such rate cease to be so reported, sanctioned, recognised, published, announced or adopted (or similar action), then the Calculation Agent shall make such adjustment(s) to the terms of the Securities as the Calculation Agent determines necessary to account for the effect of such Adjustment Event including, in the case of an Increased Cost of Hedging, adjustments to pass on to Securityholders any such Increased Cost of Hedging (including, but not limited to, reducing any amounts payable or deliverable in respect of the Securities to reflect any such increased costs) and in the case of a successor rate, determination of the relevant rate by

reference to the official successor rate. Any such adjustment(s) may have an adverse effect on the value of such Securities and, if the Calculation Agent determines that no adjustment(s) can reasonably so be made, such Adjustment Event shall be an Early Redemption Event.

If an Early Redemption Event occurs (being, in each case if applicable, (a) circumstances where the Calculation Agent determines that no adjustment(s) can reasonably be made following an Adjustment Event, (b) a Section 871(m) Event or (c) a Hedging Disruption Early Termination Event (if specified as applicable in the applicable Final Terms)), the Securities may be redeemed as more fully set out in the terms and conditions of the relevant Securities. If the Securities are redeemed early, the relevant Issuer will pay to each Securityholder in respect of each Calculation Amount held by such holder an amount calculated in accordance with the method specified in the applicable Final Terms, as determined by the Calculation Agent. The amount repaid to investors could be substantially less than the investor's initial investment and the investor would therefore sustain a loss.

#### ***Currency Settlement Disruption Event***

If, in the opinion of the Calculation Agent, payment of any amount due in respect of the Securities cannot be made by it in the Specified Currency on any date on which payment is scheduled to be made under the Securities due to the occurrence of a Currency Settlement Disruption Event (being (a) the imposition of restrictions on the transferability, purchase and holding of the Specified Currency, (b) its non-acceptance by a clearing system or its disuse, (c) its illiquidity in the relevant market or (d) any other circumstances beyond the relevant Issuer's control), then the relevant Issuer shall be entitled to satisfy its obligations to the Securityholders by either (i) delaying any such payment until after the Currency Settlement Disruption Event ceases to exist, or (ii) making such payment in United States dollars on, or as soon as reasonably practicable after, the relevant payment date. Any such delayed payment or payment in United States dollars will not constitute a default and Securityholders shall not be entitled to further interest or any other payment in respect of such delay.

See further FX Rate Condition 5(c) (*Settlement Disruption*) of Part A of Underlying Schedule 8 (*FX Rate Conditions*), and FX Rate Condition 5(e) (*Settlement Disruption*) of Part B of Underlying Schedule 8 (*FX Rate Conditions*).

#### ***Risks associated with Securities relating to Dividend Futures Contracts***

If investing in Securities relating to dividend futures contracts, investors should be familiar with investments in global capital markets and with equity index dividends derivatives generally. The value of a dividend futures contract will generally track the dividends paid by the companies (each a "**Relevant Company**") comprised in the equity index (the "**Relevant Index**") relating to the relevant dividend futures contract from time to time during one calendar year. global economic, financial and political developments, among other things, may have a material effect on the performance of such Relevant Companies and therefore on the value of the dividends paid by such Relevant Companies and the value of the relevant dividend futures contract, and this may in turn have a material adverse effect on the value of and return on the Securities.

Securities relating to dividend futures contracts will give rise to obligations of the relevant Issuer and, where the Issuer is CGMHI, the CGMHI Guarantor or, where the Issuer is CGMFL, the CGMFL Guarantor and will not give rise to any obligations under the relevant dividend futures contract or any obligations of any Relevant Company, and accordingly investors will have no recourse against any sponsor of such dividend futures contract or any such Relevant Company. No sponsor of the relevant dividend futures contract will have participated in the preparation of the applicable Final Terms or in establishing the terms of the Securities.

Not all types of dividends paid by a Relevant Company may be relevant for the purpose of determining the price of a dividend futures contract (for example, in general, ordinary dividends declared by a Relevant Company (paid in cash or shares) are considered as realised dividends, which, if so provided in the contract specifications for the relevant dividend futures contract, are relevant for the purpose of determining the price of dividend futures contracts, whereas special or extraordinary dividends are not generally considered as realised dividends and therefore, if so provided in the contract specifications for the relevant dividend futures contract will not be relevant for the purpose of determining the price of such dividend futures contract). Further, the Relevant Companies may change from time to time in accordance with the rules of the Relevant Index and such a change in Relevant Companies may have an adverse effect on the price of the dividend futures contract and amounts payable in respect of the Securities. Investors should refer to the contract specifications for the dividend futures contract and the index rules relating to the Relevant Index for details regarding the calculation methodologies (including which dividends will be included in the calculation of the dividend futures contract) and adjustments which may be made thereto (including to the Relevant Companies to be included in the Relevant Index). Investors should note that the performance of similar dividend futures contracts in respect of prior contract periods will not necessarily be indicative of the performance of the relevant dividend futures contract to which the Securities relate.

The market value of the Securities may, at any time, be affected by certain factors relating to dividend futures contracts which may include, but are not limited to, the possibility of significant changes in:

- the Relevant Companies comprised in the Relevant Index and expectations relating to the dividends to be announced in relation thereto;
- market interest and yield rates;
- the time remaining to the final settlement date of the relevant dividend futures contract; and
- economic, political and macro-economic factors.

Accordingly, before purchasing Securities relating to dividend futures contracts, prospective investors should carefully consider, among other matters, the value and price volatility of dividend futures contracts and the performance of the Relevant Companies comprised in the Relevant Index by reference to which amounts payable under the relevant Securities are calculated, as this may affect the value of and return on the Securities.

In addition, the value of the dividends paid by the Relevant Companies may be influenced by many factors, including the earnings and dividend policy of each such Relevant Company, changes in applicable laws and regulations, global economic, financial and political developments and structural supply and demand factors. Relevant Companies may pay reduced dividends or no dividends in respect of the relevant contract period. The amount of dividends paid by Relevant Companies in respect of similar periods may bear no relation to dividends paid during the relevant contract period. Any such changes may have an adverse effect on the amount of relevant dividends paid by Relevant Companies and, in turn, the price of the relevant dividend futures contract and amounts payable in respect of the Securities.

Accordingly, investors may receive a lower return on Securities linked to one or more dividend futures contracts than they would have received if they had invested directly in the dividend futures contracts or in another product.

See Underlying Schedule 9 (*Dividend Futures Contract Conditions*) for the specific terms and conditions in respect of Securities linked to dividend futures contracts.

***Adjustments to Valuation Dates, Adjustment Events and Early Redemption Events in relation to Securities linked to Dividend Futures Contracts***

As the terms and conditions of Securities relating to dividend futures contracts may include provisions dealing with the postponement of a Valuation Date due to the occurrence of a Disrupted Day or the variation of a Valuation Date following the announcement by the relevant dividend futures contract sponsor that the expiry date of a dividend futures contract will occur on an alternative date to that originally contemplated, such postponement, variation or any alternative provisions for valuation provided in the terms and conditions of such Securities may have a material adverse effect on the value of and return on such Securities.

Certain events or occurrences described below will only be relevant if the associated Adjustment Events and Early Redemption Events are specified as being applicable for dividend futures contracts in the applicable Final Terms.

If the Calculation Agent determines that an Adjustment Event occurs in respect of any dividend futures contract (being, in each case if applicable, (a) the occurrence at any time of a change in law affecting any underlying hedging position in relation to the Securities or materially increasing the relevant Issuer's costs in relation to performing its obligations in respect of the Securities or a Hedging Disruption or an Increased Cost of Hedging, (b) such dividend futures contract (i) not being calculated and announced by or on behalf of the relevant dividend futures contract sponsor but instead being calculated and announced by or on behalf of a successor to the relevant dividend futures contract sponsor or (ii) being replaced by a successor dividend futures contract), then the Calculation Agent shall make such adjustment(s) to the terms of the Securities as the Calculation Agent determines necessary to account for the effect of such Adjustment Event including, in the case of an Increased Cost of Hedging, adjustments to pass on to Securityholders any such Increased Cost of Hedging (including, but not limited to, reducing any amounts payable or deliverable in respect of the Securities to reflect any such increased costs). Any such adjustments may have an adverse effect on the value of the Securities and, if the Calculation Agent determines that no adjustment can reasonably so be made, such Adjustment Event shall be an Early Redemption Event.

If a Dividend Futures Contract Adjustment Event occurs (being, in each case if applicable, in respect of a dividend futures contract, (i) the relevant exchange and/or dividend futures contract sponsor, as the case may be, announcing that it will make a material change or modification to a relevant dividend futures contract, (ii) the relevant exchange and/or the dividend futures contract sponsor, as the case may be, permanently cancelling or discontinuing the dividend futures contract or there otherwise being a permanent discontinuation in trading or trading never commencing in such dividend futures contract and no successor dividend futures contract existing, or (iii) any "final settlement price" not being displayed or published on the relevant electronic page or by the exchange at the relevant valuation time), then the Calculation Agent may determine whether such Dividend Futures Contract Adjustment Event has a material effect on the Securities and, if so, shall either (A) calculate the "final settlement price" of such dividend futures contract by calculating the value of the relevant dividends for the applicable contract period for such dividend futures contract by reference to the formula for and the method of calculation last in effect of any related dividend point index or such other sources as it deems appropriate and/or (B) make such adjustments to the terms of the Securities as it determines necessary or appropriate to account for the effect of the relevant Dividend Futures Contract Adjustment Event and/or (C) in the case of (iii) above only, substitute such dividend futures contract with a replacement dividend futures contract and determine any adjustment necessary to account for such substitution. Any such calculation, substitution and/or adjustment may have an adverse effect on the value of the Securities and, if the Calculation Agent determines that no calculation, adjustment or substitution can reasonably so be made, such Dividend Futures Contract Adjustment Event shall be an Early Redemption Event.

If an Early Redemption Event occurs (being, in each case if applicable (a) circumstances in which the Calculation Agent determines that no adjustment or substitution can reasonably be made following an Adjustment Event, (b) no calculation, substitution or adjustment can reasonably be made following a Dividend Futures Contract Adjustment Event, (c) a Section 871(m) Event or (d) a Hedging Disruption Early Termination Event (if specified as applicable in the applicable Final Terms)), the Securities may be redeemed as more fully set out in the terms and conditions of the Securities. If the Securities are redeemed early, the relevant Issuer will pay to each Securityholder in respect of each Calculation Amount held by such holder an amount calculated in accordance with the method specified in the applicable Final Terms, as determined by the Calculation Agent. The amount repaid to investors could be substantially less than the investor's initial investment and the investor could therefore sustain a loss.

### ***Risks associated with Securities linked to Interest Rates***

The market value of the Securities may, at any time, be affected by certain factors relating to interest rates which may include, but are not limited to, the possibility of significant changes in the level of the interest rate, macroeconomic, political or financial factors, speculation and central bank and governmental intervention.

Fluctuations that have occurred in any interest rate in the past are not necessarily indicative, however, of fluctuation that may occur in the interest rate during the term of any Security. Accordingly, before purchasing Securities, prospective investors should carefully consider, among other matters, the value and price volatility of the relevant interest rates, as this may have a material adverse effect on the value of and return on the Securities.

Depending on the terms of the Securities, investors may receive no amount(s) or assets because of the performance of the relevant interest rates and they may lose a substantial portion of their investment. In addition, investors should ensure that they review the terms of the Securities in question as these may provide for amounts due or assets deliverable to be determined by reference to an option or formulae linked to the relevant interest rate rather than being a conventional debt security referencing an interest rate, such as one which bears interest at a specified floating rate of interest. Accordingly, investors may receive a lower return on Securities linked to one or more interest rates than they would have received if they had invested in another product referencing an interest rate.

See Underlying Schedule 10 (*Underlying Interest Rate Conditions*) for the specific terms and conditions in respect of Securities linked to interest rates.

### ***Disrupted Days, Adjustment Events and Early Redemption Events in relation to Securities linked to Interest Rates***

As the terms and conditions of Securities relating to interest rates include provisions dealing with the consequences of a Disrupted Day, including referring to alternative price sources or determination of the relevant interest rate by the Calculation Agent or by reference to quotes from reference dealers, such alternative provisions for valuation provided in the terms and conditions of such Securities may have a material adverse effect on the value of and return on such Securities.

Certain events or occurrences described below will only be relevant if the associated Adjustment Events and Early Redemption Events are specified as being applicable for interest rates in the applicable Final Terms.

If the Calculation Agent determines that an Adjustment Event occurs in respect of any interest rate (being, in each case if applicable, the occurrence at any time of a change in law affecting any underlying hedging position in relation to the Securities or materially increasing the relevant Issuer's costs in relation to performing its obligations in respect of the Securities or a Hedging Disruption

or an Increased Cost of Hedging), then the Calculation Agent shall make such adjustment(s) to the terms of the Securities as the Calculation Agent determines necessary to account for the effect of such Adjustment Event. Any such adjustment may include, in the case of an Increased Cost of Hedging, adjustments to pass on to Securityholders any such Increased Cost of Hedging (including, but not limited to, reducing any amounts payable or deliverable in respect of the Securities to reflect any such increased costs). Any such adjustments may have an adverse effect on the value of such Securities and, if the Calculation Agent determines that no adjustment can reasonably so be made, such Adjustment Event shall be an Early Redemption Event.

If an Early Redemption Event occurs (being, in each case if applicable, (a) circumstances in which the Calculation Agent determines that no adjustment or substitution can reasonably be made following an Adjustment Event, (b) a Section 871(m) Event or (c) a Hedging Disruption Early Termination Event (if specified as applicable in the applicable Final Terms)), the Securities may be redeemed as more fully set out in the terms and conditions of the Securities. If the Securities are redeemed early, the relevant Issuer will pay to each Securityholder in respect of each Calculation Amount held by such holder an amount calculated in accordance with the method specified in the applicable Final Terms, as determined by the Calculation Agent. The amount repaid to investors could be substantially less than the investor's initial investment and the investor could therefore sustain a loss.

## **9 Risks associated with Securities linked to rates and benchmark reform**

### ***The unavailability, disruption or discontinuance of any interest rate to which the Securities are linked will result in the application of certain fallback provisions***

In relation to any event or circumstance affecting an interest rate, the fallback provisions described in Valuation and Settlement Condition 8 will be applied in the order set out therein, in each case where applicable for the relevant rate and the event or circumstance. If the first applicable option shown does not apply to the relevant interest rate and the relevant event or circumstance then the next option which does should be applied. It is possible that, following the application of such fallback provisions, the relevant rate could be determined on a different day than originally intended and/or may be determined by the Calculation Agent in its reasonable discretion (*billiges Ermessen*, § 317 of the German Civil Code (*BGB*)). There is a risk that the determination of the relevant interest rate in accordance with any of these fallback provisions may result in lower amounts payable to investors under the Securities and a reduction in their market value.

Any adjustments to the terms and conditions of the Securities (including the determination of any spread or factor howsoever defined) which the Calculation Agent determines are necessary or appropriate pursuant to the provisions of the Reference Rate Event Provisions and the Administrator/Benchmark Event provisions shall be made to the extent reasonably practicable, but also taking into account prevailing industry standards in any related market (including, without limitation, the derivatives market) and may include, where applicable and without limitation:

- technical, administrative or operational changes that the Calculation Agent decides are appropriate;
- the application of any adjustment factor or adjustment spread; and
- (subject to compliance with applicable laws and/or regulatory guidance in the relevant jurisdiction) adjustments to reflect any increased costs to the Issuer of providing exposure to the replacement or successor rate(s) and/or benchmark(s).

Such adjustments may also be applied on more than one occasion, may be made as of one or more effective dates, may but do not have to involve the selection of a successor or replacement rate

which is determined on a backwards-looking compounding basis by reference to a "risk-free rate" and which, unless the context otherwise requires or it is inappropriate, will be the relevant rate in relation to the then current and all future determination days.

Investors should refer to "*Section C – Investment Considerations – 1. General – Application of Fallback Provisions in respect of Reference Rates and Benchmarks*" for an overview of how and when such fallback provisions apply.

***If a floating rate becomes unavailable it may be determined in the Calculation Agent's reasonable discretion (billiges Ermessen, § 317 of the German Civil Code (BGB)) or by alternative methods***

If the relevant rate is unavailable and the Screen Rate Determination provisions of Valuation and Settlement Condition 3(a) apply, subject as provided in Valuation and Settlement Condition 8, the Calculation Agent shall determine the relevant rate in its reasonable discretion (*billiges Ermessen*, § 317 of the German Civil Code (*BGB*)) having regard to such sources as it deems appropriate and any alternative benchmark then available and taking into account prevailing industry standards in any related market (including, without limitation, the derivatives market), which determination may be made by reference to quotations provided by third party banks.

If the ISDA Determination provisions of Valuation and Settlement Condition 3(a) apply, subject as provided in Valuation and Settlement Condition 8, if the relevant rate of interest cannot be determined by reference to the relevant ISDA Definitions (including the temporary cessation provisions set out in such ISDA Definitions, which may include reference bank quotations), then the rate of interest will be that determined by the Calculation Agent in its reasonable discretion (*billiges Ermessen*, § 317 of the German Civil Code (*BGB*)) having regard to alternative benchmarks then available and taking into account prevailing industry standards in any related market (including, without limitation, the derivatives market).

If the relevant rate is unavailable and the SFRD (Non-Index) Fallback Provisions of Valuation and Settlement Condition 3(a)(i) apply, subject as provided in Valuation and Settlement Condition 8, the amount of interest payable on such Securities will be determined using (a) the Bank of England's Bank Rate (for the purposes of this paragraph, the "**Bank Rate**") for such day plus the mean of the spread of the SONIA rate to the Bank Rate, or (b) if the Bank Rate is not available on such day, the SONIA rate published for the first preceding London Banking Day on which the SONIA rate was published. In respect of (a), there is no assurance that the characteristics of the Bank Rate and spread calculation will be similar to, or will produce the economic equivalent of, the SONIA rate upon which compounded daily SONIA is based. If the said rate and spread calculation provisions or alternative provisions for determining the SONIA rate in respect of a particular day become applicable, this could result in adverse consequences to the amount of interest payable on the Securities, which could adversely affect the return on, value of and market for the Securities.

If the relevant rate is unavailable and the SFRD (Index) Fallback Provisions of Valuation and Settlement Condition 3(a)(i) and/or the SOFR Floating Rate Determination provisions of Valuation and Settlement Condition 3(a)(i) apply, subject as provided in Valuation and Settlement Condition 8, the relevant SONIA Index value, or SOFR or SOFR Index value, as applicable, will be determined by the Calculation Agent in its reasonable discretion (*billiges Ermessen*, § 317 of the German Civil Code (*BGB*)) having regard to such sources as it deems appropriate and any alternative benchmark then available and taking into account prevailing industry standards in any related market (including, without limitation, the derivatives market).

As a result, the return on the Securities may be lower than expected and/or the value of the Securities may be adversely affected and the Calculation Agent will have no responsibility to the Issuer or any third party as a result of having acted on any such quotations.

***Failure by the Calculation Agent and/or the Issuer to give notice***

Pursuant to the Reference Rate Event Provisions and the Administrator/Benchmark Event provisions, the Calculation Agent is required to notify the Issuer of certain determinations made in accordance with such provisions, and the Issuer is required to notify the Securityholders thereof or of certain elections to redeem the Securities. However, failure by the Calculation Agent to so notify the Issuer or failure by the Issuer to so notify the Securityholders will not affect the validity of any such determination or election. Any determination or election may result in payments under the Securities being lower than those originally anticipated or the Securities being redeemed early, and this could have a material adverse effect on the value of and return on the Securities.

***The regulation and reform of "benchmarks" may adversely affect the value of and return on Securities linked to or referencing such "benchmarks"***

Interest rate benchmarks play an important role in financial markets and it is therefore critical that benchmarks which are used extensively are robust and are based on active, liquid underlying markets. As a consequence, interest rates and indices or other figures which are deemed to be "benchmarks" have been the subject of recent national and international regulatory scrutiny and reform and certain benchmarks have been questioned as a result of the absence of relevant active underlying markets and possible disincentives (including possibly as a result of benchmark reforms) for market participants to continue contributing to such benchmarks. Contrary to interbank offered rates, 'risk-free rates', such as SONIA and SOFR, represent deep underlying markets where data inputs can evolve over time to ensure that such benchmarks adapt to future changes in money markets and continue to be robust. The reliance of risk-free rates on actual transactions as opposed to expert judgement also reduces the conduct risks associated with such benchmarks.

Regulatory authorities and central banks view the overnight risk-free rates as providing the most robust benchmark interest rate available and are therefore strongly encouraging the transition away from interbank offered rates.

***The EU Benchmarks Regulation and UK Benchmarks Regulation***

The EU Regulation on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds (the "**EU Benchmarks Regulation**") and the EU Benchmarks Regulation as it forms part of UK domestic law by virtue of the European Union (Withdrawal) Act 2018 (as amended) and regulations made thereunder (the "**UK Benchmarks Regulation**", and together with the EU Benchmarks Regulation, the "**Benchmarks Regulations**") are a key element of the ongoing regulatory reform in the EU and the UK and have applied since 1 January 2018 and been subject to subsequent amendments.

In addition to so-called "critical benchmarks", other interest rates, foreign exchange rates and certain indices, will in most cases be within scope of both versions of the Benchmarks Regulations as "benchmarks" where they are used to determine the amount payable under, or the value of, certain financial instruments (including (i) in the case of the EU Benchmarks Regulation, Securities traded on an EU regulated market or EU multilateral trading facility (MTF) and (ii) in the case of the UK Benchmarks Regulation, Securities traded on a UK recognised investment exchange or a UK MTF), and in a number of other circumstances.

The EU Benchmarks Regulation applies to the provision of benchmarks, the contribution of input data to a benchmark and the use of a benchmark within the EU. Among other things, it (i) requires benchmark administrators to be authorised or registered (or, if non-EU-based, to be subject to an

equivalent regime or otherwise recognised or endorsed) and (ii) prevents certain uses by EU supervised entities of "benchmarks" provided by administrators that are not authorised or registered (or, if non-EU based, not deemed equivalent or recognised or endorsed).

The UK Benchmarks Regulation contains most of the same provisions as the EU Benchmarks Regulation, but has narrower geographical scope of application. The UK Benchmarks Regulation applies to the provision of benchmarks, the contribution of input data to a benchmark and the use of a benchmark within the UK. The onus of compliance with the UK Benchmarks Regulation rests on UK benchmark administrators and UK supervised entities.

The ESMA maintains a public register of benchmark administrators and third country benchmarks pursuant to the EU Benchmarks Regulation (the "**ESMA Register**"). Benchmark administrators which were authorised, registered or recognised by the UK Financial Conduct Authority ("**FCA**") prior to 31 December 2020 were removed from the ESMA Register on 1 January 2021. From 1 January 2021 onwards, the FCA maintains a separate public register of benchmark administrators and non-UK benchmarks pursuant to the UK Benchmarks Regulation (the "**UK Register**"). The UK Register retains UK benchmark administrators which were authorised, registered or recognised by the FCA prior to 31 December 2020.

The EU Benchmarks Regulation and the UK Benchmarks Regulation could have a material impact on any Securities linked to or referencing a "benchmark". For example:

- a rate or index which is a "benchmark" within the meaning of the EU Benchmarks Regulation may not be used in certain ways by an EU supervised entity if its administrator does not obtain authorisation from any EU competent authority (or, if a non-EU entity, does not satisfy the "equivalence" conditions and is not "recognised" pending an equivalence decision and the benchmark is not endorsed). If the benchmark administrator does not obtain or maintain (as applicable) such authorisation or, if a non-EU entity, "equivalence" is not available and it is not recognised and the benchmark is not endorsed, then the Securities may be redeemed prior to maturity;
- a rate or index which is a "benchmark" within the meaning of the UK Benchmarks Regulation may not be used in certain ways by a UK supervised entity if (subject to applicable transitional provisions) its administrator does not obtain authorisation or registration from the FCA (or, if a non-UK entity, does not satisfy the "equivalence" conditions and is not "recognised" pending an equivalence decision and the benchmark is not endorsed). If the benchmark administrator does not obtain or maintain (as applicable) such authorisation or registration or, if a non-UK entity, "equivalence" is not available and it is not recognised and the benchmark is not endorsed, then the Securities may be redeemed prior to maturity; and
- the methodology or other terms of the "benchmark" could be changed in order to comply with the requirements of the EU Benchmarks Regulation or UK Benchmarks Regulation, as applicable, and such changes could reduce or increase the rate or level or affect the volatility of the published rate or level, and (depending on the terms of the particular Securities could lead to adjustments to the terms of the Securities as the Calculation Agent deems necessary or appropriate.

Any of the international or national reforms, or the general increased regulatory scrutiny of "benchmarks", could increase the costs and risks of administering or otherwise participating in the setting of a "benchmark" and complying with any such regulations or requirements. Such factors may have the following effects on certain "benchmarks": (i) discourage market participants from continuing to administer or contribute to the "benchmark"; (ii) trigger changes in the rules or

methodologies used in the "benchmark" and/or (iii) lead to the disappearance of the "benchmark". Any of the above changes or any other consequential changes as a result of international or national reforms or other initiatives or investigations, could have a material adverse effect on the value of and return on any Securities linked to or referencing a "benchmark" and the Calculation Agent may be entitled to make corresponding adjustments to the terms and conditions of the Securities.

#### *Differences in methodologies*

Risk-free rates are generally backwards-looking and are calculated on a compounded or weighted average basis.

Interest on Securities which reference a backwards-looking risk-free rate is not determined until the end of the relevant interest calculation period. Therefore, the Securityholders may be unable to reliably estimate in advance the amount of interest which will be payable on such Securities. Further, if such Securities become due and payable following an Event of Default, or are otherwise redeemed early on a date which is not an Interest Payment Date, where a separate amount in respect of accrued interest is payable, the final Interest Rate and/or Interest Amount payable in respect of such Securities shall be determined by reference to a shortened period ending immediately prior to the date on which the Securities become due and payable or are scheduled for redemption.

#### *Developing markets for SONIA, SOFR and €STR and potential impact on performance and returns*

The market continues to develop in relation to adoption of SONIA, SOFR and €STR as reference rates in the capital markets for sterling, U.S. dollar or euro bonds, respectively, and their adoption as alternatives to the relevant interbank offered rates. In addition, market participants and relevant working groups are exploring alternative reference rates based on risk-free rates, including term SONIA, SOFR and €STR reference rates (which seek to measure the market's forward expectation of an average SONIA rate, SOFR or €STR over a designated term).

The market or a significant part thereof may adopt an application of risk-free rates that differs significantly from that set out in the terms and conditions and used in relation to Securities that reference such risk-free rates issued under this Base Prospectus. In respect of SONIA, while the terms and conditions include a compounded daily SONIA formula and there have been a number of capital markets issuances to date referencing compounded daily SONIA, on 3 August 2020 the Bank of England began publishing the SONIA daily Compounded Index, the methodology of which differs from that set out in the Conditions. Term SONIA reference rates (which seek to measure the market's forward expectation of an average SONIA rate over a designated term) have been published from January 2021 and term SOFR rates have also become available for use. It is possible that market participants may seek to apply compounded rates or term rates for capital markets issuances, although UK authorities have made clear their preference for the market to adopt a broad-based transition to SONIA compounded in arrears for new transactions, with use of a term SONIA reference rate being more limited.

The Issuer may in the future also issue Securities referencing SONIA, SOFR, €STR or other risk-free rates that differ materially in terms of interest determination when compared with any previous SONIA, SOFR, €STR or other risk-free rate referenced Securities issued by it under this Base Prospectus.

The development of new risk-free rates could result in reduced liquidity or increased volatility, or could otherwise affect the market price of any Securities that reference a risk-free rate issued under this Base Prospectus from time to time.

The new risk free rates may have only a limited trading market, and an established trading market may never develop or may not be very liquid. Market terms for Securities indexed to the new risk

free rates may evolve over time, and may lead to impacts on trading prices and values, and such Securities may not be able to be sold or may not be able to be sold at prices that will provide a yield comparable to similar investments that have a developed secondary market, and may consequently suffer from increased pricing volatility and market risk.

Similarly, the manner of adoption or application of risk-free rates in the Eurobond markets may differ materially compared with the application and adoption of risk-free rates in other markets, such as the derivatives and loan markets. Prospective investors should carefully consider how any mismatch between the adoption of such reference rates in the bond, loan and derivatives markets may impact any hedging or other financial arrangements which they may put in place in connection with any acquisition, holding or disposal of Securities referencing such risk-free rates.

***Interest on Securities linked to a Reference Rate will be calculated using a Replacement Reference Rate selected by the Calculation Agent if a Reference Rate Event occurs***

***Occurrence of a Reference Rate Event***

If the Reference Rate Event Provisions apply pursuant to Valuation and Settlement Condition 8, there is a risk that a Reference Rate Event may occur in respect of such Reference Rate (for an overview of how the Reference Rate Event Provisions apply, see "*Section C – Investment Considerations – 1. General – Application of Fallback Provisions in respect of Reference Rates and Benchmarks*" below).

It is uncertain as to if or when a Reference Rate Event may occur in respect of a Reference Rate and the circumstances which could trigger such an event are outside of the Issuer's control. Whether a Reference Rate Event has occurred will be determined by the Calculation Agent, and any subsequent use of a replacement Reference Rate is likely to result in changes to the terms and conditions of the Securities (which could be extensive) and/or interest or other payments under the Securities that are lower than or that do not otherwise correlate over time with the payments that could have been made on such Securities if the relevant Reference Rate remained available in its current form.

Subject to the terms and conditions of the Securities, each Securityholder will bear the risks arising from any such change and will not be entitled to any form of compensation as a result of any such change.

***Determination of alternative benchmark and any Adjustment Spread***

If the Calculation Agent determines that a Reference Rate Event has occurred in respect of a Reference Rate, it will:

- (A) seek to identify a Replacement Reference Rate;
- (B) calculate the adjustment, if any, to the Replacement Reference Rate that it determines is required in order to reduce any transfer of economic value from (i) the relevant Issuer to the Securityholders or (ii) the Securityholders to the Issuer, in each case that would otherwise arise as a result of the replacement of the Reference Rate with the Replacement Reference Rate (an "**Adjustment Spread**");
- (C) determine such other amendments to the Securities which it considers are necessary and/or appropriate in order to account for the effect of the replacement of the relevant Reference Rate with the Replacement Reference Rate (as adjusted by the Adjustment Spread); and
- (D) determine the timing for when the Replacement Reference Rate, Adjustment Spread and such other adjustments will become effective in relation to the relevant Securities.

Investors should be aware that:

- (I) the application of any Replacement Reference Rate (notwithstanding the inclusion of any Adjustment Spread), together with any consequential amendments (or, if applicable, any changes made following a material change), could result in a lower amount being payable than would otherwise have been the case;
- (II) more than one possible replacement rate may exist and if so it is possible that the Calculation Agent may select the least favourable replacement rate. In the case of IBOR linked swap rates, there is currently no industry-wide approach for dealing with the discontinuance or non-representativeness of such swap rates across all currencies and a complete consensus does not exist as to what rate or rates may become accepted replacements. It is impossible to predict the effect of any such replacements on the value of the Securities. Additionally, even where administrators have published new swap rates linked to risk free rates, there can be no guarantee that such rates will be liquid or recognised or acknowledged as being an industry standard, and the method by which such new swap rates are calculated may change in the future. Consequently, the outcomes of determinations by the Calculation Agent may be unpredictable and the exercise of discretion by the Calculation Agent may adversely affect the market value of, and return (if any) on, the Securities;
- (III) any such Replacement Reference Rate (as adjusted by any Adjustment Spread) and any consequential amendments (or, if applicable, any changes made following a material change) shall apply without requiring the consent of the holders of Securities; and
- (IV) if the Calculation Agent determines that it is not possible or commercially reasonable to adjust the terms and conditions of the Securities to account for the effect of any Reference Rate Event or to identify a Replacement Reference Rate or calculate an Adjustment Spread, then absent a determination that no Replacement Reference Rate or other amendments to the terms of the Securities are required, the Securities may, at the Issuer's option, be the subject of an early redemption, in which case investors may lose some or all of their investment. There is no guarantee that a Replacement Reference Rate will be identified or that an Adjustment Spread will be calculated by the Calculation Agent.

The Adjustment Spread may be positive, negative or zero and/or determined pursuant to a formula or methodology. There can be no assurance that the replacement adjustment will fully mitigate the transfer of economic value between the Issuer and holders.

#### *Interim adjustments*

If, following a Reference Rate Event but prior to any adjustments or replacement having occurred, the relevant Reference Rate is required for any determination in respect of the Securities and at that time, no amendments have occurred in accordance with the foregoing and:

- (A) if the Reference Rate is still available, and it is still permitted under applicable law or regulation for the Securities to reference the Reference Rate and for the Issuer to use the Reference Rate, the level of the Reference Rate shall be determined pursuant to the terms that would apply to the determination of the Reference Rate as if no Reference Rate Event had occurred; or
- (B) if the Reference Rate is no longer available or it is no longer permitted under applicable law or regulation for the Securities to reference the Reference Rate or for the Issuer to use the Reference Rate, the level of the Reference Rate shall be determined by the Calculation Agent in its reasonable discretion (*billiges Ermessen*, § 317 of the German Civil Code (*BGB*)), after consulting any source it deems to be reasonable, as (a) a substitute or successor rate that it has determined is the industry-accepted (in the derivatives market) substitute or successor rate for the relevant Reference Rate (including any temporary substitute or successor rate)

or the rate published at the relevant time on the last day on which the Reference Rate was published or was permitted to be used in accordance with applicable law or regulation (the "**Last Permitted Rate**") or (b) if it determines there is no such industry-accepted (in the derivatives market) substitute or successor rate or the use of the Last Permitted Rate would not produce a commercially reasonable result, a substitute or successor rate that it determines is a commercially reasonable alternative to the Reference Rate, taking into account prevailing industry standards in any related market (including, without limitation, the derivatives market).

To the extent that any Securities reference a Reference Rate with respect to which a Reference Rate Event is likely to occur during the term of such Securities, prospective investors should be aware that the consequence of the occurrence of a Reference Rate Event described above will be realised if such a Reference Rate Event occurs.

The interests of the Calculation Agent in making the determinations described above may be adverse to the investors' interests as holders of Securities. The selection of a Replacement Reference Rate, and any decisions made by the Calculation Agent in connection with implementing a Replacement Reference Rate with respect to the Securities, could have a material adverse effect on the value of and return on the Securities. Further, there is no assurance that the characteristics of any Replacement Reference Rate will be similar to the relevant Reference Rate or that any Replacement Reference Rate will produce the economic equivalent of such Reference Rate. In particular, any of these fallback provisions may result in interest payments that are lower than, or do not otherwise correlate over time with, the payments that would have been made on the relevant Securities if the previous rate had continued being published in its current form.

#### ***Risks relating to the occurrence of an Administrator/Benchmark Event***

The occurrence of an Administrator/Benchmark Event (if applicable) in respect of any relevant Benchmark may mean adjustments are made to the Securities which may include selecting one or more successor benchmarks and making related adjustments to the Securities, including if applicable to reflect any increased costs of the Issuer of providing exposure to the replacement or successor rate(s) and/or benchmark(s). Alternatively, early redemption of the Securities may apply. For an overview of how the Administrator/Benchmark Event provisions apply, see "*Section C – Investment Considerations – 1. General – Application of Fallback Provisions in respect of Reference Rates and Benchmarks*" below. Any such adjustment may have an adverse effect on the value of, return on or market for the Securities, and if the Securities are early redeemed, the amount repaid to investors could be substantially less than their initial investment and investors could therefore sustain a loss.

#### ***Risks relating to the discontinuance or unavailability of an Interest Rate***

If (x) the provisions of Underlying Schedule 10 (*Underlying Interest Rate Conditions*) relating to the determination of the Underlying Closing Level of an interest rate on any Scheduled Trading Day in the event of the occurrence of any Disrupted Day and (y) the provisions relating to the consequences of any such Disrupted Day set out in the terms and conditions of the Securities apply pursuant to Valuation and Settlement Condition 8, if (i) the relevant Electronic Page is not available, or (ii) the percentage rate of the relevant interest rate for the relevant Scheduled Trading Day does not appear on the Electronic Page, and/or (iii) the relevant interest rate is not provided or published by the relevant administrator or a relevant authorised distributor and/or (iv) a component of the relevant interest rate is not provided or published, the Calculation Agent shall determine the underlying closing level for such interest rate as it deems appropriate and in its reasonable discretion (*billiges Ermessen*, § 317 of the German Civil Code (*BGB*)), having regard to such sources as it deems appropriate and any alternative benchmark then available and taking into account prevailing

industry standards in any related market (including, without limitation, the derivatives market)) and may make such adjustments to the terms and conditions of the Securities as it determines necessary or appropriate to reflect any industry-accepted practices for the successor interest rate, including applying an adjustment factor. Any such amendments may result in payments under the Securities being different from those originally anticipated, and could have a material adverse effect on the value of and return on the Securities.

***Swap Rates may be materially amended or discontinued***

Swap rates may be subject to reform in the future. These reforms may cause one or more swap rate(s) to be discontinued, to be modified, or to be subject to other changes. Any such consequence could also have a material adverse effect on the value of and return on Securities the payout of which is dependent on the performance of such swap rate.

If a swap rate ceases, different fallback provisions would apply based on the way in which the relevant swap rate is determined under the Conditions and the fallback provisions described in Valuation and Settlement Condition 8. Such fallback provisions will be applied in the order set out therein and, where ISDA Determination applies, this will mean that any permanent cessation fallback provisions included as part of the applicable ISDA Definitions will not apply.

New swap rates linked to risk free rates have recently been developed, such as IBA's GBP SONIA ICE Swap Rate settings and USD SOFR ICE Swap Rate settings. However, there can be no guarantee that such rates will be liquid, and the method by which such new swap rates are calculated may change in the future.

***The Calculation Agent may make consequential changes to the terms and conditions of the Securities if the methodology of a relevant rate is amended***

In the event that the administrator of a rate referenced by Floating Rate Securities or Interest Rate Linked Securities amends the methodology of such interest rate (including, without limitation, amendments to the time of publication of the relevant rate), the Calculation Agent may but shall not be required to make any related or consequential changes to the terms and conditions of the Securities not otherwise provided for in the Reference Rate Event Provisions, Administrator/Benchmark Event provisions, Underlying Rate Fallback provisions, SRD Fallback Provisions, ISDA Determination provisions, SONIA Fallback provisions or SOFR Fallback provisions (including, without limitation, any technical, administrative or operational changes, changes to timing and frequency of determining rates and making payments of interest and changes to the definition of Designated Maturity (where applicable)) that the Calculation Agent determines to be appropriate in a manner substantially consistent with market practice (or, if the Calculation Agent decides that adoption of any portion of such market practice is not administratively feasible or if the Calculation Agent determines that no appropriate market practice exists, in such other manner as the Calculation Agent determines is reasonably necessary). Investors should be aware that such changes to the terms and conditions of the Securities may adversely affect the market value of, and return (if any) on, such Securities.

***Risks in connection with "Shift" and "Lag" methodologies***

Where SONIA Floating Rate Determination (Non-Index Determination) or SOFR Floating Rate Determination is specified in the applicable Final Terms as the manner in which the interest rate is to be determined, a compounding method will also be specified. These compounding methodologies have emerged as conventions for daily compounding of rates in arrears. The conventions differ in the period that each method uses when weighting each business day's overnight rate for the relevant risk free rate. The "Shift" approach (i.e., "Compounding with Observation Period Shift") weights the relevant risk free rate according to the relevant number of days that apply in a separate

observation period which 'shadows' the Interest Period (e.g., the observation period might start and end five business days preceding the relevant start and end of the Interest Period). The "Lag" approach (i.e., "OIS Compounding" or "Compounding with Lookback") weights the relevant risk free rate according to the number of days that apply in the relevant Interest Period. Investors should be aware that divergence between the above methodologies could lead to a difference in the interest being determined even where the relevant risk free rate is the same for the Securities and may not be what investors expected.

***Methodologies for determining interest payable in respect of Securities linked to SONIA or SOFR may differ substantially***

The amount of interest payable in respect of Securities linked to SONIA or SOFR will be calculated by reference to (i) the rate of return of a daily compound interest investment (with the daily SONIA or SOFR, as applicable, as the reference rate for the calculation of interest); or (ii) where SONIA Floating Rate Determination (Index Determination) or Index Determination in respect of SOFR Floating Rate Determination applies, a screen rate, formula or value as may be published by the administrator of SONIA or SOFR, as applicable. There can be no assurance that amounts of interest determined pursuant to (i) and (ii) will be similar, and over time the market may adopt an application of these methodologies that differs significantly from that set out in the terms and conditions of the Securities. Further, investors should refer to "*Developing markets for SONIA, SOFR and €STR and potential impact on performance and returns*" above for a description of the key risks relating to the development of risk free rates across the market generally.

## **10 Risks associated with certain types of Securities and certain product features**

***Risks relating to Fixed Rate Securities***

Investment in Fixed Rate Securities involves the risk that if market interest rates subsequently increase above the rate paid on the Fixed Rate Securities, this will adversely affect the value of the Fixed Rate Securities.

***Risks relating to Fixed/Floating Rate Securities***

Fixed/Floating Rate Securities may bear interest at a rate that converts from a fixed rate to a floating rate or from a floating rate to a fixed rate. Where the relevant Issuer has the right to effect such a conversion, this will affect the secondary market in, and the market value of, the Securities, since the relevant Issuer may be expected to convert the rate when it is likely to result in a lower overall cost of borrowing for the relevant Issuer. If the relevant Issuer converts from a fixed rate to a floating rate in such circumstances, the spread on the Fixed/Floating Rate Securities may be less favorable than then prevailing spreads on comparable Floating Rate Securities tied to the same reference rate. In addition, the new floating rate at any time may be lower than the rates on other floating rate Securities issued by the relevant Issuer. If the relevant Issuer converts from a floating rate to a fixed rate in such circumstances, the fixed rate may be lower than the prevailing market rates.

***Mandatory early redemption or "autocall"***

If "Mandatory Early Redemption" is specified as applicable in the applicable Final Terms, then such Final Terms will specify what constitutes a "MER Barrier Event" (or "Exit Barrier Event") and, following the occurrence of a MER Barrier Event (or Exit Barrier Event), the Securities are redeemed on the relevant MER date and the relevant MER amount (or exit amount) specified in the applicable Final Terms becomes payable and no further amount shall be payable in respect of such Securities after the MER date. In this case, investors are subject to a reinvestment risk, as they may not be able to replace their investment in such Securities with an investment that has a similar profile of chances and risks as the relevant Securities.

If any Securities are redeemed early in accordance with the above, the amount received by the relevant holders will be limited to the MER amount (or exit amount) irrespective of the price of the relevant Underlying(s) or any other reference factor(s) applicable to such Underlying(s). Furthermore, investors will not benefit from any movement in the price of relevant Underlying(s) that may occur during the period between the relevant date of early redemption and the maturity date.

Unless the MER amount (or exit amount) is a specified fixed amount in respect of each calculation amount and such amount is greater than an investor's initial investment in the Securities, then investors should note that, unless a scheduled minimum redemption amount is specified in all circumstances, then they may lose all or part of their investment.

#### ***Securities subject to optional redemption by the Issuer***

An optional redemption feature of Securities, as set out in General Condition 4 (*Redemption and Purchase*) and any related provisions in the applicable Final Terms, is likely to limit their market value. During any period when the relevant Issuer may elect to redeem Securities, the market value of those Securities generally will not rise substantially above the price at which they can be redeemed. This also may be true prior to any redemption period.

The relevant Issuer may be expected to redeem Securities when its cost of borrowing is lower than the interest rate on the Securities. At those times, an investor generally would not be able to reinvest the redemption proceeds at an effective interest rate as high as the interest rate on the Securities being redeemed and may only be able to do so at a significantly lower rate. Prospective investors should consider reinvestment risk in light of other investments available at that time.

#### ***Redemption amount or Entitlement due on the maturity date***

Where the redemption amount or assets deliverable at maturity is determined by reference to the performance of the relevant Underlying(s), investors should note that, unless a minimum redemption amount is specified in all circumstances, then they may lose all or part of their investment.

#### ***Securities subject to a cap***

Where the terms of the Securities provide that the amount payable or deliverable is subject to a maximum amount (cap), the Securityholder's ability to participate in any change in the value of the Underlying(s) over the term of the Securities will be limited, no matter how much the level, price or other applicable value of the Underlying(s) rises above the cap level over the term of the Securities. Accordingly, the value of or return on the Securities may be significantly less than if the Securityholder had purchased the Underlying(s) directly or through another product not subject to a cap.

#### ***Risks relating to FX provisions***

Where FX Provisions are included in the applicable Final Terms and a relevant Underlying is denominated in a currency other than the relevant Specified Currency of the Securities then values of such Underlying will be converted into the relevant Specified Currency. Such conversion may, as provided in the terms and conditions of the Securities, be determined by referring to a cross rate (meaning that such conversion will be determined via the exchange rate of a third currency). Therefore, amounts due or assets deliverable in respect of the Securities will also be linked to the performance of the relevant exchange rate and negative performance of such exchange rate could negate positive performance of the relevant Underlying(s).

## **11 Risks relating to Securities that are Physical Delivery Securities**

### ***Settlement disruption event and failure to deliver***

In the case of Physical Delivery Securities, if a Settlement Disruption Event occurs or exists on any date specified for the delivery of the relevant Entitlement, settlement will be postponed until the next Settlement Business Day in respect of which there is no Settlement Disruption Event. The relevant Issuer in these circumstances may select to deliver the relevant Entitlement in such other commercially reasonable manner as it may select or it may pay the Disruption Cash Redemption Amount in lieu of delivering the Entitlement.

If, in relation to Physical Delivery Securities, "Failure to Deliver due to Illiquidity" is specified as applying in the applicable Final Terms and it is impossible or impracticable, in the opinion of the Calculation Agent, to deliver, when due, some or all of the Relevant Assets where such failure to deliver is due to illiquidity in the market for such Relevant Assets, the relevant Issuer has the right to pay the Failure to Deliver Redemption Amount in lieu of delivering some or all of such Relevant Assets which are affected by such illiquidity.

If "Aggregation of Entitlements" is specified as applicable in the applicable Final Terms, Physical Delivery Securities which are held by the same Securityholder will be aggregated for the purpose of determining the aggregate Entitlements in respect of such Securities and such aggregate Entitlements will be rounded down to the nearest Tradeable Amount of the Relevant Asset(s), in such manner as the relevant Calculation Agent shall determine. If "Aggregation of Entitlements" is not specified as applicable in the applicable Final Terms, the Entitlement in respect of each Calculation Amount will be rounded down to the nearest whole multiple of the Tradeable Amount of the Relevant Asset(s) in such manner as the relevant Calculation Agent shall determine. Amounts of the Relevant Asset less than the Tradeable Amount shall not be delivered and no cash or other adjustment will be made in respect of such rounding unless "Cash Adjustment" is specified as applying in the applicable Final Terms, in which case, the relevant Issuer shall pay to the relevant Securityholder a cash amount equal to the value of any such lesser amount.

Consequently, Securityholders may not receive the Entitlements that they expect to receive, may receive less than they would otherwise expect or may receive a cash amount instead.

### ***Issuer's option to Substitute Assets or to pay the Alternative Cash Redemption Amount***

If the Securities are Physical Delivery Securities, the relevant Issuer may, if the Calculation Agent determines that the Relevant Asset or Relevant Assets, as the case may be, comprises securities which are not freely tradeable and deliverable, elect either (i) to substitute a Substitute Asset or Substitute Assets, as the case may be, for the Relevant Asset or Relevant Assets, or (ii) not to deliver or procure the delivery of the relevant Entitlement or the relevant Substitute Asset or Substitute Assets, as the case may be, to the relevant Securityholders, but in lieu of such delivery to make payment to the relevant Securityholders on the maturity date of the Alternate Cash Redemption Amount. In these circumstances, Securityholders may receive assets which are different to, or cash instead of, the assets that they expected to receive.

### ***Expenses***

All Expenses arising from the delivery of the Entitlement in respect of Physical Delivery Securities shall be for the account of the relevant Securityholder.

Expenses in respect of Physical Delivery Securities shall be deducted by the relevant Issuer from any cash amount owing to such Securityholder and paid by the relevant Issuer on behalf of the Securityholder or paid by the relevant Issuer on behalf of such Securityholder by converting such amount of the Relevant Asset(s) due to be delivered as necessary to pay the Expenses, as specified

by the Securityholder in the relevant Asset Transfer Notice. If any Expenses are not so paid, the relevant Securityholder shall be deemed to authorise the relevant Issuer to convert and the relevant Issuer may convert such amount of the Relevant Asset(s) into cash sufficient to cover the Expenses in respect of the relevant Security from which the relevant Intermediary shall deduct such Expenses.

#### ***Variation of Settlement***

In respect of Physical Delivery Securities, the relevant Issuer has an option to vary settlement in respect of such Securities and, in lieu of delivering or procuring delivery of the relevant Entitlement, to pay an amount determined to be equal to the fair market value of the Entitlement on the maturity date.

In such circumstances, a Securityholder will not receive any Relevant Assets as the Securities will only be cash settled and the redemption amount received by a Securityholder may be significantly less than their initial investment in the Securities. Furthermore, a Securityholder would not benefit from any increase in the price of the Relevant Assets that would have otherwise been deliverable if the Securities had been settled by physical delivery after the date of determination of such fair market value.

### **12 Risks relating to Securities that are Dual Currency Securities**

If the Securities are Dual Currency Securities, then amounts payable in respect of the Securities will be determined by converting all amounts due under the Securities from the Denomination Currency into the Relevant Currency by multiplying such amount by the Dual Currency Exchange Rate for the last occurring valuation date. In such circumstances, amounts that Securityholders receive in respect of the Securities are also linked to the performance of the Underlying which is the exchange rate used for such conversions. Investors should therefore also have regard to the risk factors relating to Securities linked to a currency exchange rate as set out above (in particular the risk factor entitled "8. *Risks relating to Securities linked to Underlying(s) – Risks associated with Securities linked to currency exchange rates*").

### **13 Risks specific to Credit Linked Securities**

#### ***Credit risk of the Reference Entity***

Investors should note that a holder of a Credit Linked Security will be exposed to the credit of one or more Reference Entities, which exposure shall be, unless otherwise stated in the applicable Final Terms, to the full extent of their investment in such Credit Linked Security. Upon the occurrence of any specified Credit Event with respect to any Reference Entity, investors may suffer significant losses at a time when losses may be suffered by a direct investor in obligations of such Reference Entity. However, the holding of a Credit Linked Security may not reflect the impact of investing in an obligation of a Reference Entity, and losses in relation to the Credit Linked Securities could be considerably greater than would be suffered by a direct investor in the obligations of a Reference Entity and/or could arise for reasons unrelated to such Reference Entity. In addition, the terms of the obligations of Reference Entities may not be standard, and holders of that debt may therefore incur additional losses that are not reflected in the relevant Credit Linked Securities. This is of greater force in the case where the Reference Entity is a sovereign. There is no common set of rules or practices that governs the manner in which a sovereign government, faced with deterioration in its fiscal position or the performance of its economy, may attempt to reach resolution with holders of its debt obligations. Due to, amongst other factors, the role of governments and international organisations as creditors, the ability of a sovereign to enact legislation that may affect holders of its debt obligations, and the role played by other governments, including those of the jurisdictions in which private creditors are located, the development of events is inherently unpredictable. As a

result, specified Credit Events may not encompass all the circumstances in which holders of a sovereign Reference Entity's obligations may suffer credit-related losses.

### ***Legal risks***

Investors should note that a Credit Event may occur even where (i) the Reference Entity/underlying obligor lacks capacity to enter into any obligation, (ii) there is any actual or alleged unenforceability, illegality, impossibility or invalidity with respect to any obligation or (iii) the Credit Event results from (a) any applicable law, order, regulation, decree or notice or change in, the interpretation by any court, tribunal, regulatory authority or similar administrative or judicial body or (b) the imposition of, or any change in, any exchange controls, capital restrictions or any other similar restrictions imposed by any monetary or other authority.

In such circumstances, investors should note that they will bear the legal risks since the occurrence of a Credit Event will result in an early redemption of their Credit Linked Securities, in full or in part.

### ***Jurisdictional differences and assessment of Reference Entity***

There can be less publicly available information about certain Reference Entities particularly where the laws in the jurisdiction of the Reference Entity do not subject the Reference Entity to reporting requirements. Furthermore, certain Reference Entities are subject to accounting, auditing and financial reporting standards that may differ from those applicable in other jurisdictions, and the relevant ways in which the legal regime of a Reference Entity operates can result in differences in outcomes across various jurisdictions. The differences highlighted herein may make it more difficult to make an accurate assessment of the creditworthiness of certain Reference Entities, and these differences may have a significant effect on the recovery on an underlying debt obligation in the event of bankruptcy or reorganisation of a Reference Entity. For example, once a bankruptcy or insolvency proceeding has commenced under the laws of certain jurisdictions, it may not be permissible to trade or accelerate the debt of the relevant issuer.

In making any assessment with respect to the creditworthiness of any Reference Entity or the Reference Entity generally, investors should also take into account, amongst other factors, (i) the name of the Reference Entity given that there can be confusion among market participants with respect to similarly named entities within a corporate group or failure to monitor any recent name changes or Successors identified with respect to a particular Reference Entity, (ii) the obligor on any referenced obligation and its capacity, to the extent relevant for any Credit Linked Security, (iii) the characteristics of any obligation referenced such as whether it is senior or subordinated, senior non preferred, freely transferrable, secured or unsecured, a bond, loan or a payment obligation not related to borrowed money which may either meet or fail to meet certain requirements specified in the Credit Linked Security relevant to either the occurrence of a Credit Event or redemption following a Credit Event and (iv) where there are multiple Reference Entities, whether each Reference Entity is weighted equally or whether some Reference Entities have greater weightings than others given a Reference Entity's weighting with respect to the relevant Credit Linked Security determines the portion of the principal amount of the Credit Linked Security that is attributable to that Reference Entity. The above factors are related to, and may affect, the creditworthiness of the relevant Reference Entity(ies) which, in turn, may impact the value of, and return on, the Credit Linked Securities and therefore, such factors are important and should be taken into consideration when making a decision whether to invest in the Credit Linked Securities.

### ***Actions of Reference Entities***

A Reference Entity could take certain actions (e.g., merger, demerger or the repayment or transfer of indebtedness) without having regard to any investor's interest. A Reference Entity may have an

incentive to structure a transaction to produce a particular result for example, in order to induce holders of its debt obligations to take certain actions. In some cases, a Reference Entity may repay its outstanding liabilities or assign them to a different entity in a manner that does not give rise to the determination of a Successor to the Reference Entity. In such cases, with respect to that Reference Entity, there may no longer be any obligations (a circumstance commonly referred to as an "orphaning"), which may result in there being no appropriate Obligations for an Auction to be determined with respect to the relevant Reference Entity. Such actions could affect the value of and return on such Credit Linked Securities in a manner that was not originally contemplated by investors.

***Historical performance may not predict future performance***

Investors should note that the historical performance of a Reference Entity or similar entities is not indicative of its future performance and, accordingly, if contrary to historical performance, a Credit Event occurs, the Credit Linked Security may early redeem.

***Concentrated credit risk where Reference Entities are concentrated in the same sectors or regions***

The credit risk to investors in the Credit Linked Securities, which are credit-linked to multiple Reference Entities may be increased, amongst other things, as a result of the concentration of Reference Entities in a particular industry sector or geographic area, or the exposure of the Reference Entities to similar financial or other risks as other Reference Entities.

Although at the Issue Date or Trade Date, as applicable, investors in Single Name Credit Linked Securities will have exposure to a single Reference Entity, investors should note that the risk factors set out above will equally apply to such Credit Linked Securities when multiple successors are identified in accordance with the Credit Linked Conditions.

***Impact of a Credit Event on principal and interest***

The occurrence of a Credit Event in relation to any Reference Entity from time to time may result in either full or partial redemption of the Credit Linked Securities on the relevant Credit Event Redemption Date which shall depend on whether "Credit Payment on Maturity" or "Credit Payment Following Credit Event" applies and any recovery (which could be zero) will be payable to the investor but the investor shall be exposed to all incurred losses, which will reduce its principal redemptions.

Following the occurrence of a Relevant Event Determination Date investors should note that interest will cease to accrue on a specified portion of the relevant Credit Linked Securities as set out in the terms and conditions of the Credit Linked Securities depending on whether "Interest Accrual on Default" or "No Interest Accrual on Default" applies in the applicable Final Terms.

If "No Interest Accrual on Default" is applicable, interest will cease from the Interest Payment Date immediately preceding the Relevant Event Determination Date or, where there is no Interest Payment Date immediately preceding the Relevant Event Determination Date, the Issue Date. If "Interest Accrual on Default" is applicable, interest will cease to accrue on the first Business Day immediately following the Relevant Event Determination Date. In such case, interest shall accrue on the affected applicable proportion from (and including) the Interest Payment Date immediately preceding the Relevant Event Determination Date (or where there is no Interest Payment Date immediately preceding the Relevant Event Determination Date, the Issue Date) to (and including) the Relevant Event Determination Date.

The Issuer may also suspend interest in certain circumstances where the Calculation Agent has determined that a potential Credit Event could occur but no Credit Event Notice has been provided

to the Issuer and/or the Securityholders. Such suspension of interest shall be effected although no Relevant Event Determination Date has actually occurred.

Investors should be aware that payment of any interest wrongly suspended will be repayable in accordance with the terms and conditions of the Credit Linked Securities and where insufficient interest has been suspended (the absolute value of such interest shortfall constituting the Interest Suspension Shortfall Amount), such Interest Suspension Shortfall Amount shall be claimed by the Issuer from any future amount(s) payable upon the redemption or, where applicable, write down in full of the relevant Credit Linked Securities (whether at maturity or upon early redemption). The Issuer however shall have no further claims against any investors for any Interest Suspension Shortfall Amount which cannot be deducted in full or in part (on account of the relevant redemption amount being insufficient).

Interest (if applicable) shall continue to be suspended until the Calculation Agent determines that no Relevant Event Determination Date can occur. In such circumstances, investors should note that they may not receive any interest for multiple Interest Periods.

Interest will otherwise continue to accrue as usual on any remaining portion of the Credit Linked Security unaffected by the Relevant Credit Event to and excluding the earlier to occur of any full redemption at the Maturity Date or any relevant early redemption. Where "Credit Payment on Maturity applies", additional interest shall accrue on the Credit Linked Securities in respect of the Credit Payment on Maturity Amount at the funding interest rate.

***Exposure to Credit Events and successions prior to the Trade Date or Issue Date***

The Credit Event Backstop Date represents the first day of the credit protection period for a Series of Credit Linked Securities. The Credit Event Backstop Date will be specified in the applicable final terms as the Issue Date, the Trade Date or a number of calendar days prior to Trade Date. **The Credit Event Backstop Date may be specified to be prior to the Trade Date. Investors should accordingly note a Credit Event occurring prior to the Trade Date or Issue Date may result in a Credit Event being triggered under such Credit Linked Securities.**

Investors should also note that this will not be the case where the terms of the Credit Linked Securities expressly specify the Credit Event Backstop Date as the Trade Date or the Issue Date. Credit Linked Securities may also be exposed to Successor determinations in respect of events occurring prior to the Trade Date or Issue Date as the Credit Linked Securities have a similar backstop date (referred to as "**Successor Backstop Date**"), which is a look-back period of 90 calendar days prior to the date of a request to convene the relevant Credit Derivatives Determinations Committee (or, if applicable, the effective date of a notice to the investor describing the relevant succession) is applicable for the purposes of any Successor determination. In both cases, investors should note that a Credit Event or succession that occurred prior to the Trade Date or Issue Date could affect the relevant Credit Linked Securities. In respect of a Series of Credit Linked Securities, where on or after 1 January 2014, an entity assumes all of the obligations (including at least one relevant obligation) of a Reference Entity which is not a sovereign, in circumstances where a Reference Entity has ceased to exist, or is in the process of being dissolved and has not issued or incurred any borrowed money obligation at any time since the legally effective date of the assumption (such entity, a "**Universal Successor**"), the look-back period of 90 calendar days will not apply.

Investors should conduct their own review of any recent developments with respect to any Reference Entity(ies) by consulting publicly available information. If, prior to the Trade Date or Issue Date, a request to convene a Credit Derivatives Determinations Committee to determine whether a Credit Event or Successor determination has occurred with respect to a Reference Entity has been made, details of such request may be found on the DC Secretary's webpage at

<https://www.cdsdeterminationscommittees.org/> (or any successor website). If a Credit Derivatives Determinations Committee has not been convened to determine such matter as of the Trade Date or Issue Date, investors should note that one may still be convened after the Trade Date or Issue Date in respect of an event that has occurred which occurs up to 60 days (in the case of a Credit Event), 90 days (in the case of the determination of a Successor) or any time (in the case of the determination of a Universal Successor, where applicable) before the date of a request to convene such Credit Derivatives Determinations Committee to make the relevant determinations. Equally, Credit Events and successions may occur but where issues are not raised within the requisite time period to the Credit Derivatives Determinations Committee to qualify for a Credit Event or a qualifying succession, the events will not impact the relevant Credit Linked Securities, subject to any further actions undertaken by the Calculation Agent (where applicable).

### ***Successors***

Investors should note that, from time to time, the Reference Entity may be subject to change following the determination of any successors to the Reference Entity, and the creditworthiness of such successors may have an impact on the value of, and return on, the Credit Linked Securities.

The Calculation Agent will be responsible for determining, as soon as reasonably practicable after it becomes aware of the relevant succession, the sovereign or entity, if any, that qualifies as the successor. The Credit Linked Conditions provide that if a Reference Entity has more than one successor, the Calculation Agent shall amend the terms of the Credit Linked Securities, without consent of the investors, to reflect that the relevant Reference Entity has been succeeded by more than one successor and for the purposes of calculation, the affected notional representing such Reference Entity will be divided equally among the successors. Following such determination, the Credit Linked Securities shall remain outstanding in an amount equal to the outstanding Aggregate Principal Amount (or Number of Securities) and interest will accrue on such amount in accordance with the adjustments determined by the Calculation Agent in its reasonable discretion (*billiges Ermessen*, § 317 of the German Civil Code (*BGB*)), acting in a commercially reasonable manner to reflect the economic effects of the identification of more than one successor, considered in the aggregate. Investors should note that the Credit Linked Security may reference substantially different credit risks following the determination of one or more successors. These credit risks could potentially be greater or lesser than the credit risk of the original Reference Entity. Investors should also be aware that the determination of a successor will not necessarily result in the assumption of that obligation by the successor either at all or in the same proportion as the allocation of the notional amount of the original Credit Linked Security. Such changes to the Credit Linked Securities could adversely impact the value of the Credit Linked Securities.

### ***Volatile prices***

The market price of Credit Linked Securities may be volatile and will be affected by, amongst other things, (i) the actual or perceived creditworthiness and credit ratings of each Reference Entity and any guarantors or other supporters of its relevant obligations, (ii) expected rates of recovery on obligations of the Reference Entity, (iii) actions of a Reference Entity and its principal creditors, (iv) the nature of each Reference Entity's outstanding indebtedness, including its maturity and subordination structure and any guarantees or other support that the Reference Entity has provided to other entities, (v) the contractually specified credit-related events with respect to a Reference Entity that may trigger settlement of the Credit Linked Securities, (vi) optionality that a party may have, such as the ability to select the obligations of a Reference Entity that will be valued or to decide whether or not to trigger settlement, (vii) correlation among the credit spreads and/or default probabilities of the components of a basket or index, if applicable, (viii) market liquidity, (ix) the time remaining to the maturity or (x) economic, financial, political and regulatory or judicial events or conditions that affect a Reference Entity or its outstanding obligations, or the market for Credit

Linked Securities or related financial markets, including credit spreads in the market. Such volatility could impact on the market value of the Credit Linked Securities.

### ***Market liquidity***

Various factors may affect the market liquidity for the Credit Linked Securities. Future regulation of Credit Linked Securities could limit market liquidity. The market liquidity of instruments based on a bespoke portfolio of Reference Entities will generally be less than that of instruments linked to standardised indices and terms. The market liquidity of a single-name Reference Entity may be affected by the Reference Entity's inclusion or exclusion from a standardised index, with exclusion from an index generally expected to result in diminished market liquidity.

In addition, Credit Linked Securities with terms that differ from trading conventions may have substantially less market liquidity and price transparency. Consequently, market liquidity could vary during the term of a Credit Linked Security and will affect the value of such Credit Linked Security. There is no assurance that the Issuer, Dealer, Calculation Agent or one or more of their affiliates will be able to provide prices with respect to the Credit Linked Securities or that a secondary market can develop with respect to the Credit Linked Securities.

The Credit Derivatives Determinations Committees may make announcements, determinations and resolutions which may have an adverse impact on the value of, and return on, Credit Linked Securities. The Credit Derivatives Determinations Committees make determinations that are relevant to the majority of the credit derivatives market and to promote transparency and consistency.

In making any determination with respect to a Credit Event or a succession date, the Calculation Agent may have regard to announcements, determinations and resolutions made by the Credit Derivatives Determinations Committees. In certain circumstances (including, without limitation, the determination of the occurrence of an "**Event Determination Date**"), the Credit Linked Securities will be subject to the announcements, determinations and resolutions of the Credit Derivatives Determinations Committees. Such announcements, determinations and resolutions could adversely impact the quantum and timing of payments of interest and principal on the Credit Linked Securities.

### ***Investors have no role in respect of the composition of the Credit Derivatives Determinations Committees***

Securityholders will have no role in the composition of the Credit Derivatives Determinations Committees. A separate criterion will apply to the selection of dealer and non-dealer institutions to serve on the Credit Derivatives Determinations Committees ("**DC Member**"), and Securityholders will have no role in establishing such criteria. In addition, the composition of the Credit Derivatives Determinations Committees will change from time to time as the term of a member institution may expire or a member institution may be required to be replaced. Securityholders will have no control over the process for selecting institutions to participate on the Credit Derivatives Determinations Committees given the process is governed by the Credit Derivatives Determinations Committees Rules (the "**DC Rules**"). To the extent provided for in the Credit Linked Securities, the determinations of the Credit Derivatives Determinations Committees (for example, whether or not a Credit Event has occurred) which will impact the return on the Credit Linked Securities will be final and binding with respect to specific matters set out in the terms and conditions of the Credit Linked Securities, where relevant.

*Investors will not be notified of deliberations and resolutions of the Credit Derivatives Determinations Committees*

Notices of issues submitted to the Credit Derivatives Determinations Committees, meetings convened to deliberate such questions and the results of binding votes of the Credit Derivatives Determinations Committees will be published on the website of the DC Secretary at <https://www.cdsdeterminationscommittees.org/> (or any successor website). Neither the Issuer, Dealer, Calculation Agent or one or more of their affiliates shall be obliged to inform investors of such updates as published from time to time. Investors should carefully monitor the matters under consideration by the Credit Derivatives Determinations Committees and their determinations as such determinations may affect an investor's rights under the Credit Linked Securities.

Notwithstanding that an investor may be unaware of information relating to determinations of a Credit Derivatives Determinations Committee as published on the DC Secretary's website, this will not impact any redemptions, reductions in interest, write-downs or determinations made by the Calculation Agent and/or Issuer.

*Investors will have no recourse against any of the institutions serving (which could include the Issuer, the Dealer or the Calculation Agent) on the Credit Derivatives Determinations Committees or the external reviewers*

DC Members (which could include the Issuer, the Dealer, the Calculation Agent or one or more of their affiliates) do not owe any duty to Securityholders to refer specific questions to the Credit Derivatives Determinations Committees. Securityholders will be prevented from pursuing legal claims with respect to actions taken by such DC Member in its capacity as such under the DC Rules. DC Members have no duty to investigate, supplement or verify the accuracy of information on which a determination is based. In addition, the Credit Derivatives Determinations Committees are not obligated to follow previous determinations or to apply principles of interpretation such as those that might guide a court in interpreting contractual provisions. Therefore, investors should be aware that a Credit Derivatives Determinations Committee could reach a conflicting determination for a similar set of facts, which may impact the Credit Linked Securities in a manner that was not originally contemplated by investors.

***Requirement for publicly available information***

The Credit Linked Securities may specify that only publicly available information regarding a relevant event may be used to trigger or modify the transaction. The Credit Linked Conditions contain standards as to what constitutes publicly available information. If a Credit Event or a succession occurs, amongst other events, but the requisite public information about the event is not available within the applicable time periods, then the event will not take effect under the Credit Linked Securities.

Investors should note that in certain circumstances it may be difficult to verify the occurrences of certain Credit Events as a party in possession of such information which may evidence such Credit Event may be contractually prohibited from disclosing information to another party by virtue of any credit agreement or other agreement with the Reference Entity, any underlying obligor, any affiliate of the Reference Entity or of the underlying obligor or such party may be bound by or subject to a confidentiality obligation or agreement whereby the required information for verification may not be capable of disclosure without breaching such confidentiality undertakings. Accordingly, there may be circumstances when a Credit Event may not be capable of trigger under the Credit Linked Securities due to lack of publicly available information.

In addition, there can be no assurance that all events occurring prior to the Trade Date and Issue Date, including events that would affect the accuracy or completeness of the public filings of the

Reference Entity or the value of the underliers, will have been publicly disclosed. Subsequent disclosure of any such events or the disclosure of or failure to disclose material future events concerning an issuer could adversely affect the value of the Credit Linked Securities, their usefulness for any investor's intended purpose, and the timing or amount of payments or deliveries.

***Risks associated with Auction Redemption following a Credit Event***

If "Auction Redemption" is applicable with respect to the Credit Linked Securities, then the amounts payable under the Credit Linked Securities will be determined on the basis of the final price determined pursuant to the auction procedure set out in the relevant Credit Derivatives Auction Settlement Terms (then available at <https://www.cdsdeterminationscommittees.org/> (or any successor website)). In respect of specified obligations of the relevant Reference Entity, provided that the Credit Derivatives Determinations Committee determines that an applicable auction will be held, an auction final price determination date will occur. Credit losses determined pursuant to a market auction process may be greater or less than the losses which would have been determined in the absence of the auction. In particular, the auction process may be affected by technical factors or operational errors, which would not otherwise apply or may be the subject of actual or attempted manipulation. The administrator(s) specified in the auction settlement terms conduct auctions. Investors are subject to the risk that where a final price is determined in accordance with an auction, this may result in a lower recovery value than an obligation of the Reference Entity would have had if such final price had been determined pursuant to alternative methods. In addition, the Credit Derivatives Determinations Committee may amend the form of auction settlement terms for a particular auction. The DC Rules provide for certain amendments by resolution of a convened Credit Derivatives Determinations Committee. Other amendments may be made subject to a public comment period; however, the DC Rules permit the Credit Derivatives Determinations Committee to forego a public comment period by supermajority action. Accordingly, there can be no assurance that the Credit Derivatives Auction Settlement Terms for a particular auction will be on similar terms to the form of auction settlement terms or the terms of previous auctions.

Where the only relevant Credit Event is a restructuring, several concurrent but separate auctions may occur with respect to the Reference Entity and such Credit Event. The auction settlement amount may be based on the price of one or more obligations of the Reference Entity having a final maturity date different from the restructured obligation.

Although auctions can generally be expected to be held for Reference Entities that are widely traded in the credit markets, there can be no assurance that an auction will be held for future Credit Events or that, if held, the auction will result in the determination of an auction final price. If an auction is not held or fails to result in the determination of an auction final price (as might occur if an auction is cancelled by the Credit Derivatives Determinations Committee due, for example, to an inability to obtain the requisite number of initial bids) and if "Auction Redemption" is applicable with respect to the Credit Linked Securities, then the fallback redemption method shall apply which is cash redemption. In such circumstances of cash redemption, the final price will be determined pursuant to the valuation method specified in the Credit Linked Securities.

Investors should carefully assess and understand the elections specified in relation to the relevant Credit Linked Securities and the circumstances and/or events as described above, which may affect the value of, and return on, such Credit Linked Securities.

***Risks associated with Cash Redemption following a Credit Event***

If "Cash Redemption" applies to the Credit Linked Securities, then following the occurrence of a Credit Event the Calculation Agent will be required to seek quotations in respect of selected obligations of the Reference Entity in accordance with the terms and conditions of the Credit Linked Securities. Investors should be aware that such obligations may no longer exist and no qualifying

substitute obligations may have been identified, such quotations may not be available, or the level of such quotations may be substantially reduced as a result of illiquidity in the relevant markets or as a result of factors other than the credit risk of the Reference Entity (for example, liquidity constraints affecting market dealers). Moreover, the market value of a Reference Entity's obligations may be highly volatile in the period following a Credit Event. Accordingly, any quotations so obtained may be significantly lower than the value of the relevant obligation which would be determined by reference to (for example) the present value of related cash flows or the value that a party could obtain if it controlled the disposition of the obligations. Furthermore, the price of the selected obligations of the Reference Entity may be deemed to be zero in the event that no such quotations are available. Further, valuation of the selected obligations will be determined at a particular determination date and as such the recovery price which would be adopted in any loss amount or incurred loss amount that would be suffered by an investor following the occurrence of a Credit Event will reflect the value of relevant obligations at a given date. As such, the exposure to loss suffered by an investor or any principal write-down may be more than that ultimately realised by a holder of debt obligations of the Reference Entity, whether by means of enforcement of rights following a default or receipt of distributions following an insolvency or otherwise.

Further, where quotations are sought on an asset package, such asset package may contain assets which are hard to value and for which a valuation methodology may not be readily available or suitable, which may reduce the value of quotations or the availability of quotations that may otherwise have been obtained. Accordingly, investors should note that any quotations so obtained may be significantly lower than the value of the relevant obligation (or asset package) which would be determined by reference to (for example) the present value of related cash flows or the value that a party could obtain if it controlled the disposition of the obligations.

***Fixed Recovery Redemption may be subject to a fixed recovery price***

If "Fixed Recovery Redemption" applies to Credit Linked Securities and the Credit Event Redemption Amount of the Credit Linked Securities is calculated by reference to a fixed recovery price of the obligations of a Reference Entity(ies), the occurrence of a Credit Event may result in the recovery being materially lower than the prevailing price of the relevant obligations of the relevant Reference Entity. Investors should note that redemption could occur with a Fixed Recovery Percentage set at zero per cent. where the Final Terms specify accordingly.

If the Fixed Recovery Percentage is zero, following the occurrence of a Relevant Event Determination Date the occurrence of the Cash Redemption Date or the Final Cash Redemption Date shall fully and effectively discharge the Issuer's obligation to redeem the relevant Credit Linked Securities in full. Investors should be aware that where the Fixed Recovery Percentage is zero, the loss amount in respect of the Affected Reference Entity will be 100 per cent. and, accordingly, no redemption amounts will be payable to the Securityholders. Investors accordingly will bear the loss of their principal.

***"Cheapest-to-Deliver" risk***

Since the Issuer and/or Calculation Agent has reasonable discretion (*billiges Ermessen*, §§ 315, 317 of the German Civil Code (*BGB*)) to choose the portfolio of obligations to be valued following a Credit Event in respect of a Reference Entity, it is likely that the portfolio of obligations selected will be obligations of the Reference Entity with the lowest anticipated market value that are permitted to be selected pursuant to the terms of the Credit Linked Securities. This could result in a lower recovery value and hence greater losses for an investor. Obligations of differing maturities, currencies or payment priority (either contractual or under applicable insolvency law), among other characteristics, may diverge considerably in market value. Similar considerations apply where "Auction Redemption" applies given that the representative transaction that is priced in an auction

generally allows a choice of obligations from a final list established by the Credit Derivatives Determinations Committee whereby participating bidders provide two way prices.

***Payments of the Credit Linked Securities may be deferred or suspended (Maturity Date Extension)***

Investors should note that in certain circumstances, for example where (i) a Credit Event has occurred with regard to a Reference Entity and the related credit loss or incurred loss amount has not been determined as at the relevant Maturity Date or the Credit Event Redemption Date may occur after the Maturity Date, (ii) where a potential Credit Event is determined to occur as at the scheduled maturity of the Credit Linked Securities (including Potential Failure to Pay if "Grace Period Extension" is specified as being applicable in the applicable Final Terms or Potential Repudiation/Moratorium if "Repudiation/Moratorium" is specified as being applicable in the applicable Final Terms), (iii) where a DC Credit Event Question has been submitted but the relevant Credit Derivatives Determinations Committee has not declared a DC Credit Event Announcement, announced a DC Credit Event Question Dismissal (or resolved not to determine the matters set out in the CE Resolution Notice, as applicable), declared a DC No Credit Event Announcement or resolved whether or not to convene to resolve any issue or (iv) a Credit Event Notice may be delivered after the Maturity Date within an effective delivery period which may result in a Relevant Event Determination Date occurring. In such circumstances, payment of the redemption amount of the Credit Linked Securities and/or interest on the Credit Linked Securities may be deferred at the determination of the Calculation Agent in its reasonable discretion (*billiges Ermessen* § 317 of the German Civil Code (*BGB*)) for a material period in whole or part without compensation to an investor. In such circumstances, the Issuer is not obliged to take any action with respect to redemption in relation to the relevant Credit Linked Securities and no additional interest shall be payable to an investor in connection with such tolling or suspension of payments, including any final redemption amount. Once the relevant DC Credit Event Announcement or DC Credit Event Question Dismissal (or, where applicable, a resolution not to determine the matters set out in the CE Resolution Notice) has occurred, the relevant timing requirements that pertain to settlement that have previously tolled or been suspended shall resume on the Business Day following such public announcement by ISDA or the DC Secretary, as applicable, with the Issuer having the benefit of the full day notwithstanding when the tolling or suspension began.

***Payment Failure Event – failure to pay***

Investors should note that where it is impossible, impracticable or illegal for the Issuer to pay (due to an event beyond the control of the Issuer including, without limitation, a failure by the investor to provide account details of its designee) or for a Securityholder to accept payment of (due to an event beyond the control of such Securityholder), the obligation of the Issuer to pay any amount scheduled to be paid will be postponed until such time that the event no longer exists or is cured but where the event continues to exist on the Payment Failure Cut-Off Date, no such payment will be made by the Issuer and the Issuer's obligations to the investor will be deemed to be fully discharged as of that date. Any postponement or deemed discharge of payment will not constitute an Event of Default under General Condition 7 (*Events of Default*) and will not entitle the relevant investors to any additional interest or other payment as a result thereof.

***Determination of Event Determination Dates and Credit Event Redemption Dates post Maturity Date***

Investors should note that an Event Determination Date which would give rise to a redemption could occur as a result of notices being provided during the prescribed notice delivery period or post dismissal additional period which may occur after the Maturity Date or, in some cases 14 calendar days after the date of the DC Credit Event Announcement as a result of requests submitted

after the Maturity Date by market participants to the Credit Derivatives Determinations Committee for the relevant Credit Derivatives Determinations Committee to be convened to deliberate an issue. The Maturity Date of the Credit Linked Security may also be extended by the Calculation Agent in its reasonable discretion (*billiges Ermessen*, § 317 of the German Civil Code (*BGB*)) where the last relevant Credit Event Redemption Date or the last Payment Failure Cut-Off Date occurs after the Maturity Date. In each of these circumstances, the maturity date of the Credit Linked Securities will be extended and investors should note that the final redemption amounts, if any would be payable on a date later than the Maturity Date and no additional interest shall be payable to an investor in connection with such tolling or suspension of payments, including any final redemption amount.

### ***Adjustments and amendments***

Investors should note that the Credit Linked Securities may be subject to amendments without consent of the investors, where an Event Determination Date is deemed either to have occurred on a date that is different from the date that was originally determined to be the Event Determination Date or not to have occurred. Certain DC resolutions may reverse prior DC resolutions or the occurrence of a Relevant Event Determination Date that has resulted in the identification of Successors, Substitute Reference Obligations or the occurrence of an Auction Final Price Determination Date or Valuation Date and depending on the circumstances, may have the effect of reversing the economic impact for the Credit Linked Securities. Investors should be aware that in these circumstances, the Calculation Agent in its reasonable discretion (*billiges Ermessen*, § 317 of the German Civil Code (*BGB*)) will determine the adjustment payment, if any, that is payable to investors, the date the adjustment payment is payable and no accruals of interest, if any, shall be taken into account when calculating any such adjustment payment and when making such adjustments, no further consent of the Securityholder shall be required.

Any such amendment may affect the value of, and return on, the Credit Linked Securities.

### ***Potential conflicts of interest***

The Calculation Agent and one or more of its affiliates is a leading dealer in the credit derivatives market. If "Auction Redemption" is applicable under the Credit Linked Securities and an auction is held in respect of a Reference Entity for which a Credit Event has occurred, there is a high probability that the Calculation Agent or one of its affiliates would act as a participating bidder in any such auction. In such capacity, it may take certain actions which may influence the final price determined pursuant to the auction, including, without limitation, (i) submitting bids, offers and physical settlement requests (either on its or their own behalf or on behalf of customers) with respect to the relevant obligations and (ii) providing rates of conversion to determine the applicable currency conversion rates to be used to convert any obligations that are not denominated in the auction currency into such currency for the purposes of the auction. In deciding whether to take any such action, or whether to act as a participating bidder in any auction, the Calculation Agent or one or more of its affiliates (as applicable) shall be under no obligation to consider the interests of any investors and the effects of their participation may have a material adverse effect on the value of a Credit Linked Security.

The Issuer, the Dealer, the Calculation Agent or one or more of their respective affiliates may also be a voting member on one or more of the Credit Derivatives Determinations Committees responsible for determining the occurrence of Credit Events for the purposes of certain credit derivatives transactions and may take certain actions that may influence the process and outcome of decisions of the Credit Derivatives Determinations Committees. Such entities may also have an inherent conflict of interest in the outcome of any such determinations. The actions taken by such entities may also be adverse to the interests of an investor and may result in an economic benefit accruing to the Issuer, the Dealer, the Calculation Agent or one or more of their respective affiliates.

In performing any duty under the DC Rules that govern the Credit Derivatives Determinations Committees, the Issuer, the Dealer, the Calculation Agent or one or more of their respective affiliates shall have no obligation however to consider the interests of an investor and may ignore any conflict of interests arising in respect of the Credit Linked Securities.

***The Issuer, the Dealer or the Calculation Agent may have dealings and information in relation to Reference Entities***

The Issuer, the Dealer and/or the Calculation Agent and/or their respective affiliates may, now or in the future, deal in obligations of the Reference Entities, make equity investments in a Reference Entity, engage in business with a Reference Entity, its affiliates and its competitors or any other person or entity having obligations relating to a Reference Entity, including making loans to, or otherwise extend credit to, and generally engage in any kind of commercial or investment banking or other business, including asset management or other advisory services, including merger and acquisition or bankruptcy-related advisory services. The Issuer, the Dealer, the Calculation Agent and/or their respective affiliates may also participate in loan restructurings or recapitalisations that may affect the Credit Linked Security and any reference obligations. In such circumstances, the Issuer, the Dealer and/or the Calculation Agent and/or their respective affiliates may act with respect to such dealings, business and advisory freely and without accountability to any investor in the same manner as if the Credit Linked Securities did not exist, and any such action might have an adverse effect on any investor (including, without limitation, any action that might give rise to a Credit Event).

The Issuer and/or the Calculation Agent and/or their respective affiliates may be, whether by virtue of the types of relationships described above or otherwise, at any time, in possession of information in relation to any Reference Entity (or any obligations thereof) which is or may be material in the context of the Credit Linked Securities and which is or may not be known to the general public or Securityholders. The Credit Linked Securities do not create any obligation to disclose to Securityholders any such relationship or information (whether or not confidential), notwithstanding that any such relationship or information may have an adverse impact on the value of, and return on, the Credit Linked Securities.

***The Credit Linked Securities do not represent an interest in obligations of Reference Entities***

The Credit Linked Securities do not represent or convey any interest in any obligations of Reference Entities or any direct or indirect obligation of any Reference Entity to an investor. The Issuer is not an agent of any investor for any purpose and an investor will not have rights equivalent to those of a holder of debt obligations of a Reference Entity, such as voting rights or rights to receive consent fees or other distributions from a Reference Entity. For example, if a restructuring occurs with respect to a Reference Entity, the investor, unlike a holder of a Reference Entity's obligations, will have no right to challenge or participate in any element of the restructuring. If the Issuer is the owner of one or more obligations of a Reference Entity, it may exercise its voting or control rights or otherwise act in its capacity as holder of such obligations without regard to the interests of an investor, and such actions could adversely affect the Credit Linked Securities held by an investor. Consequently, the investor's purchase of the Credit Linked Securities may be riskier than a direct investment in the obligations of a Reference Entity. The purchase of a Credit Linked Security differs from an offering of new obligations by a Reference Entity in that none of the subscription moneys paid with respect to the Credit Linked Security will go to a Reference Entity. The Issuer in addition does not grant any security interest over any such obligations of the Reference Entity.

***Operational risks and notices***

The Credit Linked Securities may require that certain notices be given in order to exercise rights, realise, value or protect and preserve interests under the Credit Linked Securities, including but not

limited to notices to investors by the Issuer of the occurrence of a Credit Event or that describes a succession together with supporting information, the choice of obligations to be delivered or valued, certain potential Credit Events and the exercise of the right to utilise parallel auctions in the case of certain restructuring Credit Events.

Investors should have arrangements for delivering and receiving such notices and monitoring the actions of the relevant Credit Derivatives Determinations Committees, and be prepared to take the necessary or appropriate steps when it receives such notices or learn of such actions where an investor needs to take action pursuant to such notice. Failure to take the relevant steps or actions within the requisite time periods could adversely affect an investor's interests under a Credit Linked Security.

Investors should note that in some cases, determinations of a Credit Derivatives Determinations Committee may substitute for a required notice, modify the effect of a previously delivered notice or alter the period during which a notice may be delivered which may impact on timings of notices provided by the Issuer.

Where the relevant notice is to be provided by the Issuer, the Calculation Agent or the Fiscal Agent, investors should note that a failure by any of such parties to deliver the relevant notices or any decision by any of them not to deliver a Credit Event Notice to the investor shall not constitute an Event of Default under the relevant Credit Linked Securities.

### ***Interpretation of terms***

The terms of the Credit Linked Securities are subject to interpretation and further evolution. In some instances, the views of market participants may differ as to how the terms of specific credit provisions should be interpreted in the context of specific events, entities and obligations in comparison to that of a Credit Derivatives Determinations Committee or Calculation Agent where applicable. Accordingly, the consequences resulting from the interpretation of various terms could vary in the context of the Credit Linked Securities and result in unexpected losses, redemption, write-down, reduction in interest and other economic impact for an investor.

### ***Foreign exchange risks***

Investors should note that in certain circumstances, a currency conversion may be required to effect certain determinations, calculations in relation to any payment or delivery obligation with respect to the Credit Linked Securities. Investors should note that with respect to any auction in connection with Auction Redemption, the relevant exchange rates to be applied with respect to the auction, where relevant will be set by the auction administrators prior to any auction final price determination date. In such circumstances, the Credit Linked Securities will have foreign exchange rate risk, which may have an adverse impact on the value of, and return on, the Credit Linked Securities.

### ***Discretionary powers of the Calculation Agent***

The determination by the Calculation Agent of any amount or of any state of affairs, circumstance, event or other matter, or the formation of any opinion or the exercise of any discretion required or permitted to be determined, formed or exercised by the Calculation Agent shall (in the absence of manifest error) be final and binding on the Issuer and any Securityholder. In performing its duties pursuant to the Credit Linked Securities and making any determinations expressed to be made by it, the Calculation Agent shall act in a commercially reasonable manner and within its reasonable discretion (*billiges Ermessen*, § 317 of the German Civil Code (*BGB*)). Any determinations made or actions taken by the Calculation Agent may have an adverse impact on the value of, and return on, the Notes.

***Risks relating to Linear Basket Credit Linked Securities***

With respect to Linear Basket Credit Linked Securities, investors should note that they could be exposed to significant losses which may result from changes in the market's perception of the credit quality of the underlying Reference Entities. The market's perception of the credit quality of the underlying Reference Entities may be highly volatile and may change very rapidly following the availability of new information. Investors should refer to the risk factors entitled "*Credit risk of the Reference Entity*", "*Jurisdictional differences and assessment of Reference Entity*", "*Actions of Reference Entities*", "*Historical performance may not predict future performance*", and "*Concentrated credit risk where Reference Entities are concentrated in the same sectors or regions*". Investors should carefully review the list of Reference Entities that constitute the Linear Basket Credit Linked Securities and evaluate whether such exposure meets its stated objectives and is representative of the market to which exposure is required.

Investors should note that an investment in relation to a bespoke portfolio of Reference Entities may not have significant liquidity and accordingly there may be no, or a limited, secondary market in such Credit Linked Securities.

## SECTION C – INVESTMENT CONSIDERATIONS

This SECTION C contains important investment considerations the relevant Issuer, the CGMHI Guarantor and the CGMFL Guarantor recommend prospective investors to assess prior to an investment in Securities, including important information on Green Bonds, Social Bonds, Social Finance Bonds as well as Credit Linked Securities.

### 1 General

Before investing in Securities investors should determine whether an investment in Securities is appropriate in their particular circumstances and should consult with their legal, business and tax advisers to determine the consequences of an investment in Securities and to arrive at their own evaluation of the investment. In particular, the relevant Issuer, the CGMHI Guarantor (if applicable) and the CGMFL Guarantor (if applicable) recommend that investors take independent tax advice before committing to purchase any Securities. None of the relevant Issuer, the CGMHI Guarantor (if applicable) and the CGMFL Guarantor (if applicable) provides tax advice and therefore responsibility for any tax implications of investing in any Securities rests entirely with each investor. Investors should note that the tax treatment will differ from jurisdiction to jurisdiction. Investors will assume and be solely responsible for any and all taxes of any jurisdiction or governmental or regulatory authority, including (without limitation) any state or local taxes or other similar assessment or charge that may be applicable to any payment in respect of the Securities.

An investment in Securities is only suitable for investors who:

- (a) have the requisite knowledge and experience in financial and business matters to evaluate the merits and risks of an investment in Securities;
- (b) have access to, and knowledge of, appropriate analytical tools to evaluate such merits and risks in the context of their financial situation;
- (c) are capable of bearing the economic risk of an investment in Securities for an indefinite period of time; and
- (d) recognise that it may not be possible to dispose of Securities for a substantial period of time, if at all.

Prospective investors in Securities should make their own independent decision to invest in Securities and as to whether the investment in Securities is appropriate or proper for them based upon their own judgement and upon advice from such advisers as they may deem necessary. Prospective investors in Securities should not rely on any communication (written or oral) of the relevant Issuer, the CGMHI Guarantor (if applicable) and the CGMFL Guarantor (if applicable), any Dealer or any of their affiliates or their respective officers or agents as investment advice or as a recommendation to invest in Securities, it being understood that information and explanations related to Securities shall not be considered to be investment advice or a recommendation to invest in Securities. No communication (written or oral) received from the relevant Issuer, the CGMHI Guarantor (if applicable) and the CGMFL Guarantor (if applicable), any Dealer or any of their affiliates or their respective officers or agents shall be deemed to be an assurance or guarantee as to the expected results of an investment in Securities.

#### *Hedging arrangements in respect of the Securities*

Any Issuer and/or the CGMHI Guarantor and/or the CGMFL Guarantor and/or any of their affiliates may enter into arrangements to hedge the relevant Issuer's and/or the CGMHI Guarantor's and/or the CGMFL Guarantor's obligations under the Securities and/or the CGMHI Deed of Guarantee and/or the CGMFL Deeds of Guarantee but are not required to do so. If they do so, any Issuer and/or

the CGMHI Guarantor and/or the CGMFL Guarantor and/or any such affiliate will have certain rights under such hedging arrangements and may pursue actions and take steps that they deem appropriate to protect their own interests under such hedging arrangements without regard to the consequences for Securityholders. Investors will not have recourse to the applicable counterparty under any such hedging arrangements and any such hedging arrangements will not confer any rights or entitlements on any Securityholders and will constitute separate obligations of the relevant Issuer and/or the CGMHI Guarantor and/or the CGMFL Guarantor and/or any such affiliate.

Prospective investors intending to purchase Securities to hedge against the market risk associated with investing in the particular Underlying(s) should recognise the complexities of utilising Securities in this manner. For example, the value of the relevant Securities may not exactly correlate with the value of the relevant Underlying(s). Due to fluctuating supply and demand for Securities, there is no assurance that their value will correlate with movements of the Underlying(s). For these reasons, among others, it may not be possible to purchase or liquidate securities in a portfolio at the prices used to calculate the value of any relevant Underlying, and the investor may suffer a loss accordingly.

***Certain factors affecting the value and trading price of Securities***

The amounts due and/or value of any assets to be delivered in respect of the Securities at any time prior to the relevant maturity date is typically expected to be less than the trading price of such Securities at that time. The difference between the trading price and such amounts due and/or value of any assets to be delivered, as the case may be, will reflect, among other things, the "time value" of the Securities. The "time value" of the Securities will depend partly upon the length of the period remaining to maturity and expectations concerning the value of the Underlying(s).

Securities pose some additional risks with regard to interim value. The interim value of Securities varies as the price or level of the Underlying(s) varies, as well as due to a number of other interrelated factors, including (i) the trading price of the relevant Securities, (ii) the value and volatility of the Underlying(s), (iii) the remaining tenor, (iv) in the case of Cash Settled Securities, the probable range of any Redemption Amounts, (v) any change(s) in interim interest rates and dividend yields if applicable, (vi) any change(s) in currency exchange rates, (vii) the depth of the market or liquidity of the Underlying(s) and (viii) any related transaction costs.

Any sale of Securities prior to their scheduled redemption may be at a substantial discount from the original purchase price and Securityholders may lose some or all of their investment.

***Application of Fallback Provisions in respect of Reference Rates and Benchmarks***

The fallback provisions described in Valuation and Settlement Condition 8 in respect of Reference Rates and Benchmarks apply as follows:

**Reference Rates:**

- If a Reference Rate Event occurs and if the applicable Final Terms specify any Reference Rate to be applicable in respect of the Securities, Valuation and Settlement Condition 6 (the "**Reference Rate Event Provisions**") shall apply.
- A Reference Rate Event occurs with respect to a Reference Rate (which means any interest rate howsoever described in the terms and conditions of the Securities and as amended from time to time pursuant to the provisions of the Reference Rate Event Provisions) where the Calculation Agent determines that (i) the Reference Rate has been or will be materially changed, has ceased or will cease to be provided permanently or indefinitely and there is no successor administrator or provider that will continue to provide the Reference Rate, or a regulator or other official sector entity has prohibited or will prohibit the use of or it is

otherwise not permitted to use such Reference Rate in respect of the Securities; (ii) any authorisation or similar in respect of the Reference Rate or the administrator or sponsor of the Reference Rate has not been, or will not be, obtained or has been, or will be, refused or similar and as a result the Issuer or any other entity is not or will not be permitted under applicable law or regulation to use the relevant Reference Rate to perform its or their obligations under the Securities; (iii) unless the applicable Final Terms specify that "*Reference Rate Event (Limb (iii))*" does not apply, it is not commercially reasonable to continue use of the Reference Rate due to licensing restrictions or changes in licensing costs; (iv) the administrator or sponsor of the relevant Reference Rate, any national, regional or other supervisory or regulatory authority which is responsible for either (a) supervising the administrator or sponsor of the Reference Rate or (b) regulating the Reference Rate, the central bank for the currency of the Reference Rate or other official body with applicable responsibility announcing that the Reference Rate is no longer, or as of a specified future date will no longer be representative of any underlying market and or economic reality that such Reference Rate is intended to measure and that representativeness will not be restored; or (v) the relevant Reference Rate is the subject of any market-wide development in the over-the-counter derivatives market (which may be in the form of a protocol, publication of standard terms or otherwise by ISDA) pursuant to which such Reference Rate is or will be replaced with a replacement rate with respect to over-the-counter derivatives transactions which reference such Reference Rate.

- The Calculation Agent will seek to determine a replacement Reference Rate which must be one of the following:
  - (a) where applicable, if a replacement Reference Rate can be determined by interpolating from other tenors of the relevant Reference Rate, such interpolated Reference Rate, together with an adjustment; or
  - (b) a pre-nominated replacement Reference Rate, together with an adjustment; or
  - (c) an index, benchmark, other price source or rate or fall-back rate or methodology for calculating an index, benchmark, other price source, rate or fall-back rate which is recognised or acknowledged as being an industry standard replacement for over-the-counter derivative transactions which reference such Reference Rate, together with an adjustment; or
  - (d) an index, benchmark or other price source that the Calculation Agent determines to be a commercially reasonable alternative for the Reference Rate, together with an adjustment.
- In the alternative, the Calculation Agent may determine that no replacement Reference Rate is required or may adjust the term of the Securities as it determines necessary or appropriate to account for the effect of such Reference Rate Event. Where applicable, if no such determination and/or adjustments are made, and if the Calculation Agent determines that it is not possible or commercially reasonable to identify a replacement Reference Rate or calculate the relevant adjustment, the Issuer may redeem the Securities early.
- The Calculation Agent has powers to make amendments to the terms of the Securities as it considers are necessary and/or appropriate to account for the effect of the replacement Reference Rate, and to determine the level of the Reference Rate to apply in respect of the Securities on an interim basis. For related risks see "*Interest on Securities linked to a Reference Rate will be calculated using a Replacement Reference Rate selected by the Calculation Agent if a Reference Rate Event occurs*" above.

#### Benchmarks:

- If an Administrator/Benchmark Event occurs with respect to the relevant rate, provided that the Reference Rate Event Provisions do not apply to the relevant event or circumstance, Valuation and Settlement Condition 7 (the "**Administrator/Benchmark Event provisions**") shall apply.
- An Administrator/Benchmark Event occurs with respect to a Benchmark (which means any figure or rate and where any amount payable or deliverable under the Securities, or the value of the Securities, is determined by reference in whole or in part to such figure or rate) where the Calculation Agent determines that (i) a Benchmark is materially changed, cancelled or its use is prohibited by a regulator or other official sector entity in respect of the Securities; (ii) any authorisation or similar in respect of a relevant Benchmark or the administrator or sponsor of a relevant Benchmark has not been, or will not be, obtained or has been, or will be, rejected or similar with the effect that the Issuer or any other entity is not, or will not be, permitted under any applicable law or regulation to use the relevant Benchmark to perform its or their respective obligations under the Securities; (iii) unless the applicable Final Terms specify that "*Administrator/Benchmark Event (Limb (3))*" does not apply, it is not commercially reasonable to continue use of the Benchmark due to licensing restrictions or changes in licence costs; or (iv) a relevant supervisor and/or sponsor officially announces the benchmark is no longer representative, or as of a specified future date will no longer be capable of being representative, of any relevant underlying market(s) or economic reality that such Benchmark is intended to measure.
- The Calculation Agent may make adjustment(s) to the terms of the Securities as it determines necessary or appropriate to account for the effect of the relevant event or circumstance, including, without limitation, the selection of a successor benchmark. Alternatively and if applicable, the Issuer may redeem the Securities early. For related risks see "*Risks relating to the occurrence of an Administrator/Benchmark Event*" above.

#### Interest Rate as an Underlying:

- If an event or circumstance occurs with respect to an interest rate which is an Underlying and if the applicable Final Terms specify an interest rate as an Underlying, provided that neither the Reference Rate Event Provisions nor the Administrator/Benchmark Event provisions apply to the relevant interest rate as a result of such relevant event or circumstance, the provisions of Underlying Schedule 10 (*Underlying Interest Rate Conditions*) relating to the determination of the Underlying Closing Level of an interest rate on any Scheduled Trading Day in the event of the occurrence of any Disrupted Day and the provisions relating to the consequences of any such Disrupted Day set out in the terms and conditions of the Securities shall apply. For related risks, see "*Risks relating to the discontinuance or unavailability of an Interest rate*" above.

#### Screen Rate Determination:

- If a floating rate cannot be determined and if the applicable Final Terms specify any of Screen Rate Determination or ISDA Determination to be applicable, provided that none of the Reference Rate Event Provisions, the Administrator/Benchmark Event provisions and the Underlying Interest Rate Conditions apply to the relevant floating rate as a result of such relevant event or circumstance, the relevant provisions of Valuation and Settlement Condition 3(a) shall apply.
- Where Screen Rate Determination is applicable, if the Page is not available or if no offered quotation or fewer than three offered quotations appear or no rate is provided or published

by the relevant administrator or a relevant authorised distributor or a component of the relevant rate is not provided or published (as applicable), in each case as at the Specified Time, or by 10.30 a.m. Sydney time in the case of BBSW, the Calculation Agent will determine the Screen Rate in its reasonable discretion (*billiges Ermessen*, § 317 of the German Civil Code (*BGB*)) having regard to such source as it deems appropriate and any alternative benchmark then available and taking into account prevailing industry standards in any related market (including, without limitation, the derivatives market). Such rate may be (without limitation) a rate published by another authorised distributor, a rate formally recommended by the administrator of the relevant rate or the administrator or supervisor or competent authority responsible for supervising such administrator, the last published rate or the arithmetic mean of quotations provided by reference banks selected by the Calculation Agent.

#### ISDA Determination:

Where ISDA determination is selected as the method of calculation of a rate of interest, the relevant rate will be determined on the same basis as the rate that would be calculated under an 'over-the-counter' derivative transaction documented using the market standard interest rate definitions published by ISDA. These definitions provide a standard method of calculating interest and include certain 'fallback' provisions which may be used to determine an interest rate in the event of temporary or permanent discontinuation of the relevant rate. However, for the purposes of the Securities, the fallback provisions set out in the relevant ISDA interest rate definitions will only apply in certain circumstances as described below.

The ISDA interest rate definitions have been amended, supplemented and replaced from time to time and, as at the date of this document, there are two versions which are relevant for the purposes of the Securities: the 2006 ISDA Definitions published by ISDA as amended or supplemented from time to time (the "**2006 Definitions**") and the 2021 ISDA Interest Rate Derivatives Definitions published by ISDA as restated from time to time (the "**2021 Definitions**"). The applicable Final Terms will indicate the version of the ISDA definitions which apply in respect of the Securities.

- Where ISDA Determination is applicable, and the 2006 Definitions are specified in the applicable Final Terms, if the Calculation Agent determines that the ISDA Rate cannot be determined, then notwithstanding anything to the contrary in the Terms and conditions of the Securities, and prior to the application of any provisions relating to an index cessation event (howsoever described) or other permanent cessation fallback provisions in the 2006 Definitions (including where applicable such fallbacks set out in any supplement to the 2006 Definitions), the ISDA Rate for the relevant period and/or date shall be such rate as is determined by the Calculation Agent in its reasonable discretion (*billiges Ermessen*, § 317 of the German Civil Code (*BGB*)) having regard to alternative benchmarks then available and taking into account prevailing industry standards in any related market (including, without limitation, the derivatives market). It should be noted, however, that even though relevant fallback provisions may be included in accordance with the terms of the ISDA Determination itself or the above provision, if prior ranking fallback provisions described in Valuation and Settlement Condition 8 apply then these prior ranking fallback provisions will be applied first, meaning that any fallback provisions included as part of the ISDA Determination itself may not apply.
- Where ISDA Determination is applicable and the 2021 Definitions are specified in the applicable Final Terms, any fallback provisions relating to temporary cessation will apply in respect of the Securities. However, prior to the application of any provisions relating to permanent cessation or an Administrator/Benchmark Event in the 2021 Definitions

(including, for the avoidance of doubt any discontinued rates maturities provisions), then, subject as provided in "*Hierarchy Provisions and Adjustments*" below and notwithstanding anything to the contrary in the terms and conditions of the Securities, the ISDA Rate for the relevant period and/or date shall be such rate as is determined by the Calculation Agent in its reasonable discretion (*billiges Ermessen*, § 317 of the German Civil Code (*BGB*)) having regard to alternative benchmarks then available and taking into account prevailing industry standards in any related market (including, without limitation, the derivatives market). See further "*The unavailability, disruption or discontinuance of any interest rate to which the Securities are linked will result in the application of certain fallback provisions*" above.

- For related risks, see "*If a floating rate becomes unavailable it may be determined in the Calculation Agent's reasonable discretion (billiges Ermessen, § 317 of the German Civil Code (BGB)) or by alternative methods*" above.

SONIA Floating Rate Determination, SOFR Floating Rate Determination:

- If a floating rate cannot be determined and SONIA Floating Rate Determination (Non-Index Determination), SONIA Floating Rate Determination (Index Determination) and/or SOFR Floating Rate Determination are specified in the applicable Final Terms, provided that none of the Reference Rate Event Provisions, the Administrator/Benchmark Event provisions and the Underlying Interest Rate Conditions apply to the relevant floating rate as a result of the relevant event or circumstance, the relevant provisions of Valuation and Settlement Condition 3(a) shall apply.
- Where SONIA Floating Rate Determination (Non-Index Determination) is applicable, if the Calculation Agent determines that the SONIA rate is not available on the relevant Page or has not otherwise been published by the relevant authorised distributors on a relevant day, the Calculation Agent will determine such SONIA rate as being:
  - (a) (i) the Bank of England's Bank Rate (the "Bank Rate") prevailing at close of business on such day in the relevant Observation Period; plus (ii) the mean of the spread of the SONIA rate to the Bank Rate over the previous five days on which a SONIA rate has been published, excluding the highest spread (or, if there is more than one highest spread, one only of those spreads) and the lowest spread (or, if there is more than one lowest spread, one only of those spreads) to the Bank Rate; or
  - (b) if the Bank Rate is not published by the Bank of England at close of business on such day in the relevant Observation Period, the SONIA rate published on the relevant Page (or otherwise published by the relevant authorised distributors) for the first preceding London Banking Day on which the SONIA rate was published on such Page (or otherwise published by the relevant authorised distributors).

Notwithstanding the foregoing, in the event the Bank of England publishes guidance as to (A) how the SONIA rate is to be determined or (B) any rate that is to replace the SONIA rate, the Calculation Agent shall, to the extent that it is reasonably practicable, follow such guidance in order to determine the SONIA rate for the purpose of the Securities for so long as the SONIA rate is not available or has not been published by the authorised distributors. For related risks, see "*If a floating rate becomes unavailable it may be determined in the Calculation Agent's reasonable discretion (billiges Ermessen, § 317 of the German Civil Code (BGB)) or by alternative methods*" above.

- If the relevant rate is unavailable and the SONIA Floating Rate Determination provisions of Valuation and Settlement Condition 3(a) and/or the SOFR Floating Rate Determination provisions of Valuation and Settlement Condition 3(a) apply, subject as provided in

Valuation and Settlement Condition 8, the relevant SONIA Index value, or SOFR or SOFR Index value, as applicable, will be determined by the Calculation Agent in its reasonable discretion (*billiges Ermessen*, § 317 of the German Civil Code (*BGB*)) having regard to such sources as it deems appropriate and any alternative benchmark then available and taking into account prevailing industry standards in any related market (including, without limitation, the derivatives market).

#### ***Considerations relating to linear interpolation provisions***

If "2021 Definitions Linear Interpolation" is specified as applicable in the applicable Final Terms, then the provisions relating to "Linear Interpolation" set out in the 2021 Definitions will apply to the relevant Floating Rate Option. The Floating Rate Option shall be determined at the level of the related swap or hedging arrangement by straight line linear interpolation by reference to two rates based on the relevant Floating Rate Option, one of which shall be determined as if the Designated Maturity were the period of time for which rates are available next shorter than the length of the relevant Interest Period and the other of which shall be determined as if the Designated Maturity were the period of time for which rates are available next longer than the length of the relevant Interest Period, provided that if there is no rate available for a period of time next shorter or, as the case may be, next longer, then the calculation agent for the relevant swap shall determine such rate at such time and by reference to such sources as it determines appropriate. In such circumstances, the linear interpolation provisions set out in Valuation and Settlement Condition 3(f) of the terms and conditions of the Securities shall not apply to the Securities.

#### ***Leveraging Risk***

Borrowing to fund the purchase of the Securities (leveraging) can have a significant negative impact on the value of and return on the investment. Investors considering leveraging the Securities should obtain further detailed information as to the applicable risks from the leverage provider.

#### ***Change of law (including applicable tax law) or tax practice***

The terms and conditions of the Securities are based on relevant laws in effect as at the date of this Base Prospectus. No assurance can be given as to the impact of any possible judicial decision or change to such laws or administrative practices after the date of this Base Prospectus and any such change could materially adversely impact the value of any Securities affected by it.

In addition, any relevant tax law, regulations or practice applicable as at the date of this Base Prospectus and/or the date of purchase or subscription of any Securities may change at any time (including during any subscription period or the term of any Securities) and it is not possible to predict the precise tax treatment which will apply to the Securities at any given time. Any such change may have an adverse effect on the investor including that its Securities may be redeemed before their due date, their liquidity may decrease and/or the tax treatment of amounts payable or receivable by or to the Investor may be less favorable than otherwise expected by it.

#### ***Credit ratings may not reflect all risks***

One or more independent credit rating agencies may assign credit ratings to securities issued under the Programme, including any Securities. The credit rating agencies may have different rating methodologies, criteria, models and requirements from one another. The ratings may not reflect the potential impact of all risks related to structure, market and other factors that may affect the value of the Securities. A credit rating is not a recommendation to buy, sell or hold securities and may be reduced, withdrawn or qualified by the rating agency at any time. If the ratings on any Securities are reduced, withdrawn or qualified, it could adversely affect the liquidity or the market value of such Securities.

Additionally, the global landscape of financial sector regulation itself is undergoing significant change. In the U.S., the Dodd-Frank Act, among other things, expands regulatory oversight of Citigroup Inc. (and its subsidiaries) and credit rating agencies. It is not clear how this expanded regulatory oversight will impact the ratings on the Securities or the rating of the relevant Issuer, the CGMHI Guarantor and/or the CGMFL Guarantor.

In general, European (excluding United Kingdom) regulated investors are restricted under the EU CRA Regulation from using credit ratings for regulatory purposes, unless such ratings are issued by a credit rating agency established in the EU and registered under the EU CRA Regulation (and such registration has not been withdrawn or suspended, subject to transitional provisions that apply in certain circumstances). Such general restriction will also apply in the case of credit ratings issued by non-EU credit rating agencies, unless the relevant credit ratings are endorsed by an EU-registered credit rating agency or the relevant non-EU rating agency is certified in accordance with the EU CRA Regulation (and such endorsement action or certification, as the case may be, has not been withdrawn or suspended, subject to transitional provisions that apply in certain circumstances). If the status of the rating agency rating the Securities changes, European (excluding United Kingdom) regulated investors may no longer be able to use the rating for regulatory purposes and the Securities may have a different regulatory treatment. This may result in European (excluding United Kingdom) regulated investors selling the Securities which may impact the value of the Securities and any secondary market. The list of registered and certified rating agencies published by ESMA on its website in accordance with the EU CRA Regulation is not conclusive evidence of the status of the relevant rating agency included in such list, as there may be delays between certain supervisory measures being taken against a relevant rating agency and the publication of the updated ESMA list.

In general, United Kingdom regulated investors are restricted under the UK CRA Regulation from using credit ratings for regulatory purposes, unless such ratings are issued by a credit rating agency established in the UK and registered under the UK CRA Regulation (and such registration has not been withdrawn or suspended, subject to transitional provisions that apply in certain circumstances). Such general restriction will also apply in the case of credit ratings issued by non-UK credit rating agencies, unless the relevant credit ratings are endorsed by a UK-registered credit rating agency or the relevant non-UK rating agency is certified in accordance with the UK CRA Regulation (and such endorsement action or certification, as the case may be, has not been withdrawn or suspended, subject to transitional provisions that apply in certain circumstances). If the status of the rating agency rating the Securities changes, United Kingdom regulated investors may no longer be able to use the rating for regulatory purposes and the Securities may have a different regulatory treatment. This may result in United Kingdom regulated investors selling the Securities which may impact the value of the Securities and any secondary market. The list of registered and certified rating agencies published by the FCA on its website in accordance with the UK CRA Regulation is not conclusive evidence of the status of the relevant rating agency included in such list, as there may be delays between certain supervisory measures being taken against a relevant rating agency and the publication of the updated FCA list.

***Citi, its management and its businesses must continually review, analyse and successfully adapt to ongoing regulatory and other uncertainties and changes in the U.S. and globally***

Despite the adoption of final regulations and laws in numerous areas impacting Citigroup Inc. and its businesses over the past several years, Citigroup Inc., its management and its businesses continually face ongoing regulatory and legislative uncertainties and changes, both in the United States of America ("U.S.") and globally. While the areas of ongoing regulatory and legislative

uncertainties and changes facing Citigroup Inc. are too numerous to list completely, various examples include, but are not limited to (i) potential fiscal, monetary, regulatory, tax and other changes arising from the U.S. federal government and other governments, including as a result of the differing priorities of the current U.S. presidential administration, changes in regulatory leadership or focus and actions of Congress or in response to the pandemic; (ii) potential changes to various aspects of the regulatory capital framework and requirements applicable to Citigroup Inc.; and (iii) future legislative and regulatory requirements in the U.S. and globally related to climate change, including any new disclosure requirements. When referring to "regulatory", Citigroup Inc. is including both formal regulation and the views and expectations of its regulators in their supervisory roles.

Ongoing regulatory and legislative uncertainties and changes make Citigroup Inc.'s and its management's long-term business, balance sheet and strategic budget planning difficult, subject to change and potentially more costly. U.S. and other regulators globally have implemented and continue to discuss various changes to certain regulatory requirements, which would require ongoing assessment by management as to the impact to Citigroup Inc., its businesses and business planning. For example, while the Basel III post-crisis regulatory reforms and revised market risk framework have been finalised at the international level, there remain significant uncertainties with respect to the integration of these revisions into the U.S. regulatory capital framework. Business planning is required to be based on possible or proposed rules or outcomes, which can change dramatically upon finalisation, or upon implementation or interpretive guidance from numerous regulatory bodies worldwide, and such guidance can change.

Moreover, U.S. and international regulatory and legislative initiatives have not always been undertaken or implemented on a coordinated basis, and areas of divergence have developed and continue to develop with respect to the scope, interpretation, timing, structure or approach, leading to inconsistent or even conflicting requirements, including within a single jurisdiction. For example, in May 2019, the European Commission adopted, as part of Capital Requirements Directive V, a new requirement for major banking groups headquartered outside the EU (which would include Citigroup Inc.) to establish an intermediate EU holding company where the foreign bank has two or more institutions (broadly meaning banks, broker-dealers and similar financial firms) established in the EU. While in some respects the requirement mirrors an existing U.S. requirement for non-U.S. banking organizations to form U.S. intermediate holding companies, the implementation of the EU holding company requirement could lead to additional complexity with respect to Citigroup Inc.'s resolution planning, capital and liquidity allocation and efficiency in various jurisdictions.

Regulatory and legislative changes have also significantly increased Citigroup Inc.'s compliance risks and costs and can adversely affect Citigroup Inc.'s businesses, results of operations and financial condition.

## **2 Green Bonds**

The Final Terms relating to any issuance of specific Securities may provide that it will be the relevant Issuer's intention to apply an amount equal to the net proceeds of such Securities to fund, in whole or in part, the financing or refinancing of "Eligible Green Assets", which refers to loans and/or investments made by entities within the Group for assets or projects that meet the Green Bond Eligibility Criteria (as specified in the Green Bond Framework) of the Group in accordance with its Green Bond Framework where the use of such funds supports the sustainable progress strategy of the Group ("**Green Bonds**"). Potential investors should make their own independent decision to invest in Green Bonds and as to whether an investment in such Securities is appropriate or proper for them based upon their own judgement, circumstances and investment criteria or guidelines and upon advice from such advisers as they may deem necessary.

### *Green Bond Framework*

The Group has developed a Green Bond Framework (the "**Green Bond Framework**") for securities issuances in order to finance projects that contribute to climate change mitigation as well as projects that promote sustainable infrastructure. The below description is based on the Green Bond Framework as at the date of this Base Prospectus. However, the Green Bond Framework may be amended or updated from time to time and investors should therefore refer to the most recent version of the Green Bond Framework which will be available on the Group's website ([https://www.citigroup.com/citi/fixedincome/green\\_bonds.htm](https://www.citigroup.com/citi/fixedincome/green_bonds.htm)) and the applicable Final Terms for information on the use of proceeds of the relevant Securities.

As at the date of this Base Prospectus, the Green Bond Framework has received a second party opinion by an independent consultant as detailed therein. Any such opinion is only current as of the date that opinion was issued and is not, nor should be deemed to be, a recommendation by the relevant Issuer, the Dealers or any other person to buy, sell or hold Green Bonds. Potential investors must determine for themselves the relevance of any such opinion and/or the information contained therein for the purpose of any investment in Green Bonds. As at the date of this Base Prospectus, the providers of such opinions are not subject to any specific oversight or regulatory or other regime. For the avoidance of doubt, the Green Bond Framework and any such opinion are not, nor shall be deemed to be, incorporated in and/or form part of this Base Prospectus.

### *Eligible Green Projects*

The Green Bond Eligibility Criteria specified in the Green Bond Framework reflect good practices for supporting the transition to a low-carbon economy through projects in one or more of the following areas (or any other eligible area described in the applicable Final Terms) ("**Eligible Green Projects**"):

- *Renewable energy*: proceeds may be allocated towards the acquisition, development, operation and maintenance of new and ongoing renewable energy activities, including related costs.
- *Energy efficiency*: proceeds may be allocated towards the financing or refinancing of warehouse facilities for residential energy efficiency loans or consumer finance companies that provide residential energy efficiency loans for projects or assets that reduce energy consumption or mitigate greenhouse gas (GHG) emissions.
- *Sustainable transportation*: proceeds may be allocated towards building or operating mass transit and creating or constructing infrastructure to support mass transit.
- *Water quality and conservation*: proceeds may be allocated towards projects that improve water quality, efficiency and conservation.
- *Green building*: proceeds may be allocated towards financing of existing or new construction / renovation of residential and commercial buildings that earn certain efficiency and environmental certifications.

The Group has developed a list of exclusionary criteria ("**Exclusionary Criteria**") for the use of proceeds from the sale of Green Bonds (for example, certain large-scale hydropower plants, nuclear power plants and fossil fuel projects) and commits itself to not knowingly being involved in financing any such projects or activities through the proceeds of any such sale.

### *Green Bond Asset Portfolio and Management of Proceeds*

Under the Green Bond Framework, the Group will maintain a single pool for Eligible Green Assets (the "**Green Bond Asset Portfolio**"). If the investment by any entity within the Group in any asset

in the Green Bond Asset Portfolio is terminated or if an asset no longer meets the Green Bond Eligibility Criteria, the asset will be removed from the Green Bond Asset Portfolio.

The Group's Green Bond Asset Working Group (the "**GBA Working Group**") is responsible for supervising the Green Bond Asset Portfolio and the aggregate amount of Green Bonds issued by entities within the Group with the aim of ensuring that the aggregate amount in the Green Bond Asset Portfolio is equal to or greater than the aggregate amount raised by such Green Bonds. For this purpose, the aggregate size and maturity of the Green Bond Asset Portfolio is monitored quarterly. If for any reason the aggregate amount in the Green Bond Asset Portfolio is less than the aggregate amount of Green Bonds issued, the unallocated amount will be held in cash, cash equivalents and/or other liquid marketable instruments (including U.S. Treasury securities) in the liquidity portfolio of the Group until the amount can be allocated towards the Green Bond Asset Portfolio.

### *Reporting*

Under the Green Bond Framework, a report (the "**Green Bond Report**") will be published by the Group on its website ([https://www.citigroup.com/citi/fixedincome/green\\_bonds.htm](https://www.citigroup.com/citi/fixedincome/green_bonds.htm)) within a year from any issuance of any Green Bonds which will be renewed annually until full allocation and in case of any material changes. No other or separate notification will be provided to investors in particular Green Bonds as to the Green Bond Asset Portfolio.

The Green Bond Report will give details of (i) the total amount of assets in the Green Bond Asset Portfolio and the total outstanding amount raised by Green Bond issuances; (ii) the eligible assets within the Green Bond Asset Portfolio along with the Issuer's financial commitments to each asset; (iii) the total amount of unallocated proceeds, if any; and (iv) environmental impacts of the Green Bond Asset Portfolio to the extent it is practical to do so. Any such report is only current as of the date that report was issued and is not, nor should be deemed to be, a recommendation by the Issuer, the Dealers or any other person to buy, sell or hold Green Bonds.

Under the Green Bond Framework, the Issuer has also engaged external independent accountants to review that the assets included in the Green Bond Asset Portfolio meet the Green Bond Eligibility Criteria and are not invested in assets as defined by the Exclusionary Criteria and that the aggregate amount in the Green Bond Asset Portfolio is equal to or greater than the aggregate amount raised by Green Bonds (or, to the extent the total amount of the outstanding bonds is less than the aggregate amount in Green Bond Asset Portfolio, that the difference is held in the manner described in the Green Bond Framework). Any review report is only current as of the date that report was issued and investors must determine for themselves the relevance of any such report and/or the information contained therein for the purposes of their investment considerations or expectations.

For the avoidance of doubt, neither the Green Bond Report nor the report of any third party is, or shall be deemed to be, incorporated in and/or form part of this Base Prospectus.

## **3 Social Bonds issued by CGMHI**

The Final Terms relating to any issuance of specific Securities may provide that it will be the relevant Issuer's intention to apply an amount equal to the net proceeds of such Securities to fund the financing or refinancing, in whole or in part, of a portion of the Group's portfolio of affordable housing assets ("**Social Bonds**"). Prospective investors should make their own independent decision to invest in Social Bonds and as to whether an investment in such Securities is appropriate or proper for them based upon their own judgement, circumstances and investment criteria or guidelines and upon advice from such advisers as they may deem necessary.

Social Bonds shall not be issued by CGMFL.

### *Social Bond Framework*

The Group has developed a Social Bond Framework for Affordable Housing (the "**Social Bond Framework**") for securities issuances in order to finance projects that contribute to affordable and supportive housing. The Social Bond Framework may be amended or updated from time to time and investors should therefore refer to the most recent version of the Social Bond Framework which will be available on the Group's website ([https://www.citigroup.com/citi/fixedincome/housing\\_bonds.htm](https://www.citigroup.com/citi/fixedincome/housing_bonds.htm)) and the applicable Final Terms for information on the use of proceeds of the relevant Securities.

As at the date of this Base Prospectus, the Social Bond Framework has received a second party opinion by an independent consultant as detailed therein. Any such opinion is only current as of the date that opinion was issued and is not, nor should be deemed to be, a recommendation by the Issuer, the Dealers or any other person to buy, sell or hold Social Bonds. Potential investors must determine for themselves the relevance of any such opinion and/or the information contained therein for the purpose of any investment in Social Bonds. As at the date of this Base Prospectus, the providers of such opinions are not subject to any specific oversight or regulatory or other regime. For the avoidance of doubt, the Social Bond Framework and any such opinion are not, nor shall be deemed to be, incorporated in and/or form part of this Base Prospectus.

### *Affordable Housing Bond Asset Portfolio and Management of Proceeds*

Under the Social Bond Framework, an amount equivalent to the net proceeds of Social Bonds is allocated to finance or refinance a portion of the Group's portfolio of affordable housing assets (the "**Affordable Housing Bond Asset Portfolio**"), which consist of selected eligible financing instruments which are used to finance the construction, rehabilitation and/or the preservation of quality affordable housing for low-moderate income populations in the United States (the "**Social Bond Eligibility Criteria**"). If the investment in any asset in the Affordable Housing Bond Asset Portfolio is terminated or if an asset no longer meets the Social Bond Eligibility Criteria, the asset will be removed from the Affordable Housing Bond Asset Portfolio.

The Group's Affordable Housing Bond Asset Working Group (the "**AFBA Working Group**") is responsible for oversight of the Affordable Housing Bond Asset Portfolio and monitoring the aggregate amount of Social Bonds issued by entities within the Group with the aim of ensuring that the aggregate amount in the Affordable Housing Bond Asset Portfolio is equal to or greater than the aggregate amount raised by such Social Bonds. For this purpose, the continued eligibility and aggregate size of the Affordable Housing Bond Asset Portfolio is monitored quarterly. If for any reason the aggregate amount in the Affordable Housing Bond Asset Portfolio is less than the outstanding amount of Social Bonds issued, the unallocated amount will be held in cash, cash equivalents and/or other liquid marketable instruments (including U.S. Treasury securities) until the amount can be allocated towards the Affordable Housing Bond Asset Portfolio.

The Group has developed a list of exclusionary criteria ("**Exclusionary Criteria**") for the proceeds of the Affordable Housing Bond Asset Portfolio (for example, certain loans or investments for projects outside the United States, mortgage-backed securities and other derivatives, etc., all as further described in the Social Bond Framework) and commits itself to not knowingly be involved in financing any such projects or activities through the proceeds of any such sale.

### *Reporting*

Under the Social Bond Framework, a report (the "**Affordable Housing Bond Report**") will be published by the Group on its website ([https://www.citigroup.com/citi/fixedincome/housing\\_bonds.htm](https://www.citigroup.com/citi/fixedincome/housing_bonds.htm)) within a year from any issuance of the inaugural Social Bonds and which will cover all Social Bonds issued during the reporting period specified therein and any material changes in the Affordable Housing Bond Asset Portfolio.

No other or separate notification will be provided to investors in particular Social Bonds as to the Affordable Housing Bond Asset Portfolio.

The Affordable Housing Bond Report will provide information on (i) the total outstanding par amount of Social Bonds issued during the reporting period; (ii) the total outstanding amount of funded financial assets that comprise the Affordable Housing Bond Asset Portfolio; (iii) the total amount of unallocated proceeds, if any, assigned to cash, cash equivalent and/or other liquid marketable instruments; and (iv) social impacts of the Social Bonds by providing information about the housing properties associated with the Affordable Housing Bond Asset Portfolio. Any such report is only current as of the date that report was issued and is not, nor should be deemed to be, a recommendation by the Issuer, the Dealers or any other person to buy, sell or hold Social Bonds.

Under the Social Bond Framework, the Issuer will also engage external independent accountants to review that the assets included in the Affordable Housing Bond Asset Portfolio meet the Social Bond Eligibility Criteria and are not invested in assets as defined by the Exclusionary Criteria and that the aggregate amount in the Affordable Housing Bond Asset Portfolio is equal to or greater than the aggregate amount raised by the issuance of Social Bonds (or, to the extent the total amount of the outstanding Social Bonds is less than the aggregate amount in the Affordable Housing Bond Asset Portfolio, that the difference is held in the manner described in the Social Bond Framework). Any review report is only current as of the date that report was issued and investors must determine for themselves the relevance of any such report and/or the information contained therein for the purpose of their investment considerations or expectations.

For the avoidance of doubt, neither the Affordable Housing Bond Report nor the report of any third party is, or shall be deemed to be, incorporated in and/or form part of this Base Prospectus.

#### **4 Social Finance Bonds issued by CGMHI**

The Final Terms relating to any issuance of specific Securities may provide that it will be the relevant Issuer's intention to allocate an amount equal to the net proceeds of such Securities to finance or refinance a portion of certain of the Group's portfolio of assets (such assets, the "**Social Finance Assets**" and any such portfolio, the "**Social Finance Assets Portfolio**") that meet the Group's Social Finance Asset Portfolio Eligibility Criteria (as specified in the Social Finance Framework) and do not meet any of the Exclusionary Criteria (as specified in the Social Finance Framework). Potential investors should make their own independent decision to invest in the Social Finance Bonds and as to whether an investment in such Securities is appropriate or proper for them based upon their own judgement, circumstances and investment criteria or guidelines and upon advice from such advisers as they may deem necessary.

Social Finance Bonds shall not be issued by CGMFL.

##### *Social Finance Framework*

The Group has developed the Citigroup Social Finance Framework (the "**Social Finance Framework**") for securities issuances in order to support lending to social businesses across Citigroup's emerging market footprint. The below description is based on the Social Finance Framework as at the date of this Base Prospectus. However, the Social Finance Framework may be amended or updated from time to time and you should therefore refer to the most recent version of the Social Finance Framework which will be available on the Group's website ([https://www.citigroup.com/citi/fixedincome/social\\_finance\\_bonds.htm](https://www.citigroup.com/citi/fixedincome/social_finance_bonds.htm)) and the applicable Final Terms for information on the use of proceeds of the relevant Securities.

The Social Finance Framework has been developed in line with the International Capital Market Association (ICMA) Social Bond Principles 2021. As at the date of this Base Prospectus, the Social

Finance Framework has received a "second party opinion" by an independent consultant as detailed therein. Any such opinion is only current as of the date that opinion was issued and is not, nor should be deemed to be, a recommendation by the relevant Issuer, the Dealers or any other person to buy, sell or hold Social Finance Bonds. Potential investors must determine for themselves the relevance of any such opinion and/or the information contained therein for the purpose of any investment in Social Finance Bonds. As at the date of this Base Prospectus, the providers of such opinions are not subject to any specific oversight or regulatory or other regime. For the avoidance of doubt, the Social Finance Framework and any such opinion are not, nor shall be deemed to be, incorporated in and/or form part of this Base Prospectus.

#### *Social Finance Assets*

The Social Finance Assets must meet the Social Finance Asset Portfolio Eligibility Criteria by falling into one of the categories outlined below:

- (1) *Access to essential services*: financing expanding access to financial services to unbanked and underserved individuals and small and medium-sized enterprises (SMEs);
- (2) *Affordable housing*: financing for companies and financial service providers enabling access to housing and housing improvements for underserved individuals;
- (3) *Affordable basic infrastructure*: financing for companies that expand availability of water, sanitation, or clean energy for off-grid communities in emerging markets;
- (4) *Access to essential services (healthcare)*: financing for companies that expand access to inclusive healthcare, ensure healthy lives and promote well-being;
- (5) *Access to essential services (education)*: financing for companies and organisations that deliver and promote inclusive lifelong learning opportunities for underserved individuals lacking access to education and in emerging markets; and
- (6) *Access to essential services (smallholder farmer finance)*: financing for social enterprises that deliver products and services to smallholder farmers.

The Group has developed a list of exclusionary criteria for the use of the proceeds from Social Finance Bonds (the "**Exclusionary Criteria**") (for example, certain loans or investments (i) for projects in high income economies, (ii) in institutions not meeting employment regulations, (iii) supporting fossil fuel energy generation, (iv) which may result in economic loss to the Group, (v) in activities which are incompatible with the Social Finance Framework or the Group's social finance criteria or which generate significant adverse social impacts or (vi) in "prohibited activities" as defined in the Social Finance Framework) and commits itself to not intentionally including any of the projects or activities in the Social Finance Asset Portfolio.

#### *Eligible Social Finance Asset Selection and Evaluation Process*

The Group's specialist Social Finance team will review assets to check they meet the Social Finance Asset Portfolio Eligibility Criteria and will identify a unique Social Finance Asset Portfolio for the aggregate principal amount of securities issued during a given reporting period that are intended to be used for Social Finance Assets ("**Social Finance Bonds**"). Once screened, Social Finance Assets will be added to the relevant Social Finance Asset Portfolio. The selection process for the Social Finance Assets takes into account whether the potential eligible asset satisfies the criteria for inclusion in the Social Finance Assets Portfolio. Additionally, the selection of Social Finance Assets is also governed by risk approval guidelines and credit monitoring standards in each relevant jurisdiction. If the Group's investment in any asset in any Social Finance Asset Portfolio is terminated or if an asset no longer meets the Social Finance Asset Portfolio Eligibility Criteria or satisfies any of the Exclusionary Criteria, the Social Finance team will remove such asset from the

relevant Social Finance Asset Portfolio and may include additional eligible assets in a Social Finance Asset Portfolio.

#### *Management of Proceeds*

The Group's Sustainable Bond Working Group (the "**SB Working Group**") is responsible for oversight of the Social Finance Asset Portfolio, and its responsibilities include monitoring the total aggregate amount of Social Finance Bonds issued and tracking the portfolio using an internal asset management system. The SB Working Group aims to ensure that the aggregate amount in each Social Finance Asset Portfolio is equal to or greater than the aggregate amount raised by Social Finance Bonds issued during the associated reporting period by reviewing the aggregate size and maturity of the Social Finance Asset Portfolio each quarter. If for any reason the aggregate amount in any Social Finance Asset Portfolio is less than the total outstanding amount of such Social Finance Bonds issued, the Group will assign the unallocated balance to cash, cash equivalents and/or other liquid marketable instruments (including U.S. Treasury securities) until the amount can be allocated towards the Social Finance Asset Portfolio.

#### *Reporting*

The Group will publish a report (the "**Sustainable Bond Report**") on its website ([https://www.citigroup.com/citi/fixedincome/social\\_finance\\_bonds.htm](https://www.citigroup.com/citi/fixedincome/social_finance_bonds.htm)) within one year from issuance of the Group's inaugural Social Finance Bonds and will renew such report annually until full allocation of the proceeds and in case of any material changes. The Sustainable Bond Report will cover allocation and impact reporting for all Social Finance Bonds issued during the reporting period specified therein and will provide updated information should a material change in the Social Finance Asset Portfolio occur. You should note that no other or separate notification will be provided to investors in particular Social Finance Bonds as to the Social Finance Asset Portfolio.

#### *External Review*

The Group will engage external independent accountants to review that the assets included in the Social Finance Asset Portfolio meet the Social Finance Asset Portfolio Eligibility Criteria and are not invested in assets defined in the Exclusionary Criteria. Further, the independent accountants will be engaged to confirm that the aggregate amount in the Social Finance Asset Portfolio is equal to or greater than the aggregate amount raised by the relevant Social Finance Bonds and, to the extent the total amount of the relevant outstanding Social Finance Bonds is greater than the aggregate amount in the Social Finance Asset Portfolio, that the difference is held in cash, cash equivalents and/or other liquid marketable instruments (including U.S. Treasury securities) in the Group's liquidity portfolio. Any review report is only current as of the date that report was issued and you must determine for yourself the relevance of any such report and/or the information contained therein for the purposes of your own investment considerations or expectations.

For the avoidance of doubt, neither the Sustainable Bond Report nor the report of any third party is, or shall be deemed to be, incorporated in and/or form part of this Base Prospectus and is not, nor should be deemed to be a recommendation by the relevant Issuer or any Dealer to buy, sell or hold the Securities.

## **5 Securities or Underlying(s) labelled or marketed as having "green", "sustainable", "social", "ESG" or similar objectives**

Securities or the Underlying(s) of Securities (e.g., a Security Index) may be described or marketed as having "green", "sustainable", "social", "ESG" or similar objectives.

Notwithstanding the use of such term(s) in the title and/or marketing materials of the Securities or in the description of the Underlying(s), such Securities or Underlying(s) (or the administrator(s) thereof):

- may not meet investors' objectives or expectations as regarding investments which are "green", "sustainable", "social", "ESG" or other similar label; and/or
- may not fulfil legislative or regulatory requirements or criteria as regarding investments which are "green", "sustainable", "social", "ESG" or other similar label (including as set out under the EU Benchmarks Regulation, Regulation (EU) 2020/852 on the establishment of a framework to facilitate sustainable investment (the so called EU Taxonomy Regulation) or either of those regulations as they form part of the domestic law of the UK).

There is currently no universally agreed framework (legal, regulatory, or any other) or market consensus on what constitutes a "green", "sustainable", "social", "ESG" or similar product or the precise attributes required for a particular product to be defined as such, and no assurance can be given that such a universally accepted framework or consensus will develop over time. While there have been regulatory efforts in some jurisdictions and regions (particularly within the European Economic Area and the UK) to define similar concepts, the legal and regulatory framework governing sustainable finance is still developing and there can be no assurance that these local regimes will be more widely adopted in global financial markets.

Accordingly, no assurance can be given to investors that any product will meet any or all of the investor's objectives or expectations regarding investments which are "green", "sustainable", "social", "ESG" or other similar label or that no environmental, social and/or other impacts will occur in the implementation of the product.

## 6 Credit Linked Securities

### **INTRODUCTION TO CREDIT LINKED SECURITIES**

#### ***What are Credit Linked Securities?***

Credit Linked Securities are debt securities, the value of which is linked to the credit risk of one or more Reference Entities. The amount of interest, if applicable, and principal which investors will receive on the Credit Linked Securities is dependent on whether certain Credit Events occur in respect of any relevant Reference Entity to which the Credit Linked Securities are linked.

In purchasing the Credit Linked Securities, investors are assuming credit risk exposure to each Reference Entity (and possible successors thereof). A Credit Linked Security is broadly intended to give the investor access to a credit default swap referencing certain Reference Entity(ies) in funded format. Therefore, many of the features and risks applicable to a market standard credit default swap referencing the relevant Reference Entity(ies) will be equally applicable to the Credit Linked Securities.

By investing in the Credit Linked Securities, the investor will be a seller of credit protection (and hence a buyer of credit risk), while the Issuer will be a buyer of credit protection (and therefore a seller of credit risk).

#### ***What is credit risk?***

Credit risk with respect to a Reference Entity is the risk that the Reference Entity fails to perform its obligations under certain borrowed money, bond or loan (as applicable) obligations, a specified reference obligation of the Reference Entity or the risk that the Reference Entity enters into bankruptcy or insolvency proceedings. Borrowed money obligations include any incurred loan obligations of the Reference Entity, obligations under any debt securities issued by the Reference Entity and certain qualifying guarantees of the Reference Entity related to such borrowed money obligations. In addition, failure to perform with respect to certain specified reference obligations will also be captured.

The failure of the Reference Entity to perform its obligations is generally (but not exclusively) as a result of a deterioration of its financial condition.

The financial condition and creditworthiness of a Reference Entity may change over time. Public information which is available in relation to a Reference Entity may be incomplete, misleading or out of date. The identity of each Reference Entity is subject to change as a result of successions where there are debt transfers or where another entity issues bonds or incurs a loan obligation in exchange for bonds or loans of the Reference Entity. The risks associated with a successor Reference Entity may be greater than the risks associated with the original Reference Entity.

If the Credit Linked Securities are linked to multiple Reference Entities, the probability that a Credit Event will occur may be increased. The credit risk to investors may further be increased if the Reference Entities are concentrated in a particular industry sector or geographic area, or if they have exposure to similar financial or other risks.

#### ***What is the difference between the Credit Linked Securities and an ordinary debt security?***

Credit Linked Securities are similar to an ordinary debt security in that they provide the investor with a regular stream of interest payments, if applicable, and the return of par or a premium on maturity in the ordinary course. However, Credit Linked Securities have the added feature not present in ordinary debt securities of an exposure to the credit of one or more Reference Entities. If a Credit Event occurs in relation to the relevant Reference Entity, an investor may lose all or part of its investment in the Credit Linked Securities.

***What is the difference between Credit Linked Securities and a bond issued by the Reference Entity?***

Credit Linked Securities give an investor exposure to the credit risk of the Reference Entity without having to own a bond, loan or other type of borrowed money obligation of such Reference Entity. The Reference Entity itself is not a party to and has no direct involvement in the Credit Linked Securities and an investor will not be able to claim against the Reference Entity or Issuer for any losses it suffers from a Credit Event in respect of the relevant Reference Entity. The investor will also not have any interest in, or rights under, any obligation of such Reference Entity. An investment in Credit Linked Securities is not equivalent to an investment in the obligations of a Reference Entity.

The Issuer is not obliged to hold any obligation of the Reference Entity or otherwise have credit risk exposure to the Reference Entity. In addition to the credit risk of the relevant Reference Entity to which the Credit Linked Securities are linked, an investor will also be exposed to the credit risk of the Issuer and/or Guarantor, as applicable. Therefore, even if the Reference Entity is performing well, an investor may still suffer a loss if the Issuer's and/or the Guarantor's, as applicable, creditworthiness declines.

***How do changes in share prices of any Reference Entity affect the value of the Credit Linked Securities?***

Taking credit risk on the Reference Entity by purchasing Credit Linked Securities is different from taking equity risk by investing in shares of the Reference Entity. There are a number of reasons for this. For example:

- (a) the Credit Linked Securities reference borrowed money obligations of the Reference Entity or specified guarantees of the Reference Entity in respect of borrowed money obligations, and a Reference Entity must generally pay amounts due to the creditors on these debt obligations before paying dividends or capital to shareholders;
- (b) the obligations of the Reference Entity referenced by the Credit Linked Securities consist of borrowed money obligations or specified guarantees of the Reference Entity in respect of borrowed money obligations; holders of this type of debt will generally rank ahead of holders of ordinary shares in the insolvency of a Reference Entity, and so may have (but are not guaranteed) a higher rate of recovery of moneys due to them;
- (c) the Credit Linked Securities reference these borrowed money obligations and accordingly, the market value of the Credit Linked Securities is related to (although not necessarily equal to) the value of these borrowed money obligations; and
- (d) there is no direct link between share prices and the value of the Credit Linked Securities.

However, in some circumstances, change in the share price of the Reference Entity may result in or from, at a general level, a change in the market value of its debt and vice versa.

**KEY REGULATORY CONCEPTS RELEVANT TO CREDIT LINKED SECURITIES**

***What is ISDA?***

The International Swaps and Derivatives Association, Inc. ("ISDA") is a trade organisation of participants in the market for over-the-counter derivatives. It is headquartered in New York, and is responsible for creating standardised contracts such as the ISDA Master Agreement and the 2014 ISDA Credit Derivatives Definitions and a wide range of related documentation, that are used to enter into derivatives transactions. Definitions, confirmations and other documents and information published by

ISDA are available on ISDA's website: <https://www.isda.org/>. Certain publications are available free of charge while others are available to subscribers of the website only.

At the date of this Base Prospectus, ISDA has over 900 member institutions from over 70 countries. These members include a broad range of over-the-counter derivatives market participants.

### ***What is a Credit Event?***

A Credit Event is, broadly speaking, an event which may be, but is not necessarily, regarded as being indicative of a default or material decline in the creditworthiness of the Reference Entity, which also includes bankruptcy in the case of a corporate Reference Entity.

Credit Events are determined by reference to, in the context of a bankruptcy, the relevant Reference Entity itself and, in other cases, certain eligible types of obligations of such Reference Entity which, in relation to the Credit Linked Securities, include loans, debt securities or other borrowed money obligations of the Reference Entity or specified reference obligations ("**Obligations**").

The Credit Events relevant to the Credit Linked Securities are any of the following events with respect to the Reference Entity, which will apply to a Credit Linked Security if specified or elected by reference to a specified transaction type in the applicable Final Terms:

- (a) ***Failure to Pay***: a failure by the Reference Entity to pay amounts when due under its Obligations (after the expiry of any applicable grace period), where the failure to pay relates to an amount greater than a pre-determined minimum amount;
- (b) ***Bankruptcy***: a bankruptcy or insolvency procedure in respect of the Reference Entity;
- (c) ***Restructuring***: a restructuring of an Obligation of the Reference Entity which amends key terms of that Obligation as to reduction in repayment of principal or payment of interest thereunder, postponement in the payment of principal or interest, the changes in the ranking of the instrument causing subordination or resulting in redenomination into certain hard currencies in a form that binds all holders of the obligation and such event is not expressly provided for in the terms of the instrument where the event results from, directly or indirectly, a deterioration in the creditworthiness or financial condition of the Reference Entity;
- (d) ***Obligation Acceleration***: the acceleration of an Obligation of the Reference Entity before it would otherwise be due and payable in respect of a pre-determined minimum amount;
- (e) ***Obligation Default***: an Obligation of the Reference Entity in respect of a pre-determined minimum amount becomes capable of being declared due and payable before it would otherwise be due and payable;
- (f) ***Repudiation/Moratorium***: the Reference Entity repudiates an Obligation in respect of a pre-determined minimum amount or imposes a moratorium in respect of an Obligation in respect of such minimum amount and a failure to pay or a restructuring under such obligation subsequently occurs within a specified time period, without regard to any pre-determined amount; or
- (g) ***Governmental Intervention***: an event which would result in the reduction or postponement of payment of principal or interest or change in ranking of priority in the instrument causing subordination, an expropriation of or the mandatory cancellation of an Obligation as the result of an action taken or announcement made by a Governmental Authority in a form which is binding regardless of whether such event is expressly provided for under the terms of the instrument. This event is applicable only where "Financial Reference Entity Terms" is stated to be applicable in the Final Terms.

### ***What Credit Events apply to the Credit Linked Securities?***

In respect of each issue of Credit Linked Securities, the types of Credit Events which may apply in relation to the specified Reference Entity will vary depending on the identity of each Reference Entity and will be specified in the applicable Final Terms. Such specified Credit Events will generally be based on the nature of the relevant Reference Entity (corporate, sovereign, etc.) and its location (EMEA (Europe, Middle East and Africa), Asia-Ex Japan, Japan, Latin America, North America etc.).

### ***When does a Credit Event need to occur to affect the payout on the Credit Linked Securities?***

A Credit Event may occur at any time during the period from, and including, the "Credit Event Backstop Date" to, and including, the Maturity Date or such other date as is specified in the applicable Final Terms (subject to extension in certain circumstances).

The Credit Event Backstop Date will be specified in the applicable final terms as the Issue Date, the Trade Date or a number of calendar days prior to Trade Date. **The Credit Event Backstop Date may be specified to be prior to the Trade Date.**

### ***What are the event and payment timings which are relevant?***

- (a) **Event Timing:** In order to determine the day on which an event occurs for the purposes of the Credit Linked Securities, the demarcation of days shall be made by reference to Greenwich Mean Time irrespective of the time zone in which such event occurred. Any event occurring at midnight shall be deemed to have occurred immediately prior to midnight.
- (b) **Payment Timing:** If a payment is not made by the Reference Entity on its due date or, as the case may be, on the final day of the relevant Grace Period, then such failure to make a payment shall be deemed to have occurred on such day prior to midnight Greenwich Mean Time irrespective of the time zone of its place of payment.

### ***Can a Credit Event occur prior to the Issue Date or the Trade Date?***

**Yes. A Credit Event may occur prior to the Issue Date of the Credit Linked Securities and may even occur prior to the Trade Date specified in the applicable Final Terms.**

Securityholders should conduct their own review of any recent developments with respect to the Reference Entity by consulting publicly available information. If a request has been delivered to ISDA prior to the Trade Date to determine whether a Credit Event has occurred with respect to the Reference Entity, details of such request may be found on the ISDA website at <https://www.cdsdeterminationscommittees.org/>.

### ***When can a Credit Event be triggered?***

A Credit Event may be bilaterally triggered with respect to the Reference Entity during the "Notice Delivery Period", being a period commencing on the Trade Date (as specified in the Final Terms) and expiring 14 calendar days after the Extension Date. The Extension Date means the later of (a) the Maturity Date or (b) if a potential Credit Event, such as a Failure to Pay or Repudiation/Moratorium, has occurred on or prior to the Maturity Date of the Credit Linked Securities, which may become an actual Credit Event within a specified period following the Maturity Date, the Grace Period Extension Date or the Repudiation/Moratorium Evaluation Date. Accordingly, notwithstanding the occurrence of a Maturity Date, a Credit Event could be triggered after the Maturity Date.

### ***What is an Event Determination Date?***

In order for Credit Linked Securities to be redeemed following a Credit Event it is necessary for a relevant Event Determination Date to have occurred. Depending on the circumstances, this may be the date on

which a notice describing the occurrence of the Credit Event has been effectively delivered (together with, if applicable, a notice containing publicly available information confirming the occurrence of the Credit Event), or the date on which, amongst other things, it is publicly announced that a DC Credit Event Question was effective and the Credit Derivatives Determinations Committee was in possession of publicly available information with respect to such question, provided that certain conditions are satisfied.

Accordingly, notwithstanding the occurrence of the Maturity Date, an Event Determination Date could occur as a result of issues submitted to the Credit Derivatives Determinations Committee after the Maturity Date where the date on which a DC Credit Event Question was effective and on which a Credit Derivatives Determinations Committee was in possession of Publicly Available Information with respect to such question falls on or prior to the 14th day following the Maturity Date or any Extended Maturity Date, as applicable.

***Can an Event Determination Date only occur if a Credit Derivatives Determinations Committee determines that one has occurred?***

No. The Calculation Agent and the Issuer may also deliver a Credit Event Notice to the Securityholder in relation to a Credit Event triggering an Event Determination Date (see "*When can a Credit Event be triggered?*" above).

***What is the Credit Derivatives Determinations Committee and how does it affect the Credit Linked Securities?***

The Credit Derivatives Determinations Committee was established by ISDA in March 2009 to make determinations that are relevant to the majority of the credit derivatives market and to promote transparency and consistency. Securityholders will have no role in the composition of the Credit Derivatives Determinations Committee by virtue of the fact that they are investors in the Credit Linked Securities.

Prospective Securityholders should note that a Credit Derivatives Determinations Committee has the power to make binding decisions which the Calculation Agent may determine are applicable for the purposes of the Credit Linked Securities on critical issues, including:

- (a) the occurrence of a Credit Event and the standard Event Determination Date;
- (b) whether one or more Auctions will be held in respect of the Reference Entity for which a Credit Event has occurred;
- (c) the suitable methodology to be applied when determining the asset market value;
- (d) the auction settlement terms;
- (e) the occurrence of a succession or succession event and the identity of any "Successors" (for details, see "*Successors*" below); and
- (f) suitable substitute Reference Obligations where a substitution event has occurred.

Consequently, Securityholders will be bound by any such relevant decisions determined to be applicable to the Credit Linked Securities and the payments on the Credit Linked Securities and the timing of any such payments may be affected by such decisions or determinations. Questions referred to the Credit Derivatives Determinations Committee and the results of binding votes will be published by the DC Secretary on <https://www.cdsdeterminationscommittees.org/>.

The Credit Derivatives Determinations Committees are regional and there is a Credit Derivatives Determinations Committee for each of the following five regions: the Americas, Asia (excluding Japan), Australia and New Zealand, Europe, the Middle East and Africa (EMEA) and Japan. The proceedings of each Credit Derivatives Determinations Committee will be governed by rules published from time to time by the DC Secretary. A copy of such rules is available as at the date of this Base Prospectus free of charge at <https://www.cdsdeterminationscommittees.org/>.

Each Credit Derivatives Determinations Committee is formed of ten voting dealer members, five voting buy-side (non-dealer) members and three non-voting members (two dealers and one buy-side). A Credit Derivatives Determinations Committee may also include as non-voting members one or more credit derivatives central clearing counterparties as observer members. Dealer institutions are selected for membership in accordance with the DC Rules published by the DC Secretary and certain trading volume data guidelines.

With effect from 12 October 2018, DC Administration Services, Inc., a Delaware-incorporated subsidiary of ISDA was appointed by ISDA to act as the DC Secretary. The DC Secretary is responsible for various administrative tasks, including distributing questions submitted by eligible market participants to the relevant DC Members, convening DC meetings, and publishing the results of DC votes. The DC Secretary does not vote on whether Credit Events have occurred.

## **SUMMARY OF DIFFERENT CREDIT PRODUCTS UNDER THE PROGRAMME**

### ***What are the different types of Credit Linked Securities that may be issued under the Programme?***

If Credit Linked Securities are issued by way of Final Terms, the Credit Linked Securities may either be Single Name Credit Linked Securities or Linear Basket Credit Linked Securities.

#### **(A) *What are Single Name Credit Linked Securities?***

Single Name Credit Linked Securities represent an investment linked to the performance of only one Reference Entity specified in the applicable Final Terms.

Unless redeemed early in full, if a Credit Event and a relevant Event Determination Date occurs, then each Single Name Credit Linked Security will be redeemed in full (or, where multiple successors are identified, in part) by payment of the relevant Credit Event Redemption Amount on the relevant Credit Event Redemption Date.

Multiple Credit Events and related Event Determination Dates may occur in respect of Single Name Credit Linked Securities in accordance with the relevant Successor provisions.

#### **(B) *What are Linear Basket Credit Linked Securities?***

Linear Basket Credit Linked Securities represent an investment linked to the performance of a basket of Reference Entities specified in the applicable Final Terms and are exposed to the credit risk of each Reference Entity in the basket in proportion to the weighting specified for such Reference Entity in the applicable Final Terms.

Unless redeemed early in full, if a Credit Event and relevant Event Determination Date occurs in respect of any one of the Reference Entities in the basket, then each Linear Basket Credit Linked Security will be redeemed in part, in proportion to the weighting of the affected Reference Entity, by payment of the relevant Credit Event Redemption Amount on the relevant Credit Event Redemption Date. Redemption will be effected in accordance with the relevant Successor provisions, where applicable.

Multiple Credit Events, and therefore multiple Event Determination Dates, may occur with respect to more than one Reference Entity. Further, multiple Credit Events and related Event Determination Dates may occur in respect of a single Reference Entity in accordance with the relevant Successor provisions.

## **PAYOUTS UNDER CREDIT LINKED SECURITIES – KEY TIMINGS AND AMOUNTS**

### ***What are the different timings for payouts that are contemplated under the Credit Linked Conditions?***

The amount of interest, if applicable, and principal which an investor receives will depend on whether redemption of the Credit Linked Securities occurs:

- (a) in the usual course, at maturity (see further "When will the Credit Linked Securities be redeemed if no Credit Event occurs?" below);
- (b) pursuant to the occurrence of a Credit Event (see further, "What is "Credit Payment following Credit Event"?" below);
- (c) at maturity, despite the occurrence of a Credit Event (see further, "What is "Credit Payment on Maturity"?" below); or
- (d) pursuant to the occurrence of an event (other than a Credit Event) triggering early redemption (see further "When may the Issuer redeem the Credit Linked Securities early?" below).

#### ***(A) When will the Credit Linked Securities be redeemed if no Credit Event occurs?***

If no Event Determination Date has occurred, and provided that the Credit Linked Securities are not otherwise redeemed early, repurchased or cancelled, each Credit Linked Security will be redeemed in full on the Maturity Date (which may in certain circumstances have been extended) (see further "What will Securityholders receive if the Credit Linked Securities are not redeemed early?" below).

#### ***(B) What is "Credit Payment following Credit Event"?***

"Credit Payment following Credit Event" refers to where a Credit Event occurs with respect to a Reference Entity and an Event Determination Date occurs as a result and redemption follows such Credit Event (see further "What will Securityholders receive if "Credit Payment following Credit Event" applies?" below).

#### ***(C) What is "Credit Payment on Maturity"?***

"Credit Payment on Maturity" refers to where a Credit Event occurs with respect to a Reference Entity and an Event Determination Date occurs as a result, but redemption (and accordingly, payment of the relevant redemption amounts) occurs only at maturity (see further "What will Securityholders receive if "Credit Payment on Maturity" applies?" below).

#### ***(D) When may the Issuer redeem the Credit Linked Securities early?***

The Issuer may redeem the Credit Linked Securities early in full, other than where a Credit Event has occurred, if (i) certain tax events occur with respect to the Credit Linked Securities, (ii) certain events occur which make it unlawful for the Issuer and/or the relevant Guarantor to perform certain obligations or comply with material provisions of agreements entered into in connection with the Credit Linked Securities, (iii) an Early Redemption Event occurs, (iv) certain Events of Default occur, (v) the Issuer elects to exercise its call option in respect of the Credit Linked

Securities (if "Issuer Call" is applicable), (vi) in certain cases and if applicable, following an Administrator/Benchmark Event or certain other benchmark events, (vii) a Realisation Disruption Event occurs, (viii) a Merger Event occurs or (x) if the Reference Obligation (in respect of a Reference Entity to which "Reference Obligation Only" applies) is redeemed in whole prior to its scheduled maturity date (see further "*What will Securityholders receive if the Issuer redeems the Credit Linked Securities early (other than due to a Credit Event)?*" below).

***Can Securityholders elect to redeem their Credit Linked Securities early?***

The Securityholders do not have a right to require the Issuer to redeem their Securities early.

***What are Securityholders expected to receive pursuant to the different payouts contemplated under the Credit Linked Conditions?***

The amount of interest, if applicable, and principal which an investor receives will depend on when redemption of the Credit Linked Securities occurs.

***(A) What will Securityholders receive if the Credit Linked Securities are not redeemed early?***

Where the Credit Linked Securities are not otherwise redeemed early, repurchased or cancelled, the amount payable in respect of each Credit Linked Security that is redeemed in full on the Maturity Date will be an amount equal to par or at a premium.

***(B) What will Securityholders receive if "Credit Payment following Credit Event" applies?***

If "Credit Payment following Credit Event" applies and an Event Determination Date occurs, the Credit Linked Securities will be redeemed at the Credit Event Redemption Amount (see further, "*What is the Credit Event Redemption Amount?*" below), with no further payment of principal or interest, if applicable, on the proportion of the Credit Linked Securities affected by the Credit Event (see further "*What interest payments will Securityholders receive after the occurrence of a Credit Event?*" below). The Credit Event Redemption Amount is likely to be less than the par value of the Credit Linked Securities and may even be zero.

***(C) What will Securityholders receive if "Credit Payment on Maturity" applies?***

If "Credit Payment on Maturity" applies and an Event Determination Date occurs, interest will cease to accrue on, or be payable in respect of, such portion of the Credit Linked Securities affected by the Credit Event. This will not affect any interest payable on the remaining portion of the Credit Linked Securities unaffected by such Credit Event. Further, the Credit Payment on Maturity Amount (which reflects the incurred recoveries to be paid at maturity) will accrue interest based on the funding interest rate specified in the Final Terms (see further "*What interest payments will Securityholders receive after the occurrence of a Credit Event?*" below). The Credit Linked Securities will be redeemed only at maturity in an amount equal to the Credit Event Redemption Amount (see further, "*What is the Credit Event Redemption Amount?*" below). The Credit Event Redemption Amount is likely to be less than the par value of the Credit Linked Securities and may even be zero.

***(D) What will Securityholders receive if the Issuer redeems the Credit Linked Securities early (other than due to a Credit Event)?***

If the Credit Linked Securities are redeemed early in full (other than where a Credit Event Merger Event or redemption in whole of the Reference Obligation has occurred), the Credit Linked Securities will be redeemed on the Early Redemption Date or Optional Redemption Date, as applicable, by payment of an amount equal to the Early Redemption Amount or Optional

Redemption Amount, as applicable, with no further payment of principal or interest, if applicable, due in respect of such Credit Linked Securities. The Early Redemption Amount is an amount determined with respect to the Credit Linked Securities in the Settlement Currency which is typically equal to the fair market value of such Securities or the principal amount of such Securities (together with any unpaid interest). The Optional Redemption Amount is an amount specified in, or determined in the manner specified in the applicable Final Terms.

Where applicable, in the case of a Merger Event, the Credit Linked Securities will be redeemed on the Early Redemption Date by payment of the Merger Redemption Amount. The Merger Redemption Amount may be equal to either (x) the Early Redemption Amount or (y) an amount equal to the outstanding aggregate notional amount of the relevant Credit Linked Securities less any unwind costs, and will be specified in the applicable Final Terms.

In the case of redemption in whole of the Reference Obligation (where "Reference Obligation Only" applies), each Credit Linked Security will be redeemed on the Substitution Event Date by payment of the Substitution Event Redemption Amount. The Substitution Event Redemption Amount is an amount determined with respect to the Credit Linked Securities in the Settlement Currency which is typically equal to the fair market value of such Securities, less any unwind costs.

## **REDEMPTION MECHANICS UNDER THE PROGRAMME**

### ***What is the Applicable Proportion?***

The Applicable Proportion represents such proportion of the aggregate notional amount of a Credit Linked Security that is affected by a Credit Event and is used for determining the amounts payable or to be written down and/or redeemed following the occurrence of a Credit Event as well as for calculating the interest payable on such Credit Linked Securities. The calculation of the Applicable Proportion depends on the nature of the Credit Linked Securities, the type of Credit Event resulting in redemption (including whether the Credit Event is an M(M)R Restructuring or not) and whether the Successor provisions are relevant (see further "*Successors*" below):

#### **(A) *Single Name Credit Linked Securities***

The Applicable Proportion of each Single Name Credit Linked Security will be equal to the product of the Specified Denomination of such Credit Linked Security and 100 per cent.

#### **(B) *Linear Basket Credit Linked Securities***

The Applicable Proportion of Linear Basket Credit Linked Securities will be equal to the product of the Specified Denomination of such Credit Linked Security and an amount (expressed as a percentage) equal to the Reference Entity Notional Amount, divided by the Original Aggregate Nominal Amount of the relevant Credit Linked Securities;

### ***What are the different methods of redemption?***

The Credit Linked Securities will be redeemed in accordance with the Credit Event Redemption Method elected for by the Issuer (and specified in the Final Terms), provided that the Fallback Redemption Method will apply where the elected Credit Event Redemption Method cannot be applied.

Auction Redemption, Cash Redemption or Fixed Recovery Redemption may be selected as the Credit Event Redemption Method, with a fallback for Cash Redemption.

### ***What is the Credit Event Redemption Amount?***

The Credit Event Redemption Amount is the cash amount that is payable to the Securityholders on an early redemption of the Credit Linked Securities following the occurrence of a Credit Event and is broadly indicative of the recoveries in respect of such Credit Linked Securities.

The Credit Event Redemption Amount depends on the applicable Credit Event Redemption Method or Fallback Redemption Method, the nature of the Credit Linked Securities and the timing for payment.

For such Credit Linked Securities, the Credit Event Redemption Amount will be the Auction Redemption Amount (where Auction Redemption is applicable), the Cash Redemption Amount (where Cash Redemption or Fixed Recovery Redemption is applicable) or if "Credit Payment on Maturity" is applicable, the Final Auction Redemption Amount or the Final Cash Redemption Amount.

The Credit Event Redemption Amount is determined based on the recovery price of certain obligations determined in the relevant auction on the auction final price determination date or eligible obligations ("**Valuation Obligations**") of the Reference Entity on a specified date (being the final price determination date) following the occurrence of a Credit Event with respect to such Reference Entity. With respect to the Credit Linked Securities which are subject to Cash Redemption, the eligible obligations shall be one or more obligations, as selected by the Calculation Agent in accordance with the applicable Final Terms. The price of such eligible obligations will be determined on the basis of bid quotations received by the Calculation Agent from dealers.

### ***How is the Credit Event Redemption Amount determined if Auction Redemption applies?***

If Auction Redemption applies, the Auction Redemption Amount will be determined by reference to a price determined by way of a credit derivatives auction administered by the auction administrators based on the auction settlement terms published by the DC Secretary (an "**Auction**"). The Auction will involve a bidding process by institutions participating in the relevant Auction, pursuant to a bidding procedure set under the relevant auction settlement terms, to establish the value of certain obligations of the relevant Reference Entity. Such obligations mean obligations of the Reference Entity which satisfy certain specified "Obligation Categories" and "Obligation Characteristics" which are on the Final List as published by the DC Secretary. The Issuer or one or more of its affiliates may act as a participating bidder in any such Auction and may submit bids and offers with respect to the Obligations of the Reference Entity.

If Auction Redemption applies, the Auction Redemption Amount will be equal to the product of (1) the Applicable Proportion of the Credit Linked Securities being redeemed and (2) the price (expressed as a percentage) determined through the Auction for certain obligations of such Reference Entity, minus each Credit Linked Security's *pro rata* share of any unwind costs.

The auction price is likely to be lower than the par value of the Obligations of the Reference Entity and will be reflective of a loss experienced by the holder of such Obligations. Moreover, the price is likely to reflect the lowest prevailing market value of any Obligation. The lower the auction price, the greater the amount retained by the Issuer to make whole the loss suffered by it (as buyer of credit protection) and thus the smaller the Credit Event Redemption Amount paid to Securityholders on an early redemption of the Credit Linked Securities.

### ***How is the Credit Event Redemption Amount determined if Cash Redemption applies?***

If Cash Redemption applies, the Cash Redemption Amount will be determined on the basis of the bid quotations sought by the Calculation Agent from third party dealers for the eligible obligations of the relevant Reference Entity selected by the Calculation Agent and satisfying certain specified obligation categories and obligation characteristics (such obligations being the Valuation Obligations). However, if

no quotations are obtained, the Calculation Agent will determine the final price acting in its reasonable discretion (*billiges Ermessen*, § 317 of the German Civil Code (*BGB*)) which may even be zero.

If Cash Redemption applies, the Cash Redemption Amount will be equal to the product of (1) the Applicable Proportion of the Credit Linked Securities being redeemed and (2) the price (expressed as a percentage) determined on the basis of such bid quotations sought by the Calculation Agent from third party dealers, minus each Credit Linked Security's *pro rata* share of any unwind costs.

In any case, while determining the Final Price, the Issuer will be entitled to select the cheapest Valuation Obligations for valuation. The lower the Final Price, the greater the amount retained by the Issuer to make whole the loss suffered by it (as buyer of credit protection) and thus the smaller the Credit Event Redemption Amount paid to Securityholders on an early redemption of the Credit Linked Securities.

***What will a Securityholder recover if fixed recovery is applicable?***

If "Fixed Recovery Redemption" is specified as applicable, then following the occurrence of a Credit Event and relevant Event Determination Date, the amount payable on redemption on the relevant Credit Event Redemption Date shall be calculated as set out in "*How is the Credit Event Redemption Amount determined if Cash Redemption applies?*" above, provided that instead of the Final Price, the "Fixed Recovery Percentage" set out in the applicable Final Terms shall apply. The Fixed Recovery Percentage may be specified as zero, in which case Securityholders will lose all of their investment upon the occurrence of a Credit Event.

***How much will Securityholders receive if the Credit Linked Securities are partially redeemed following a determination of multiple successors?***

If the Credit Linked Securities are partially redeemed following a determination of multiple successors, the Calculation Agent shall apportion any calculation amounts equally between the number of Successors and the Credit Event Redemption Amount, to be delivered for any Credit Events, which occur shall be calculated on the basis of such apportioned amounts. For details on successors, see "*Successors*" below.

***Can Credit Linked Securities be redeemed after the Maturity Date?***

If no Event Determination Date occurs then the Credit Linked Securities are scheduled to redeem on the Maturity Date.

However, if the Calculation Agent determines that on or prior to the Maturity Date, (i) one or more Reference Entities (a) may be subject to a Credit Event, (b) if "Grace Period Extension" is applicable, is or may be subject to a Potential Failure to Pay, or (c) if "Potential Repudiation/Moratorium" is applicable, is or may be subject to a Potential Repudiation/Moratorium (ii) a Credit Event Notice may be delivered after the Maturity Date within an effective delivery period which may result in a Relevant Event Determination Date occurring (iii) a Credit Event Resolution Request Date may occur after the Maturity Date but during the Notice Delivery Period which may result in a Relevant Event Determination Date occurring; (iv) the final Credit Event Redemption Date will only occur after the Maturity Date; or (v) a Payment Failure Cut-Off Date may occur after the Maturity Date where a Payment Failure Event has occurred, then each Credit Linked Security then outstanding shall not be redeemed on the Maturity Date but shall be redeemed on the Extended Maturity Date.

***When will the Credit Linked Securities be redeemed if the Maturity Date is extended?***

If no Relevant Event Determination Date occurs on or prior to the Notes Extension Date, the Credit Linked Securities will redeem on the latest to occur of (a) the fifth Business Day following the Notes Extension Date; (b) the final Credit Event Redemption Date in relation to any unsettled Relevant Credit Events; (c) the fifth Business Day following the Payment Failure Cut-Off Date (if applicable).

In respect of Credit Linked Securities where a Relevant Event Determination Date actually occurs on or prior to the Notes Extension Date, the Credit Linked Securities shall be redeemed on the later to occur of (a) the final Credit Event Redemption Date in relation to any unsettled Relevant Credit Events, as applicable and (b) the fifth Business Day following the Payment Failure Cut-Off Date (if applicable).

### **INTEREST SPECIFIC PROVISIONS**

#### ***What interest payments will Securityholders receive after the occurrence of a Credit Event?***

If an Event Determination Date occurs, the date on which interest ceases to accrue on the Applicable Proportion of the relevant Credit Linked Securities (for further information see "*What is the Applicable Proportion?*" above) shall depend on whether "No Interest Accrual on Default" or "Interest Accrual on Default" applies.

##### **(A) *No Interest Accrual on Default***

Interest shall cease from and including the Interest Payment Date preceding the Event Determination Date, in respect of the first Interest Period, from (and including) the Issue Date.

##### **(B) *Interest Accrual on Default***

Interest shall cease from and including the first Business Day immediately following the Event Determination Date.

However, (i) in respect of each Credit Linked Security, interest will accrue on the Applicable Proportion from (and including) the Interest Payment Date preceding such Event Determination Date, or (if no such Interest Payment Date exists), the Issue Date to (and including) such Event Determination Date.

Any accrued but unpaid interest shall be paid (i) within 10 Business Days following the relevant Credit Event Redemption Date (if "Credit Payment following Credit Event" applies), (ii) on such date as determined by the Calculation Agent (if "Credit Payment on Maturity" applies) or (iii) if the Credit Linked Securities are early redeeming in full, on the Early Redemption Date, the Optional Redemption Date or the Substitution Event Date, as applicable.

The Credit Payment on Maturity Amount will accrue interest additionally at the funding interest rate where "Credit Payment following Credit Event" applies.

#### ***If a Credit Event and Event Determination Date have not occurred, will I receive payments of interest on each Interest Payment Date?***

If an Applicable DC Credit Event Question has been made on or prior to an Interest Payment Date and no corresponding DC Resolution has been published or a Relevant Credit Event and related Relevant Event Determination Date could occur but no Credit Event Notice has been provided, then any interest payable under the Credit Linked Securities will be suspended to the maximum possible amount.

#### ***If payments of interest are suspended, when will the Issuer's obligations to make such payments resume?***

Suspension of interest amount will continue until the Calculation Agent determines that a Relevant Credit Event has not occurred and will not occur. Any public announcements may be one of an Applicable DC No Credit Event Announcement, an Applicable DC Credit Event Question Dismissal or an announcement by the DC Secretary that the Credit Derivatives Determinations Committee will not be convening to Resolve the relevant Applicable DC Credit Event Question.

In such case, the Securityholders will be paid the suspended interest amount 10 Business Days following the date of such announcement or determination by the Calculation Agent.

***Will Securityholders receive an additional amount of interest once the Issuer's obligation to make interest payments resumes?***

No additional amount of interest will be payable to the Securityholders by the Issuer in connection with the delay or postponement in payment of an interest amount. However, if the Calculation Agent determines that the amount of interest suspended pursuant to Credit Linked Condition 2(c) (*Suspension of Interest following a Potential Credit Event*) was greater or lesser than the amount of interest that should have been suspended, the Issuer will be required to calculate the adjustment interest amount due to or from the Securityholders and such adjustment amount will be paid to, or held back from future interest payments owed to, the Securityholders and where there has been a shortfall as at the relevant maturity or early redemption date, such interest shortfall proceeds shall be deducted from the final redemption amounts.

**ADDITIONAL PROVISIONS**

***What are the Financial Reference Entity Terms?***

If "Financial Reference Entity Terms" applies, then:

- (a) where the Reference Obligation is a senior obligation and if a Credit Event relating to Governmental Intervention or Restructuring would only affect the subordinated obligations of the relevant obligor, a Credit Event will not be triggered in respect of such Reference Entity;
- (b) where the Reference Obligation is a subordinated obligation and if a Credit Event relating to Governmental Intervention or Restructuring would only affect the further subordinated obligations of the relevant obligor, a Credit Event will not be triggered in respect of such Reference Entity;
- (c) with respect to successions, if the Credit Linked Securities relates to a Senior Obligation, the debt transfer shall be assessed only in relation to Bond or Loans which include the Senior Obligations of the Reference Entity and where the Credit Linked Securities are Subordinated Obligations, the debt transfer shall exclude Senior Obligations and any Further Subordinated Obligations of the Reference Entity which fall within the Obligation Category "Bond or Loan", provided that if no such Bond or Loan exists, the debt transfer shall be assessed only in relation to Bond or Loans which include the Senior Obligations of the Reference Entity;
- (d) provided that if "Governmental Intervention" applies, if an obligation would otherwise satisfy a particular Obligation Characteristic, the existence of any terms in the relevant obligation in effect at the time of making the determination which permit the Reference Entity's obligations to be altered, discharged, released or suspended in circumstances which would constitute a Governmental Intervention, shall not cause such obligation to fail to satisfy such Obligation Characteristic;
- (e) a qualifying guarantee which contains terms permitting or anticipating a Governmental Intervention will not be treated as containing provisions where the principal payment obligations of the Reference Entity can be discharged, released, reduced, assigned or otherwise altered as a result of the occurrence or non-occurrence of such event;

## **SUCCESSORS**

### ***Is it possible to change a Reference Entity?***

The Reference Entity may not be changed unless a "Successor" determination has been made with respect to the Reference Entity on or after the "Successor Backstop Date" (or, in the case of a "Universal Successor", on or after 1 January 2014).

A "Universal Successor" means, with respect to any Reference Entity (not being a sovereign entity), the single entity which assumes all of the obligations (including at least one relevant bond or loan) of the Reference Entity and at the time of the determination either (a) the Reference Entity has ceased to exist, or (b) the Reference Entity is in the process of being dissolved (however described) and the Reference Entity has not issued or incurred any borrowed money obligation at any time since the legally effective date of the assumption.

### ***What is a "Successor" to the Reference Entity and how can succession affect the Credit Linked Securities?***

If the DC Secretary publicly announces that a Credit Derivatives Determinations Committee has resolved that a different entity or entities has or have become successor(s) to the original Reference Entity to which the Credit Linked Securities are linked, then such entity/ies may be identified as a "Successor" to the original Reference Entity. The Calculation Agent (being the Issuer or an Affiliate) may also, following a succession event, identify an entity or entities as a successor(s) to the original Reference Entity.

A single entity, or one entity or one or more entities may either directly or as provider of a qualifying guarantee succeed to the Reference Entity based on whether the percentage of debt transferred satisfies certain specified thresholds but where a universal successor applies, the entity need only assume all of the obligations and at least one bond or loan or guarantee obligation in connection with either where at the time of determination certain conditions exist. If there is a Steps Plan, the Calculation Agent shall consider all related successions in respect of such Steps Plan in aggregate as if forming part of a single succession.

An entity shall succeed to another entity if an entity other than the Reference Entity (a) assumes or becomes liable for the relevant obligations whether by operation of law or pursuant to any agreement (including, with respect to a Reference Entity that is a Sovereign, any protocol, treaty, convention, accord, concord, entente, pact or other agreement), or (b) issues Bonds or incurs Loans (the **"Exchange Bonds or Loans"**) that are exchanged for Relevant Obligations, and in either case the Reference Entity is not thereafter a direct obligor or a provider of a qualifying guarantee with respect to such Relevant Obligations or such Exchange Bonds or Loans, as applicable.

The identity of the original Reference Entity will be treated as having been amended accordingly for the purposes of the Credit Linked Securities so that, following the determination or announcement of a "Successor", the Credit Linked Securities will be linked to the credit risk of the Successor. The credit risk associated with a Successor or Successors may be different from and could be greater than the credit risk associated with the original Reference Entity.

The events which may lead to the determination or announcement of a Successor may occur at any time from and including the "Successor Backstop Date" (or, in the case of a "Universal Successor", on or after 1 January 2014), which is a rolling date that is:

- (a) if a Credit Derivatives Determinations Committee receives a request to resolve whether or not there is one or more Successors to the Reference Entity, 90 calendar days prior to the date of such request; or

- (b) otherwise, 90 calendar days prior to the date on which an effective notice of the occurrence of a succession is delivered by the Issuer to the Fiscal Agent.

***Can a succession occur prior to the Issue Date?***

Yes. A succession may occur prior to the Issue Date of the Credit Linked Securities and may even occur prior to the Trade Date specified in the applicable Final Terms. The Successor Backstop Date may fall prior to the Trade Date and accordingly a succession may occur prior to the Trade Date.

Securityholders should conduct their own review of any recent developments with respect to the Reference Entity by consulting publicly available information. If a request has been delivered to convene a Credit Derivatives Determinations Committee prior to the Trade Date to determine whether a succession has occurred with respect to the Reference Entity, details of such request may be found on the ISDA website <https://www.cdsdeterminationscommittees.org/>.

***Can a sovereign be subject to a succession?***

Yes, where an annexation, unification, secession, partition, dissolution, consolidation, reconstitution or other similar event occurs and the debt is transferred as described in "What is a "Successor" to the Reference Entity and how can succession affect the Credit Linked Securities?" above.

***Does the Calculation Agent have unfettered discretion to determine a Successor?***

No. Although the Calculation Agent has the right to make a determination as to whether or not a succession event has occurred, its right is limited by the Credit Linked Conditions as follows: the Calculation Agent (a) cannot make such a determination if a Credit Derivatives Determinations Committee has already determined that such an event does not constitute a succession event; (b) is required to act on the basis of Eligible Information and (c) is required to act in a commercially reasonable manner and within its reasonable discretion (*billiges Ermessen*, § 317 of the German Civil Code (*BGB*)).

***Can multiple successors be identified with respect to a Reference Entity?***

Yes, including the case where the original entity affected by the succession is also identified as a Successor. In such case where there are multiple successors, the Calculation Agent shall apportion any calculation amounts equally between the number of Successors and the Credit Event Redemption Amount for any Credit Events which occur shall be calculated on the basis of such apportioned amounts.

Where multiple successors are identified, multiple Credit Events and multiple Event Determination Dates may occur with respect to each Reference Entity.

**DISCRETIONARY POWERS OF THE ISSUER AND THE CALCULATION AGENT**

***What are some of the key determinations that the Calculation Agent is responsible for making in relation to Credit Linked Securities?***

Securityholders should note that the Calculation Agent is responsible for making certain determinations with respect to the Credit Linked Securities.

The Calculation Agent is responsible for, amongst other things:

- (a) electing whether to deliver a Credit Event Notice and supporting information in order to trigger settlement of the Credit Linked Securities following the occurrence of a Credit Event;
- (b) where the Credit Event Redemption Amount is not determined by an Auction, determining the Final Price on the basis of bid quotations from third party dealers;
- (c) determining successor Reference Entities for the purposes of the Credit Linked Securities;

- (d) determining substitute Reference Obligation(s) for the purposes of the Credit Linked Securities;
- (e) following the occurrence of an Event Determination Date, where an Event Determination Date occurred on a date that is different from the date first determined or that no Event Determination Date occurred or occurred prior to a preceding Interest Payment Date, determining, acting in its reasonable discretion (*billiges Ermessen*, § 317 of the German Civil Code (*BGB*)), any additional amount payable to the Securityholder(s) or any reduction in any subsequent amount that would otherwise subsequently be payable to the Securityholders and the date on which such adjustment payment is payable; and
- (f) determining whether a Merger Event or Substitution Event Date has occurred.

Securityholders should note that any determination and/or calculation made by the Calculation Agent shall, in the absence of manifest error, be final, conclusive and binding on the Issuer and the Securityholders.

#### New Financial Report Structure

##### CITIGROUP REPORTABLE OPERATING SEGMENTS

Note: Mexico is included in International.

Citigroup Inc. is a holding company and services its obligations primarily by earnings from its operating subsidiaries. Citigroup Inc. may augment its capital through issuances of common stock, perpetual preferred stock and equity issued through awards under employee benefit plans, among other issuances. Citigroup Inc. and Citigroup Inc.'s subsidiaries that operate in the banking and securities businesses can

only pay dividends if they are in compliance with the applicable regulatory requirements imposed on them by federal and state bank regulatory authorities and securities regulators in the United States. Citigroup Inc.'s subsidiaries may be party to credit agreements that also may restrict their ability to pay dividends. Citigroup Inc. currently believes that none of these regulatory or contractual restrictions on the ability of its subsidiaries to pay dividends will affect Citigroup Inc.'s ability to service its own debt. Citigroup Inc. must also maintain the required capital levels of a bank holding company, and must submit a capital plan, subjected to stress testing, to the Federal Reserve, to which the Federal Reserve does not object, before it may pay dividends on its stock.

Under longstanding policy of the Federal Reserve, a bank holding company is expected to act as a source of financial strength for its U.S. insured depository institutions. As a result of this regulatory policy, the Federal Reserve might require Citigroup Inc. to commit resources to its U.S. insured depository institutions when doing so is not otherwise in the interests of Citigroup Inc. or its shareholders or creditors.

There are no recent events particular to Citigroup Inc. which are to a material extent relevant to an evaluation of Citigroup Inc.'s solvency and no material changes in Citigroup Inc.'s borrowing and funding structure since its last financial year other than as set out in the specified sections of the documents referenced below which are incorporated into this Base Prospectus by reference:

- (i) the "Executive Summary" section on pages 6 to 9 of the section entitled "Management Report" of the Citigroup Inc. 2023 Form 10-K;
- (ii) the Consolidated Balance Sheet on pages 146 to 147 of the Citigroup Inc. 2023 Form 10-K;
- (iii) the "Executive Summary" section on pages 4 to 7 of the Citigroup Inc. 2024 Q3 Form 10-Q; and
- (iv) the Consolidated Balance Sheet on pages 100 to 101 of the Citigroup Inc. 2024 Q3 Form 10-Q.

The principal offices for Citigroup Inc. are located at 388 Greenwich Street, New York, NY 10013, and its telephone number is + 1 212 559-1000. The website of Citigroup Inc. is [www.citigroup.com](http://www.citigroup.com). Unless specifically incorporated by reference herein, no information in such website should be deemed to be incorporated in, or form a part of, this Base Prospectus. Citigroup Inc. was established as a corporation incorporated in Delaware on 8 March 1988 (under its original name of Commercial Credit Group, Inc.), registered at the Delaware Division of Corporations with perpetual duration pursuant to the Delaware General Corporation Law with registration number 2154254.

Citigroup Inc.'s authorised capital stock consists of 6 billion shares of common stock and 30 million shares of preferred stock. As at 31 December 2022, there were 1,936,986,425 fully paid common stock shares outstanding and 759,800 fully paid preferred shares outstanding. A common stock share carries one vote, and no pre-emptive or other subscription rights or conversion rights. A preferred stock share carries no general voting rights.

No shareholder, or associated group of shareholders acting together, owns enough shares of Citigroup Inc.'s common stock to directly or indirectly exercise control over Citi.

The Legal Entity Identifier (LEI) of Citigroup Inc. is 6SHGI4ZSSLCXXQSBB395.

### **Citi Resolution Plan (CSA, etc.) in relation to Securities issued by Citigroup Global Markets Holdings Inc.**

Citigroup Inc. is required under Title I of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (the "**Dodd-Frank Act**") and the rules promulgated by the FDIC and Federal Reserve to

periodically submit a plan for Citigroup Inc.'s rapid and orderly resolution under the U.S. Bankruptcy Code in the event of material financial distress or failure. On 22 November 2022, the Federal Reserve and FDIC issued feedback on the resolution plans filed on 1 July 2021 by the eight U.S. Global Systemically Important Banks (GSIBs), including Citigroup Inc. The Federal Reserve and FDIC identified one shortcoming, but no deficiencies, in Citigroup Inc.'s 2021 resolution plan regarding data integrity and data quality management issues. Based on regulatory changes effective 31 December 2019, Citigroup Inc. will alternate between submitting a full resolution plan and a targeted resolution plan on a biennial cycle. Citigroup Inc.'s 2023 resolution plan submission, which was filed on 1 July 2023, was a full resolution plan. For additional information on Citigroup Inc.'s resolution plan submissions, see "Managing Global Risk – Liquidity Risk – Resolution Plan" in Citigroup Inc.'s most recent Annual Report on Form 10-K. Citigroup Inc.'s preferred resolution strategy is "single point of entry" under the U.S. Bankruptcy Code.

Under Citigroup Inc.'s preferred "single point of entry" resolution plan strategy, only Citigroup Inc., the parent holding company, would enter into bankruptcy, while Citigroup Inc.'s material legal entities, including CGMHI (as further defined in the public section of its 2023 resolution plan, which can be found on the Federal Reserve's and FDIC's websites) would remain operational and outside of any resolution or insolvency proceedings. Citigroup Inc. believes its resolution plan has been designed to minimise the risk of systemic impact to the U.S. and global financial systems, while maximising the value of the bankruptcy estate for the benefit of Citigroup Inc.'s creditors. In addition, in line with the Federal Reserve's final TLAC rule, Citigroup Inc. believes it has developed the resolution plan so that Citigroup Inc.'s shareholders and unsecured creditors bear any losses resulting from Citigroup Inc. bankruptcy.

In response to feedback received from the Federal Reserve and FDIC (together, the "**Agencies**"), Citigroup Inc. took the following actions:

- (i) Citicorp LLC ("**Citicorp**"), an existing wholly-owned subsidiary of Citigroup Inc., was established as an intermediate holding company for certain of Citigroup Inc.'s operating material legal entities, including CGMHI;
- (ii) Citigroup Inc. executed an inter-affiliate agreement with Citicorp, Citigroup Inc.'s operating material legal entities and certain other affiliated entities pursuant to which Citicorp is required to provide liquidity and capital support to Citigroup Inc.'s operating material legal entities in the event Citigroup Inc. were to enter bankruptcy proceedings (the "**Citi Support Agreement**");
- (iii) pursuant to the Citi Support Agreement:
  - Citigroup Inc. made an initial contribution of assets, including certain high-quality liquid assets and inter-affiliate loans (the "**Contributable Assets**"), to Citicorp, and Citicorp became the business as usual funding vehicle for Citigroup Inc.'s operating material legal entities;
  - Citigroup Inc. will be obligated to continue to transfer Contributable Assets to Citicorp over time, subject to certain amounts retained by Citigroup Inc. to, among other things, meet Citigroup Inc.'s near-term cash needs; and
  - in the event of a Citigroup Inc. bankruptcy, Citigroup Inc. will be required to contribute most of its remaining assets to Citicorp; and
- (iv) the obligations of both Citigroup Inc. and Citicorp under the Citi Support Agreement, as well as the Contributable Assets, are secured pursuant to a security agreement.

The Citi Support Agreement provides two mechanisms, besides Citicorp's issuing of dividends to Citigroup Inc., pursuant to which Citicorp will be required to transfer cash to Citigroup Inc. during business as usual so that Citigroup Inc. can fund its debt service as well as other operating needs: (i) one or more funding notes issued by Citicorp to Citigroup Inc.; and (ii) a committed line of credit under which Citicorp may make loans to Citigroup Inc.

Under the terms and conditions of the Securities, a Citigroup Inc. bankruptcy, insolvency or resolution proceeding will not constitute an event of default with respect to any series of Securities issued by Citigroup Global Markets Holdings Inc. Moreover, it will not constitute an event of default with respect to any series of Securities issued by Citigroup Global Markets Holdings Inc. if the guarantee of the Securities by Citigroup Inc. (as CGMHI Guarantor) ceases to be (or is claimed not to be) in full force and effect for any reason, including by Citigroup Inc.'s insolvency or resolution. Should the Citigroup Inc. guarantee no longer be in effect, Citigroup Global Markets Holdings Inc. will become the sole obligor under its Securities, and there can be no assurance that it would be able to continue to meet its obligations under such Securities.

In the event that Citigroup Global Markets Holdings Inc. also enters bankruptcy, at the time of Citigroup Inc.'s bankruptcy filing or at a later time, you, as a holder of Securities issued by Citigroup Global Markets Holdings Inc. would be an unsecured creditor of Citigroup Inc. in respect of the Citigroup Inc. guarantee and, accordingly, you cannot be assured that the Citigroup Inc. guarantee would protect you against losses resulting from a default by Citigroup Global Markets Holdings Inc.

### **Markets**

*Markets* provides corporate, institutional and public sector clients around the world with a full range of sales and trading services across equities, foreign exchange, rates, spread products and commodities. The range of services includes market-making across asset classes, risk management solutions, financing, prime brokerage, research, securities clearing and settlement.

As a market maker, *Markets* facilitates transactions, including holding product inventory to meet client demand, and earns the differential between the price at which it buys and sells the products. These price differentials and the unrealized gains and losses on the inventory are recorded in Principal transactions. Interest income earned on assets held, less interest paid on long- and short-term debt and secured funding transactions, is recorded as *Net interest income*.

The amount and types of *Markets* revenues are impacted by a variety of interrelated factors, including market liquidity; changes in market variables such as interest rates, foreign exchange rates, equity prices, commodity prices and credit spreads, as well as their implied volatilities; investor confidence; and other macroeconomic conditions. *Markets* revenues include revenues earned by Citi that are subject to a revenue sharing arrangement with *Banking* – Corporate Lending for Investment Banking, *Markets and Services* products sold to Corporate Lending clients.

Assuming all other market conditions do not change, increases in client activity levels or bid/offer spreads generally result in increases in revenues. However, changes in market conditions can significantly impact client activity levels, bid/offer spreads and the fair value of product inventory. Management of the *Markets* businesses involves daily monitoring and evaluation of the above factors.

*Markets* international presence is supported by trading floors in approximately 80 countries and a proprietary network in 95 countries and jurisdictions.

For additional information on *Market's* business activities, see "*Markets*" in the Citigroup Inc. 2023 Form 10-K.

**THIS DEED OF GUARANTEE** is made on 11 May 2017 by Citigroup Global Markets Limited (the Guarantor) in favour of each Beneficiary (as defined below).

**NOW THIS DEED WITNESSES** as follows:

### 1 Definitions

As defined herein:

**"Beneficiary"** means any person who is owed any sum or amount which is due and payable by CGMFL under or in respect of any Liability;

**"CGMFL"** means Citigroup Global Markets Funding Luxembourg S.C.A.;

**"Liabilities"** means all the liabilities of CGMFL of any kind and in any currency (whether present or future, actual or contingent and whether incurred alone or jointly with another) together with all the charges, commission, interest and expenses payable by CGMFL in connection with the relevant liability; and

**"Taxes"** includes all present and future income and other taxes, levies, duties, imposts, deductions, charges, fees and withholdings, in each case as imposed or levied by or on behalf of the United Kingdom, together with interest thereon and penalties with respect thereto (if any).

Where the context so admits, the singular includes the plural and vice versa. Headings are for convenience of reference only.

### 2 Deed of Guarantee

Subject as provided herein, the Guarantor irrevocably and unconditionally guarantees by way of deed poll to each Beneficiary that if, for any reason, CGMFL does not pay any sum payable by it to such Beneficiary under or in respect of any Liability including any premium or any other amounts of whatever nature or additional amounts which may become payable under the foregoing as and when the same shall become due and payable under any of the foregoing, the Guarantor will duly and promptly pay to such Beneficiary on the request of such Beneficiary the sum or the amount payable by CGMFL to or for such Beneficiary.

### 3 Guarantor as Principal Obligor

Without affecting CGMFL's obligations, the Guarantor will be liable under this Deed of Guarantee as if it were the sole principal obligor and not merely a surety. Accordingly, it will not be discharged, nor will its liability be affected, by anything which would not discharge it or affect its liability if it were the sole principal obligor (including (a) any time, indulgence, waiver or consent at any time given to CGMFL or any other person, (b) any amendment to any Liability or to any security or other guarantee or indemnity, (c) the making or absence of any demand on CGMFL or any other person for payment, (d) the enforcement or absence of enforcement of any Liability or of any security or other guarantee or indemnity, (e) the release of any such security, guarantee or indemnity, (f) the dissolution, amalgamation, reconstruction or reorganisation of CGMFL or any other person, (g) the illegality, invalidity or unenforceability of or any defect in any provision of any Liability or any of CGMFL's obligations under

or in respect of a Liability or (h) any other act, event or omission which but for this sub-Clause might operate to discharge, impair or otherwise affect the obligations expressed to be assumed by the Guarantor herein or any of the rights, powers or remedies conferred upon the Beneficiaries or any of them by this Deed of Guarantee or by law).

#### **4 Guarantor's Obligations Continuing**

The Guarantor's obligations under this Deed of Guarantee are irrevocable and are and will remain in full force and effect by way of continuing security in respect of any outstanding Liabilities. Furthermore, these obligations of the Guarantor are additional to, and not instead of, any security or other guarantee or indemnity at any time existing in favour of a Beneficiary, whether from the Guarantor or otherwise. The Guarantor irrevocably waives all notices and demands whatsoever.

#### **5 Repayment to CGMFL**

If any payment or amount received by a Beneficiary is, on the subsequent liquidation or insolvency of CGMFL, avoided under any laws relating to liquidation or insolvency, such payment will not be considered as having discharged or diminished the liability of the Guarantor and this Deed of Guarantee will continue to apply as if such payment or amount had at all times remained owing by CGMFL.

#### **6 Indemnity**

As a separate and alternative stipulation, the Guarantor unconditionally and irrevocably agrees that any sum amount expressed to be payable by CGMFL under or in respect of any Liability but which is for any reason (whether or not now known or becoming known to CGMFL, the Guarantor or any Beneficiary) not recoverable from the Guarantor on the basis of a guarantee will nevertheless be recoverable from it as if it were the sole principal debtor and will be paid by it to the Beneficiary on the request of such Beneficiary subject as provided herein. This indemnity constitutes a separate and independent obligation from the other obligations in this Deed of Guarantee, gives rise to a separate and independent cause of action and will apply irrespective of any indulgence granted by any Beneficiary.

#### **7 Status of Deed of Guarantee**

This Deed of Guarantee shall take effect as a deed poll for the benefit of each Beneficiary from time to time and for the time being, each of which shall be entitled severally to enforce this Deed of Guarantee against the Guarantor. The payment obligations of the Guarantor under this Deed of Guarantee constitute direct, unconditional, unsubordinated and unsecured obligations of the Guarantor and rank and will at all times at least rank *pari passu* with all other unsecured and unsubordinated outstanding obligations of the Guarantor, save for such obligations as may be preferred by provisions of law that are both mandatory and of general application.

#### **8 Settlement Conditional**

Any settlement or discharge between the Guarantor and the Beneficiaries or any of them shall be conditional upon no payment to the Beneficiaries or any of them by the Guarantor or any other person on the Guarantor's behalf being avoided or reduced by virtue of any laws relating to bankruptcy, insolvency, liquidation or similar laws of general application for the time being in force and, in the event of any such payment being so avoided or reduced, the Beneficiaries shall be entitled to recover the amount by which such payment is so avoided or reduced from the Guarantor subsequently as if such

settlement or discharge had not occurred PROVIDED THAT such recovery is not contrary to any law applicable thereto.

## **9 No Prior Action Required**

No Beneficiary shall be obliged before exercising any of the rights, powers or remedies conferred upon it by this Deed of Guarantee or by law:

- (a) to make any demand of CGMFL;
- (b) to take any action or obtain judgment in any court against CGMFL; or
- (c) to make or file any claim or proof in a winding-up or dissolution of CGMFL, and the Guarantor hereby expressly waives presentment, demand, protest and notice of dishonour in respect of each Liability.

## **10 Postponement of Guarantor's Rights**

The Guarantor agrees that, so long as any sums and or amounts are or may be owed by CGMFL under or in respect of the Liabilities or CGMFL is under any other actual or contingent obligation thereunder or in respect thereof, the Guarantor will not exercise any right which the Guarantor may at any time have by reason of the performance by the Guarantor of its obligations hereunder:

- (a) to claim any contribution from any other guarantor of CGMFL's obligations under or in respect of the Liabilities;
- (b) to take the benefit (in whole or in part) of any security enjoyed in connection with the Liabilities by any Beneficiary; or
- (c) to be subrogated to the rights of any Beneficiary against CGMFL in respect of amounts paid by the Guarantor under this Deed of Guarantee.

## **11 Taxation**

All payments by the Guarantor under or in connection with this Deed of Guarantee shall be made free and clear of and without deduction for or on account of all Taxes. All Taxes in respect of this Deed of Guarantee and payments thereunder shall be for the account of and shall be paid by the Guarantor for its own account prior to the date on which penalties attach thereto. If the Guarantor is compelled by law to make payment subject to any Tax and a Beneficiary does not actually receive for its own benefit on the due date the full amount provided for hereunder, the Guarantor will pay all necessary additional amounts to ensure receipt by the Beneficiary of the full amount so provided for. The Guarantor will indemnify each Beneficiary in respect of all such Taxes.

## **12 Power to Execute**

The Guarantor hereby warrants, represents and covenants with each Beneficiary that it has all corporate power, and that it has taken all necessary corporate or other steps, to enable it to execute, deliver and perform this Deed of Guarantee, and that this Deed of Guarantee constitutes a legal, valid and binding obligation of the Guarantor in accordance with its terms.

### **No Set-Off or Counterclaim**

All payments to be made by the Guarantor under this Deed of Guarantee will be calculated and be made without (and free and clear of any deduction for) set-off or counterclaim.

### **13 Production of Deed of Guarantee**

The Guarantor hereby acknowledges the right of every Beneficiary to the production of, and the right of every Beneficiary to obtain (upon payment of a reasonable charge) a copy of, this Deed of Guarantee, and further acknowledges and covenants that the obligations binding upon it contained herein are owed to, and shall be for the account of, each and every Beneficiary, and that each Beneficiary shall be entitled severally to enforce the said obligations against the Guarantor.

### **14 Stamp Duties**

### **15 Partial Invalidity**

If at any time any provision thereof is or becomes illegal, invalid or unenforceable in any respect under the laws of any jurisdiction, neither the legality, validity or enforceability of the remaining provisions hereof nor the legality, validity or enforceability of such provision under the laws of any other jurisdiction shall in any way be affected or impaired thereby.

However, the Social Finance Framework may be amended or updated from time to time and you should therefore refer to the most recent version of the Social Finance Framework which will be available on the Group's website ([https://www.citigroup.com/citi/fixedincome/social\\_finance\\_bonds.htm](https://www.citigroup.com/citi/fixedincome/social_finance_bonds.htm)) and the applicable Final Terms for information on the use of proceeds of the relevant Securities.

The Social Finance Framework has been developed in line with the International Capital Market Association (ICMA) Social Bond Principles 2021. Any such opinion is only current as of the date that opinion was issued and is not, nor should be deemed to be, a recommendation by the relevant Issuer, the Dealers or any other person to buy, sell or hold Social Finance Bonds. - (2) *Affordable housing*: financing for companies and financial service providers enabling access to housing and housing improvements for underserved individuals;

#### *Eligible Social Finance Asset Selection and Evaluation Process*

The Group's specialist Social Finance team will review assets to check they meet the Social Finance Asset Portfolio Eligibility Criteria and will identify a unique Social Finance Asset Portfolio for the aggregate principal amount of securities issued during a given reporting period that are intended to be used for Social Finance Assets ("**Social Finance Bonds**"). Once screened, Social Finance Assets will be added to the relevant Social Finance Asset Portfolio. The selection process for the Social Finance Assets takes into account whether the potential eligible asset satisfies the criteria for inclusion in the Social Finance Assets Portfolio. Additionally, the selection of Social Finance Assets is also governed by risk approval guidelines and credit monitoring standards in each relevant jurisdiction. If the Group's investment in any asset in any Social Finance Asset Portfolio is terminated or if an asset no longer meets the Social Finance Asset Portfolio Eligibility Criteria or satisfies any of the Exclusionary Criteria, the Social Finance team will remove such asset from the relevant Social Finance Asset Portfolio and may include additional eligible assets in a Social Finance Asset Portfolio.

#### *Management of Proceeds*

The Group's Sustainable Bond Working Group (the "**SB Working Group**") is responsible for oversight of the Social Finance Asset Portfolio, and its responsibilities include monitoring the total aggregate amount of Social Finance Bonds issued and tracking the portfolio using an internal asset management system. The SB Working Group aims to ensure that the aggregate amount in each Social Finance Asset Portfolio is equal to or greater than the aggregate amount raised by Social Finance Bonds issued during the associated reporting period by reviewing the aggregate size and maturity of the Social Finance Asset Portfolio each quarter. If for any reason the aggregate amount in any Social Finance Asset Portfolio is less than the total outstanding amount of such Social Finance Bonds issued, the Group will assign the unallocated balance to cash, cash equivalents and/or other liquid marketable instruments (including U.S. Treasury securities) until the amount can be allocated towards the Social Finance Asset Portfolio.

#### *Reporting*

The Group will publish a report (the "**Sustainable Bond Report**") on its website ([https://www.citigroup.com/citi/fixedincome/social\\_finance\\_bonds.htm](https://www.citigroup.com/citi/fixedincome/social_finance_bonds.htm)) within one year from issuance

of the Group's inaugural Social Finance Bonds and will renew such report annually until full allocation of the proceeds and in case of any material changes. The Sustainable Bond Report will cover allocation and impact reporting for all Social Finance Bonds issued during the reporting period specified therein and will provide updated information should a material change in the Social Finance Asset Portfolio occur. You should note that no other or separate notification will be provided to investors in particular Social Finance Bonds as to the Social Finance Asset Portfolio.

#### *External Review*

The Group will engage external independent accountants to review that the assets included in the Social Finance Asset Portfolio meet the Social Finance Asset Portfolio Eligibility Criteria and are not invested in assets defined in the Exclusionary Criteria. Further, the independent accountants will be engaged to confirm that the aggregate amount in the Social Finance Asset Portfolio is equal to or greater than the aggregate amount raised by the relevant Social Finance Bonds and, to the extent the total amount of the relevant outstanding Social Finance Bonds is greater than the aggregate amount in the Social Finance Asset Portfolio, that the difference is held in cash, cash equivalents and/or other liquid marketable instruments (including U.S. Treasury securities) in the Group's liquidity portfolio. Any review report is only current as of the date that report was issued and you must determine for yourself the relevance of any such report and/or the information contained therein for the purposes of your own investment considerations or expectations.

For the avoidance of doubt, neither the Sustainable Bond Report nor the report of any third party is, or shall be deemed to be, incorporated in and/or form part of this Base Prospectus and is not, nor should be deemed to be a recommendation by the relevant Issuer or any Dealer to buy, sell or hold the Securities.

## 5 Interest and Redemption of the Securities

### *General introduction to the Interest and Redemption profiles*

As explained in the subsection "Introduction to the Programme and the components of the Base Prospectus" of "Section A – General Description of the Programme", the Final Terms will specify which interest profile, which features relating to interest, mandatory early redemption, redemption profiles and features relating to the redemption apply to the Securities.

As such the Securities provide for different interest profiles and interest payments (if any) may be linked to certain interest underlyings or other conditions for payment. Payment of any redemption amount depends on the applicable redemption profile of the Securities. The Securities may redeem at maturity or extraordinarily prior to maturity. In the case of Credit Linked Securities, the redemption at maturity may be extended in certain circumstances. In respect of Credit Linked Securities, please see the subsection "6. Credit Linked Securities" below for information on how interest and redemption are effected by the occurrence of a credit event.

Formulae for determining amounts due or assets deliverable under the Securities may be subject to one or a combination of the features described below. In such circumstances, the relevant calculation will not be made only by reference to the performance of one or more underlying and the application of such features may result in the calculation being subject to a minimum and/or maximum amount or otherwise increasing or decreasing the amount that would otherwise have been calculated had no such feature(s) been applicable. Movements in the value of the relevant underlying will be magnified where a participation rate applies and may therefore result in greater gains or losses than if no participation rate applied. Therefore, amounts due or assets deliverable in respect of the Securities will also be linked to the performance of the relevant exchange rate and negative performance of such exchange rate could negate positive performance of the relevant Underlying(s).

### *Interest profiles*

The Securities may be zero coupon securities, fixed rate securities, floating rate securities, CMS rate securities, inflation rate securities or interim performance interest securities.

A brief description of each interest profile is set out below.

(a) **Zero coupon securities**

Zero coupon securities do not bear any interest and may be issued at a discount to par.

(b) **Fixed rate securities**

Fixed rate securities bear fixed interest and any interest amount due will be payable in the specified currency on the relevant interest payment date.

(c) **Floating rate securities**

Floating rate securities bear floating interest from the interest commencement date and any interest due will be payable in arrear on the interest payment date(s) in the specified currency and in respect of the interest period ending on the interest period end date falling on or about such interest payment date.

(d) **CMS rate securities**

CMS rate securities bear interest linked to a constant maturity swap (CMS) reference rate or the difference between or the lesser of two CMS reference rates, as the case may be, from the interest commencement date and any interest due will be payable in arrear on the interest payment date(s) in the specified currency and in respect of the interest period ending on the interest period end date falling on or about such interest payment date.

(e) **Inflation rate securities**

Inflation rate securities may bear interest and any interest amount due, subject to and if applicable, (i) the relevant underlying closing level, (ii) any margin, (iii) the relevant day count fraction and (iv) any interest participation rate, will be payable in the specified currency on the relevant interest payment date.

(f) **Interim performance interest securities**

Interim performance interest securities may bear interest and any interest amount due, subject to and if applicable, (i) the relevant interim performance, (ii) the interest participation rate, (iii) any FX rate or FX rate performance and (iv) any interest adjustment(s), will be payable in the specified currency on the relevant interest payment date.

*Interest barrier event*

The payment of the relevant interest amount may be subject to the occurrence or non-occurrence of an interest barrier event.

An interest barrier event describes a situation where on specified observation dates the performance (closing level) of the relevant underlying is above or below a specific predetermined barrier level. Where the closing level of the underlying is above such barrier level a barrier event has occurred; where the closing level of the underlying is below the barrier level a barrier event has not occurred. For Securities featuring an interest barrier event the payment of the relevant interest amount is subject to the fact that on the relevant observation date(s) an interest barrier level was either hit (i.e., occurrence of a barrier event) or missed (i.e., non-occurrence of a barrier event).

*Interest profiles features*

The Securities may have the following additional interest profile features:

(a) **Interest barrier lock-in**

In case of the interest barrier lock-in feature, an interest barrier event will occur if an interest lock-in event has occurred in respect of any prior interest payment date. An interest lock-in event will occur if an interest barrier event has occurred and on such date and further conditions as specified in the applicable Final Terms are met with regard to the interest lock-in event.

(b) **Lookback**

In the case of the lookback feature any interest amount due amounts to the interest amount plus (if applicable) the sum of the interest amounts in respect of all interest payment dates falling prior to such interest payment date on which an interest barrier event did not occur and which have not been accounted for on any prior interest payment date, will be payable in the specified currency on the relevant interest payment date.

(c) **Multi-chance**

In case of the multi-chance feature, any interest amount due, will be payable in the specified currency on the relevant interest payment date, subject to the number of interest barrier underlyings for which an interest barrier event occurred. The determination of whether an interest barrier event has occurred on the relevant interest payment date shall be made for each interest barrier underlying separately.

(d) **Accrual**

In case of the accrual feature in case of fixed rate securities any interest amount due will be payable in arrear on the interest payment date(s) in the specified currency in respect of the interest period ending on (but excluding) the interest period end date falling on or about such date.

(e) **Range accrual**

In case of the range accrual feature any interest amount due shall be multiplied by the product of the applicable day count fraction and the applicable accrual rate, as determined on each range accrual determination date. The accrual rate is equal to the number of interest barrier observation dates in the relevant interest period on which an interest barrier event occurs divided by the number of range accrual determination dates in such interest period.

(f) **Twin win interim performance**

In case of the twin win feature in case of interim performance securities the interim performance component of the interest amount will be converted to its absolute value.

(g) **Reverse interim performance**

In case of the reverse interim performance feature in case of interim performance securities the interim performance component will be subtracted from a specified percentage.

(h) **Cap, floor or collar**

Any interest amount may be subject to a maximum interest amount (a cap), a minimum interest amount (a floor) or both (a collar).

*Interim Performance Interest*

Interim performance interest means an interest amount that is calculated by using the interim performance of a single or multiple interest underlying(s). The interim performance is expressed as a percentage and is determined by reference to the performance of the relevant interest underlying(s) on a given valuation date. The interim performance is calculated by the underlying closing level or the interest reference level in each case minus the interest strike level divided by the interest initial level.

*Interest Underlyings*

Interest underlyings may apply (i) in case of interim performance interest securities, as a component of the interim performance and (ii) for the purpose of determining the occurrence or non-occurrence of an interest barrier event.

An interest underlying can be any of the following: Security index, inflation index, commodity, share, depositary receipt, exchange traded fund share, FX rate, dividend futures contract, rate.

*Reference Rates*

In case of floating rate securities, the interest amount will be linked to a reference interest rate. A brief description of the interest rate is set out below.

A reference rate may be any one or more of the European Interbank Offered Rate ("**EURIBOR**"), the Sterling Overnight Index Average ("**SONIA**"), the Stockholm Interbank Offered Rate ("**STIBOR**"), the Copenhagen Interbank Offered Reference Rate ("**CIBOR**"), the Norwegian Interbank Offered Rate ("**NIBOR**"), the Australian Financial Markets Association (AFMA) Bank-Bill Reference Rate ("**BBSW**") or any other interest or other rate that appears on a reference page.

If the reference rate for the Securities is EURIBOR, STIBOR, CIBOR, NIBOR, TIBOR or HIBOR, the floating rate will be determined by reference to the relevant reference page.

- (i) EURIBOR is the rate of interest quoted by banks operating in the European interbank market for the Euro sponsored by the European Banking Federation.
- (ii) STIBOR is the rate of interest based on the interest rates at which banks offer to lend unsecured funds to other banks in the Stockholm interbank market.
- (iii) CIBOR is the rate of interest based on the interest rates at which banks offer to lend unsecured funds to other banks in the Copenhagen interbank market.
- (iv) NIBOR is the rate of interest lenders require for unsecured money market lending in Norwegian Kroner (NOK).
- (v) BBSW is the rate of interest based on the interest rates at which banks offer to lend unsecured funds to other banks in the Sydney interbank market.

If the floating or other variable rate of interest is calculated by reference to a reference rate that is different to those contemplated above, then the reference page for such reference rate will be set out in the applicable Final Terms.

#### *Redemption profiles*

A brief description of each redemption profile is set out below.

##### **(a) Redemption amount (cash settled or physical delivery)**

Any redemption amount due will be paid in the specified currency or delivered in the form of an entitlement in case of physical delivery securities by the relevant Issuer on the maturity date. The redemption amount may be equal to fixed percentage per calculation amount or equal to the performance-linked redemption amount. The performance-linked redemption amount depends, each as applicable, on the following factors: any relevant percentage, any final performance of the final performance underlying, any final participation rate, any redemption adjustment, any FX performance, any global participation rate, any final participation rate put, final participation rate call, put call sum floor of the final performance underlying, any market timer percentage, any final reference level of the final performance underlying, any annuity floor, any annuity factor and annuity.

##### **(b) Redemption amount upon redemption barrier event (cash settled or physical delivery)**

The redemption amount may depend on the occurrence or non-occurrence of a redemption barrier event. If a redemption barrier event has occurred, either no amount will be payable or the specified redemption amount will be payable in the specified currency or in case of physical delivery securities the entitlement will be delivered. The redemption amount may be equal to fixed percentage per calculation amount or equal to the performance-linked redemption amount.

(c) **Redemption amount upon redemption barrier event and redemption upper barrier event (cash settled or physical delivery)**

In case a redemption barrier event is applicable and has not occurred but a redemption upper barrier event has occurred an amount specified as a percentage of the calculation amount or the performance-linked redemption amount will be payable. If no redemption upper barrier event has occurred, an amount specified as a percentage of the calculation amount or the performance-linked redemption amount will be payable.

(d) **Redemption amount upon redemption exit event (cash settled)**

In case a redemption exit event is applicable and has occurred the specified redemption exit amount will be payable in the specified currency. If no redemption exit event has occurred, the redemption amount may depend on the occurrence or non-occurrence of a redemption barrier event as described under paragraphs (b) and (c) above.

*Redemption types*

The Securities may be redeemed at maturity or in certain extraordinary circumstances prior to maturity.

(a) **Redemption at maturity**

If Securities are redeemed at maturity the redemption amount may be equal to the principal amount (redemption at par) or determined by reference to the value or performance of one or more Underlying, a so-called performance-linked redemption amount.

In the case of Credit Linked Securities, the redemption at maturity may be extended in certain circumstances. In respect of Credit Linked Securities, please see the subsection "6. *Credit Linked Securities*" below for information on how redemption is effected by the occurrence of a credit event.

The **performance-linked redemption amount** is calculated by the Calculation Agent by reference to one of the following formulas, as specified in the applicable Final Terms:

*Put Option:* the sum of the Calculation Amount and the Calculation Amount multiplied by the Final Performance of the Final Performance Underlying(s) ("**FPU**") multiplied by the Final Participation Rate ("**FPR**") multiplied by FX Performance plus the Redemption Adjustment, expressed as a formula:

Calculation Amount + (Calculation Amount x Final Performance of FPU x FPR x FX Performance) + Redemption Adjustment

*Call Option:* the sum of the Calculation Amount and the Calculation Amount multiplied by the Final Performance of the Final Performance Underlying(s) ("**FPU**") multiplied by the Final Participation Rate ("**FPR**") multiplied by FX Performance plus the Redemption Adjustment, expressed as a formula:

Calculation Amount + (Calculation Amount x Final Performance of FPU x FPR x FX Performance) + Redemption Adjustment

*Call Spread - Put Spread Option:* (x) the Calculation Amount multiplied by (y) the "call spread amount" (being the greater of the Call Floor and the lesser of the Call Cap and the Final Performance of the Final Performance Underlying(s)), multiplied by the Final Participation Rate Call ("**FPR Call**") plus the "put spread amount" (being the lesser of the Put Cap and the greater of the Put Floor and the sum of the Relevant Percentage plus Final Performance of the Final

Performance Underlying(s), multiplied by the Final Participation Rate Put ("**FPR Put**") all multiplied by the Global Participation Rate ("**GPR**") and multiplied by the FX Performance, plus the Redemption Adjustment ("**RedAdj**") expressed as a formula:

Calculation Amount x [[[Max(Call Floor, Min(Call Cap, FinalPerf)) x FPR Call] + [Min(PutCap, Max(PutFloor, Relevant Percentage + FinalPerf)) x FPR Put]] x GPR x FX Performance] + RedAdj

*Twin Win*: the product of the Calculation Amount and the sum of the Relevant Percentage and the Absolute Value of the Final Performance of the Final Performance Underlying(s) ("**FPU**") multiplied by the Final Participation Rate ("**FPR**") multiplied by the FX Performance, plus the Redemption Adjustment ("**RedAdj**") expressed as a formula:

Calculation Amount x (Relevant Percentage + Abs [Final Performance of FPU x FPR x FX Performance]) + RedAdj

*Market Timer*: the product of (a) the Calculation Amount and (b) the sum of (i) 100% and (ii) the Final Performance of the Final Performance Underlying(s) ("**FPU**") multiplied by the Final Participation Rate ("**FPR**") and (iii) the Market Timer Percentage and (c) the FX Performance, plus the Redemption Adjustment ("**RedAdj**") expressed as a formula:

Calculation Amount x (100% + FPR x Final Performance of FPU + Market Timer Percentage) x FX Performance + RedAdj

*Put Call Sum*: the product of the Calculation Amount ("**CA**") and the sum of (a) the sum of (i) the Relevant Percentage and the Final Performance of the Final Performance Underlying(s) ("**FPU**") and (ii) the Final Participation Rate ("**FPR**") and (b) the greater of the Put Call Sum Floor and the Final Performance of the FPU, plus or minus, as the case may be, the Redemption Adjustment ("**RedAdj**"), expressed as a formula:

CA x (((Relevant Percentage + Final Performance of the FPU) x FPR) + Max (Put Call Sum Floor; Final Performance of the FPU)) x FX Performance + RedAdj

*Swaption*: the product of (a) the Calculation Amount and (b) 100% less the product of (i) Final Participation Rate, (ii) the greater of (A) the Annuity Floor and (B) the Final Reference Level ("**FRL**") of the Final Performance Underlying multiplied by the Annuity Factor and (iii) the Annuity, expressed as a formula:

Calculation Amount x {100% - [FPR x Max (Annuity Floor, {Annuity Floor x Final Reference Level of FPU}) x Annuity]}

**(b) Redemption at the Option of the Issuer**

If redemption at the option of the relevant Issuer (Issuer Call) is specified as applicable in the applicable Final Terms, the relevant Issuer may, having given the number of days' notice specified in the applicable Final Terms or, if none is so specified: not less than, five nor more than 60 days' notice to the Securityholders (which notices shall be irrevocable and shall specify the date fixed for redemption), redeem all or some only of the Securities then outstanding on any Optional Redemption Date and, in respect of each principal amount of the Securities equal to the Calculation Amount or each number of Securities at the Optional Redemption Amount specified in, or determined in the manner specified in, the Valuation and Settlement Schedule or specified in the applicable Final Terms together, if appropriate, with interest accrued to (but excluding) the relevant Optional Redemption Date. Any such redemption must be of an amount not less than the

Minimum Redemption Amount and not more than the Maximum Redemption Amount, in each case as may be specified in the applicable Final Terms.

In the case of a redemption of some only of the Securities, the Securities to be redeemed will be selected in accordance with the rules of the Relevant Clearing System (in the case of Securities cleared through Euroclear and/or Clearstream, Luxembourg, to be reflected in the records of Euroclear and Clearstream, Luxembourg as either a pool factor or a reduction in nominal amount, at their discretion).

**(c) Mandatory early redemption**

If a mandatory early redemption ("**MER**") is specified in the applicable Final Terms the mandatory early redemption amount ("**MER amount**") or exit amount will be payable on the mandatory early redemption date ("**MER date**"). Such amounts in respect of the calculation amount may be:

- (i) a specified fixed amount,
- (ii) the performance-linked MER amount,
- (iii) in case of the occurrence of a MER upper barrier event a specified fixed amount and if such event has not occurred a specified fixed amount.

The **performance-linked MER amount** is calculated by the Calculation Agent by reference to one of the following formulas, as specified in the applicable Final Terms:

*Put Option:* the product of the Calculation Amount and the sum of the Relevant Percentage and the MER Performance of the MER Performance Underlying(s) ("**MERPU**") for such MER Date multiplied by FX Performance multiplied by the MER Participation Rate ("**MERPR**") plus the MER Adjustment Amount ("**MERAA**"), expressed as a formula:

Calculation Amount x (Relevant Percentage + MER Performance of MERPU) x FX Performance x MERPR + MERAA

*Call Option:* the sum of the Calculation Amount and the sum of the Calculation Amount multiplied by the MER Performance of the MER Performance Underlying(s) ("**MERPU**") for such MER Date multiplied by the FX Performance multiplied by the MER Participation Rate ("**MERPR**") plus the MER Adjustment Amount ("**MERAA**"), expressed as a formula:

Calculation Amount + (Calculation Amount x MER Performance of MERPU) x FX Performance x MERPR + MERAA

*Call Spread - Put Spread Option:* (x) the Calculation Amount multiplied by (y) the "call spread amount" (being the greater of the Call Floor and the lesser of the Call Cap and the MER Performance of the MER Performance Underlying(s) for such MER Date multiplied by the MER Participation Rate Call ("**MERPR Call**") plus the "put spread amount" (being the lesser of the Put Cap and the greater of the Put Floor and the sum of 100 per cent. and the MER Performance of the MER Performance Underlying(s) for such MER Date multiplied by the MER Participation Rate Put ("**MERPR Put**") multiplied by the FX Performance multiplied by the Global Participation Rate ("**GPR**") plus the MER Adjustment Amount ("**MERAA**"), expressed as a formula:

Calculation Amount x [[Max(Call Floor, Min(Call Cap, MERPerf)) x MERPR Call] + [Min(Put Cap, Max(Put Floor, 100% + MERPerf) x MERPR Put]] x FX Performance x GPR + MERAA

*Twin Win*: the product of the Calculation Amount and the sum of 100 per cent. and the Absolute Value of the MER Performance of the MER Performance Underlying(s) ("**MERPU**") for such MER Date multiplied by a MER Participation Rate ("**MERPR**") and multiplied by FX Performance plus a MER Adjustment Amount ("**MERAA**"), expressed as a formula:

Calculation Amount x (100% + Abs [MER Performance of MERPU]) x FX Performance x MERPR + MERAA

Such amount is therefore subject to a Minimum MER Amount (a floor).

*Snowball*: the product of the Calculation Amount and the sum of 100 per cent and the Snowball Percentage in respect of such MER Date, by reference to the following formula:

Calculation Amount x (100% + Snowball Percentage)

The MER amount or exit amount may be subject to a maximum amount (a cap), a minimum amount (a floor) or both (a collar).

**(d) Extraordinary early redemption provisions**

If the Securities are extraordinarily redeemed prior to maturity and if specified in the applicable Final Terms, hedge costs may be deducted from the relevant early redemption amount. The Securities may be redeemed extraordinarily prior to maturity either (i) following the occurrence of an adjustment event or (ii) following the occurrence of an additional early redemption event. #### *Determinations by the Calculation Agent*

If in the reasonable determination of the Calculation Agent any Adjustment Event occurs, then (subject to the provisions of the Underlying Schedule applicable to such Underlying) the Calculation Agent shall (i) make such adjustment to the terms of the Securities as the Calculation Agent determines necessary or appropriate in its reasonable discretion (*billiges Ermessen*, § 317 of the German Civil Code (*BGB*)) to

account for the effect of such Adjustment Event and (ii) determine the effective date of each such adjustment.

The adjustments made by the Calculation Agent in response to an Adjustment Event may include a substitution of the relevant Underlying and the Calculation Agent may make such other adjustments to the terms of the Securities as it deems necessary or appropriate in its reasonable discretion (*billiges Ermessen*, § 317 of the German Civil Code (*BGB*)) in relation to such substitution.

The Calculation Agent will notify the Issuer and each Paying Agent of any determination made by it and the action that it proposes to take in respect of any such determination. The Issuer will then notify the Securityholders thereof as soon as reasonably practicable thereafter.

*Reasonable discretion of the Calculation Agent*

Reasonable discretion (*billiges Ermessen*, § 317 of the German Civil Code (*BGB*)) requires that the determination sufficiently takes into account the interests of both parties, with a full appreciation of the purpose of the contract, in this case of the Securities. This is an objective standard. An equitable result is to be achieved in the individual case. This requires a comprehensive analysis and weighing of the interests of both contracting parties (i.e., Issuer and Securityholders), taking into account all actual circumstances and factors. Both the interests of the Issuer and the interests of the Securityholders must be taken into account by the Calculation Agent.

Interests of the Issuer may include, but are not limited to, the following:

- no increase in anticipated disbursements;
- continuation with comparable investment conditions;
- possibility to hedge the risk related to the Securities in the market;
- matching of the terms of the hedge and of the Security;
- alignment with general market developments; and
- uniformity of investment conditions between comparable products.

Securityholder interests may include, but are not limited to, the following:

- maintaining the anticipated return;
- continuation of the investment;
- level of risk of the investment;
- risk appetite of the Securityholder; and
- continuation under comparable investment conditions.

In exercising its reasonable discretion in respect of any adjustments to the Securities, the Calculation Agent may take into account such factors as it determines reasonable in each case, which may include, in particular, (i) general market developments; (ii) recommendations of industry associations and (iii) any circumstances or events which have or may have a material impact on the hedging arrangements entered into by a hedging party in respect of the risk related to the Securities.

The Calculation Agent is required to choose from a range of possible determination outcomes. Reasonable discretion as such is value-free and a regulative principle from which the requirement to

balance the interests is derived. The Calculation Agent must determine the objectively "best" decision from a number of possible outcomes, by

1. determining the relevant interests of the parties to be included in the consideration,
2. taking into account the facts relevant to those interests, and
3. evaluating the conflicting interests and weighting them against each other.

The Calculation Agent must include all relevant aspects in the proper weighing process.

#### *Judicial review of the exercise of reasonable discretion*

The exercise of the reasonable discretion is subject to judicial review as to whether the limits of the discretion have been observed and whether irrelevant or arbitrary motives have not been decisive for the determination. Securityholders may challenge any determination made by the Calculation Agent based on the concept of reasonable discretion.

In its examination, the court generally focuses on the point in time at which the determination was to be made by the Calculation Agent.

Judicial review is directed at examining whether the concept of reasonable discretion (*billiges Ermessen*) has been misunderstood, whether the legal limits of the discretion have been exceeded, whether no use has been made of the discretion, whether an incorrect approach has been taken or whether the weighing and balancing of the interests has been faulty or incomplete.

According to German case law, a determination is manifestly unreasonable if it is grossly contrary to good faith, and this is apparent to an unbiased and knowledgeable observer.

If the determination made is unreasonable, the court shall make its own reasonable determination.

#### *Notification to the Securityholders*

The Calculation Agent shall notify the Issuer and each Paying Agent of any determination made by it and the action that it proposes to take in respect of any such determination. The Issuer shall notify the Securityholders thereof as soon as reasonably practicable thereafter.

All notices to the Securityholders in respect of any Securities shall be published:

- (i) at the website specified in the applicable Final Terms and will be deemed to have been given on the date of first publication; and/or
- (ii) in the case of listed Securities, in accordance with the rules and regulations of the relevant stock exchange or other relevant authority and will be deemed to have been given on the first date of transmission or publication; and/or
- (iii) if publication pursuant to (i) or (ii) is not practicable, in another leading German language daily newspaper with circulation in Europe and will be deemed to have been given on the date of first publication; and/or
- (iv) provided that any publication or other requirements required pursuant to (ii) shall also be complied with if applicable, to the Relevant Clearing System for communication by the Relevant Clearing System to the Securityholders and will be deemed to be given on the first day following the day of transmission to the applicable Relevant Clearing System.

With respect to Securities listed on the Luxembourg Stock Exchange and so long as the rules of that exchange so require, any notices to Securityholders must be published on the website of the Luxembourg Stock Exchange.

## **6 Credit Linked Securities**

### ***Credit Events***

The amount of principal and/or interest payable is dependent upon whether bankruptcy has occurred with respect to the Reference Entity and whether certain credit events ("**Credit Events**") have occurred in respect of obligations of the Reference Entity that fall within a specified category (e.g., bonds, loans, borrowed money) and where applicable have specified characteristics (e.g., subordination, currency, governing law). Whereas bankruptcy is a Credit Event that relates to the Reference Entity itself, other Credit Events, such as failure to pay or restructuring, relate to obligations of the Reference Entity and only in the case of a restructuring credit event, deterioration of creditworthiness of the Reference Entity is a pre-condition for a Credit Event to occur. Depending on the terms of the Credit Linked Security, obligations for which the Reference Entity acts in a capacity other than direct obligor (for example, as a guarantor or insurer) may or may not be within the class of obligations that is relevant for the purposes of determining whether a Credit Event has occurred. Investors should additionally be aware that a Reference Entity may decide to restructure only certain classes of its obligations and such a selective restructuring may not result in a Credit Event for the classes of obligations that are relevant for a particular Credit Linked Security. Investors should therefore carefully review the applicable Credit Events and their definitions under the Credit Linked Securities and independently evaluate its appropriateness to the objective for purchasing the Credit Linked Securities.

### ***Impact of a Credit Event on principal and interest***

The occurrence of a Credit Event in relation to any Reference Entity from time to time may result in either full or partial redemption of the Credit Linked Securities on the relevant Credit Event Redemption Date which shall depend on whether "Credit Payment on Maturity" or "Credit Payment Following Credit Event" applies and any recovery (which could be zero) will be payable to the investor but the investor shall be exposed to all incurred losses, which will reduce its principal redemptions.

Following the occurrence of a Relevant Event Determination Date investors should note that interest will cease to accrue on a specified portion of the relevant Credit Linked Securities as set out in the terms and conditions of the Credit Linked Securities depending on whether "Interest Accrual on Default" or "No Interest Accrual on Default" applies in the applicable Final Terms.

If "No Interest Accrual on Default" is applicable, interest will cease from the Interest Payment Date immediately preceding the Relevant Event Determination Date or where there is no Interest Payment Date immediately preceding the Relevant Event Determination Date, the Issue Date. If "Interest Accrual on Default" is applicable, interest will cease to accrue on the first Business Day immediately following the Relevant Event Determination Date. In such case, interest shall accrue on the affected applicable proportion from (and including) the Interest Payment Date immediately preceding the Relevant Event Determination Date (or where there is no Interest Payment Date immediately preceding the Relevant Event Determination Date, the Issue Date) to (and including) the Relevant Event Determination Date.

The Issuer may also suspend interest in certain circumstances where the Calculation Agent has determined that a potential Credit Event could occur but no Credit Event Notice has been provided to the Issuer and/or the Securityholders. Such suspension of interest shall be effected although no Relevant Event Determination Date has actually occurred.

Investors should be aware that payment of any interest wrongly suspended will be repayable in accordance with the terms and conditions of the Credit Linked Securities and where insufficient interest has been suspended (the absolute value of such interest shortfall constituting the Interest Suspension Shortfall Amount), such Interest Suspension Shortfall Amount shall be claimed by the Issuer from any future amount(s) payable upon the redemption or, where applicable, write down in full of the relevant Credit Linked Securities (whether at maturity or upon early redemption). The Issuer however shall have no further claims against any investors for any Interest Suspension Shortfall Amount which cannot be deducted in full or in part (on account of the relevant redemption amount being insufficient).

Interest (if applicable) shall continue to be suspended until the relevant Credit Derivatives Determinations Committee makes the relevant announcements or the Calculation Agent determines that no Relevant Event Determination Date can occur. In such circumstances, investors should note that they may not receive any interest for multiple Interest Periods and no liability will attach to the Issuer for any such non-payment of interest.

Interest will otherwise continue to accrue as usual on any remaining portion of the Credit Linked Security unaffected by the Relevant Credit Event to and excluding the earlier to occur of any full redemption at Maturity Date or any relevant early redemption. Where "Credit Payment on Maturity applies", additional interest shall accrue on the Credit Linked Securities in respect of the Credit Payment on Maturity Amount at the funding interest rate.

Investors should note that the Issuer is not obliged to suffer any loss as a result of a Credit Event. Credit losses on Credit Linked Securities will be calculated irrespective of whether the Issuer has suffered an actual loss in relation to a Reference Entity or any obligations thereof. The Issuer is not obliged to account for any recovery which it may subsequently make in relation to such Reference Entity or its obligations.

#### *Maturity Date Extension*

Investors should note that where the Calculation Agent determines in its reasonable discretion (*billiges Ermessen* § 317 of the German Civil Code (*BGB*)) that on or prior to the Maturity Date, (i) one or more Reference Entities (a) may be subject to a Credit Event, (b) if "Grace Period Extension" is applicable, is or may be subject to a Potential Failure to Pay, or (c) if "Potential Repudiation/Moratorium" is applicable, is or may be subject to a Potential Repudiation/Moratorium (ii) a Credit Event Notice may be delivered after the Maturity Date within an effective delivery period which may result in a Relevant Event Determination Date occurring (iii) a Credit Event Resolution Request Date may occur after the Maturity Date but during the Notice Delivery Period which may result in a Relevant Event Determination Date occurring; (iv) the final Credit Event Redemption Date will only occur after the Maturity Date; or (v) a Payment Failure Cut-Off Date may occur after the Maturity Date where a Payment Failure Event has occurred, then each Credit Linked Security then outstanding shall not be redeemed on the Maturity Date but shall be redeemed on the Extended Maturity Date.

If any amount is payable on the Maturity Date of Credit Linked Securities (including any interest payment), such amount shall fall due on the Extended Maturity Date and shall be payable without any interest or other sum payable in respect of the postponement of the payment of such amount.

#### *Successors*

Investors should note that, from time to time, the Reference Entity may be subject to change following the determination of any successors to the Reference Entity, and the creditworthiness of such successors may have an impact on the value of, and return on, the Credit Linked Securities.

Broadly, "**successor**" means, the entity or entities, if any, determined to have succeeded to a requisite amount of relevant obligations of the Reference Entity. For a Sovereign Reference Entity, an entity may

only be a successor to a Reference Entity that is a sovereign following the occurrence of a unification, annexation, secession, partition, dissolution, consolidation, reconstitution or other similar event.

The Calculation Agent will be responsible for determining, as soon as reasonably practicable after it becomes aware of the relevant succession, the sovereign or entity, if any, that qualifies as the successor. The Credit Linked Conditions provide that if a Reference Entity has more than one successor, the Calculation Agent shall amend the terms of the Credit Linked Securities, without consent of the investors, to reflect that the relevant Reference Entity has been succeeded by more than one successor and for the purposes of calculation, the affected notional representing such Reference Entity will be divided equally among the successors. Following such determination, the Credit Linked Securities shall remain outstanding in an amount equal to the outstanding Aggregate Principal Amount and interest will accrue on such amount in accordance with the adjustments determined by the Calculation Agent in its reasonable discretion (*billiges Ermessen*, § 317 of the German Civil Code (*BGB*)), acting in a commercially reasonable manner to reflect the economic effects of the identification of more than one successor, considered in the aggregate. Investors should note that the Credit Linked Security may reference substantially different credit risks following the determination of one or more successors. These credit risks could potentially be greater or lesser than the credit risk of the original Reference Entity. Investors should also be aware that the determination of a successor will not necessarily result in the assumption of that obligation by the successor either at all or in the same proportion as the allocation of the notional amount of the original Credit Linked Security. Such changes to the Credit Linked Securities could adversely impact the value of the Credit Linked Securities.

***Exposure to Credit Events and successions prior to the Trade Date or Issue Date***

The Credit Event Backstop Date represents the first day of the credit protection period for a Series of Credit Linked Securities. The Credit Event Backstop Date will be specified in the applicable final terms as the Issue Date, the Trade Date or a number of calendar days prior to Trade Date. **The Credit Event Backstop Date may be specified to be prior to the Trade Date.**

**Investors should accordingly note a Credit Event occurring prior to the Trade Date or Issue Date may result in a Credit Event being triggered under such Credit Linked Securities.**

Investors should also note that this will not be the case where the terms of the Credit Linked Securities expressly specify the Credit Event Backstop Date as the Trade Date or the Issue Date. Credit Linked Securities may also be exposed to Successor determinations in respect of events occurring prior to the Trade Date or Issue Date as the Credit Linked Securities have a similar backstop date (referred to as "**Successor Backstop Date**"), which is a look-back period of 90 calendar days prior to the date of a request to convene the relevant Credit Derivatives Determinations Committee (or, if applicable, the effective date of a notice to the investor describing the relevant succession) is applicable for the purposes of any Successor determination. In both cases, investors should note that a Credit Event or succession that occurred prior to the Trade Date or Issue Date could affect the relevant Credit Linked Securities. In respect of a Series of Credit Linked Securities, where on or after 1 January 2014, an entity assumes all of the obligations (including at least one relevant obligation) of a Reference Entity which is not a sovereign, in circumstances where a Reference Entity has ceased to exist, or is in the process of being dissolved and has not issued or incurred any borrowed money obligation at any time since the legally effective date of the assumption (such entity, a "**Universal Successor**"), the look-back period of 90 calendar days will not apply.

Investors should conduct their own review of any recent developments with respect to any Reference Entity(ies) by consulting publicly available information. If, prior to the Trade Date or Issue Date, a request to convene a Credit Derivatives Determinations Committee to determine whether a Credit Event

or Successor determination has occurred with respect to a Reference Entity has been made, details of such request may be found on the DC Secretary's webpage at <https://www.cdsdeterminationscommittees.org/> (or any successor website). If a Credit Derivatives Determinations Committee has not been convened to determine such matter as of the Trade Date or Issue Date, investors should note that one may still be convened after the Trade Date or Issue Date in respect of an event that has occurred which occurs up to 60 days (in the case of a Credit Event), 90 days in the case of the determination of a Successor) or any time (in the case of the determination of a Universal Successor, where applicable) before the date of a request to convene such Credit Derivatives Determinations Committee to make the relevant determinations. Equally, Credit Events and successions may occur but where issues are not raised within the requisite time period to the Credit Derivatives Determinations Committee to qualify for a Credit Event or a qualifying succession, the events will not impact the relevant Credit Linked Securities, subject to any further actions undertaken by the Calculation Agent (where applicable).

### ***Reference Obligations under the Credit Linked Securities***

The reference obligation will be the obligation specified for the relevant Reference Entity set out in the applicable Final Terms. Where certain substitution events occur with respect to such reference obligations, the Calculation Agent will attempt to substitute the same in accordance with the criteria and conditions set out in the Credit Linked Securities.

Where a Reference Obligation Only Series is specified as applicable in the Final Terms, the Credit Linked Securities shall early redeem without any substitution of the reference obligation where the reference obligation is redeemed in whole but otherwise, no substitution will be required if the aggregate amounts under the said obligation have reduced or it no longer is an obligation of the Reference Entity.

### ***Auction Redemption following a Credit Event***

If "Auction Redemption" is applicable with respect to the Credit Linked Securities, then the amounts payable under the Credit Linked Securities will be determined on the basis of the final price determined pursuant to the auction procedure set out in the relevant Credit Derivatives Auction Settlement Terms (then available at <https://www.cdsdeterminationscommittees.org/> (or any successor website)). In respect of specified obligations of the relevant Reference Entity, provided that the Credit Derivatives Determinations Committee determines that an applicable auction will be held, an auction final price determination date will occur. Credit losses determined pursuant to a market auction process may be greater or less than the losses which would have been determined in the absence of the auction. In particular, the auction process may be affected by technical factors or operational errors, which would not otherwise apply or may be the subject of actual or attempted manipulation. The administrator(s) specified in the auction settlement terms conduct auctions. Investors are subject to the risk that where a final price is determined in accordance with an auction, this may result in a lower recovery value than an obligation of the Reference Entity would have had if such final price had been determined pursuant to alternative methods.

In addition, the Credit Derivatives Determinations Committee may amend the form of auction settlement terms for a particular auction. The DC Rules provide for certain amendments by resolution of a convened Credit Derivatives Determinations Committee. Other amendments may be made subject to a public comment period; however, the DC Rules permit the Credit Derivatives Determinations Committee to forego a public comment period by supermajority action. Accordingly, there can be no assurance that the Credit Derivatives Auction Settlement Terms for a particular auction will be on similar terms to the form of auction settlement terms or the terms of previous auctions.

Where the only relevant Credit Event is a restructuring, several concurrent but separate auctions may occur with respect to the Reference Entity and such Credit Event. The auction settlement amount may be based on the price of one or more obligations of the Reference Entity having a final maturity date different from the restructured obligation.

Although auctions can generally be expected to be held for Reference Entities that are widely traded in the credit markets, there can be no assurance that an auction will be held for future Credit Events or that, if held, the auction will result in the determination of an auction final price. If an auction is not held or fails to result in the determination of an auction final price (as might occur if an auction is cancelled by the Credit Derivatives Determinations Committee due, for example, to an inability to obtain the requisite number of initial bids) and if "Auction Redemption" is applicable with respect to the Credit Linked Securities, then the fallback redemption method shall apply which, is cash redemption. In such circumstances of cash redemption, the final price will be determined pursuant to the valuation method specified in the Credit Linked Securities.

Investors should carefully assess and understand the elections specified in relation to the relevant Credit Linked Securities and the circumstances and/or events as described above, which may affect the value of, and return on, such Credit Linked Securities.

#### ***Cash Redemption following a Credit Event***

If "Cash Redemption" applies to the Credit Linked Securities, then following the occurrence of a Credit Event the Calculation Agent will be required to seek quotations in respect of selected obligations of the Reference Entity in accordance with the terms and conditions of the Credit Linked Securities. Investors should be aware that such obligations may no longer exist and no qualifying substitute obligations may have been identified, such quotations may not be available, or the level of such quotations may be substantially reduced as a result of illiquidity in the relevant markets or as a result of factors other than the credit risk of the Reference Entity (for example, liquidity constraints affecting market dealers). Moreover, the market value of a Reference Entity's obligations may be highly volatile in the period following a Credit Event. Accordingly, any quotations so obtained may be significantly lower than the value of the relevant obligation which would be determined by reference to (for example) the present value of related cash flows or the value that a party could obtain if it controlled the disposition of the obligations. Furthermore, the price of the selected obligations of the Reference Entity may be deemed to be zero in the event that no such quotations are available. Further, valuation of the selected obligations will be determined at a particular determination date and as such the recovery price which would be adopted in any loss amount or incurred loss amount that would be suffered by an investor following the occurrence of a Credit Event will reflect the value of relevant obligations at a given date. As such, the exposure to loss suffered by an investor or any principal write-down may be more than that ultimately realised by a holder of debt obligations of the Reference Entity, whether by means of enforcement of rights following a default or receipt of distributions following an insolvency or otherwise.

Further, where quotations are sought on an asset package, such asset package may contain assets which are hard to value and for which a valuation methodology may not be readily available or suitable, which may reduce the value of quotations or the availability of quotations that may otherwise have been obtained. Accordingly, investors should note that any quotations so obtained may be significantly lower than the value of the relevant obligation (or asset package) which would be determined by reference to (for example) the present value of related cash flows or the value that a party could obtain if it controlled the disposition of the obligations.

***Fixed Recovery Redemption may be subject to a fixed recovery price***

If "Fixed Recovery Redemption" applies to Credit Linked Securities and the Credit Event Redemption Amount of the Credit Linked Securities is calculated by reference to a fixed recovery price of the obligations of a Reference Entity(ies), the occurrence of a Credit Event may result in the recovery being materially lower than the prevailing price of the relevant obligations of the relevant Reference Entity. Investors should note that redemption could occur with a Fixed Recovery Percentage set at zero per cent. where the Final Terms specify accordingly.

If the Fixed Recovery Percentage is zero, following the occurrence of a Relevant Event Determination Date the occurrence of the Cash Redemption Date or the Final Cash Redemption Date shall fully and effectively discharge the Issuer's obligation to redeem the relevant Credit Linked Securities in full. Investors should be aware that where the Fixed Recovery Percentage is zero, the loss amount in respect of the Affected Reference Entity will be 100 per cent. and, accordingly, no redemption amounts will be payable to the Securityholders. Investors accordingly will bear the loss of their principal.

***No early redemption or Frustration***

Investors should note that the Credit Linked Securities will not early redeem and no frustration shall occur solely because the Reference Entity does not exist on, or ceases to exist on or following, the Trade Date or Issue Date or Obligations or the Reference Obligation do not exist on, or cease to exist on or following, the Trade Date or Issue Date. Accordingly, investors should conduct their own investigation as to the existence of a Reference Entity and/or relevant obligations prior to the purchase of the Credit Linked Securities to ensure that the exposure to the particular Reference Entity is within the contemplated objectives of the investor.

***Merger Events and Early Redemption in certain circumstances***

If "Redemption following Merger" is specified as being applicable in the applicable Final Terms, investors should note that the Credit Linked Securities may be redeemed earlier by the Issuer where it or the Calculation Agent determines that the Issuer or a Reference Entity consolidates or amalgamates with, or merges into, or transfers all or substantially all of its respective assets to, a Reference Entity or the Issuer, as applicable, or the Issuer and a Reference Entity become Affiliates. Accordingly, a Merger Event will result in the relevant Credit Linked Securities being redeemed in full or in part at the Merger Redemption Amount.

If a Reference Obligation is fully redeemed with respect to a Reference Obligation for a Series of Credit Linked Securities in respect of a Reference Entity to which "Reference Obligation Only" applies, investors should note that the relevant Credit Linked Securities shall be redeemed in part or in full at the Substitution Event Redemption Amount.

If the Credit Linked Securities are so redeemed early in the circumstances described above, the Issuer will pay to investors, as holder of such Notes, an amount specified in the General Conditions or the Credit Linked Conditions or such other amount (or method for calculating the amount) specified in the applicable Final Terms. There is no guarantee that the amount repaid to any investor will be equal to or higher than the initial investment in the relevant Credit Linked Securities and such amount may be substantially less than such initial investment.

***Relevant Credit Events disregarded***

Where a Relevant Credit Event occurs immediately after an event triggering early redemption of the Credit Linked Securities, the occurrence of the Relevant Credit Event will be disregarded (to the extent that the relevant Credit Linked Securities have not already been redeemed in full and cancelled) and the

Early Redemption Amount, or Optional Redemption Amount payable to Securityholders will be determined on the basis of the event triggering early redemption of the Credit Linked Securities only.

In the context of a Non-exempt Offer of such Securities, the relevant Issuer, the CGMHI Guarantor (where the Issuer is CGMHI) and the CGMFL Guarantor (where the Issuer is CGMFL) accept responsibility, in the jurisdictions to which the consent to use the Base Prospectus extends, for the content of this Base Prospectus under Article 11 of the Prospectus Regulation in relation to any person (an "**Investor**") who acquires any Securities in a Non-exempt Offer made by any person to whom the Issuer has given consent to the use of this Base Prospectus (an "**Authorised Offeror**") in that connection, if the conditions attached to that consent are complied with by the Authorised Offeror. The consent and conditions attached to it are set out under "*Consent*".

None of the Issuer, the CGMHI Guarantor (where the Issuer is CGMHI), the CGMFL Guarantor (where the Issuer is CGMFL) or any Dealer make any representation as to the compliance by an Authorised Offeror with any applicable conduct of business rules or other applicable regulatory or securities law requirements in relation to any Non-exempt Offer and none of the Issuer, the CGMHI Guarantor (where the Issuer is CGMHI), the CGMFL Guarantor (where the Issuer is CGMFL) or any Dealer have any responsibility or liability for the actions of that Authorised Offeror.

Save as provided below, none of the Issuer, the CGMHI Guarantor (where the Issuer is CGMHI), the CGMFL Guarantor (where the Issuer is CGMFL) or any Dealer have authorised the making of any Non-exempt Offer by any offeror and the Issuer has not consented to the use of this Base Prospectus by any other person in connection with any Non-exempt Offer of Securities. ROBOR is currently provided by National Bank of Romania.

As at the date of this Base Prospectus, SONIA, SOFR, TONA, ROBOR and €STR do not fall within the scope of the Benchmarks Regulation.

As at the date of this Base Prospectus, EMMI, ASX, SIX Swiss, NoRe, DFBF and SFBF appear on the register of administrators and benchmarks (the "**Benchmark Register**") established and maintained by the European Securities and Markets Authority ("**ESMA**") pursuant to Article 36 of the Benchmarks Regulation, while IBA does not appear on such register.

In the case any amounts payable or assets deliverable under the Securities may be calculated by reference to a benchmark not listed above, the applicable Final Terms will indicate whether or not the benchmark is provided by an administrator included in the Benchmark Register pursuant to Article 36 of the Benchmarks Regulation. Transitional provisions in the Benchmarks Regulation may apply such that the administrator of a particular "benchmark" is not required to be included in the register of administrators and benchmarks at the date of the applicable Final Terms.

## **10 Meetings of Securityholders**

The Securities are subject to the provisions of the German Act on Notes of 9 August 2009 (*Gesetz über Schuldverschreibungen aus Gesamtemissionen* – "**SchVG**"). The terms and conditions of the Securities issued under this programme will not provide for meetings of Securityholders or majority resolutions by Securityholders pursuant §§ 5 et seq. SchVG and will not provide for the election of a joint representative.

## SECTION F.2 – ISSUE OF SECURITIES

Securities will be issued on a continuous basis in series (each a "**Series**"). The Securities of each Series are intended to be interchangeable with all other Securities of that Series.

Each Series of Securities may be issued in tranches (each a "**Tranche**") having different issue dates but the terms otherwise identical to other Tranches constituting such series (or identical other than in respect of the first payment of interest).

The specific terms of each Tranche will be set forth in the applicable Final Terms.

### **Fungible issues of Securities for which the terms and conditions are set out in a Previous Base Prospectus**

In respect of Securities where the first Tranche of an issue of Securities which is being increased was issued under a base prospectus with an earlier date (an "**Original Base Prospectus**") and the terms and conditions and the form of Final Terms from such Original Base Prospectus are incorporated by reference in this Base Prospectus, such Securities will be documented using the form of Final Terms from the Original Base Prospectus (the "**Original Form of Final Terms**"), save that the initial paragraphs (up to and including the paragraph containing the definition of "Base Prospectus") after the title of the respective Guarantor of the Original Form of Final Terms shall be deleted and replaced with the wording set out in the Form of Final Terms in "*Section G.3 - FORM OF FINAL TERMS*" to be inserted in case (i) the first tranche of an issue which is being increased was issued under a base prospectus with an earlier date, (ii) a new base prospectus is published during the Offer Period of a Non-exempt Offer but prior to the Issue Date of the relevant Securities or (iii) a new base prospectus is published after the Offer Period of a Non-exempt Offer but prior to the Issue Date of the relevant Securities.

## **SECTION F.3 – SUBSCRIPTION AND SALE AND TRANSFER AND SELLING RESTRICTIONS**

CGMHI, CGMFL, Citigroup Inc., CGML and Citigroup Global Markets Europe AG entered or will enter into a Dealership Agreement (the "**Dealership Agreement**"). The Securities will be offered on a continuous basis by the relevant Issuer to the Dealers. However, the relevant Issuer reserves the right to sell Securities directly on its own behalf to other entities and to offer Securities in specified jurisdictions directly to the public through distributors, in accordance with all applicable rules and regulations. Securities may be resold at prevailing market prices, or at prices related thereto, at the time of such resale, as determined by the relevant Issuer or the relevant Dealer. The Securities may also be sold by the relevant Issuer through the Dealers, acting as agent of the relevant Issuer. The Securities may also be issued in syndicated Tranches which are jointly and severally underwritten by two or more Dealers.

The Issuers, the CGMHI Guarantor and the CGMFL Guarantor have agreed to indemnify the Dealers against certain liabilities in connection with the offer and sale of the Securities issued by the relevant Issuer, including in relation to liabilities arising under the Securities Act. The Dealership Agreement may be terminated in relation to all the Dealers and the Arranger or any of them by any Dealer or the Arranger, at any time on giving not less than 10 days' notice.

- (viii) that the Issuer and others will rely upon the truth and accuracy of the foregoing acknowledgements, representations and agreements and agrees that if any of such acknowledgements, representations or agreements made by it are no longer accurate, it shall promptly notify the Issuer; and if it is acquiring any Securities as a fiduciary or agent for one or more accounts it represents that it has sole investment discretion with respect to each such account and that it has full power to make the foregoing acknowledgements, representations and agreements on behalf of each such account.

#### *United States of America*

The Securities, the CGMHI Deed of Guarantee and the CGMFL Deeds of Guarantee have not been and will not be registered under the Securities Act or any state securities laws. Trading in the Securities has not been approved by the United States Commodity Futures Trading Commission under the United States Commodity Exchange Act, as amended. No issue of Securities may be offered or sold within the United States or to, or for the account or benefit of, U.S. persons. The Securities, the CGMHI Deed of Guarantee and the CGMFL Deeds of Guarantee do not constitute, and have not been marketed as, contracts of sale of a commodity for future delivery (or options thereon) subject to the United States Commodity Exchange Act, as amended, and trading in the Securities has not been approved by the United States

Commodity Futures Trading Commission under the United States Commodity Exchange Act, as amended. Terms used in this section have the meanings given to them by Regulation S under the Securities Act.

Each Dealer has represented and agreed that (i) it, its affiliates (if any) and any person acting on its or their behalf have not offered or sold and will not offer or sell any Securities at any time within the United States or to, or for the account or benefit of, U.S. persons and (ii) at or prior to confirmation of sale of Securities, it will have sent to each distributor, dealer or person receiving a selling concession, fee or other remuneration that purchases such Securities from it a confirmation or other notice stating that such distributor, dealer or person is subject to the restrictions on offers and sales of such Securities within the United States or to, or for the account or benefit of, U.S. persons that are set forth herein.

An offer or sale of Securities within the United States or to, or for the account or benefit of, a U.S. person by any dealer (whether or not participating in the offering) at any time may violate the registration requirements of the Securities Act if such offer or sale is made otherwise than in accordance with an available exemption from registration under the Securities Act.

#### *Prohibition of Sales to EEA Retail Investors*

Unless the Final Terms in respect of any Securities specify the "*Prohibition of Sales to EEA Retail Investors*" as "*Not Applicable*", each Dealer has represented and agreed, and each further Dealer appointed under the Programme will be required to represent and agree, that it has not offered, sold or otherwise made available and will not offer, sell or otherwise make available any Securities which are the subject of the offering contemplated by the Base Prospectus as completed by the Final Terms in relation thereto to any retail investor in the European Economic Area ("**EEA**"). For the purposes of this provision:

- (a) the expression "retail investor" means a person who is one (or more) of the following:
  - (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended, varied or replaced from time to time, "**MiFID II**") or
  - (ii) a customer within the meaning of Directive (EU) 2016/97 (the "**Insurance Distribution Directive**"), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or
  - (iii) not a qualified investor as defined in Regulation (EU) 2017/1129 (as amended, the "**Prospectus Regulation**"); and
- (b) the expression an "offer" includes the communication in any form and by any means of sufficient information on the terms of the offer and the Securities to be offered so as to enable an investor to decide to purchase or subscribe for the Securities.

If the relevant Final Terms in respect of any Securities specify "*Prohibition of Sales to EEA*" as "*Not Applicable*", in relation to each member state of the EEA (each, a "**Relevant State**"), each Dealer has represented and agreed, and each further Dealer appointed under the Programme will be required to represent and agree, that it has not made and will not make an offer of Securities which are the subject of the offering contemplated by the Base Prospectus as completed by the final terms in relation thereto to the public in that Relevant State except that it may make an offer of such Securities to the public in that Relevant State and/or for the specified periods:

- (a) if the Final Terms in relation to the Securities specify that an offer of those Securities may be made other than pursuant to Article 1(4) of the Prospectus Regulation in that Relevant State ("**Non-exempt Offer**"), following the date of publication of a prospectus in relation to such

Securities which has been approved by the competent authority in that Relevant State or, where appropriate, approved in another Relevant State and notified to the competent authority in that Relevant State, provided that any such prospectus has subsequently been completed by the Final Terms contemplating such Non-exempt Offer, in accordance with the Prospectus Regulation, in the period beginning and ending on the dates specified in such prospectus or Final Terms, as applicable and the Issuer has consented in writing to its use for the purpose of that Non-exempt Offer;

- (b) at any time to any legal entity which is a qualified investor as defined in the Prospectus Regulation;
- (c) at any time to fewer than 150 natural or legal persons (other than qualified investors as defined in the Prospectus Regulation), subject to obtaining the prior consent of the relevant Dealer or Dealers nominated by the Issuer for any such offer; or
- (d) at any time in any other circumstances falling within Article 1(4) of the Prospectus Regulation,

provided that no such offer of Securities referred to in paragraphs (b) to (d) above shall require the Issuer or any Dealer to publish a prospectus pursuant to Article 3 of the Prospectus Regulation or supplement a prospectus pursuant to Article 23 of the Prospectus Regulation.

For the purposes of this provision, the expression an "offer of Securities to the public" in relation to any Securities in any Relevant State means the communication in any form and by any means of sufficient information on the terms of the offer and the Securities to be offered so as to enable an investor to decide to purchase or subscribe for the Securities, and the expression "**Prospectus Regulation**" means Regulation (EU) 2017/1129 (as amended).

Each Dealer has represented and agreed, and each further Dealer appointed under this Programme will be required to represent and agree that, in relation to any offering of Securities to which MiFID II and Regulation (EU) No 600/2014 ("**MiFIR**") applies, that such offering is in accordance with the applicable rules set out in MiFID II (including any applicable national transposition of MiFID II) and MiFIR, including that any commission, fee or non-monetary benefit received from the Issuer complies with such rules.

### *United Kingdom*

#### *Prohibition of Sales to UK Retail Investors*

Unless the Final Terms in respect of any Securities specifies "*Prohibition of Sales to UK Retail Investors*" as "*Not Applicable*" (or where the applicable Final Terms in respect of any Securities specifies "Prohibition of Sales to UK Retail Investors" as applicable other than with respect to offers of the Securities in the United Kingdom for specified periods of time), each Dealer has represented and/or agreed (as applicable), and each further Dealer appointed under the Programme will be required to represent and/or agree (as applicable), that it has not offered, sold or otherwise made available and will not offer, sell or otherwise make available any Securities which are the subject of the offering contemplated by this Base Prospectus as completed by the applicable Final Terms to any retail investor in the United Kingdom at any time (or, as the case may be, in any period during which the applicable Final Terms in respect of any Securities specifies "*Prohibition of Sales to UK Retail Investors*" as applicable). For the purposes of this provision. For the purposes of this provision:

- (a) the expression "retail investor" means a person who is one (or more) of the following:

- (i) a retail client, as defined in point (8) of Article 2 of Regulation (EU) No 2017/565 as it forms part of domestic law by virtue of the *European Union (Withdrawal) Act 2018 of the United Kingdom* (as amended, the "**EUWA**");
  - (ii) a customer within the meaning of the provisions of the Financial Services and Markets Act 2000 of the United Kingdom (as amended, the "**FSMA**") and any rules or regulations made under the FSMA to implement Directive (EU) 2016/97, where that customer would not qualify as a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the EUWA; or
  - (iii) not a qualified investor as defined in the **UK Prospectus Regulation**); and
- (b) the expression "offer" includes the communication in any form and by any means of sufficient information on the terms of the offer and the Securities to be offered so as to enable an investor to decide to purchase or subscribe for the Securities.

Where the applicable Final Terms in respect of any Securities specify "*Prohibition of Sales to UK Retail Investors*" as "*Not Applicable*" (or as applicable other than with respect to offers of the Securities in the United Kingdom for specified periods of time), then each Dealer has represented and/or agreed (as applicable), and each further Dealer appointed under the Programme will be required to represent and/or agree (as applicable), that it has not made and will not make an offer of Securities which are the subject of the offering contemplated by this Base Prospectus as completed by the applicable Final Terms to the public in the United Kingdom except that it may make an offer of such Securities to the public in the United Kingdom:

- (a) if the applicable Final Terms in respect of the Securities specify that an offer of those Securities may be made other than pursuant to section 86 of the FSMA (a "**Non-exempt Offer**"), following the date of publication of a prospectus in relation to such Securities which has been approved by the FCA, PROVIDED THAT any such prospectus has subsequently been completed by Final Terms contemplating such Non-exempt Offer, in the period or periods beginning and ending on the dates specified in such prospectus or Final Terms, as applicable, and the Issuer has consented in writing to its use for the purpose of that Non-exempt Offer;
- (b) at any time to any legal entity which is a qualified investor as defined in the UK Prospectus Regulation;
- (c) at any time (or, as the case may be, in any relevant specified period) to fewer than 150 natural or legal persons (other than qualified investors as defined in Article 2 of the UK Prospectus Regulation) in the United Kingdom subject to obtaining the prior consent of the relevant Dealer or Dealers nominated by the Issuer for any such offer; or
- (d) at any time (or, as the case may be, in any relevant specified period) in any other circumstances falling within section 86 of the FSMA,

PROVIDED THAT no such offer of Securities referred to in paragraphs (b) to (d) above shall require the Issuer or any Dealer to publish a prospectus pursuant to section 85 of the FSMA or supplement a prospectus pursuant to Article 23 of the UK Prospectus Regulation.

For the purposes of this provision:

- the expression "offer of Securities to the public" in relation to any Securities means the communication in any form and by any means of sufficient information on the terms of the offer

and the Securities to be offered so as to enable an investor to decide to purchase or subscribe for the Securities; and

- the expression "**UK Prospectus Regulation**" means Regulation (EU) 2017/1129 as it forms part of domestic law by virtue of the EUWA.

#### *Other regulatory restrictions*

Each Dealer has represented and/or agreed (as applicable), and each further Dealer appointed under the Programme will be required to represent and/or agree (as applicable), that:

- (i) in relation to any Securities which have a maturity of less than one year,
  - (a) it is a person whose ordinary activities involve it in acquiring, holding, managing or disposing of investments (as principal or agent) for the purposes of its business; and
  - (b) it has not offered or sold and will not offer or sell any Securities other than to persons whose ordinary activities involve them in acquiring, holding, managing or disposing of investments (as principal or as agent) for the purposes of their businesses or who it is reasonable to expect will acquire, hold, manage or dispose of investments (as principal or agent) for the purposes of their businesses where the issue of the Securities would otherwise constitute a contravention of Section 19 of the FSMA by the Issuer;
- (ii) it has only communicated or caused to be communicated and will only communicate or cause to be communicated an invitation or inducement to engage in investment activity (within the meaning of Section 21 of the FSMA) received by it in connection with the issue or sale of any Securities in circumstances in which Section 21(1) of the FSMA does not apply to any of CGMHI, the CGMHI Guarantor and CGMFL or, in the case of the CGMFL Guarantor, would not, if the CGMFL Guarantor was not an authorised person, apply to the CGMFL Guarantor; and
- (iii) it has complied and will comply with all applicable provisions of the FSMA and the Financial Conduct Authority Handbook with respect to anything done by it in relation to any Securities in, from or otherwise involving the United Kingdom.

#### *Austria*

In addition to the cases described in the section entitled "*Prohibition of Sales to EEA Retail Investors*" above, the Securities may be offered for the first time in Austria only once a notification with the Austrian Control Bank (*Oesterreichische Kontrollbank Aktiengesellschaft*), all as prescribed by the Austrian Capital Market Act 2019 (*Kapitalmarktgesetz 2019*), as amended, has been filed as soon as possible prior to the commencement of the relevant offer of the Securities.

#### *Croatia*

In addition to the cases described in the section entitled "*Prohibition of Sales to EEA Retail Investors*" above, the Securities may be offered in Croatia in cases exempt according to the Prospectus Regulation only once a notification with the Croatian Financial Services Supervisory Agency (*Hrvatska agencija za nadzor financijskih usluga, HANFA*), all as prescribed by the Croatian Capital Market Act (Official Gazette Nos 65/18 - 151/22), has been filed.

#### *Switzerland*

Each Dealer has represented and/or agreed (as applicable) and each further Dealer appointed under the Programme and each other offeror will be required to represent and/or agree (as applicable) that:

- (a) it has only made and will only make an offer of Securities to the public in Switzerland, other than pursuant to an exemption under Article 36(1) of the Swiss Federal Financial Services Act ("**FinSA**") or where such offer does not qualify as a public offer in Switzerland, if the applicable Final Terms in respect of any Securities published according to Article 64 FinSA specify "*Swiss Non-exempt Offer*" as applicable, in the "*Swiss Offer Period*" specified in the applicable Final Terms, and if consent has been granted to use this Base Prospectus (as completed by the applicable Final Terms) for a public offer in Switzerland in accordance with Article 36(4) FinSA; or
- (b) it has not offered and will not offer, directly or indirectly, Securities to the public in Switzerland, and have not distributed or caused to be distributed and will not distribute or cause to be distributed to the public in Switzerland, this Base Prospectus, the applicable Final Terms or any other offering material relating to the Securities, which shall not constitute a prospectus pursuant to FinSA, other than pursuant to an exemption under Article 36(1) FinSA or where such offer or distribution does not qualify as a public offer in Switzerland.

For these purposes "public offer" refers to the respective definitions in Article 3(g) and (h) FinSA and as further detailed in the implementing Financial Services Ordinance.

If Securities qualifying as debt instruments with a "derivative character" (as such expression is understood under FinSA) are offered to private clients within the meaning of FinSA in Switzerland a key information document under Article 58 FinSA (*Basisinformationsblatt für Finanzinstrumente*) or Article 59(2) FinSA in respect of such Securities must be prepared and published. According to Article 58(2) FinSA, no key information document is required for Securities that may only be acquired for private clients under an asset management agreement. Other than where the applicable Final Terms specifies the "*Prohibition of Offer to Private Clients in Switzerland*" to be "*Applicable*" other than with respect to the period(s) of time specified therein, with respect to such period(s), the Securities may not be offered to private clients within the meaning of FinSA in Switzerland. For these purposes, a private client means a person who is *not* one (or more) of the following: (i) a professional client as defined in Article 4(3) FinSA (not having opted-in on the basis of Article 5(5) FinSA) or Article 5(1) FinSA; or (ii) an institutional client as defined in Article 4(4) FinSA; or (iii) a private client with an asset management agreement according to Article 58(2) FinSA. For these purposes "offer" refers to the interpretation of such term in Article 58 FinSA.

## General

These selling restrictions may be amended by the agreement of the Issuers, the CGMHI Guarantor, the CGMFL Guarantor and the relevant Dealers. Any such amendment will be set out in either the subscription agreement or the dealer accession letter, as relevant or in a supplement to this Base Prospectus.

No action has been taken or will be taken in any jurisdiction that would permit a public offering of any of the Securities, or possession or distribution of this Base Prospectus or any other offering material or any Final Terms, in any country or jurisdiction where, or under circumstances in which, action for that purpose is required and has not been taken. No offers, sales, resales or deliveries of any Securities, or distribution of any offering material relating to any Securities, may be made in or from any jurisdiction except in circumstances which will result in compliance with any applicable laws and regulations and which will not impose any obligation on the Issuers, the CGMHI Guarantor, the CGMFL Guarantor and/or any Dealer.

Each Dealer has agreed that it will comply with all relevant laws, regulations and directives in each jurisdiction in which it purchases, offers, sells or delivers Securities or has in its possession or distributes

this Base Prospectus, any other offering material or any Final Terms, in all cases at its own expense, and the Issuers, the CGMHI Guarantor and the CGMFL Guarantor shall not have responsibility therefor.

## SECTION F.4 – TAXATION

### TAXATION WARNING

The tax legislation of the state of residence of a prospective purchaser of Securities and the Issuers', the CGMHI Guarantor's and the CGMFL Guarantor's country of incorporation may have an impact on the income received from the Securities.

**Prospective purchasers of Securities are advised to consult their own tax advisers as to the tax consequences of the purchase, ownership and disposition of the Securities.**

### UNITED STATES FEDERAL INCOME TAX CONSIDERATIONS

The following is a summary of certain U.S. federal income tax consequences that may be relevant to the ownership and disposition by Non-U.S. Holders (as defined below) of Securities that are in registered form for U.S. federal income tax purposes. This summary does not purport to be a comprehensive description of all of the tax consequences that may be relevant to the decision to purchase Securities by any particular Non-U.S. Holder, including tax consequences that arise from rules of general application to all taxpayers or to certain classes of taxpayers or that are generally believed to be known by investors. For example, this summary does not address the tax consequences to Non-U.S. Holders who may be subject to special treatment under U.S. federal income tax law, such as (i) Non-U.S. Holders whose income or gain from a Security is effectively connected with the conduct of a United States trade or business, (ii) Non-U.S. Holders that are present in the United States for 183 days or more within a taxable year in which they own Securities or (iii) Non-U.S. Holders that are "controlled foreign corporations" or "passive foreign investment corporations" and investors therein.

This summary is based on the Internal Revenue Code of 1986, as amended (the "**Code**"), U.S. Treasury regulations and judicial and administrative interpretations thereof, in each case as in effect on the date hereof. Changes to any of the foregoing could affect the tax consequences described below, possibly with retroactive effect. Further, this summary does not describe any tax consequences arising out of the tax laws of any state, local or non-U.S. jurisdiction, or any U.S. federal taxes other than income taxes and, to a limited extent, estate taxes. Prospective purchasers of the Securities should consult their tax advisers regarding the U.S. federal, state, local and non-U.S. tax consequences of owning and disposing of Securities in light of their own particular circumstances.

This discussion does not address the U.S. federal tax consequences of the ownership or disposition of the Underlying that a Non-U.S. Holder may receive in respect of a Physical Delivery Security. Prospective purchasers should consult their tax advisers regarding the relevant U.S. federal tax consequences of the ownership and disposition of the Underlying.

The Issuer will not attempt to ascertain whether any issuer of any shares, shares that underlie an Index, or any other equity interest to which a Security relates should be treated as a "United States real property holding corporation" ("**USRPHC**") within the meaning of Section 897 of the Code (including a non-corporate entity treated as a USRPHC for relevant purposes of Section 897 of the Code). If any such relevant issuer were so treated, certain adverse U.S. federal income tax consequences might apply to a Non-U.S. Holder upon the sale, exchange or other disposition of such a Security. Prospective purchasers of the Securities are urged to refer to information filed with the Securities and Exchange Commission or another governmental authority by the relevant issuer and consult their tax advisers regarding the possible consequences if any such relevant issuer is or becomes a USRPHC.

For the purposes hereof, the term "**Non-U.S. Holder**" means a beneficial owner of a Security that for U.S. federal income tax purposes is a non-resident alien individual, a foreign corporation or a foreign estate or trust.

If a partnership (including any entity treated as a partnership for U.S. federal income tax purposes) holds a Security, the tax treatment of a partner in the partnership generally will depend on the status of the partner and upon the activities of the partnership. Prospective purchasers that are partnerships should consult their tax advisers regarding the tax consequences to their partners of an investment in the Securities.

The Securities are not intended for purchase by persons other than Non-U.S. Holders. The U.S. federal tax consequences to a United States person of the ownership and disposition of a Security may be unclear in certain circumstances and may be adverse.

This discussion may be supplemented, modified or superseded by further discussion regarding U.S. federal tax considerations set out in the applicable Final Terms, which a prospective purchaser is urged to read before making a decision to invest in the relevant Securities.

## **Securities Issued by the U.S. Issuer**

### ***Securities Treated as Debt***

This section describes certain generally applicable U.S. federal income tax consequences to Non-U.S. Holders in respect of Securities issued by CGMHI (the "**U.S. Issuer**") that the U.S. Issuer intends to treat as debt for U.S. federal income tax purposes as evidenced by the statement under "United States Tax Considerations" in the applicable Final Terms. It generally assumes that the U.S. Issuer's intended treatment is respected. Prospective purchasers of the Securities should consult their tax advisers about the risk that the IRS challenges the U.S. Issuer's treatment of the Securities. Certain exceptions to these general rules are discussed below under "*Other U.S. Federal Tax Considerations for Non-U.S. Holders*" and "*FATCA*", and therefore this discussion is subject to, and should be read in conjunction with, the discussions contained in those sections.

Interest payments on a Security issued by the U.S. Issuer should not be subject to U.S. federal withholding tax, provided that (1) the Non-U.S. Holder does not actually or constructively own 10 per cent. or more of the total combined voting power of all classes of stock of the U.S. Issuer entitled to vote, (2) the Non-U.S. Holder is not (i) a controlled foreign corporation for U.S. federal income tax purposes that is related to the U.S. Issuer through stock ownership or (ii) a bank extending credit pursuant to a loan agreement entered into in the ordinary course of its trade or business, (3) such interest is not contingent on the U.S. Issuer's profits, revenues or changes in the value of its property and is not otherwise excluded from the definition of "portfolio interest" by Section 871(h)(4) of the Code, and (4) the Non-U.S. Holder provides a statement signed under penalties of perjury that certifies that it is a non-United States person in compliance with applicable requirements (generally, an appropriate IRS Form W-8) or satisfies certain documentary evidence requirements for establishing that it is a non-United States person. Gain realised by a Non-U.S. Holder on the taxable disposition of a Security (which excludes amounts attributable to accrued interest) generally will not be subject to U.S. federal withholding or income tax.

If the U.S. Issuer designates a substitute for itself, or there is another change to the Securities that results in the Securities being treated as reissued for U.S. federal income tax purposes, as discussed in "*Securities Issued by the U.S. Issuer – Possible Taxable Event Under Section 1001 of the Code*", the treatment of the Securities after such an event could differ from their prior treatment. Except where specifically stated, the discussion herein assumes that no such deemed retirement and reissuance has occurred.

As discussed under "*Other U.S. Federal Tax Considerations for Non-U.S. Holders – Possible Alternative Tax Treatments of an Investment in the Securities*" below, there is no authority regarding the U.S. federal income tax treatment of Securities that are designated pursuant to the Final Terms as being treated by the Issuer as debt for U.S. federal tax purposes but that do not provide for the return of a holder's investment under all circumstances at maturity, including Credit Linked Securities. The U.S. Issuer's intended treatment of such Securities is not binding on the IRS, and the IRS could disagree with it. If such a Security were treated as an instrument other than debt, interest payments on the Security could be subject to withholding at a rate of 30 per cent., subject to reduction under an applicable income tax treaty. Insofar as it has responsibility as a withholding agent in respect of such Securities, the U.S. Issuer currently does not intend to withhold on payments on such Securities to Non-U.S. Holders (subject to the certification requirements and the exceptions described herein). However, it is possible that other withholding agents may withhold on interest payments on such Securities, and in the future the U.S. Issuer may determine that it is required to so withhold.

### ***Securities Not Treated as Debt***

This section describes certain generally applicable U.S. federal income tax consequences to Non-U.S. Holders in respect of Securities issued by the U.S. Issuer that the Issuer intends to treat as a financial instrument other than debt for U.S. federal income tax purposes, as evidenced by the statement under "United States Tax Considerations" in the applicable Final Terms. It generally assumes that the U.S. Issuer's intended treatment is respected. Certain exceptions to these general rules are discussed below under "*Other U.S. Federal Tax Considerations for Non-U.S. Holders*" and "*FATCA*", and therefore this discussion is subject to, and should be read in conjunction with, the discussions contained in those sections. Prospective purchasers should note that the U.S. Issuer will not be required to pay any additional amounts with respect to U.S. federal income taxes, if any, withheld, whether by the U.S. Issuer or by another withholding agent, with respect to Securities not treated as debt for U.S. federal income tax purposes.

If the U.S. Issuer designates a substitute for itself, or there is another change to the Securities that results in the Securities being treated as reissued for U.S. federal income tax purposes, as discussed in "*Securities Issued by the U.S. Issuer – Possible Taxable Event Under Section 1001 of the Code*", the treatment of the Securities after such an event could differ from their prior treatment. Except where specifically stated, the discussion herein assumes that no such deemed retirement and reissuance has occurred.

### ***Securities Treated as Prepaid Forward Contracts or Options***

Generally, subject to the discussion in the next paragraph, a Non-U.S. Holder should not be subject to U.S. federal withholding or income tax in respect of the taxable disposition of a Security, not providing for any payments prior to maturity or early redemption, that is treated for U.S. federal income tax purposes as a prepaid forward contract or an option.

In some cases, a Security may provide for amounts that are fixed or accrue prior to maturity but are paid at maturity. In that event, such amounts paid to a Non-U.S. Holder might be subject to withholding tax at a rate of 30 per cent. (which may be reduced under an applicable income tax treaty). Even if the U.S. Issuer or an applicable withholding agent generally treats such amounts as eligible for an exemption from withholding, in light of the uncertain treatment of such amounts the U.S. Issuer or an applicable withholding agent might require a Non-U.S. Holder to provide a statement signed under penalties of perjury that certifies that it is a non-United States person in compliance with applicable requirements (generally an appropriate IRS Form W-8) or to satisfy certain documentary evidence requirements for establishing that it is a non-United States person. Prospective purchasers should consult their tax advisers regarding the treatment of such payments.

#### *Securities Treated as Prepaid Forward Contracts or Options with Associated Periodic Payments*

With respect to Securities treated as prepaid forward contracts or options with associated periodic payments, to the extent the U.S. Issuer has withholding responsibility in respect of the Securities, it intends to treat the periodic payments as subject to withholding at a rate of 30 per cent., unless the Non-U.S. Holder provides a properly executed and appropriate IRS Form W-8 claiming eligibility for a reduction of or an exemption from withholding under an applicable income tax treaty. A Non-U.S. Holder generally should not be subject to U.S. federal withholding or income tax with respect to the taxable disposition of a Security (although any amount received in respect of a periodic payment may be treated as subject to withholding). Unless otherwise specified in the applicable Final Terms, this discussion also applies to a Security that provides for non-periodic payment(s) prior to maturity or early redemption.

#### *Securities Treated as Put Options and Deposits*

A Non-U.S. Holder generally should not be subject to U.S. federal withholding or income tax in respect of amounts paid on a Security treated as a Put Option and a Deposit, as long as the requirements in the second paragraph under "*Securities Issued by the U.S. Issuer – Securities Treated as Debt*" are met. While the U.S. Issuer currently does not intend to withhold on payments to Non-U.S. Holders on Securities treated as Put Options and Deposits (assuming these requirements are met), in light of the uncertain treatment of the Securities other persons having withholding responsibility in respect of the Securities may treat some or all of each periodic payment on a Security as subject to withholding tax at a rate of 30 per cent. (which may be reduced under an applicable income tax treaty). Moreover, it is possible that in the future the U.S. Issuer may determine that it should so withhold at a rate of 30 per cent., subject to reduction under an applicable income tax treaty, on periodic payments on the Securities. A Non-U.S. Holder generally should not be subject to U.S. federal withholding or income tax with respect to the taxable disposition of a Security (other than with respect to amounts attributable to an accrued periodic payment, which are discussed above).

#### *Possible Taxable Event Under Section 1001 of the Code*

If there is (i) any Adjustment Event, including but not limited to the replacement of the Underlying, (ii) a change in the methodology by which an index is calculated, (iii) a change in the components of an index, (iv) any other circumstance resulting in a material change to the Underlying or a rate referenced by a Security, (v) a redenomination, (vi) the Issuer designates a Substitute for itself, or (vii) any other circumstance resulting in a material change to the terms of a Security, it is possible that the Securities could be treated, in whole or part, as retired and reissued for U.S. federal income tax purposes. The treatment of the Securities after such an event, including withholding tax consequences, could differ from their prior treatment. Prospective purchasers should consult their tax advisers regarding the risk of such an event.

#### **Securities Issued by the Non-U.S. Issuer**

In the case of Securities issued by CGMFL (the "**Non-U.S. Issuer**"), subject to the discussions below under "*Other U.S. Federal Tax Considerations for Non-U.S. Holders*", the Non-U.S. Issuer currently intends to treat payments made with respect to such Securities as not subject to U.S. federal withholding tax.

#### **Other U.S. Federal Tax Considerations for Non-U.S. Holders**

Except where specified otherwise, the discussion in this section applies to any Security issued by either the Non-U.S. Issuer or the U.S. Issuer.

### ***Possible Alternative Tax Treatments of an Investment in the Securities***

Depending on the facts and circumstances regarding a particular offering of Securities, it is possible that the International Revenue Service (the "**IRS**") could treat the Securities in a manner different from their expected treatment.

If all or any portion of a Security issued by a U.S. Issuer that the Issuer treats as a debt instrument were recharacterised as a financial instrument other than debt, certain payments made to a Non-U.S. Holder could be treated as being subject to U.S. federal withholding or income tax, as discussed above under "*Securities Issued by the U.S. Issuer – Securities Not Treated as Debt*". In addition, even if the Issuer treats a Credit Linked Security as debt for U.S. federal tax purposes, the consequences of a Credit Event may not be clear, depending on the circumstances. If all or any portion of a Security issued by a U.S. Issuer that the Issuer treats as a financial instrument other than debt were recharacterised as a debt instrument, any payment made to a Non-U.S. Holder with respect to the Security generally would not be subject to U.S. federal withholding or income tax as long as the requirements in the second paragraph under "*Securities Issued by the U.S. Issuer – Securities Treated as Debt*" are met. Moreover, if the payment at maturity on a financial instrument other than debt were to become fixed or subject to a minimum level prior to maturity, a Non-U.S. Holder might be required to treat the Security as debt after that date. Alternatively, it is possible that a Non-U.S. Holder could be treated as owning the Underlying, in which case the tax consequences might be materially and adversely affected.

The U.S. Treasury Department and the IRS have issued a notice requesting comments on the U.S. federal income tax treatment of "prepaid forward contracts" and similar instruments. Among the issues addressed in the notice is the degree, if any, to which any income with respect to these instruments should be subject to U.S. federal withholding tax. While the notice requests comments on appropriate transition rules and effective dates, it is possible that any Treasury regulations or other guidance promulgated after consideration of these issues might adversely affect the withholding tax consequences of an investment in the Securities, possibly with retroactive effect. If withholding is required, the Issuer will not be required to pay any additional amounts with respect to amounts so withheld.

### ***Section 871(m) Withholding on Dividend Equivalents***

Section 871(m) of the Code and the Treasury regulations thereunder ("**Section 871(m)**") impose a 30 per cent. (or lower treaty rate) withholding tax on "dividend equivalents" paid or deemed paid to Non-U.S. Holders with respect to certain financial instruments linked to U.S. equities ("**Underlying Securities**"), as defined under the applicable Treasury regulations, or indices that include Underlying Securities. Section 871(m) generally applies to "specified equity-linked instruments" ("**Specified ELIs**"), which are financial instruments that substantially replicate the economic performance of one or more Underlying Securities, as determined based on tests set forth in the applicable Treasury regulations and discussed further below. Section 871(m) provides certain exceptions to this withholding regime, in particular for instruments linked to certain broad-based indices that meet requirements set forth in the applicable Treasury regulations ("**Qualified Indices**") as well as securities that track such indices ("**Qualified Index Securities**").

Although the Section 871(m) regime became effective in 2017, the applicable Treasury regulations, as modified by an IRS notice, phase in the application of Section 871(m) as follows:

- For financial instruments issued prior to 2027, Section 871(m) will generally apply only to financial instruments that have a "delta" of one.

- For financial instruments issued in 2027 and thereafter, Section 871(m) will apply if either (i) the "delta" of the relevant financial instrument is at least 0.80, if it is a "simple" contract, or (ii) the financial instrument meets a "substantial equivalence" test, if it is a "complex" contract.

Delta is generally defined as the ratio of the change in the fair market value of a financial instrument to a small change in the fair market value of the number of shares of the Underlying Security. The "substantial equivalence" test measures whether a complex contract tracks its "initial hedge" (shares of the Underlying Security that would fully hedge the contract) more closely than would a "benchmark" simple contract with a delta of 0.80.

The calculations are generally made at the calculation date, which is the earlier of (i) the time of pricing of the Security, i.e., when all material terms have been agreed on, and (ii) the issuance of the Security. However, if the time of pricing is more than 14 calendar days before the issuance of the Security, the calculation date is the date of the issuance of the Security. In those circumstances, information regarding the Issuer's final determinations for purposes of Section 871(m) may be available only after a Non-U.S. Holder agrees to acquire a Security. As a result, a Non-U.S. Holder should acquire such a Security only if it is willing to accept the risk that the Security is treated as a Specified ELI subject to withholding under Section 871(m).

In addition, Securities of a Series that are issued in different Tranches, or otherwise priced on different dates, may have different calculation dates for purposes of determining whether they are Specified ELIs. As a result, Securities acquired by a Non-U.S. Holder may be Specified ELIs, and therefore subject to withholding under Section 871(m), even if other Securities of the same Series are not Specified ELIs. In such a situation, a withholding agent may treat all of the Securities in that Series as being subject to Section 871(m) withholding if it is not able to distinguish among those Securities.

If the terms of a Security are subject to a "significant modification" (for example, upon an Issuer substitution, as discussed in *"Securities Issued by the U.S. Issuer – Possible Taxable Event Under Section 1001 of the Code"*), the Security generally will be treated as reissued for this purpose at the time of the significant modification, in which case the Security could become a Specified ELI at that time.

If a Security is a Specified ELI, withholding in respect of dividend equivalents will, depending on the applicable withholding agent's circumstances, generally be required either (i) on the underlying dividend payment date or (ii) when cash payments are made on the Security or upon the date of maturity, lapse or other disposition of the Security by the Non-U.S. Holder, or possibly upon certain other events. Depending on the circumstances, the applicable withholding agent may withhold the required amounts from coupons or other payments on the Security, from proceeds of the retirement or other disposition of the Security, or from other cash or property of the Non-U.S. Holder held by the withholding agent.

The dividend equivalent amount will include the amount of any actual or, under certain circumstances, estimated dividend. If the dividend equivalent amount is based on the actual dividend, it will be equal to the product of: (i) in the case of a "simple" contract, the per-share dividend amount, the number of shares of an Underlying Security and the delta; or (ii) in the case of a "complex" contract, the per-share dividend amount and the initial hedge. The dividend equivalent amount for Specified ELIs issued prior to 2027 that have a "delta" of one will be calculated in the same manner as (i) above, using a "delta" of one. The per-share dividend amount will be the actual dividend (including any special dividends) paid with respect to a share of the Underlying Security. If the dividend equivalent amount is based on an estimated dividend, the Final Terms will generally state the estimated amounts.

Depending on the terms of a Security and whether or not it is issued prior to 2027, the Final Terms may contain additional information relevant to Section 871(m), such as whether the Security references a

Qualified Index or Qualified Index Security; whether it is a "simple" contract; the "delta" and the number of shares multiplied by delta (for a simple contract); and whether the "substantial equivalence test" is met and the initial hedge (for a complex contract).

The Issuer's determination is binding on Non-U.S. Holders and withholding agents, but it is not binding on the IRS. The Section 871(m) regulations require complex calculations to be made with respect to Securities linked to Underlying Securities and their application to a specific issue of Securities may be uncertain. Accordingly, even if the Issuer determines that certain Securities are not Specified ELIs, the IRS could challenge the Issuer's determination and assert that withholding is required in respect of those Securities.

Moreover, the consequences under Section 871(m) may depend on the particular circumstances of the Non-U.S. Holder. For example, if a Non-U.S. Holder enters into other transactions relating to an Underlying Security, the Non-U.S. Holder could be subject to withholding tax or income tax liability under Section 871(m) even if the relevant Securities are not Specified ELIs subject to Section 871(m) as a general matter. Non-U.S. Holders should consult their tax advisers regarding the application of Section 871(m) in their particular circumstances.

#### *Specified Current Payment Securities*

The following discussion applies to certain Securities that are Specified ELIs and that provide solely for (i) a payment at maturity or earlier retirement or exercise that is determined by reference to the value of the Underlying(s) (or physical delivery of the Underlying(s)) and (ii) cash payments equal to dividends (if any) on each Underlying Security to which the Security relates multiplied by the number of shares of such Underlying Security to which the Security relates (such cash payments, "**U.S. dividend-linked payments**" and each such Security, a "**Specified Current Payment Security**"). It is expected that each U.S. dividend-linked payment will be made on the payment date for the related dividend.

The Issuer will treat each U.S. dividend-linked payment as the payment of a dividend equivalent. Accordingly, Non-U.S. Holders should expect withholding agents to withhold 30 per cent. (or a lower rate under the dividend provision of an applicable income tax treaty) of each U.S. dividend-linked payment. However, because the application of Section 871(m) to Specified Current Payment Securities is not entirely clear, it is possible that a withholding agent could treat such a Security as subject to additional withholding, for example from amounts due at maturity or exercise of the Security. In addition, a withholding agent may withhold at the 30 per cent. (or other applicable maximum) rate regardless of whether the Non-U.S. Holder is eligible for the benefits of an income tax treaty in respect of the payment.

#### *Specified Net Total Return Securities*

The following discussion applies to certain Securities that are Specified ELIs and that provide solely for a payment at maturity or earlier retirement or exercise that is determined by reference to the value of the Underlying(s) (or physical delivery of the Underlying(s)), where such final value, in the case of an Underlying that is an Underlying Security, reflects the deemed reinvestment of any dividends paid over the term of the Security in respect of the number of shares of such Underlying Security to which the Security relates, net of the maximum amount of U.S. withholding tax that would be applicable to each such dividend (currently, 30 per cent.) (such net amount, the "**Net Dividend Amount**"). The discussion herein refers to each such Security as a "**Specified Net Total Return Security**".

Upon the payment of a dividend with respect to an Underlying Security in respect of a Specified Net Total Return Security, the Issuer will deposit with the IRS an amount equal to the relevant gross dividend amount multiplied by the maximum applicable U.S. withholding tax rate on dividends (not reduced by the application of any U.S. income tax treaty). Because (i) the Net Dividend Amount plus (ii) the amount

to be deposited with the IRS will equal 100 per cent. of the gross dividend amount, the Issuer will treat the aggregate of (i) and (ii) as the payment of a dividend equivalent equal to 100 per cent. of such gross dividend amount for purposes of Section 871(m).

Prospective purchasers of the Securities should consult their tax advisers regarding the potential application of Section 871(m) to the Securities and, if withholding applies, whether they are eligible for a refund of any part of the withholding tax discussed above on the basis of an applicable U.S. income tax treaty, as well as the process for obtaining such a refund (which will generally require the filing of a U.S. federal income tax return). In some circumstances, including when the Issuer or another intermediary performs the withholding required under Section 871(m), it may not be possible for a Non-U.S. Holder to obtain the documentation necessary to support a refund claim under an applicable treaty.

**The Issuers, the CGMHI Guarantor and the CGMFL Guarantor will not be required to pay any additional amounts in respect of amounts withheld under Section 871(m).**

Prospective purchasers of the Securities should be aware that if a Section 871(m) Event (as defined under "Section B – Risk Factors – Risks relating to Securities generally – Section 871(m) Event") occurs, an Early Redemption Event will occur, in which case the relevant Securities may be redeemed as more fully set out in the terms and conditions of such Securities.

### ***FIRPTA***

Section 897 of the Code, commonly referred to as "FIRPTA", applies to certain interests in entities that beneficially own significant amounts of United States real property interests (each, a "USRPI"). As discussed above, the Issuer will not attempt to ascertain whether any issuer of the Underlying, shares that underlie an Index, or any other equity interest to which the Securities relate should be treated as a USRPHC for purposes of Section 897 of the Code (including a non-corporate entity treated for relevant purposes of Section 897 of the Code as a USRPHC). If a relevant issuer were so treated, it is possible that, subject to the exceptions discussed in the following paragraph, a Security could be treated as a USRPI, in which case any gain from the disposition of the Security would generally be subject to U.S. federal income tax and would be required to be reported by the Non-U.S. Holder on a U.S. federal income tax return, generally in the same manner as if the Non-U.S. Holder were a United States person, and would in certain cases be subject to withholding in the amount of 15 per cent. of the gross proceeds of such disposition.

An exception to the FIRPTA rules applies in respect of interests in entities that have a regularly traded class of interests outstanding. Under this exception, a Security that is not "regularly traded" on an established securities market generally should not be subject to the FIRPTA rules unless its fair market value upon acquisition exceeds 5 per cent. of the relevant issuer's regularly traded class of interests as specified in the applicable Treasury regulations. In the case of Securities that are "regularly traded," a holding of 5 per cent. or less of the outstanding Securities of that class or series generally should not be subject to the FIRPTA rules. Certain attribution and aggregation rules apply, and prospective purchasers are urged to consult their tax advisers regarding whether their ownership interest in the Securities will be subject to an exemption from the FIRPTA rules in light of their circumstances, including any other interest they might have in a relevant issuer.

### ***U.S. Federal Estate Tax***

An individual Non-U.S. Holder or an entity the property of which is potentially includible in such an individual's gross estate for U.S. federal estate tax purposes (for example, a trust funded by such an individual and with respect to which the individual has retained certain interests or powers) should note that, absent an applicable treaty exemption, a Security issued by the U.S. Issuer that is not treated as debt

for U.S. federal estate tax purposes may be treated as U.S.-situs property subject to U.S. federal estate tax. A Security issued by the U.S. Issuer that is treated as debt for U.S. federal estate tax purposes generally will not be treated as U.S.-situs property subject to U.S. federal estate tax if payments on the Security, if received by the decedent at the time of death, would not have been subject to U.S. federal withholding or income tax because of the exemption from withholding of "portfolio interest". A holder that is such an individual or entity should consult its tax adviser regarding the U.S. federal estate tax consequences of investing in the Securities.

### ***Reportable Transactions***

A taxpayer that participates in a "reportable transaction" is subject to information reporting requirements under Section 6011 of the Code. "Reportable transactions" include, among other things, certain transactions identified by the IRS as well as certain losses recognized in an amount that exceeds a specified threshold level. In 2015, the U.S. Treasury Department and the IRS released notices designating certain "basket options," "basket contracts" and substantially similar transactions as reportable transactions. The notices apply to specified transactions in which a taxpayer or its "designee" has, and exercises, discretion to change the assets or an algorithm underlying the transaction. In addition, in July 2024 the U.S. Treasury Department and the IRS released proposed regulations that, if adopted in their current form, would deem any such transactions to be "listed transactions". If the Issuer, an Index sponsor or calculation agent or other person were to exercise discretion under the terms of a Security or an Index underlying a Security and were treated as a Securityholder's "designee" for these purposes, unless an exception applied certain holders of the relevant Securities would be required to report certain information to the IRS, as set forth in the applicable Treasury regulations, or be subject to penalties. The Issuer might also be required to report information regarding the transaction to the IRS. Prospective purchasers should consult their tax advisers regarding these rules.

### **Information Reporting and Backup Withholding**

Payments on the Securities, as well as the proceeds of a sale, exchange or other disposition (including retirement) of the Securities, may be subject to information reporting and, if a beneficial owner fails to provide certain identifying information or meet certain other conditions, may also be subject to backup withholding at the rate specified in the Code. A Non-U.S. Holder that provides the applicable withholding agent with the appropriate IRS Form W-8 will generally establish an exemption from backup withholding. Amounts withheld under the backup withholding rules are not additional taxes and may be refunded or credited against a holder's U.S. federal income tax liability, provided the relevant information is timely furnished to the IRS.

### ***FATCA***

Legislation commonly referred to as "**FATCA**" generally imposes a withholding tax of 30 per cent. on payments to certain non-U.S. entities (including financial intermediaries) with respect to certain financial instruments, unless various U.S. information reporting and due diligence requirements (that are in addition to, and potentially significantly more onerous than, the requirement to deliver an IRS Form W-8) have been satisfied. An intergovernmental agreement between the United States and the non-U.S. entity's jurisdiction may modify these requirements. This legislation generally applies to payments of U.S.-source "fixed or determinable annual or periodical" ("**FDAP**") income, which includes, among other things, interest and certain dividend equivalents (as defined above) under Section 871(m). While the tax treatment of Securities that the U.S. Issuer treats as prepaid forward contracts with associated coupons is uncertain, non-U.S. Holders should expect that persons having withholding responsibility in respect of those Securities will treat the coupons on those Securities as FDAP income for this purpose. While existing Treasury regulations would also require withholding on payments of gross proceeds from the disposition (including upon retirement) of financial instruments that provide for U.S.-source interest

or certain dividend equivalents, the U.S. Treasury Department has indicated in subsequent proposed regulations its intent to eliminate this requirement. The U.S. Treasury Department has stated that taxpayers may rely on these proposed regulations pending their finalisation. If withholding applies to the Securities, the Issuer will not be required to pay any additional amounts with respect to amounts withheld. A Non-U.S. Holder, or a U.S. person holding Securities through a Non-U.S. intermediary, should consult their tax advisers regarding the potential application of FATCA to the Securities, including the availability of certain refunds or credits.

THE TAX CONSEQUENCES OF OWNING AND DISPOSING OF THE SECURITIES ARE UNCLEAR. SECURITYHOLDERS SHOULD CONSULT THEIR TAX ADVISERS REGARDING THE TAX CONSEQUENCES OF OWNING AND DISPOSING OF THE SECURITIES, INCLUDING THE TAX CONSEQUENCES UNDER STATE, LOCAL, NON-U.S. AND OTHER TAX LAWS AND THE POSSIBLE EFFECTS OF CHANGES IN U.S. FEDERAL OR OTHER TAX LAWS.

## **UNITED KINGDOM TAX CONSIDERATIONS**

*The following is a summary of the Issuers' understanding of current United Kingdom law and published HM Revenue & Customs ("HMRC") practice relating only to the United Kingdom withholding tax treatment of payments of interest (as that term is understood for United Kingdom tax purposes) in respect of Securities. It does not deal with any other United Kingdom taxation implications of acquiring, holding or disposing of Securities. The United Kingdom tax treatment of prospective Securityholders depends on their individual circumstances and may be subject to change in the future. Prospective Securityholders who may be subject to tax in a jurisdiction other than the United Kingdom or who may be unsure as to their tax position should seek their own professional advice.*

### **Interest on Securities**

Payments of interest on the Securities that do not have a United Kingdom source may be made without deduction or withholding on account of United Kingdom income tax. If interest paid on the Securities does have a United Kingdom source, then payments may be made without deduction or withholding on account of United Kingdom income tax where one of the exemptions below applies:

- (a) where the Securities carry a right to interest and are and continue to be "listed on a recognised stock exchange", within the meaning of section 1005 of the Income Tax Act 2007 then interest can be paid without deduction or withholding on account of United Kingdom income tax.

The London Stock Exchange is a recognised stock exchange. Securities will be treated as listed on the London Stock Exchange if they are included in the Official List (within the meaning of and in accordance with the provisions of Part 6 of the Financial Services and Markets Act 2000) and admitted to trading on the London Stock Exchange. The Frankfurt Stock Exchange, Euronext Dublin, Euronext Paris, the Italian Stock Exchange, the Luxembourg Stock Exchange and the Stockholm Stock Exchange have been recognised as "recognised stock exchanges". The Securities will satisfy this listing requirement if they are officially listed in Germany, Ireland, France, Italy, Luxembourg or Sweden in accordance with provisions corresponding to those generally applicable in EEA states and are admitted to trading on the Frankfurt Stock Exchange, Euronext Dublin, Euronext Paris, the Italian Stock Exchange, the Luxembourg Stock Exchange or the Stockholm Stock Exchange (as applicable). HMRC published guidance is that Securities listed and admitted to trading on the following markets satisfy these requirements: the regulated markets of the Frankfurt Stock Exchange (but not the Open Market (*Freiverkehr*), the main market and Global Exchange Market of Euronext Dublin (but not the Enterprise Securities Market), the electronic bond market and the electronic securitised derivatives market of the Italian Stock

Exchange, the regulated market and the Euro MTF market of the Luxembourg Stock Exchange and the main market (but not the First North market) of the Stockholm Stock Exchange forming part of NASDAQ OMX Nordic Exchange. Provided, therefore, that the Securities carry a right to interest and are and remain so "listed on a recognised stock exchange", interest on the Securities will be payable without deduction of or withholding on account of United Kingdom tax;

- (b) where the Securities are admitted to trading on a "multilateral trading facility" operated by a "regulated recognised stock exchange" (both as defined by section 987 Income Tax Act 2007) interest can be paid without deduction or withholding on account of United Kingdom income. Some of the markets that do not satisfy the requirement at (a) above, may instead satisfy this requirement (b) In particular, Securities admitted to trading on the ISM operated by the London Stock Exchange should satisfy this exemption; or
- (c) where the maturity of the Securities is less than 365 days (and the Securities do not form part of a scheme or arrangement of borrowing intended to be capable of remaining outstanding for more than 364 days) interest can be paid without deduction or withholding on account of United Kingdom income.

In other cases where interest on the Securities is regarded as having a United Kingdom source, an amount must generally be withheld from payments of interest on the Securities on account of United Kingdom income tax at the basic rate (currently 20 per cent.), subject to any other available exemptions or reliefs. However, where an applicable double tax treaty provides for a lower rate of withholding tax (or for no tax to be withheld) in relation to a Securityholder, HMRC can issue a notice to the Issuer to pay interest to the Securityholder without deduction of tax (or for interest to be paid with tax deducted at the rate provided for in the relevant double tax treaty).

An amount may also be required to be withheld from payments on the Securities that have a United Kingdom source and do not constitute interest, but are nevertheless treated for United Kingdom tax purposes as either: (i) annual payments; or (ii) manufactured payments. Any such withholding on account of United Kingdom income tax would be at the basic rate. However, where an applicable double tax treaty provides for a lower rate of withholding tax (or for no tax to be withheld) in relation to a Securityholder, HMRC can issue a notice to the Issuer to pay annual payments to the Securityholder without deduction of tax (or for annual payments to be paid with tax deducted at the rate provided for in the relevant double tax treaty).

References to "interest" are to interest as interpreted for UK tax purposes and may therefore in certain cases include payments of premium.

### **Payments under the Guarantee**

The United Kingdom withholding tax treatment of payments by the CGMFL Guarantor under the terms of the CGMFL Deeds of Guarantee is uncertain. Accordingly, if the CGMFL Guarantor makes any such payments, these may be subject to United Kingdom withholding tax at the basic rate (currently 20 per cent.). In particular, such payments by the CGMFL Guarantor may not be eligible for the exemptions in relation to payments of interest by the CGMFL Issuer as described above. Accordingly, if the CGMFL Guarantor makes any such payments, these may be subject to UK withholding tax at the basic rate (currently 20 per cent.).

### *Withholding Tax*

#### *(i) Non-resident holders of Securities*

Under Luxembourg general tax laws currently in force, there is no withholding tax on payments of principal, premium or interest made to non-resident holders of Securities, nor on accrued but unpaid interest in respect of the Securities, nor is any Luxembourg withholding tax payable upon redemption or repurchase of the Securities held by non-resident holders of Securities.

#### *(ii) Resident holders of Securities*

Under Luxembourg general tax laws currently in force and subject to the law of 23 December 2005, as amended (the "**Relibi Law**"), there is no withholding tax on payments of principal, premium or interest made to Luxembourg resident holders of Securities, nor on accrued but unpaid interest in respect of Securities, nor is any Luxembourg withholding tax payable upon redemption or repurchase of **Securities** held by Luxembourg resident holders of Securities.

Under the Relibi Law, payments of interest or similar income made or ascribed by a paying agent established in Luxembourg to an individual beneficial owner who is a resident of Luxembourg will be subject to a withholding tax of 20 per cent. Such withholding tax will be in full discharge of income tax if the beneficial owner is an individual acting in the course of the management of his/her private wealth. Responsibility for the withholding of the tax will be assumed by the Luxembourg paying agent, if any.

Accordingly, payments of interest under Securities coming within the scope of the Relibi Law will be subject to withholding tax at a rate of 20 per cent.

## **GERMANY TAX CONSIDERATIONS**

*The following is a general discussion of certain German tax consequences of the acquisition, ownership and the sale, assignment or redemption of Securities and the receipt of interest thereon. It does not purport to be a comprehensive description of all tax considerations, which may be relevant to a decision to purchase Securities, and, in particular, does not consider any specific facts or circumstances that may apply to a particular purchaser. This summary is based on the laws of Germany currently in force and as applied on the date of this Base Prospectus, which are subject to change, possibly with retroactive or retrospective effect.*

As each Series or Tranche of Securities may be subject to a different tax treatment due to the specific terms of such Series or Tranche, the following section only provides some very generic information on the possible tax treatment and has to be read in conjunction with the more specific information on the taxation of each Series or Tranche of Securities as provided in the applicable Final Terms. Furthermore, the taxation of the different types of Securities may differ from each other. The following summary only describes the tax treatment of Securities in general and certain particularities with respect to individual

types of Securities. Where the term "certificates" is used in the following summary it refers – according to a German understanding of the term – to certain types of Securities linked to an underlying.

Prospective purchasers of Securities are advised to consult their own tax advisors as to the tax consequences of the acquisition, the ownership and the sale, assignment or redemption of Securities and the receipt of interest thereon, including the effect of any state or local taxes, under the tax laws of Germany and each country of which they are residents or citizens or may otherwise be liable to tax. Only these advisers will be able to take into account appropriately the details relevant to the taxation of the respective holders of the relevant Securities.

## **Tax Residents**

### *Private Investors*

#### *Interest/Capital gains*

Interest payable on Securities to persons holding such Securities as private assets ("**Private Investors**") who are tax residents of Germany (i.e., persons whose residence or habitual abode is located in Germany) qualifies as investment income (*Einkünfte aus Kapitalvermögen*) according to Sec. 20 para. 1 German Income Tax Act (*Einkommensteuergesetz*) and is, in general, taxed at a separate flat tax rate of 25 per cent. according to Sec. 32d para. 1 German Income Tax Act (*Abgeltungsteuer*, in the following also referred to as "**flat tax**"), plus 5.5 per cent. solidarity surcharge thereon and, if applicable, church tax. The German flat tax regime is currently under review of the German Federal Constitutional Court (*BVerfG*) after the Lower Saxony Finance Court in Hanover held that the withholding tax on capital gains violated the principle of equal treatment and was therefore unconstitutional (Submission order dated 18 March 2022 (docket no. 7 K 120/21)).

Capital gains from the sale, assignment or redemption of Securities, including the original issue discount and interest having accrued up to the disposition of a Security and credited separately ("**Accrued Interest**", (*Stückzinsen*)), if any, qualify – irrespective of any holding period – as investment income pursuant to Sec. 20 para. 2 German Income Tax Act and are also generally taxed at the flat tax rate of 25 per cent., plus 5.5 per cent. solidarity surcharge thereon and, if applicable, church tax. If the Securities are assigned, redeemed, repaid or contributed into a corporation by way of a hidden contribution (*verdeckte Einlage in eine Kapitalgesellschaft*) rather than sold, as a rule, such transaction is treated like a sale.

Capital gains are determined by taking the difference between the sale, assignment or redemption price (after the deduction of expenses directly and factually related to the sale, assignment or redemption) and the acquisition price of the relevant Securities. Where the relevant Securities are issued in a currency other than Euro the sale, assignment or redemption price and the acquisition costs have to be converted into Euro on the basis of the foreign exchange rates prevailing on the acquisition date and the sale, assignment or redemption date respectively. If the Issuer(s) exercise(s) the right to substitute the Issuer(s) of the Securities, the substitution might, for German tax purposes, be treated as an exchange of the Securities for new notes issued by the new Issuer(s). Such a substitution could result in the recognition of a taxable gain or loss for the respective investors.

Expenses (other than such expenses directly and factually related to the sale, assignment or redemption) related to interest payments or capital gains under the Securities are – except for a standard lump sum (*Sparer-Pauschbetrag*) of Euro 1,000 (Euro 2,000 for jointly assessed holders) – in principle not deductible.

According to the flat tax regime losses from the sale, assignment or redemption of **Securities** can only be set-off against other investment income including capital gains. If the set-off is not possible in the assessment period in which the losses have been realised, such losses can be carried forward into future assessment periods only and can be set-off against investment income including capital gains generated in these future assessment periods. The offsetting of losses incurred by a Private Investor is subject to several restrictions. Losses incurred with respect to the Securities can only be offset against investment income of the Private Investor realised in the same or the following years. According to new legislation losses from capital claims of private investors can now be offset against income derived from capital investments up to an amount of EUR 20,000.00 p.a. Further, loss from Securities which qualify as derivative transactions (*Termingeschäfte*) may only be applied against profits from other derivative transactions, and only up to an amount of EUR 20,000.00 in a given year. Losses exceeding any of these thresholds can be carried forward. The Federal Fiscal Court (*Bundesfinanzhof*) considers loss offsetting restrictions for losses on the sale of shares to be unconstitutional and has submitted the question by decision of 17 November 2020 (docket no. VIII R 11/18) to the German Federal Constitutional Court (*BVerfG*) for a decision on constitutionality.

Particularities apply with respect to so-called full risk certificates with several payment dates. According to the decree of the German Federal Ministry of Finance (*Bundesfinanzministerium*) dated 19. May 2022 (IV C 1 - S 2252/19/10003 :009) (as last amended by decree dated 20 December 2022 (IV C 1 - S 2252/19/10003 :011)), all payments to the investor under such full risk certificates that are made prior to the final maturity date shall qualify as taxable income from an "other capital receivable" (*sonstige Kapitalforderung*) pursuant to Sec. 20 para 1 no. 7 German Income Tax Act, unless the offering terms and conditions stipulate that such payments shall be redemption payments and the parties act accordingly. If there is no final redemption payment, the final maturity date shall not constitute a sale-like event in the meaning of Sec. 20 para. 2 German Income Tax Act. Therefore, capital losses, if any, shall not be deductible; however, based on case law a non-payment on a security due to certain thresholds being breached or an early termination of a security for this reason without any further payment shall be treated like a disposal resulting in the acquisition costs of such security being treated as a tax-deductible loss. Although this decree only refers to certain types of certificates, the German tax authorities apply the above described principles to other kinds of certificates as well. However, according to the decrees dated 23 January 2017 (IV C 1 – S 2252/08/10004:018) and 12 April 2018 (IV CI-5 2252/08/10004:021) the German Federal Ministry of Finance now accepts losses in connection with the expiration of option rights (including options with knock out character) and respective warrants as well as certain derivative transactions which may also affect other financial instruments.

Further, the German Federal Ministry of Finance in its decree dated 19 May 2022 (IV C 1 - S 2252/19/10003 :009, marginal number 61)) (as amended) has taken the position that a bad debt loss (*Forderungsausfall*) and a waiver of a receivable (*Forderungsverzicht*) shall, in general, be treated as a sale, so that losses suffered upon such bad debt loss or waiver shall be deductible for tax purposes. It is not clear, whether the position of the German tax authorities may affect securities which are linked to a reference value in case such value decreases.

### *Withholding*

If Securities are held in custody with or administered by a German credit institution, financial services institution (including a German permanent establishment of such foreign institution), securities trading company or securities trading bank ("**Disbursing Agent**"), the flat tax at a rate of 25 per cent. (plus 5.5 per cent. solidarity surcharge thereon and, if applicable, church tax) will be withheld by the Disbursing Agent on interest payments and the excess of the proceeds from the sale, assignment or redemption (after the deduction of expenses directly and factually related to the sale, assignment or redemption) over the

acquisition costs for the relevant Securities (if applicable converted into Euro terms on the basis of the foreign exchange rates as of the acquisition date and the sale, assignment or redemption date respectively). Church tax is collected by way of withholding as a standard procedure unless the Private Investor has filed a blocking notice (*Sperrvermerk*) with the German Federal Central Tax Office (*Bundeszentralamt für Steuern*).

The Disbursing Agent will provide for the set-off of losses against investment income including capital gains from other securities. If, in the absence of sufficient investment income derived through the same Disbursing Agent, a set-off is not possible, the holder of Securities may – instead of having a loss carried forward into the following year – file an application with the Disbursing Agent until 15 December of the current fiscal year for a certification of losses (*Verlustbescheinigung*) in order to set-off such losses against investment income derived through other institutions in the holder's personal income tax return.

If custody has changed since the acquisition and the acquisition data is not proved as required by Sec. 43a para. 2 German Income Tax Act or not permitted to be proved, the flat tax rate of 25 per cent. (plus 5.5 per cent. solidarity surcharge thereon and, if applicable, church tax) will be imposed on an amount equal to 30 per cent. of the proceeds from the sale, assignment or redemption of the relevant **Securities**.

In the course of the tax withholding provided for by the Disbursing Agent foreign taxes may be credited in accordance with the German Income Tax Act.

If Securities are not kept in a custodial account with a Disbursing Agent, the flat tax will – by way of withholding – apply on interest paid by a Disbursing Agent upon presentation of a coupon (whether or not presented with the relevant Security to which it appertains) to a holder of such coupon (other than a non-German bank or financial services institution) (*Tafelgeschäft*), if any. In this case proceeds from the sale, assignment or redemption of the relevant Securities will also be subject to the withholding of the flat tax.

In general, no flat tax will be levied if the holder of a Security filed a withholding exemption certificate (*Freistellungsauftrag*) with the Disbursing Agent (in the maximum amount of the standard lump sum of current Euro 1,000 (Euro 2,000 for jointly assessed holders) to the extent the income does not exceed the maximum exemption amount shown on the withholding exemption certificate. Similarly, no flat tax will be deducted if the holder of a Security has submitted to the Disbursing Agent a valid certificate of non-assessment (*Nichtveranlagungsbescheinigung*) issued by the competent tax office.

For Private Investors, the withheld flat tax is, in general, definitive. Exceptions apply e.g., if and to the extent the actual investment income exceeds the amount which was determined as the basis for the withholding of the flat tax by the Disbursing Agent. In such case, the exceeding amount of investment income must be included in the Private Investor's income tax return and will be subject to the flat tax in the course of the assessment procedure. According to the decree of the German Federal Ministry of Finance dated 19 May 2022 (IV C 1 - S 2252/19/10003 :009) (as last amended by decree dated 20 December 2022 (IV C 1 - S 2252/19/10003 :011) marginal numbers 143,183), however, any exceeding amount of not more than Euro 500 per assessment period will not be claimed on grounds of equity, PROVIDED THAT no other reasons for an assessment according to Sec. 32d para. 3 German Income Tax Act exist. Further, Private Investors may request that their total investment income, together with their other income, is subject to taxation at their personal, progressive income tax rate rather than the flat tax rate, if this results in a lower tax liability (*Günstigerprüfung*). According to Sec. 32d para. 2 no. 1 German Income Tax Act the flat tax rate is also not available in situations where an abuse of the flat tax rate is assumed (e.g., "back-to-back" financing). In order to prove such investment income and the withheld flat tax thereon, the investor may request from the Disbursing Agent a respective certificate in officially required form.

Investment income not subject to the withholding flat tax (e.g., if there is no Disbursing Agent) must be included in the personal income tax return and will be subject to the flat tax rate of 25 per cent. (plus 5.5 per cent. solidarity surcharge thereon and, if applicable, church tax), unless the investor requests the investment income to be subject to taxation at lower personal, progressive income tax rate or the investment income is not subject to the flat tax rate according to Sec. 32d para. 2 no. 1 German Income Tax Act. Foreign taxes on investment income may be credited in accordance with the German Income Tax Act.

#### *Business Investors*

Interest payable on Securities to persons holding the relevant Securities as business assets ("**Business Investors**") who are tax residents of Germany (i.e., Business Investors whose residence, habitual abode, statutory seat or place of effective management and control is located in Germany) and capital gains from the sale, assignment or redemption of Securities, including the original issue discount and Accrued Interest, if any, are subject to income tax at the Business Investor's personal, progressive income tax rate (plus currently 5.5 per cent. solidarity surcharge thereon and, if applicable, church tax), or, in case of corporate entities, to corporate income tax at a uniform 15 per cent. tax rate (plus 5.5 per cent. solidarity surcharge thereon). Such interest payments and capital gains may also be subject to trade tax if the relevant Securities form part of the property of a German trade or business. Losses from the sale, assignment or redemption of Securities are, in general, recognised for tax purposes; this may be different if certain (in particular index linked) Securities qualify as derivative transactions.

Withholding tax, if any, including solidarity surcharge thereon, is credited as a prepayment against the Business Investor's personal, progressive or corporate income tax liability and the solidarity surcharge in the course of the tax assessment procedure, i.e., the withholding tax is not definitive. Any potential surplus will be refunded. However, in general and subject to further requirements, no withholding deduction will apply on capital gains from the sale, assignment or redemption of Securities if (i) such Securities are held by a corporation, association or estate in terms of Sec. 43 para. 2 sentence 3 no. 1 German Income Tax Act or (ii) the proceeds from such Securities qualify as income of a domestic business and the investor notifies this to the Disbursing Agent by use of the required official form according to Sec. 43 para. 2 sentence 3 no. 2 German Income Tax Act (*Erklärung zur Freistellung vom Kapitalertragsteuerabzug*).

Where notes qualify as zero bonds and form part of a trade or business, each year the part of the difference between the issue or purchase price and the redemption amount attributable to such year must be taken into account as income.

Foreign taxes may be credited in accordance with the German Income Tax Act. Alternatively, foreign taxes may also be deducted from the tax base for German income tax purposes.

#### *Non-residents*

Interest payable on Securities and capital gains, including Accrued Interest, if any, are not subject to German taxation, unless (i) the relevant Securities form part of the business property of a permanent establishment, including a permanent representative, or a fixed base maintained in Germany by the holder of the relevant Securities; (ii) the investment income otherwise constitutes German-source income; or (iii) the relevant Securities are not kept in a custodial account with a Disbursing Agent and interest or proceeds from the sale, assignment or redemption of the relevant Securities are paid by a Disbursing Agent upon presentation of a coupon to a holder of such coupon (other than a non-German bank or financial services institution) (*Tafelgeschäft*), if any. In the cases (i), (ii) and (iii) a tax regime similar to that explained above under "*Tax Residents*" applies.

Insofar as the prerequisites for a limited tax liability are not met in the case of non resident who has capital income, no withholding tax is to be withheld by the Disbursing Agent for this income, even if the relevant Securities are held in custody with a Disbursing Agent (cf. margin number 313 of the decree dated 19 May 2022 (IV C 1 - S 2252/19/10003 :009) (as last amended by decree dated 20 December 2022 (IV C 1 - S 2252/19/10003 :011)). However, where the investment income is subject to German taxation as set forth in the preceding paragraph and the relevant Securities are held in a custodial account with a Disbursing Agent or in case of a *Tafelgeschäft*, withholding tax is levied as explained above under "*Tax Residents*". The withholding tax may be refunded based upon German national tax law or an applicable tax treaty.

### ***Inheritance and Gift Tax***

No inheritance or gift taxes with respect to any Security will arise under the laws of Germany if, in the case of inheritance tax, neither the decedent nor the beneficiary or, in the case of gift tax, neither the donor nor the donee, is a resident of Germany and such Security is not attributable to a trade or business for which a permanent establishment is maintained, or a permanent representative has been appointed, in Germany. Exceptions from this rule apply to certain German expatriates.

### ***Other Taxes***

No stamp, issue, registration or similar taxes or duties will be payable in Germany in connection with the issuance, delivery, execution or conversion of Securities. Currently, net assets tax (*Vermögensteuer*) is not levied in Germany. Germany and other EU Member States intend to introduce a financial transaction tax (see below). However, it is unclear if and in what form such tax will be actually introduced. In case such tax is introduced, the acquisition and disposal of **Securities** (in the secondary market) could be subject to a tax of at least 0.1 per cent. Of the acquisition or disposal price.

### ***EU Residents***

The EU Council Directive 2003/48/EC on the taxation of savings income has been repealed as of 1 January 2016 (1 January 2017 in the case of Austria) (in each case subject to transitional arrangements). However, the Council of the European Union has also adopted Directive 2014/107/EU (the "**Amending Cooperation Directive**"), amending Directive 2011/16/EU on administrative cooperation in the field of taxation so as to introduce an extended automatic exchange of information regime in accordance with the Global Standard released by the OECD Council as of 1 January 2016 (1 January 2017 in the case of Austria). Germany has implemented the Amending Cooperation Directive by means of a Financial Account Information Act (*Finanzkonten-Informationsaustauschgesetz*, FKAustG) according to which it will provide information on financial accounts to EU Member States and certain other states as of 1 January 2016.

### ***Solidarity surcharge***

Please note that the solidarity surcharge is partially abolished as of the assessment period 2021 for certain individuals (Law on the return of the solidarity surcharge 1995 of 10 December 2019 – Federal Law Gazette 2019 I pg. 2115). The solidarity surcharge shall, however, continue to apply for investment income and, thus, on withholding taxes levied. In case the individual income tax burden for a non-business Holders of Securities tax resident in Germany is lower than 25 per cent. Such Holder can apply for his/her investment income being assessed at his/her individual tariff-based income tax rate in which case solidarity surcharge would be refunded (see above).

## AUSTRIA TAX CONSIDERATIONS

This section on taxation contains a brief summary of the Issuer(s) understanding with regard to certain important principles which are of significance in connection with the purchase, holding or sale of the Securities in Austria. This summary does not purport to exhaustively describe all possible tax aspects and does not deal with specific situations which may be of relevance for certain potential investors. The following comments are rather of a general nature and included in this Base Prospectus solely for information purposes. They are not intended to be, nor should they be construed to be, legal or tax advice. This summary is based on the currently applicable tax legislation, case law and regulations of the tax authorities, as well as their respective interpretation, all of which may be amended from time to time. Such amendments may possibly also be effected with retroactive effect and may negatively impact the tax consequences described. It is recommended that potential investors in the Securities consult with their legal and tax advisors as to the tax consequences of the purchase, holding or sale of the Securities. Tax risks resulting from the Securities (in particular from a potential qualification as a foreign investment fund within the meaning of sec. 188 of the Austrian Investment Funds Act 2011 (*Investmentfondsgesetz* 2011)) shall in any case be borne by the investor. This summary applies to Securities that are certificated and legally and factually offered to an indefinite number of persons in the sense of sec. 27a(2)(2) of the Austrian Income Tax Act (*Einkommensteuergesetz*). Deviating rules may apply to Securities that are uncertificated and/or not legally and factually offered to an indefinite number of persons.

### **General remarks**

Individuals having a domicile (*Wohnsitz*) and/or their habitual abode (*gewöhnlicher Aufenthalt*), both as defined in sec. 26 of the Austrian Federal Fiscal Code (*Bundesabgabenordnung*), in Austria are liable to income tax (*Einkommensteuer*) in Austria on their worldwide income (unlimited income tax liability; *unbeschränkte Einkommensteuerpflicht*). Individuals having neither a domicile nor their habitual abode in Austria are liable to income tax only on income from certain Austrian sources (limited income tax liability; *beschränkte Einkommensteuerpflicht*).

Corporate entities (*Körperschaften*) having their place of management (*Ort der Geschäftsleitung*) and/or their legal seat (*Sitz*), both as defined in sec. 27 of the Austrian Federal Fiscal Code, in Austria are liable to corporate income tax (*Körperschaftsteuer*) in Austria on their worldwide income (unlimited corporate income tax liability; *unbeschränkte Körperschaftsteuerpflicht*). Corporate entities having neither their place of management nor their legal seat in Austria are liable to corporate income tax only on income from certain Austrian sources (limited corporate income tax liability; *beschränkte Körperschaftsteuerpflicht*).

Both in case of unlimited and limited (corporate) income tax liability Austria's right to tax may be restricted by double taxation treaties.

### **Income taxation**

Pursuant to sec. 27(1) of the Austrian Income Tax Act, the term investment income (*Einkünfte aus Kapitalvermögen*) comprises:

- (a) income from the letting of capital (*Einkünfte aus der Überlassung von Kapital*) pursuant to sec. 27(2) of the Austrian Income Tax Act, including dividends and interest; the tax basis is the amount of the earnings received (sec. 27a(3)(1) of the Austrian Income Tax Act);
- (b) income from realised increases in value (*Einkünfte aus realisierten Wertsteigerungen*) pursuant to sec. 27(3) of the Austrian Income Tax Act, including gains from the alienation, redemption and other realisation of assets that lead to income from the letting of capital, (including zero coupon bonds); the tax basis amounts to the sales proceeds or the redemption amount minus the

acquisition costs, in each case including accrued interest (sec. 27a(3)(2)(a) of the Austrian Income Tax Act);

- (c) income from derivatives (*Einkünfte aus Derivaten*) pursuant to sec. 27(4) of the Austrian Income Tax Act, including cash settlements, option premiums received and income from the sale or other realisation of forward contracts like options, futures and swaps and other derivatives such as index certificates (the mere exercise of an option does not trigger tax liability); e.g., in the case of index certificates, the tax basis amounts to the sales proceeds or the redemption amount minus the acquisition costs (sec. 27a(3)(3)(c) of the Austrian Income Tax Act); and
- (d) income from cryptocurrencies (*Einkünfte aus Kryptowährungen*) pursuant to sec. 27(4a) of the Austrian Income Tax Act.

Also the withdrawal of the Securities from a securities account (*Depotentnahme*) and circumstances leading to a restriction of Austria's taxation right regarding the Securities vis-à-vis other countries, e.g., a relocation from Austria (*Wegzug*), are in general deemed to constitute a sale (cf. sec. 27(6)(1) and (2) of the Austrian Income Tax Act). The tax basis amounts to the fair market value minus the acquisition costs (sec. 27a(3)(2)(b) of the Austrian Income Tax Act).

Individuals subject to unlimited income tax liability in Austria holding the Securities as non-business assets are subject to income tax on all resulting investment income pursuant to sec. 27(1) of the Austrian Income Tax Act. Investment income from the Securities with an Austrian nexus (*inländische Einkünfte aus Kapitalvermögen*), basically meaning income paid by an Austrian paying agent (*auszahlende Stelle*) or an Austrian custodian agent (*depotführende Stelle*) within the meaning of sec. 95(2) of the Austrian Income Tax Act, is subject to withholding tax (*Kapitalertragsteuer*) at a flat rate of 27.5 per cent.; no additional income tax is levied over and above the amount of tax withheld (final taxation pursuant to sec. 97(1) of the Austrian Income Tax Act). Investment income from the Securities without an Austrian nexus must be included in the investor's income tax return and is subject to income tax at the flat rate of 27.5 per cent. In both cases upon application the option exists to tax all income subject to income tax at a flat rate pursuant to sec. 27a(1) of the Austrian Income Tax Act at the progressive income tax rate (option to regular taxation pursuant to sec. 27a(5) of the Austrian Income Tax Act). The acquisition costs must not include ancillary acquisition costs (*Anschaffungsnebenkosten*; sec. 27a(4)(2) of the Austrian Income Tax Act). Expenses such as bank charges and custody fees must not be deducted (sec. 20(2) of the Austrian Income Tax Act); this also applies if the option to regular taxation is exercised. Sec. 27(8) of the Austrian Income Tax Act, inter alia, provides for the following restrictions on the offsetting of losses: negative income from realised increases in value and from derivatives may be neither offset against interest from bank accounts and other non-securitised claims vis-à-vis credit institutions (except for cash settlements and lending fees) nor against income from private foundations, foreign private law foundations and other comparable legal estates (*Privatstiftungen, ausländische Stiftungen oder sonstige Vermögensmassen, die mit einer Privatstiftung vergleichbar sind*); income subject to income tax at a flat rate pursuant to sec. 27a(1) of the Austrian Income Tax Act may not be offset against income subject to the progressive income tax rate (this equally applies in case of an exercise of the option to regular taxation); negative investment income not already offset against positive investment income may not be offset against other types of income. The Austrian custodian agent has to effect the offsetting of losses by taking into account all of a taxpayer's securities accounts with the custodian agent, in line with sec. 93(6) of the Austrian Income Tax Act, and to issue a written confirmation to the taxpayer to this effect.

Individuals subject to unlimited income tax liability in Austria holding the Securities as business assets are subject to income tax on all resulting investment income pursuant to sec. 27(1) of the Austrian Income Tax Act. Investment income from the Securities with an Austrian nexus is subject to withholding tax at a flat rate of 27.5 per cent. While withholding tax has the effect of final taxation for income from the

letting of capital, other types of investment income must be included in the investor's income tax return (but are nevertheless subject to income tax at the flat rate of 27.5 per cent.). Investment income from the **Securities** without an Austrian nexus must always be included in the investor's income tax return and is subject to income tax at the flat rate of 27.5 per cent. In both cases upon application the option exists to tax all income subject to income tax at a flat rate pursuant to sec. 27a(1) of the Austrian Income Tax Act at the progressive income tax rate (option to regular taxation pursuant to sec. 27a(5) of the Austrian Income Tax Act). The flat tax rate does not apply to income from realised increases in value, income from derivatives and income from cryptocurrencies if realising these types of income constitutes a key area of the respective investor's business activity (sec. 27a(6) of the Austrian Income Tax Act). Expenses such as bank charges and custody fees must not be deducted (sec. 20(2) of the Austrian Income Tax Act); this also applies if the option to regular taxation is exercised. Pursuant to sec. 6(2)(c) of the Austrian Income Tax Act, depreciations to the lower fair market value and losses from the alienation, redemption and other realisation of financial assets, derivatives and cryptocurrencies in the sense of sec. 27(3) to (4a) of the Austrian Income Tax Act, which are subject to income tax at the flat rate of 27.5 per cent., are primarily to be offset against income from realised increases in value and appreciations in value of such assets within the same business unit (*Wirtschaftsgüter desselben Betriebes*); only 55 per cent. of the remaining negative difference may be offset against other types of income.

Pursuant to sec. 7(2) of the Austrian Corporate Income Tax Act (*Körperschaftsteuergesetz*), corporate entities subject to unlimited corporate income tax liability in Austria are subject to corporate income tax on income in the sense of sec. 27(1) of the Austrian Income Tax Act from the Securities at a rate of currently 24 per cent. (from 2024: 23 per cent.). Income in the sense of sec. 27(1) of the Austrian Income Tax Act from the Securities with an Austrian nexus is generally subject to withholding tax at a flat rate of 27.5 per cent. However, pursuant to sec. 93(1a) of the Austrian Income Tax Act, the withholding agent may apply a rate of currently 24 per cent. (from 2024: 23 per cent.), if the debtor of the withholding tax is a corporate entity. Such withholding tax can be credited against the corporate income tax liability. Under the conditions set forth in sec. 94(5) of the Austrian Income Tax Act withholding tax is not levied in the first place. Losses from the alienation of the Securities can be offset against other income.

Pursuant to sec. 13(3)(1) in connection with sec. 22(2) of the Austrian Corporate Income Tax Act, private foundations (*Privatstiftungen*) pursuant to the Austrian Private Foundations Act (*Privatstiftungsgesetz*) fulfilling the prerequisites contained in sec. 13(3) and (6) of the Austrian Corporate Income Tax Act and holding the Securities as non-business assets are subject to interim taxation at a rate of currently 24 per cent. (from 2024: 23 per cent.) on income from the letting of capital (including interest income, income from realised increases in value, income from cryptocurrencies and income from derivatives (inter alia, if the latter are in the form of securities)). Pursuant to the Austrian tax authorities' view, the acquisition costs must not include ancillary acquisition costs. Expenses such as bank charges and custody fees must not be deducted (sec. 12(2) of the Austrian Corporate Income Tax Act). Interim tax is generally not triggered insofar as distributions subject to withholding tax are made to beneficiaries in the same tax period. Investment income from the Securities with an Austrian nexus is generally subject to withholding tax at a flat rate of 27.5 per cent. However, pursuant to sec. 93(1a) of the Austrian Income Tax Act, the withholding agent may apply a rate of currently 24 per cent. (from 2024: 23 per cent.), if the debtor of the withholding tax is a corporate entity. Such withholding tax can be credited against the tax triggered. Under the conditions set forth in sec. 94(12) of the Austrian Income Tax Act withholding tax is not levied.

Individuals and corporate entities subject to limited (corporate) income tax liability in Austria are taxable on income from the Securities if they have a permanent establishment (*Betriebsstätte*) in Austria and the Securities are attributable to such permanent establishment (cf. sec. 98(1)(3) of the Austrian Income Tax Act, sec. 21(1)(1) of the Austrian Corporate Income Tax Act). In addition, individuals subject to limited income tax liability in Austria are also taxable on interest in the sense of sec. 27(2)(2) of the Austrian

Income Tax Act and accrued interest (including from zero coupon bonds) in the sense of sec. 27(6)(5) of the Austrian Income Tax Act from the Securities if the (accrued) interest has an Austrian nexus and if withholding tax is levied on such (accrued) interest. This does not apply to an individual being resident in a state with which automatic exchange of information exists, if the individual provides a certificate of residence to the withholding agent. Interest with an Austrian nexus is interest whose debtor has its place of management and/or its legal seat in Austria or is an Austrian branch of a non-Austrian credit institution; accrued interest with an Austrian nexus is accrued interest from securities issued by an Austrian issuer (sec. 98(1)(5)(b) of the Austrian Income Tax Act). The Issuer(s) understand that no taxation applies in this respect.

Pursuant to sec. 188 of the Austrian Investment Funds Act 2011, the term "foreign investment fund" comprises (i) undertakings for collective investment in transferable securities whose member state of origin is not Austria; (ii) alternative investment funds pursuant to the Austrian Alternative Investment Fund Managers Act (*Alternative Investmentfonds Manager-Gesetz*) whose state of origin is not Austria; and (iii) secondarily, undertakings subject to a foreign jurisdiction, irrespective of the legal form they are organised in, whose assets are invested according to the principle of risk-diversification on the basis either of a statute, of the undertaking's articles or of customary exercise, if one of the following conditions is fulfilled: (a) the undertaking is factually, directly or indirectly, not subject to a corporate income tax in its state of residence that is comparable to Austrian corporate income tax; (b) the profits of the undertaking are in its state of residence subject to corporate income tax that is comparable to Austrian corporate income tax, at a rate of less than currently 14 per cent. (in 2023, and 13 per cent. as from 2024); or (c) the undertaking is subject to a comprehensive personal or material tax exemption in its state of residence. Certain collective investment vehicles investing in real estate are exempted. In case of a qualification as a foreign investment fund, the tax consequences would substantially differ from those described above: A special type of transparency principle would be applied, pursuant to which generally both distributed income as well as deemed income would be subject to Austrian (corporate) income tax.

### ***Inheritance and gift taxation***

Currently, Austria does not levy inheritance or gift tax.

Certain gratuitous transfers of assets to private law foundations and comparable legal estates (*privatrechtliche Stiftungen und damit vergleichbare Vermögensmassen*) are subject to foundation transfer tax (*Stiftungseingangssteuer*) pursuant to the Austrian Foundation Transfer Tax Act (*Stiftungseingangssteuergesetz*) if the transferor and/or the transferee at the time of transfer have a domicile, their habitual abode, their legal seat and/or their place of management in Austria. Certain exemptions apply in cases of transfers mortis causa of financial assets within the meaning of sec. 27(3) and (4) of the Austrian Income Tax Act (except for participations in corporations) if income from such financial assets is subject to income tax at a flat rate pursuant to sec. 27a(1) of the Austrian Income Tax Act. The tax basis is the fair market value of the assets transferred minus any debts, calculated at the time of transfer. The tax rate generally is 2.5 per cent., with higher rates applying in special cases.

In addition, there is a special notification obligation for gifts of money, receivables, shares in corporations, participations in partnerships, businesses, movable tangible assets and intangibles if the donor and/or the donee have a domicile, their habitual abode, their legal seat and/or their place of management in Austria. Not all gifts are covered by the notification obligation: In case of gifts to certain related parties, a threshold of EUR 50,000 per year applies; in all other cases, a notification is obligatory if the value of gifts made exceeds an amount of EUR 15,000 during a period of five years. Furthermore, gratuitous transfers to foundations falling under the Austrian Foundation Transfer Tax Act described above are also exempt from the notification obligation. Intentional violation of the notification obligation may trigger fines of up to 10 per cent. of the fair market value of the assets transferred.

Further, gratuitous transfers of the Securities may trigger income tax at the level of the transferor pursuant to sec. 27(6)(1) and (2) of the Austrian Income Tax Act (see above).

## **CROATIA TAX CONSIDERATIONS**

*The following text is a general discussion of certain Croatian tax consequences relating to the acquisition and ownership of Securities. It does not constitute tax advice nor does it purport to be a comprehensive description of all tax considerations which may be relevant to a decision to subscribe for, purchase, own or dispose of the Securities, and, in particular, does not consider any specific facts or circumstances that may apply to a particular purchaser. It also does not purport to deal with the tax consequences applicable to all categories of investors, some of which (such as dealers in securities or commodities) may be subject to special rules. Investors should note that the appointment of any person through which they hold Securities (custodians, collection agents or similar) in any jurisdiction may have tax implications.*

*The text is based on laws currently in force in Croatia and applicable on the date of this Base Prospectus, but subject to change, possibly on retroactive basis.*

*Prospective purchasers of Securities are advised to consult their own tax advisors as to the tax consequences of the subscription, purchase, ownership and disposition of Securities, including the effect of any state or local taxes, under the tax laws of Croatia and each country of which they are residents or in which they have a habitual abode.*

### ***Income tax***

Income tax is regulated by the Income Tax Act (Official Gazette Nos 115/16 – 151/22, "ITA").

The tax obligor is a natural person - income earner and heir to all tax obligations arising from income earned by his / her decedent until the decedent's death. The heir is also the tax obligor to income accrued from inherited sources of income.<sup>13</sup>

A resident is a natural person whose residence or habitual abode is in Croatia. A resident is also a natural person not having the place of residence or habitual abode in Croatia but is employed with a state office of Croatia and receives salary on that basis.<sup>14</sup>

A non-resident is a natural person not having the place of residence or habitual abode in Croatia, but is earning taxable income in Croatia.

The tax base:

a. for a resident is the total amount of income gained from capital (and other taxable income) gained by the resident in the country and abroad (world income principle)<sup>15</sup>,

b. for a non-resident is the total amount of income from capital (and other taxable income) gained by the non-resident in the country (domicile land principle)<sup>16</sup>.

The tax base can be reduced by applicable personal deductions<sup>17</sup>.

---

<sup>13</sup> Art. 2 of the ITA

<sup>14</sup> Art. 3 of the ITA

<sup>15</sup> Art. 6/1 of the ITA

<sup>16</sup> Art. 6/2 of the ITA

<sup>17</sup> Art. 14/3 of the ITA

Income from *capital* is (between others) a taxable source of income<sup>18</sup>. Income from capital includes (between others) income from interest on securities (*cro. vrijednosni papiri*)<sup>19</sup> as well as *capital gains* which includes income from the disposal of securities<sup>20</sup>.

However, the ITA provides for explicit statutory exemption, among others in case of default interest and interest realised through investment in *bonds* (*cro. "obveznice"*), regardless of the issuer and type of bonds<sup>21</sup>. As no specific guidance has been published by the Croatian Tax Authority, potential interpretation of the said provisions by the authorities cannot be assessed.

Also, certain income from disposal of securities is exempted – exchange of securities with the equivalent securities of the same issuer, whereby the ratios among the holders and capital of issuer are not altered, as well as exchange of securities, shares, i.e., financial instruments with other securities or financial instruments and acquisition of securities or financial instruments in case of status changes, provided that in all these cases there is no cash flow and the sequence of acquisition of financial property is ensured.<sup>22</sup>

A tax rate of 10% is applied to capital gains and income from interest<sup>23</sup>.

In case of interest, this tax is calculated, suspended and paid by payers at the same time as payment of the taxable income, as withholding tax. In case of capital gains (disposal of securities), the holder of financial assets has to calculate, suspend and pay the tax by the last day of February of the current year for all capital gains realized in the previous year, minus realized capital losses.

### ***Profit tax***

Profit tax is regulated by the Profit Tax Act (Official Gazette Nos 177/04 – 114/22, "**PTA**").

Profit tax obligors are<sup>24</sup>:

- (1) companies and other legal entities and natural persons residing in Croatia that perform economic operations independently, permanently and for the purpose of making profit, income or revenues or other valuable commercial benefits;
- (2) local business units of a foreign entrepreneur (non-resident);
- (3) a natural person determining income in a manner prescribed for self-employment according to income tax regulations or natural person commencing with self-employment if he/she declares that he/she will pay profit tax instead of income tax or if his/her total turnover in the previous tax period exceeded EUR 995,421.06;
- (4) exceptionally, state administration bodies, local self-administration bodies, Croatian National Bank, institutions (and other similar entities enumerated in the PTA), if they perform commercial activities whose non-taxation would lead to unjustified advantages on the market;
- (5) each entrepreneur and his legal successor not included in entrepreneurs listed above who is not an income tax obligor according to the income tax regulations and whose profit is not taxable elsewhere.

---

<sup>18</sup> Art. 5/2/4 of the ITA

<sup>19</sup> Art. 65/1/2 of the ITA

<sup>20</sup> Art. 67/2/1 of the ITA

<sup>21</sup> Art. 65/2/4 of the ITA

<sup>22</sup> 67/4/2

<sup>23</sup> Art. 70/1 and 70/4 of the ITA

<sup>24</sup> Art. 2 of the PTA

The tax base<sup>25</sup> shall be the profit determined pursuant to the accounting regulations as the difference between revenues and expenditures before the profit tax assessment, increased and reduced in accordance with the provisions of the PTA.

The tax base of a resident taxpayer shall be the profit earned in Croatia and abroad and the tax base of a non-resident shall only be the profit earned in Croatia which shall be assessed in accordance with the provisions of the PTA.

Profit tax rate is 10% if the income of the tax obligor in the tax period amounts to EUR 995,421.06 and 18% if the income of the tax obligor in the tax period is equal or higher than EUR 995,421.06.<sup>26</sup>

Within the meaning of the PTA, withholding tax is tax applied to profit made by non-resident legal entities<sup>27</sup>. Profit includes (between others) interest<sup>28</sup>. Similar as in case of income tax exceptions (the same remarks apply here accordingly), profit tax is not calculated on interest realised through investment in bonds<sup>29</sup>.

The tax base is the gross amount of payment paid by a resident payer to the non-resident recipient. The resident payer must calculate, suspend and pay the withholding profit tax at the same time as payment of the taxable income.

Withholding tax rate is 15%, except for dividends and shares in profit for which the withholding tax rate is 10%, while for all kinds of services paid to persons having their registered seat or place of actual administration or supervision in non-cooperative tax countries with which Croatia does not apply double tax treaties the tax rate is 20%<sup>30</sup>.

Croatian withholding tax can be reduced under an effective double tax treaty.

### ***Inheritance and gift taxation***

Inheritance and gift tax is regulated by the Local Taxes Act (Official Gazette Nos 115/16, 114/22, "**LTA**")

Any natural person or legal entity who inherits or receives gifts (including securities) with individual value higher than EUR 6,636.14 in Croatia is under obligation to pay tax in respect of such inheritance or gift at a rate of 4%<sup>31</sup>. Certain exemptions with respect to application of the afore stated tax are available in line with the LTA.

### ***EU Financial Transaction Tax***

On the European Union level negotiations are underway in order to implement a harmonized financial transaction tax which might have a negative impact on the receipts deriving from the Securities.

### ***Other Taxes***

No stamp, issue or registration taxes or duties will be payable in Croatia in connection with the issuance, delivery or execution of the Securities.

## SWITZERLAND TAX CONSIDERATIONS

The following discussion is a summary of certain material Swiss tax considerations relating to (i) Securities issued by any of the Issuer(s) where the Securityholder is tax resident in Switzerland or has a tax presence in Switzerland or (ii) Securities where the Paying Agent, custodian or Securities dealer is located in Switzerland. The discussion is based on legislation as of the date of this Offering Circular. It does not aim to be a comprehensive description of all the Swiss tax considerations that may be relevant for a decision to invest in Securities. The tax treatment for each investor depends on the particular situation. All investors are advised to consult with their professional tax advisors as to the respective Swiss tax consequences of the purchase, ownership, disposition, lapse, exercise or redemption of Securities (or options embedded therein) in light of their particular circumstances.

### ***Swiss Withholding Tax***

Payments on a Security are currently not subject to Swiss federal withholding tax, PROVIDED THAT the respective Issuer(s) is at all times resident and managed outside Switzerland for Swiss tax purposes.

### ***Income Taxation***

#### ***Securities held as Private Assets by a Swiss resident Holder***

##### ***(a) Structured Securities***

If a Security classifies as a structured Security, its income taxation depends on whether the bond and the derivative financial instrument(s) embedded therein are recorded separately from each other and whether the Security classifies as a structured Security with or without a predominant one-time interest payment:

(i) Non transparent derivative financial instruments: If the embedded bond is not recorded separately from the embedded derivative financial instrument(s), the Security classifies as a non-transparent structured Security and any return over the initial investment classifies as a taxable interest payment. Non transparent derivative financial instruments generally include a predominant one time interest payment and are taxed in accordance with the principles set forth below under "Transparent derivative financial instruments with a predominant one time interest payment".

(ii) Transparent derivative financial instruments without a predominant one time interest payment: If the embedded bond is recorded separately from the embedded derivative financial instrument(s) and the yield to maturity predominantly derives from periodic interest payments and not from a one time interest payment (see below "Transparent derivative financial instruments with a predominant one time interest payment"), then any periodic interest payment and the one-time interest payment, if any, is taxed when paid to the Securityholder. A gain, including interest accrued, realised on the sale of a Security is a tax free private capital gain. A loss realised on the sale of a Security is a non-tax-deductible private capital loss, respectively (see below "Securities held as Private Assets by a Swiss resident Securityholder"). The same applies if the Security is redeemed except that interest accrued is taxed when paid.

(iii) Transparent derivative financial instruments with a predominant one time interest payment: If the embedded bond is recorded separately from the embedded derivative financial instrument(s) and the yield to maturity predominantly derives from a one time interest payment such as an original issue discount or a repayment premium and not from periodic interest payments, then any periodic interest payments and on the redemption or sale of the Securities the difference between the value of the embedded bond at redemption or sale, as applicable, and its value at issuance or secondary market purchase, as applicable, converted, in each case, into Swiss Francs at the exchange rate prevailing at the time of sale or redemption, issuance or purchase, respectively, (modified differential taxation method) constitutes taxable income. A value decrease on the embedded bond respectively realised on the sale or

redemption of the Security may be offset against any gains (including periodic interest payments) realised within the same taxation period from all instruments with a predominant one time interest payment. Any residual return realised on the embedded derivative financial instrument(s) is a tax-free private capital gain, and any residual loss is a non-tax-deductible private capital loss, respectively (see below "Securities held as Private Assets by a Swiss resident Securityholder").

*(b) Bonds*

Bonds without a predominant one time interest payment: If a Security classifies as a pure bond without a predominant one time interest payment (i.e., the yield to maturity predominantly derives from periodic interest payments and not from a one time interest payment, Swiss resident private investors will be taxed on the periodic and any one time interest payments, if any, converted into Swiss Francs at the exchange rate prevailing at the time of payment. A gain, including, realised on the sale of a Security is a tax free private capital gain. A loss, realised on the sale of a Security is a non-tax deductible private capital loss (see below "Securities held as Private Assets by a Swiss resident Securityholder").

Bonds with a predominant one time interest payment: If a Security classifies as a pure bond with a predominant one time interest payment (i.e., the yield to maturity predominantly derives from a one time interest payment such as an original issue discount or a repayment premium and not from periodic interest payments), Swiss resident private investors will be taxed on any periodic interest payments and on any gains, including capital and foreign exchange gains, realised on the Securities (differential taxation method).

*(c) Pure Derivative Financial Securities*

Periodic and one-time dividend equalisation payments realised on a Security which classifies as a pure derivative financial instrument (such as pure call and put options, including low exercise price options with a maturity not exceeding one year, pure futures, static Securities replicating an index or a basket of at least five shares and with a fixed maturity or an annual redemption right) and which is held as part of their private assets constitute taxable investment income. Any other return will be classified as a tax-exempt capital gain or a non-tax deductible capital loss (see below "Securities held as Private Assets by a Swiss resident Securityholder").

*(d) Low Exercise Price Options*

According to the current practice of the Swiss Federal Tax Administration low exercise price options are given if the underlying of an option has been pre-financed by at least 50 per cent. at the time of issuance.

For low exercise price options with a maturity exceeding one year the interest component of the low exercise price option (i.e. issue discount) constitutes taxable investment income. Any other return will be classified as a tax-exempt capital gain or a non-tax deductible capital loss (see below "Securities held as Private Assets by a Swiss resident Securityholder").

*(e) Fund like Securities*

A Security classified as a fund like instrument will be considered a pass through instrument for Swiss tax purposes if dividend and interest income (less attributable costs) from, and capital gains and losses (less costs attributable) realised on, the underlying investments, are reported and distributed separately. Under such conditions, an individual holding a fund like Security as part of private assets only receives taxable income (which he or she must report annually) over such portion of the distributions (in case the fund is distributing the income realised on the underlying investments) or earnings credits (in case the fund is reinvesting the income realised on the underlying investment) as derive from dividends and interest (less attributable costs) on the underlying instruments. Any distributions or credits deriving from capital gains

realised on the underlying investments constitute a tax free private capital gain, and any respective loss on the underlying investments is a non-tax deductible private capital loss. Any gain realised within a taxation period on the sale of a fund like instrument (including accrued dividends and interest) is exempt from income taxation as a private capital gain, and, conversely, any loss realised a non tax deductible capital loss (see below "Securities held as Private Assets by a Swiss resident Securityholder").

#### *Securities held as Assets of a Swiss Business*

Corporate entities and individuals who hold Securities as part of a trade or business in Switzerland, in the case of residents abroad carried on through a permanent establishment or a fixed place of business in Switzerland, are required to recognise any payments on, and any capital gains or losses realised on the sale or redemption of, such Securities (irrespective of their classification) in their income statement for the respective taxation period and will be taxed on any net taxable earnings for such period.

The same taxation treatment also applies to Swiss resident individuals who, for income tax purposes, are classified as "professional Securities dealers" for reasons of, inter alia, frequent dealing and leveraged investments in Securities.

### **Capital Gains Taxation**

#### *Securities held as Private Assets by a Swiss resident Securityholder*

A gain, realised by an individual resident in Switzerland for tax purposes upon the sale or other disposal of a Security held as part of his or her private assets is a tax-free private capital gain. A loss, realised by an individual resident in Switzerland for tax purposes upon the sale or other disposal of a Security held as part of his or her private assets is a non-tax deductible capital loss. In the case of a gain or a loss, unless such individual is classified, for income tax purposes, as a "professional Securities dealer" for reasons of, inter alia, frequent dealing and leveraged investments in Securities. If an individual is classified as a "professional Securities dealer" he or she will be taxed in accordance with the principles set forth above under "Securities held as Assets of a Swiss Business". Concerning the bifurcation of a tax exempt capital gains component, non-tax deductible capital loss component, respectively, from taxable income components of a Security see the bifurcation principles set forth above with regard to the different instruments under "Securities held as Private Assets by a Swiss resident Securityholder".

#### *Securities held as Assets of a Swiss Business*

Capital gains realised on Securities held as Assets of a Swiss Business are taxed in accordance with the taxation principles set forth above under "Securities held as Assets of a Swiss Business").

### **Stamp Taxes**

#### *Swiss Federal Issue Stamp Tax*

The Securities are not subject to Swiss federal stamp tax on the issuance of Securities.

#### *Swiss Federal Securities Turnover Tax*

The issuance of Securities to the initial holders at the original offering price (primary market) is not subject to the Swiss federal securities turnover tax, except that the issuance of Securities which classify as fund like instruments may be subject to Swiss federal securities turnover tax of up to 0.3 per cent. on the offering price, however, only if a Swiss securities dealer (as defined in the Swiss federal stamp tax act) is a party or an intermediary to the transaction and no exemption applies.

Dealings in Securities (secondary market) which classify as pure derivative financial instruments (such as pure call and put options, including low exercise price options with a maturity not exceeding twelve

months, pure futures with a maximal pre-financing of 25 per cent., static Securities replicating an index or a basket of at least five shares and with a fixed maturity on an annual redemption right) are not subject to the Swiss federal securities turnover tax.

Dealings in Securities which have been issued by an issuer outside of Switzerland and which classify as structured Securities, share-like instruments (including low exercise price options on shares with a maturity exceeding twelve months) or fund-like instruments are subject to Swiss federal securities turnover tax of up to 0.3 per cent. on the consideration paid, however, only if a Swiss Securities dealer (as defined in the Swiss federal stamp tax act) is a party or intermediary to the transaction and no exemption applies.

Dealing in bonds and structured Securities with a maturity not exceeding one year are exempt from Swiss federal securities turnover tax.

The delivery of an underlying taxable Security at exercise or redemption to the holder of the Security is subject to Swiss federal securities turnover tax of up to 0.3 per cent. if a Swiss Securities dealer (as defined in the Swiss federal stamp tax act) is a party or intermediary to the transaction and no exemption applies.

### ***Gift, Inheritance and Estate Taxes***

Subject to an applicable tax treaty in an international scenario, transfers of Securities may be subject to cantonal and/or communal inheritance tax, estate tax or gift tax if the deceased person has had his or her last domicile in Switzerland, the donor is resident in Switzerland, respectively, or in the case of a foreign deceased or resident person the transfer involves an unincorporated business in Switzerland and Securities are held as part of such business. No such taxes exist at the federal level. Rates depend upon the existing relationship (i.e. the relationship between the deceased and the heirs, or between the donor and the donee) and the size of the inheritance or gift. Interspousal gifts and gifts to descendants and inheritances collected by the surviving spouse and descendants are frequently exempt or taxed at very low rates (up to 6 per cent.). Gifts and inheritances received from unrelated persons attract rates ranging from 20 per cent. to 40 per cent. The taxable base is usually the market value of the property transferred.

### ***Net Worth and Capital Taxes***

A holder of Securities who is an individual resident in Switzerland for tax purposes or is a non-Swiss resident holding Securities as part of a Swiss business operation or a Swiss permanent establishment is required to report Securities as part of private wealth or as part of Swiss business assets, as the case may be, and is subject to annual cantonal and/or communal private wealth tax on any net taxable wealth (including the Securities), in the case of non-Swiss resident individual holding Securities as part of a Swiss business operation or a Swiss permanent establishment to the extent the aggregate taxable wealth is allocable to Switzerland. Incorporated holders of Securities are subject to cantonal and communal capital tax on net taxable equity, in the case of a non-Swiss resident person holding Securities as part of a Swiss permanent establishment, to the extent the aggregate taxable equity is allocable to Switzerland. No net worth and capital taxes exist at the federal level.

### ***Non-Swiss resident Securityholders***

A holder of a Security who is not resident in Switzerland for tax purposes and who during the taxation year has not engaged in trade or business carried on through a business operation or permanent establishment in Switzerland, will neither be subject to income tax and capital gains tax nor net wealth or capital tax in Switzerland.

### ***Swiss Facilitation of the Implementation of the U.S. Foreign Account Tax Compliance Act***

Switzerland has concluded an intergovernmental agreement with the U.S. to facilitate the implementation of FATCA. The agreement ensures that the accounts held by U.S. persons with Swiss financial institutions are disclosed to the U.S. tax authorities either with the consent of the account holder or by means of group requests within the scope of administrative assistance. Information will not be transferred automatically in the absence of consent, and instead will be exchanged only within the scope of administrative assistance on the basis of the double taxation agreement between the U.S. and Switzerland. On 8 October 2014, the Swiss Federal Council approved a mandate for negotiations with the U.S. on changing the current direct notification based regime to a regime where the relevant information is sent to the Swiss Federal Tax Administration, which in turn provides the information to the U.S. tax authorities.

### ***Automatic Exchange of Information in Tax Matters***

On 19 November 2014, Switzerland signed the Multilateral Competent Authority Agreement (the MCAA). The MCAA is based on article 6 of the OECD/Council of Europe administrative assistance convention and is intended to ensure the uniform implementation of Automatic Exchange of Information (the AEOI). The Federal Act on the International Automatic Exchange of Information in Tax Matters (the AEOI Act) entered into force on 1 January 2017. The AEOI Act is the legal basis for the implementation of the AEOI standard in Switzerland.

The AEOI is being introduced in Switzerland through bilateral agreements or multilateral agreements. The agreements have, and will be, concluded on the basis of guaranteed reciprocity, compliance with the principle of speciality (i.e. the information exchanged may only be used to assess and levy taxes (and for criminal tax proceedings)) and adequate data protection.

Based on such multilateral or bilateral agreements and the implementing laws of Switzerland, Switzerland exchanges data in respect of financial assets, including, as the case may be, Securities, held in, and income derived thereon and credited to, accounts or deposits with a paying agent in Switzerland for the benefit of individuals resident in a EU member state or in a treaty state.

Die Emittentin und/oder die Berechnungsstelle geben keine ausdrücklichen oder stillschweigenden Zusicherungen oder Gewährleistungen ab in Bezug auf (i) die Zweckmäßigkeit einer Anlage in die Wertpapiere oder eines Exposures in Bezug auf die Wertpapiere, (ii) den Wert der Wertpapiere zu einem bestimmten Zeitpunkt an einem bestimmten Tag oder (iii) Beträge, die in Bezug auf die Wertpapiere gegebenenfalls fällig oder lieferbar werden.

Subject to all regulatory obligations, neither the Issuer nor the Calculation Agent in respect of the Securities shall owe any duty or responsibility to any Securityholder to avoid any conflict or to act in the interests of any Securityholder.

(c) *Exercise of Discretion*

In exercising its reasonable discretion (*billiges Ermessen*, §§ 315, 317 of the German Civil Code (*BGB*)) in respect of the Securities as provided herein, each of the Issuer and the Calculation Agent may take into account such factors as it determines reasonable in each case, which may include, in particular, any circumstances or events which have or may have a material impact on the Hedging Arrangements entered into by a Hedging Party (as defined in the Valuation and Settlement Schedule) in respect of the Securities. The exercise of the Issuer's and/or the Calculation Agent's reasonable discretion (*billiges Ermessen*, §§ 315, 317 of the German Civil Code (*BGB*)) in respect of the Securities as provided herein are necessary because certain circumstances or events (for example a material modification or disruption to an Underlying to which the Securities are linked) may occur subsequent to the issuance of the Securities which may materially affect the costs to a Hedging Party of maintaining the relevant Securities or relevant Hedging Arrangements. Vorbehaltlich sämtlicher aufsichtsrechtlicher Verpflichtungen sind weder die Emittentin noch die Berechnungsstelle in Bezug auf die Wertpapiere gegenüber den Wertpapierinhabern verpflichtet oder dafür verantwortlich, Konflikte zu vermeiden oder im Interesse der Wertpapierinhaber zu handeln.

(c) *Ermessensspielraum*

Die Ausübung des billigen Ermessens (§§ 315, 317 BGB) der Emittentin und/oder der Berechnungsstelle in Bezug auf die Wertpapiere, wie in diesen Allgemeinen Bedingungen aufgeführt, ist erforderlich, da bestimmte Umstände oder Ereignisse (beispielsweise eine wesentliche Änderung oder Störung eines Basiswerts, auf den sich die Wertpapiere beziehen) nach der Ausgabe der Wertpapiere eintreten können, die sich wesentlich auf die Kosten einer Hedgingpartei zur Aufrechterhaltung der betreffenden Wertpapiere oder Hedginggeschäfte auswirken können. Zu diesem Zweck bezeichnet "**Stimmrecht**" das Recht zur Stimmabgabe in einer ordentlichen Wahl der Directors (oder, im Fall einer Person, die keine Kapitalgesellschaft ist, das Recht, Personen mit ähnlichen Positionen ordnungsgemäß zu bestellen und der Bestellung zuzustimmen).

### 13 Hedging Arrangements

As used in this Condition 13, "**Hedging Arrangements**" means the arrangements, if any, the Issuer makes to have available to it the relevant cash amounts or assets to be paid or delivered under the Securities as these fall due. This may involve a Hedging Party investing directly in an Underlying. Alternatively, a Hedging Party may make an indirect investment by entering into or acquiring a derivative contract referencing an Underlying. Such Hedging Arrangements may be carried out on a portfolio basis (i.e., where the Hedging Party maintains arrangements for hedging the Securities together with other obligations of the Issuer and/or its Affiliates). A Hedging Party will seek to select Hedging Arrangements which are efficient for it in the context of the tax, regulatory and business environment in which it operates, but will do so without having regard to the interests of Securityholders. A Hedging Party may also adjust Hedging Arrangements from time to time but will not always be able to avoid adverse costs, taxes or regulatory changes which affect its Hedging Arrangements. For the avoidance of doubt, no Hedging Party is under any obligation to enter into any Hedging Arrangements and, if any Hedging Arrangements are entered into, such arrangements will not confer any rights or entitlements on any Securityholder and no Securityholder will have recourse to any such Hedging Arrangements.

### 14 Further Issues

The Issuer may from time to time without the consent of the Securityholders create and issue further securities having the same terms and conditions as the Securities (or the same in all respects save for the amount and date of the first payment of interest thereon) provided that, for the avoidance of doubt and unless otherwise specified, references in the applicable Final Terms to "**Issue Date**" shall be to the first issue date of the Securities and so that the same shall be consolidated and form

### 13 Hedginggeschäfte

Im Sinne dieser Bedingung 13 bezeichnen "**Hedginggeschäfte**" Geschäfte, die die Emittentin gegebenenfalls abschließt, damit ihr die entsprechenden im Zusammenhang mit den Wertpapieren zu zahlenden oder zu liefernden Geldbeträge oder Vermögenswerte bei Fälligkeit zur Verfügung stehen. Dies kann auch eine Direktanlage einer Hedgingpartei in einen Basiswert umfassen. Alternativ kann eine Hedgingpartei indirekt investieren, indem sie einen Derivatekontrakt auf einen Basiswert abschließt oder erwirbt. Solche Hedginggeschäfte können auf Portfolio-Basis erfolgen (d. h., die Hedgingpartei hat Geschäfte zur Absicherung der Wertpapiere und anderer Pflichten der Emittentin und/oder ihrer Verbundenen Unternehmen abgeschlossen). Eine Hedgingpartei wird versuchen, solche Hedginggeschäfte auszuwählen, die für sie im Zusammenhang mit dem steuerlichen, aufsichtsrechtlichen und geschäftlichen Umfeld, in dem sie tätig ist, effizient sind, ohne dabei jedoch die Interessen der Wertpapierinhaber zu berücksichtigen. Eine Hedgingpartei kann Hedginggeschäfte bei Veranlassung auch anpassen, jedoch nicht in jedem Fall nachteilige Kosten, Steuern oder regulatorische Änderungen vermeiden, die sich auf ihre Hedginggeschäfte auswirken. Zur Klarstellung: Keine Hedgingpartei ist zum Abschluss von Hedginggeschäften verpflichtet und die Wertpapierinhaber erlangen im Falle des Abschlusses von Hedginggeschäften keine Rechte oder Ansprüche durch solche Geschäfte und können nicht auf diese Hedginggeschäfte zurückgreifen.

### 14 Begebung weiterer Wertpapiere

Die Emittentin kann ohne Zustimmung der Wertpapierinhaber weitere Wertpapiere mit denselben (oder mit Ausnahme der Höhe und des Datums der ersten Zahlung von darauf anfallenden Zinsen in jeder Hinsicht identischen) Bedingungen wie die ursprünglichen Wertpapiere schaffen und ausgeben; dies gilt zur Klarstellung und sofern nichts anderes angegeben ist mit der Maßgabe, dass Bezugnahmen in den anwendbaren Endgültigen Bedingungen auf "**Ausgabetag**" als Bezugnahmen

a single Series with such Securities, and references in the applicable Final Terms to "**Securities**" shall be construed accordingly.

## **15 Redenomination**

If Redenomination is specified in the relevant Final Terms as being applicable, the Issuer may, without the consent of the Securityholders, on giving at least 30 days' prior notice to the Securityholders and the Paying Agents, designate a Redenomination Date, being a date (which in the case of interest bearing Securities shall be a date for payment of interest under the Securities) falling on or after the date on which the country of the relevant Specified Currency specified adopts the Euro as its lawful currency in accordance with the Treaty.

With effect from the Redenomination Date, notwithstanding the other provisions of the applicable Final Terms:

- (a) each Specified Denomination will be denominated in such amount of Euro as is equivalent to its denomination so specified in the relevant Specified Currency at the Established Rate, rounded down to the nearest Euro 0.01;
- (b) after the Redenomination Date, all payments in respect of the Securities, other than payments of interest in respect of periods commencing before the Redenomination Date, will be made solely in Euro as though references in the Securities to the relevant Specified Currency were to Euro. Payments will be made in Euro by credit or transfer to a Euro account (or any other account to which Euro may be credited or transferred) specified by the payee, or at the option of the payee, by a Euro cheque; and
- (c) such other changes shall be made to the Issuer's performance of the applicable Final Terms in its reasonable discretion (*billiges Ermessen*, § 315

Mit Wirkung ab dem Währungsumstellungstag gilt ungeachtet der übrigen Bestimmungen der anwendbaren Endgültigen Bedingungen Folgendes:

- (a) jeder Festgelegte Nennbetrag wird auf den Euro-Betrag umgestellt, der dem Gegenwert des Nennbetrags in der Festgelegten Währung zu dem Festgestellten Kurs, abgerundet auf die nächste Einheit von EUR 0,01, entspricht,
- (b) nach dem Währungsumstellungstag werden sämtliche Zahlungen auf die Wertpapiere, mit Ausnahme von Zinszahlungen für vor dem Währungsumstellungstag beginnende Zeiträume, ausschließlich so in Euro geleistet, als seien in den Wertpapieren enthaltene Bezugnahmen auf die entsprechende Festgelegte Währung Bezugnahmen auf Euro. Zahlungen erfolgen in Euro per Gutschrift oder Überweisung auf ein vom Zahlungsempfänger bezeichnetes Euro-Konto (bzw. ein anderes Konto, auf welches Gutschriften oder Überweisungen von Euro-Beträgen möglich sind) oder auf Wunsch des Zahlungsempfängers per auf Euro lautenden Scheck, und
- (c) es können nach billigem Ermessen (§ 315 BGB) der Emittentin diejenigen in der Mitteilung angegebenen anderen Änderungen hinsichtlich der

of the German Civil Code (*BGB*)) and as may be specified in the notice, to conform them to conventions then applicable to Securities denominated in Euro including but not limited to where the Securities are in global form. Any such other changes will not take effect until after they have been notified to the Securityholders in accordance with Condition 10 (*Notices*).

**"Treaty"** means the Treaty on the Functioning of the European Union, as amended.

None of the Issuer, the CGMHI Guarantor, the CGMFL Guarantor and the Paying Agent will be liable to any Securityholder or other person for any commissions, costs, losses or expenses in relation to or resulting from the credit or transfer of Euro or any currency conversion or rounding effected in connection therewith.

Determinations by the Issuer pursuant to this Condition 15 will, in the absence of manifest error,

Solche anderen Änderungen werden erst nach ihrer Mitteilung an die Wertpapierinhaber gemäß Bedingung 10 (*Mitteilungen*) wirksam.

Zum Zwecke dieser Allgemeinen Bedingungen bezeichnet:

The Calculation Agent will make all calculations and determinations required to be made under this definition on the basis of Eligible Information and will notify the Issuer and the Fiscal Agent of any such calculation or determination as soon as practicable. In calculating the percentages used to determine whether an entity qualifies as a Successor under this Credit Linked Condition 15(b), if there is a Steps Plan, the Calculation Agent shall consider all related

Die Berechnungsstelle wird alle Berechnungen und Feststellungen, die gemäß dieser Definition vorzunehmen sind, auf Grundlage Zulässiger Informationen vornehmen und die Emittentin und die Emissionsstelle so bald wie möglich von diesen Berechnungen oder Feststellungen in Kenntnis setzen. (d) *Succession in respect of multiple Reference Entities simultaneously*

If two or more Reference Entities are subject to one or more successions simultaneously or the order of such succession cannot be determined from Eligible Information, then each such Reference Entity shall be deemed to have been subject to a separate succession, with all such successions occurring in the order determined by the Calculation Agent.

(c) *Ersatz-Referenzverbindlichkeiten nach einem Nachfolgeereignis*

Wenn ein oder mehrere Nachfolger eine Referenzverbindlichkeit nicht übernommen haben, wird gemäß Bedingung 16(b) (*Ersatz-Referenzverbindlichkeit*) für Bonitätsabhängige Schuldverschreibungen eine Ersatz-Referenzverbindlichkeit bestimmt, sofern die Berechnungsstelle dies für angemessen hält.

(d) *Nachfolge in Bezug auf mehrere Referenzschuldner gleichzeitig*
